The future financial solvency of Flint will also be challenged by a continuing structural deficit. As part of the planning for future financial solvency, five year projections and a strategic plan were developed. This exercise indicated a significant financial challenge forthcoming in FY15, due to the current status of the retiree health care lawsuit and the ending of a major grant supporting firefighting resources. Future year projections also show a continuing gap between revenues and projections.

Finally, the most important challenge to be addressed in the City of Flint will be instituting structural changes in the organization of the City to foster financial solvency as a core value and to assure that future governance and management of the City is conducted in a financially responsible manner. To this end, the current Emergency Manager has created a Blue Ribbon Committee on Governance, charged with developing recommended changes to current ordinances, procedures, and the Charter. The recommendations of the Task Force are anticipated within six months.

Overview

The City of Flint has spent considerable time planning for the community's future through the comprehensive master plan and creating an organizational framework focused on the City's new vision, mission, and goals. The 2-Year budget has been developed in a balanced manner to best meet the needs of a variety of service areas and challenges.

However, challenges to changes in retiree healthcare and the loss of grant funds have required that a new service baseline be established; this also poses significant and immediate challenges to the City's financial viability. Current court rulings in regards to the retiree health care lawsuit have increased retiree health care expenses nearly $5 million in FY15, and the loss of the SAFER grant ($ 3.4 million) eliminates funding for 39 of the City's 65 firefighters.

The harsh winter increased the need to remove hundreds (if not thousands) of damaged and fallen trees throughout the city, and to repair damaged roads and sidewalks. The winter also placed additional stress on the antiquated city facilities as they faced water leaks and damage to walkways and sidewalks. Implementing the master plan, and continuing to eliminate blight will also require dedicated resources going forward.

The recently completed study of the water and sewer system finances also demonstrated a shortfall in revenues needed to operate this critical service and provide for necessary maintenance. As much as the high rates for providing water and sewer services pose significant financial challenges and community implications, the alternative of not addressing basic maintenance and adjustments based on guidance in the master plan is equally challenging.

These factors have a significant effect on the adopted staffing levels. Reductions in city staffing over the past two years have come almost exclusively from City services other than police, fire, and 911. As a result, those remaining city services are thinly staffed, and despite valiant efforts of dedicated employees, service levels have been reduced. In some cases, the reductions have been severe and counter-productive. For example, reductions in customer service at Treasury and staffing at Utilities has reduced capacity to effectively pursue collection of delinquent bills. Reductions in Information Technology have slowed the implementation of technology which can improve effective processing. Reductions in Human Resources have slowed the process of hiring employees. Reductions in Building Safety have slowed the process of conducting inspections and issuing permits, and have eliminated much in the way of code compliance efforts.

Therefore, balancing the budget in a financially sustainable way requires addressing the impact of these issues. It also requires that they are addressed within the context of the Mayor's and Council's stated budget priorities. The Council's stated priorities are:

- Maintaining police and fire staffing levels at the maximum level feasible
- Reducing the General Fund deficit by at least $1 million
- Continuing efforts to reduce blight, including demolition
- Hiring an experienced City Administrator
- Assure that capacity exists to implement the Master Plan
- Add capacity in the areas of Economic Development

- Fund years 1 & 2 of capital improvements identified in the Master Plan
- Improve street maintenance
- Establish parks partnerships
- Improve customer service through training and technology
- Increase removal of dead and diseased trees
- Evaluate ways to reduce water and sewer rates for constituents in the budget process

Balancing the budget responsibly in the context of these immediate and significant financial challenges, while addressing stated priorities, is a significantly difficult task. The unplanned addition of $5 million in expenses for increased retiree health care is a "Game-Changer" and seriously undermines the ability of the City government to move forward in becoming a positive force helping to create a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve quality of life.

As the development of the FY15 budget began, there was a significant gap between projected General Fund revenues and General Fund expenses alone. While some revenue sources indicated a slight increase over the current year, projected expenses were significantly above the current year. The expense increases are due primarily to a nearly $5 million increase in costs for retiree health care and an increase in the per person cost of pension contribution. In addition, there was recognition of the need to assure capacity to implement the Master Plan to continue addressing blight, to address increased costs of health care for current employees, and to address critically needed facility maintenance.

The budget presented here is balanced in a financially responsible manner, in that revenues and expenses meet. However, the consequence is that, where possible, revenues have been increased, and where necessary, expenses have been decreased. Whether the result is an acceptable result, in the context of the needs and the future of the City, is uncertain.

It is clear that proposed changes in service levels reflected in this budget are significant, and that at the same time the financial plan is being finalized within the confines of available revenues, considerable efforts will continue to mitigate the impacts. Continued efforts to achieve a satisfactory resolution of the retiree healthcare lawsuit, as well as to continue searching for additional sustainable funding, or to engage in mutually beneficial partnerships will continue. The changes necessary to achieve necessary balancing of revenues and expenses will be done in a managed way, not in a crisis response.

The financial projection for the years following FY15 and FY16 show the continuing challenge of a structural deficit. Without a means to identify a new significant revenue source or to sustain and even make further reductions in the City's cost base, such as retiree health care, Flint will be extremely challenged to provide even the most basic of City services in future years.

Highlights of the Adopted Budget

Costs to taxpayers are increased....

- Property tax levies remain unchanged
- Street lighting assessment increased to $71 in FY15 and $74 in FY16
- Solid Waste fee increased to $163 in FY15 and $169 in FY16
- Water and Sewer rates increased by a total of 6.5% in FY15 and 6% in FY16

Costs to City employees are increased....

- 20% premium share for health insurance implemented
- Premium contribution for non-Medicare eligible employees retiring after July 1, 2014 established
- 50% premium share for dental and vision insurance implemented
- Vacation and sick leave replaced with PTO, new accumulation caps established
- All new employees enrolled in hybrid pension plan
- All new employees enrolled in RMSA in lieu of promise of retiree health care

Legacy costs are increased significantly...

- General Fund costs for retiree health care are increased 25%, from $8 million to $10 million in FY15, increasing on an annual basis thereafter
- General Fund costs for retiree health care and pension in total are projected to increase from $16.4 million (31% of total revenues) in FY14 to $21.5 million (34% of total revenues) by FY19
- For all funds, total costs for retiree healthcare and pension are projected to increase from $30.4 million (or 17% of total revenues)in FY14 to $43.5 million (23% of total revenues) by FY19

City staffing is budgeted at 522 in FY15 and 523 in FY16.....

- Staffing is maintained in District Court, 911, Finance, Assessing, Transportation, IT, and Fleet
- Police Department – Total department staffing will be 115, with 7 vacant positions and 29 additional positions eliminated through attrition by end of FY15. Additionally, a recently offered COPS Hiring grant for six School Resource Officers will not be accepted. The next several months will be focused on mitigating the impact of this through reorganization with the assistance of consultants specialized in police and fire service; seeking additional funds; and obtaining assistance from law enforcement partners in order to achieve the best possible level of police response.
- Fire Department – Total department will be 75, with 19 positions eliminated as the SAFER grant expires. There are several vacant positions to be eliminated as part of this, with a goal of needed reduction no later than December, 2014. The next several months will be focused on mitigating the impact of this through reorganization and restructuring obtained with the assistance of consultants specialized in fire and police service.

- Planning and Development Department - Staffing is at 25, with adding 1 position. The department is being reorganized to assure capacity to implement the newly adopted Master Plan and continue efforts of blight management. Continued assistance in the form of grants and partnerships will be utilized, and general fund support for those activities is increased.
- Public Works Department - 6 positions are added to the Utilities division as the Water Treatment Plant begins operation as the primary source for Flint water; 1 position is added to Facilities to address critically needed maintenance issues.
- Finance and Administration Department - 3 positions are added to the Treasurer's Office to increase delinquent collections, with the added cost to be offset by additional revenues.
- Governance – As efforts to resolve the financial emergency progress, the position of City Administrator will be filled. Additionally, the salaries of Mayor and Council are partially restored as their role in governance increases.

Council budget priorities are addressed as follows:

- Maintaining police and fire staffing levels at the maximum level feasible – Due to revenue shortfall, increased retiree health care, and lack of other options, staffing is reduced. The Police and Fire millage funds will be used to fund 20 fire fighters and 26 police officers through FY15 and FY16. However, the accumulated millage funds will be fully used by the end of FY16.
- Reducing the General Fund deficit by at least $1 million – General Fund expenses are budgeted at $1 million less than revenues, and $800,000 in Capital Improvement Funds will be appropriated to the Utilities, thus reducing the General Funds debt to the Utility Fund by an additional $800,000. The plan is to continue this commitment for the next several years until the deficit is eliminated, and then the commitment will become one of building a financial reserve equal to 15% of General Fund revenues.
- Continuing efforts to reduce blight, including demolition – CDBG funds continue to be used for demolition and General Fund is assuming partial cost of the Blight Coordinator position
- Hiring an experienced City Administrator – Funds are included in budget.
- Assure that capacity exists to implement the Master Plan – General Fund is assuming partial cost of the Planning and Development Director, and Associate Planner, and a position of GIS technician is created, whose funding is shared among various city funds. Lead partners will be identified in each work area. Also, the Mayor has committed to overseeing the process of assuring that Master Plan implementation is an ongoing important part of city operations.
- Add capacity in the areas of Economic Development-The P&D Director is committed to defining a program for small business development, to be funded in FY16 through CDBG funds. Additionally, 20% of staff time of two DCED staffers and a portion of the Director's time will be devoted to economic development. Also, the Mayor has committed to leading the City's economic development efforts with partners and the assistance of this City staff.
- Fund years 1 & 2 of capital improvements identified in the Master Plan – the CIP portion of the Master Plan will be finalized in FY15, and the results will be considered for inclusion in the FY16 budget.

- Improve street maintenance – Due to minimal increases in state funding for streets, maintenance efforts will continue at the current levels. State financial support has been sought and obtained for some major street projects, in particular those related to economic development projects.

- Establish parks partnerships – The Planning and Development Department now has oversight of Parks, and as one of its strategic objectives, has committed to increase the number of parks partnerships in FY15 and FY16. Funding even the most basic of parks maintenance activities is increasingly challenging within the constraints of the parks millage funds. The goal is to eliminate General Fund support of these activities by the end of FY16.

- Improve customer service through training and technology– Human Resources, as it did in FY14, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. IT likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees. For example, the Treasury's customer service division is committed to specific customer service training for its front line employees.

- Increase removal of dead and diseased trees – Oversight of removal of trees within street right of ways is now the responsibility of the Transportation Division of Public Works, removal of trees within Parks is now the responsibility of Planning and Development; and removal of trees on other city properties is the responsibility of the Facilities Division of Public Works. Unfortunately, there is only a limited amount of funds available for these purposes, and the general effort will be focused on emergency responses. However, the Transportation Division is committed to attempting to secure assistance from other entities to increase capacity to address this problem.

- Evaluate ways to reduce water and sewer rates for constituents in the budget process-The results of the recent rate study confirm that it unlikely that water and sewer rates can be decreased at any time in the foreseeable future, and in fact, rates need to be increased. However, the actions taken to date to join KWA and to temporarily use the Flint River show that future rate increases will be less than had the City stayed with its prior provider.

Absent new sources of funding or reduced expenses in areas such as retiree healthcare, the commitments to progress and the staffing and service levels here are anticipated to continue for both FY15 and FY16. It is anticipated that the slight additional revenues in the General Fund for FY 16 will not be sufficient to cover increased costs, and it will be necessary to utilize additional funding from the police and fire millage to cover the costs of some police or fire positions in the General Fund in FY15. Depending on the rate of attrition in the Police Department, there should be sufficient remaining funds in the Police and Fire millage to avoid additional reductions in police or fire positions in FY16.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

June 3, 2014

Mr. Scott Kincaid, President
Members of the Flint City Council
1101 S. Saginaw St.
Flint, MI 48502

Dear Mr. Kincaid and Members of the Flint City Council:

Transmitted herewith are the final numbers for the biennial budget beginning FY14-15 and ending FY 15-16.

This budget is reflective of some of the recommended revisions offered following the Council's departmental budget hearings. All recommendations put forth by City Council were reviewed and thoroughly vetted at Treasury. The attached budget document was revised upwards by $90,000 and includes the details of the incorporated revisions.

The budget was revised to include your recommendations, along with those of the Mayor, which I felt could be implemented without adversely impacting the organizational structure, management, and the anticipated transition of the City of Flint to a Receivership Transition Advisory Board during the course of this spending plan.

Following the public hearing and consideration of the comments received, it is my intent to execute the order adopting the budget at the next Council meeting scheduled for June 23, 2014. At that time, Council will be able to officially receive the two-year budget consistent with PA 436 and the 7 Point Transition Management Plan.

You should also be aware that effective July 1, 2014, the day-to-day operations of the departments of Planning and Development, and Public Works will be shifted to Mayor Dayne Walling. The Mayor is currently putting together a plan for the allocation of resources within those departments. Similarly, Police Chief Tolbert and Fire Chief Cox are also putting together their work plans to utilize the final resource allocations for public safety.

The assistance and cooperation from you and the Council given to me, the Mayor, and the Administration in this process is greatly appreciated. I think we can agree that this is a responsible and realistic snapshot of the City's financial stability over the next two years, given its myriad financial challenges.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

CC: Dayne Walling, Mayor
Inez Brown, City Clerk
Administration

Proposed Changes to the City of Flint Proposed FY15 & FY16 Budget

On April 30, 2014, Emergency Manager Darnell Earley transmitted a proposed bi-annual budget to the Mayor and City Council, with a request that the Mayor and Council review and comment on the proposed budget. Accordingly, the City Council, acting as Committee of the Whole chaired by Finance Chair Josh Freeman, met five times to review the budget. At the conclusion, a set of recommendations was adopted and given to the Emergency Manager.

This document summarizes the key recommendations of the Council and Mayor and outlines changes made to the proposed budget as a result.

Summary of Council and Mayor Recommended Changes to FY15 & FY16 Proposed Budget

1. The recommendation of the Council identifies $1,824,510 in additional funds to be used by the Police Department:

- Specifically, $1 million of the $2.5 million in state appropriated revenues for the Lock-Up is proposed to be moved to the Police Budget.
- In addition, $1 million is identified by increasing the allocation in the CIP Fund for the purpose of reducing the deficit, thus freeing up the $1 million in the General Fund which has been identified for deficit reduction. Of that $1 million, $763,000) ($628,000 + $135,000) would be moved to the Police budget. Additionally, $61,510 is identified to be moved from the Finance Budget to the Police Budget.

2. The remaining funds from the proposed re-appropriation of the freed-up General Fund revenues ($237,000) would be used for the following:

- $50,000 - District Court
- $72,000 - City Clerk
- $50,000 - City Council Staff
- $45,000 – Additional Pay Raises for Council
- $10,000 – Brennen Center
- $10,000 – Hasselbring

3. Finally, there is a recommendation to eliminate funding for the Human Relations Commission ($22,547) and split those funds equally between Brennen Center and Hasselbring:

- Brennen - $11,274
- Hasselbring - $11,274

4. The Mayor has also made recommendations in other areas, including:

- Adding capacity to Economic Development by replacing the 20% of 2 DCED staff currently subsidized by the GF with CDBG funds and directing that staff to perform 100%

CDGB activities. The freed-up funds ($51,458) would then be used to contract for economic development services.

- Reduce DCED program staff by 1 FTE and utilize CDBG administrative funds for 50% of administrative staff support in Planning and Development
- Add 1 new FTE in Planning and Development dedicated to the new Business Licensing function
- Add to the Strategic Plan a key objective under Governance and Administration: "Respond to a minimum of 500 constituent services per month, including those formerly addressed by the Human Relations Commission staff."

Changes to the Proposed FY15 & FY16 Recommended Budget in response to Council and Mayor recommended changes

The changes proposed by the Mayor and Council have been reviewed, and changes made as considered appropriate within the context of maintaining a viable financial plan for the next two years. The proposed budget, as submitted to the Mayor and Council on April 30, 2014, will be revised as follows in response:

1. The Proposed Budget anticipates a reduction in public safety staffing of 36 officers and 19 firefighters. However, it also does not anticipate these reductions (other than vacancies occurring through attrition) until the comprehensive study of the police and fire departments is concluded. That study is to be completed prior to the end of 2014. At that time, depending on the study recommendations, a decision will be made as to the need for additional resources, and to the extent that funds in the General Fund which are currently targeted for deficit reduction can be used. Although the State will not agree to utilize funds appropriated for the operation of the Lock-Up to fund Flint police officers and firefighters, the Mayor and Emergency Manager will continue their efforts to obtain other state funding to support police and fire operations in Flint during this critical time.
2. The concern of the City Clerk, and supported by both the Council and the Mayor, of her inability to properly conduct the upcoming elections with the proposed staffing reduction, is acknowledged. Accordingly, the proposed budget is revised to continue FY14 budget level of staffing within the Clerk's Office. The business license position, originally moved to the Planning and Zoning Department in the FY15 and FY16 Proposed Budget, has been restored back to City Clerk's department. The new Business Licensing process is scheduled to be implemented by January 1, 2015; at which time, the responsibility for the process will be assumed by the Department of Planning and Development. Since the Clerk's Office staff will remain the same while reducing the responsibilities of the Clerks' Office, there should be adequate staff to conduct the elections and to provide additional support to the Council Office. Until such time as the

Business Licensing process is assumed by the Department of Planning and Development, the Clerk is authorized to increase the hours of the current part-time employee in the Council Office. $15,000 in temporary wages is added to the Council's budget for FY15.

3. The concern of the Council and the Mayor that financial support be continued to assist in the transition of the senior citizen programming at the Brennen Center and Hasselbring is acknowledged. The end goal is for there to be successful senior citizen programming at these locations, supported in their entirety by the County's senior citizen millage, which has been approved by voters within the City of Flint as well as the rest of Genesee County. Instead of adding additional funding to the FY15 and FY16 budgets, however, an amendment to the FY14 budget is being prepared to make a one-time appropriation to each center in the amount of $20,000, for a total expenditure of $40,000. The purpose of this appropriation is to support this transition.
4. The concern of the Council to add additional resources to the District Court is noted. However, during the presentation by the Court at its budget hearing, it became apparent that the proposed strategy of the Court to utilize part time employees may not be consistent with the requirement that temporary employees working in excess of 29 hours per week must be provided access to health care to the extent that full time employees are. Thus, additional funds in the amount of $40,000 is added to the Court's budget to address this potential problem.
5. The recommendation of the Mayor to add additional capacity to economic development as stated in #4 above is acknowledged. Additional resources for economic development was also a stated priority of the Council. The change recommended by the Mayor provides $50,000 in financial capacity, is revenue neutral, and is incorporated into the budget.
6. The recommendation of the Mayor with respect to reducing DCED staff by 1 FTE and redistributing the funds as noted above are also incorporated into the budget.
7. The recommendation of the Mayor to add one new FTE in Planning and Development dedicated to the new Business Licensing function is also acknowledged as being valuable in helping to assure that the new process is implemented aggressively and successfully. Accordingly, $64,000 for wages and fringes is added to the budget of Planning and Development for that purpose.
8. Finally, the recommendation of the Mayor to add an additional objective to the Governance and Administration section of the Strategic Plan is acknowledged and will be incorporated. Accordingly, while the Human Relations Commission may continue as a volunteer board, the proposed allocation is eliminated. As it has become apparent that the Human Resources Director is fully engaged with managing the Human Resources function, the portion of the Director's salary allocated to the HRC budget will be transferred to the Human Resources Budget.

Implementing the changes noted above require identifying $119,000 in FY15 General Fund appropriations and $104,000 in FY16 appropriations. The revenue and expense projections in the budget have been reviewed, and the necessary funds have been identified from the following sources:

FY15:

- $39,000 - reduction in audit costs
- $ 2,600 – net reduction in HRC budget
- $38,400 - additional projected revenue - income tax revenue
- $39,000 – additional projected revenue – delinquent income tax collections

FY16:

- $31,000 - reduction in audit costs
- $ 2,678 – net reduction in HRC budget
- $32,000 - additional projected revenue - income tax revenue
- $38,322 - additional projected revenue - delinquent income tax collections

Appreciation is extended to the Mayor, Council, and staff for the time and effort spent reviewing the proposed budget. The citizens of Flint will be better served by the changes made.

Proposed Budget FY15 and FY16 Technical Adjustments

1. Included the pension expense in the Office of the Clerk - $29,519

2. Removed wages and fringes for GIS Technician from Assessing Department because it was already budgeted in the Planning and Zoning Department - $60,518

3. Corrected the inclusion of all salaries, wages, and fringes in the Planning and Zoning department for all the approved positions - $123,596

4. Corrected Fund 202 FY15 and FY16 fund balance use. The indirect cost allocation was double reported in FY15. This was a $536,000 reduction in cost in FY15. In FY16, wages in administration was entered in error causing salaries to be overstated by $812,000. This correction was made.

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, and foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

Attachment 1. Summary of Findings of the Flint Financial Review Team

Summary of Findings of the Flint Financial Review Team
November 2011

- The City has a general fund deficit of$14,621,546 as of June 30, 2010 which was not eliminated within the two year preceding period.

- The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of$7,046,820 as of June 30, 2008. However, by June 30, 2010 the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 does not purport to eliminate the cumulative deficit until 2030 and that relies upon the issuance of an additional $12 million of debt in 2013.

- A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010 and the general fund is projected to have a $6,768,864 deficit as of June 30, 2011.

Attachment 2. 7 Point Transition Management Plan

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

TO: Scott Kincaid, President and Flint City Council
FROM: Darnell Earley, ICMA-CM, Emergency Manager
RE: 7 Point Transition Management Plan
Date: April 3, 2014
CC: Mayor Dayne Walling, Clerk Inez Brown, Gerald Ambrose, Peter Bade Elizabeth Murphy, Jason Lorenz, Maxine Murray

The primary responsibility of an emergency manager is to resolve the distressed city's financial emergency. However, resolution is not complete without providing a basic framework for, and implementation of, an objective model for the organization to follow.

A sustainable municipal organization incorporates the utilization of best practices financially, structures a governance model which clearly delineates between legislative, policy, and administrative responsibilities, and develops a management plan to provide services to residents in a consistent, reliable manner.

The 7 Point Transition Management Plan provides the roadmap to resolve the financial emergency and to achieve sustainability for the City of Flint. The Michigan Legislature recognized the need to incorporate provisions for sustainability when the "Local Financial Stability and Choice Act" was written as P.A. 436 of 2012 (Act).

The Act states in part:

> A local government shall be removed from receivership when the financial conditions are corrected in a sustainable fashion as provided in this act. MCL 141.1549(7)

The 7 Point Transition Management Plan (Plan) that we have been discussing since the beginning of 2014 outlines specific criteria for assessing attainable goals through measurable objectives, intended to provide an objective evaluation of the management principles critical to sustainability, and in concert with the requirements of the Act.

The Act further states:

> (1) If an emergency manager determines that the financial emergency that he or she was appointed to manage has

been rectified, the emergency manager shall inform the governor and the state treasurer...

(3) Subject to subsection (4), if the governor agrees that the financial emergency has been rectified, the emergency manager has adopted a 2-year budget as required under section 21, and the financial conditions of the local government have been corrected in a sustainable fashion as required under section 9(7), the governor may do either of the following:

(a) Remove the local government from receivership.
(b) Appoint a receivership transition advisory board as provided in section 23.

(4) Before removing a local government from receivership, the governor may impose 1 or more of the following conditions on the local government:

(a) The implementation of financial best practices within the local government.
(b) The adoption of a model charter or model charter provisions.
(c) Pursue financial or managerial training to ensure that official responsibilities are properly discharged. MCL 141.1562

Each of the 7 points of the Plan addresses these requirements. Moreover, the Plan sets in motion the necessary exercises for making the determinations so that as Flint's Emergency Manager, I can make an objective, sustainable, and broad recommendation to the Governor and the State Treasurer concerning Flint's emergence from, and next steps in its financial emergency. The Plan also recognizes the need to address systemic, causal factors in Flint's repeated designation as a distressed community where a financial emergency exists, and thereby in need of state intervention, as outlined in the Act.

Depending upon the Governor's response, the Plan will serve as a data-driven blueprint to forward on to a Transition Advisory Board, as provided in the Act. The Plan is not intended to be a consent agreement as provided in subsection (1), nor is it being presented as any other legal document referenced in the Act. Given Flint's history, the comprehensive nature of the Plan, if implemented in its totality, should address the problem of recidivism through sound, effective governance and accountable city management.

In retrospect, had we implemented such a plan when Flint came out of its first receivership in 2004, perhaps we would not have had a repeat of that situation.

Nevertheless, a third episode of receivership will be much more difficult for the City to rectify without exploring bankruptcy.

I have sought and will continue to seek the support and cooperation of the Flint City Council, as well as that of the Mayor, for the Plan, as we move towards this next phase of receivership. While many of the objectives in the Plan are currently underway, there is still much work to be done. With your reengagement, cooperation, and buy-in to this process I am very hopeful that we can achieve a favorable outcome as we seek to restore home rule order and local control over the next several months.

7 Point Transition Management Plan

Goal: To provide a strategy for determining and evaluating relevant and specific criteria for assessing when the City of Flint might be prepared to emerge from Emergency Manager (EM) oversight to a Transition Advisory Board (TAB), as provided in Public Act 436. The seven points identified provide comprehensive and well defined benchmarks to be reviewed before the determination is made. The Plan also defines a data-driven and measurable process for the objective, results-oriented determination of facts. The Plan establishes the criteria now so that it is clear what the conditions are that will have to be satisfied before the Emergency Manager recommends the establishment of a Transition Advisory Board.

GOAL	STRATEGY	OBJECTIVES	STATUS
1. Deficit Elimination Plan			
	Deficit Elimination Plan and Reserve Accumulation Plan will be presented by the EM/Mayor/Finance Dir. to City Council through its Finance Committee to receive Council support. Also a commitment by the Mayor and Council to implement the plan will be required.	City Council to pass resolution of support for DEP/RAP from EM/Mayor/Fin. Dir.	_____
		Receive Treasury acceptance of the DEP/RAP.	_____
		Confirmation by Mayor and Council that DEP/RAP actions will be a top priority in budgeting.	_____
2. Five-Year Financial Analysis			
	The development, monitoring and updating of a five-year financial analysis is critical to the ongoing challenges of financial solvency. It must remain an ongoing process to measure the City's ability to fund services, produce budgets, and proactively manage expenditures. It should be an expectation of the Council that the EM/Mayor/Fin. Dir. shall annually prepare and Council shall review and adopt said projection; and shall continue to use the projection as a basis for future budgeting actions.	EM/Mayor/Fin. Dir to annually prepare a 5 yr. R/E projection.	_____
		Council Finance Committee review 5 yr. analysis and move to Council.	_____
		City Council adopts 5 Year Analysis.	_____
		Finance Committee shall annually review analysis in February each year and send to Council for approval.	_____
3. Governance			
	The EM will consider recommendations from the Blue Ribbon Committee, National Civic League Model Charter, proposed charter amendments, review of electoral structure, Executive appointments, etc. It is expected that a formal agreement would be reached among the EM, Mayor, and Council as to what governance revisions are to be implemented, including time frames for implementation.	Blue Ribbon Cmte. Complete Report and Submit to EM	_____
		Mayor and Council Submit Comments on Report to EM	_____
		EM developes proposed governance structure and sends to Governor.	_____
		Mayor and Council have an opportunity to review and comment on EM proposal.	_____
		Completion of City Ordinance review by Council as proposed by EM.	_____

GOAL	STRATEGY	OBJECTIVES	STATUS
4. Organization Development	Review the City's organizational structure including: Public Safety, 9-1-1 plan, courts consolidation plan, recommendations on other long-term services, and role of the city administrator (who will be appointed prior to the TAB). Finalize the organizational relationship among Mayor, Administration and Council. This will result in an agreed upon detailed description of the roles and responsibilities of the Mayor and Council, including items such as respective roles in strategic planning, budgeting, monitoring and assessment of results, appointments, and protocols for addressing citizen complaints.	EM/Mayor determines recommended City organizational structure. EM/Mayor to recommend Council action (ordinance changes) to implement organizational structure. Council to review and adopt revised organizational structure. EM/Mayor to hire City Administrator/Manager. Finalize organization structure and roles: Mayor, Council, Administration. Labor contracts to be completed for all City unions	
5. Legacy Costs	Retiree Health Care remains the biggest challenge to managing legacy costs and the City is currently facing a legal challenge. It will be unlikely that the financial emergency will be declared resolved until this issue is settled in a manner which does not risk the solvency of the City. Sustaining the changes within RHC are essential to the City's future solvency.	Mayor and Council to support City's position on retiree health care or adopt measures offsetting the increased costs. Annual budgets to include payment of appropriate pension and health care costs and liabilities.	
6. Strategic Plan	The adoption of a long-range strategic plan by the Emergency Manager, Mayor, and Council for the governing actions of the City will provide a guidance mechanism for determining budgeting, priorities, goals and objectives.	EM/Mayor/Fin. Dir. to present 5 yr Strategic Plan through Finance Cmte. to Council for approval. Council to set spending priorities. EM/Mayor to utilize Strategic Plan to develop budget. Council to adopt budget in line with Strategic Plan and budget priorities. Council to receive quarterly reports from Mayor/Fin. Dir. on progress of achieving strategic objectives and priorities. Strategic Plan to be updated annually.	

GOAL	STRATEGY	OBJECTIVES	STATUS
7. Sustainability	Factors for determining sustainability are rooted in the 7 points. More specifically, the measures that will be evaluated include: achievement of consensus decision-making on the part of the Mayor and the Council, adoption of best practices, continuing commitment to training and development for the Mayor and Council members, ongoing monitoring and updating of plans necessary for the financial stability of the City including but not limited to 2-year budgets, 5-year financial analyses, and the ongoing implementation of the Master Plan.	Council and Mayor update methods to develop policy recommendations and achieving consensus.	
		Council and Mayor attend all training sessions as scheduled by EM.	
		Council and Mayor to actively participate in development and adoption of 2 yr. budget.	
		Implement Master Plan (evidence of Master Plan implementation in annual budget).	
		Define and incorporate financial and organizational best practices.	
		Implement system of performance measurement.	
		Utilize data-driven methods of decision making and performance measurement.

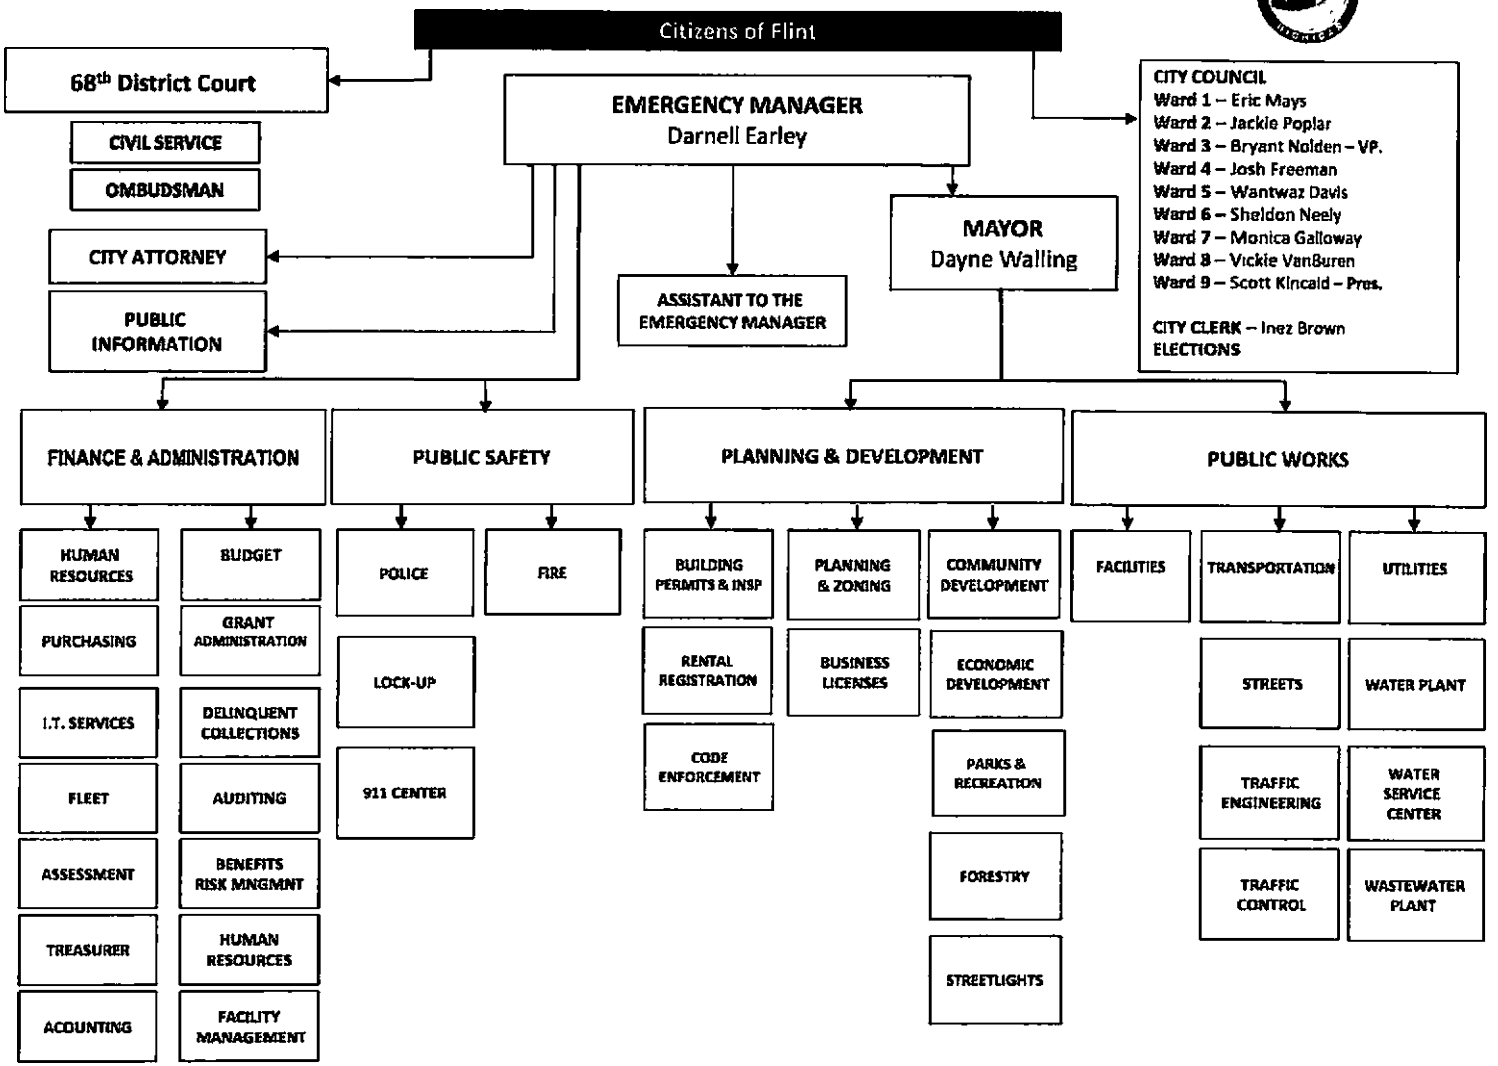
CITY OF FLINT – ORGANIZATIONAL CHART – *July 2014*



Attachment 4. Strategic Plan for the City of Flint 2015-2019

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, ~~and~~ foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

GOVERNANCE AND ADMINISTRATION

VISION Statement

The City of Flint's Governance will adapt to change and be a model of professionalism, transparency, and sustainability in order to provide effective government to each of our City's residents (as written in the Charter Preamble).

MISSION Statement

The Executive Management and Elected Leadership Directs and guides the City government in order operate in an open and financially responsible manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits within the context of the City of Flint Master Plan.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
EMERGENCY MANAGER			
MAYOR & COUNCIL		Promote vision, set priorities, and measure results	Formally assess progress towards achievement of Seven-Point Plan by October 15, 2014
	Management of City Government		Formally assess City readiness for Transition Advisory Board by December 31, 2014
CITY ADMINISTRATOR	Chief Elected Official	Leadership: Provide direction, guidance and support to the leadership in the Departments of Public Safety, Planning & Development, Public Works, and Finance & Administration in order for the achievement of their goals and objectives	Reduce deficit by no less than $1.8 million by end of FY15, and each year thereafter in accord with City Deficit Elimination Plan, and continuing to accumulate an appropriate level of reserves
	Legislative Body of the City		Begin search for City Administrator on July 1, 2014, with new City Administrator beginning work by January 1, 2015

Partner with MSP, FPD, FANG on Arson squad. 3), Partner GCSO on Auto Theft Team (GAIN), Develop Area Crime Team with MSP and GCSO through December 31, 2014

911

VISION STATEMENT

The City of Flint 911 Department will be a fully functional Next Gen 911 system, accessible 24/7 from any device.

MISSION Statement

The City of Flint 911 Department is committed to serving our citizens, businesses and visitors with professional emergency services. We will continuously strive to improve our services in the most effective and efficient manner possible.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
911			Reduce use of 911 for non-emergency calls by 25% by June 30, 2015
TELEPHONE ANSWERING & DISPATCH	Receives call and dispatches resources	Provide the best possible emergency telephone answering and dispatch purpose with available resources	Develop plan for Next Gen 911 technology, including telephone upgrade and console upgrades by July 15, 2014
	Maintains records and consoles	Provide prompt, courteous, and efficient customer service	Improve Response to incoming 911 and 7-digit calls by 10% by June 30, 2015, improver coordination with EMS dispatch
RECORDS MANAGEMENT	Management of 911 Center	Improve community group relationships through community outreach	Automate billing for structure fires by October 1, 2014
			Develop plan for Consolidation with Genesee County Consortium by June 30,2015
ADMINISTRATION			Create a new employment roster by October 1, 2014, working with Human Resources
			Working with Fire Department, create program and process by August 1, 2014 for utilizing Fire Fighters on light duty at 911
			Complete state required training for all employees by October 15, 2014
			Complete Tower construction by June 30, 2015
			Eliminate Provisional Appointments/Fill vacancies permanently by July 1, 2014
			Strengthen relations with community groups by participating in 24 meetings each year
			Implement Quality Assurance program beginning July 1, 2014

FIRE DEPARTMENT

VISION Statement

A community educated on all matters related to fire safety and fire protection resulting in minimal damage and injury from fire incidents.

MISSION Statement

Utilizing available resources, the Flint Fire Department will respond quickly and effectively to fire calls; and will lead efforts to educate the community on all matters relating to fire safety and protection.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
FIRE			
ADMINISTRATION & EMERGENCY MANAGEMENT	Department Management; coordination of emergency management activities within city		Maintain average fire response time under 9 minutes in FY2015 and develop plan to reduce response time in FY16 to less than 8 minutes
		Provide the highest quality fire response/fire protection possible	Turnaround time for Fire Inspections to be 5 days or less from request, beginning July 1, 2014
FIRE SUPPRESSION	Deployment of Fire Fighters to emergencies		Implement new organizational structure based on 75 full-time positions as of July 1, 2014
FIRE INSPECTION & ARSON INVESTIGATION	Investigation of suspicious fires; conduct of commercial building inspections		100% Flint School children contacted and provided with fire safety and prevention program by July 2015
		Engage children, students, and senior citizens in fire safety awareness and preparedness.	100% of Senior Centers provided with fire safety and prevention program by July 2015
			100% of City Block Clubs provided fire safety and prevention program by July 2015
COMMUNITY EDUCATION	Education of residents and businesses in fire prevention		At least 4 times per year, the Fire Department will provide the community with information regarding fire safety and prevention
		Lead City wide emergency preparedness and response	Evaluate and define role of the Fire Department in Emergency Management, with report provided to EM by August 1, 2014

68th DISTRICT COURT

VISION Statement

The 68th Judicial District Court will be a leader among Michigan Courts in the provision of quality service, equal access to a fair and effective system of justice, and protection of the public's safety

MISSION Statement

The 68th Judicial District Court will provide timely, fair, and impartial justice in all matters properly presented to the Court.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
DISTRICT COURT:			
ADMINISTRATION	Overall Court Management	Provides the most efficient processing possible within the net current appropriation from the City	To comply with all Trial Court Performance Standards-Annually, as dictated by the State Court Administrative Office
JUDICIAL PROCESSING	Courtroom activities		Improve Court collections-Annual increases by way of Amnesty and Collections Agency, comparing results at the end of each fiscal year to the previous year
PROBATION	Provides oversight of probationers		Re-establish Probation Department with (1) Probation Officer effective July 1, 2014

PUBLIC WORKS

VISION Statement

The vision of the Public Works Department is to be a well managed and well trained workforce that utilizes all available resources, technology, and collaborative means to maintain the City's above and underground infrastructure and facilities.

MISSION Statement

The Public Works Department is committed to the develop of qualified managers and workers with consistent ongoing training, data driven decisions, and the creation of new job performance measurables
The DPW will aggressively engage in strategic local and state level partnerships while continuously implementing new and improved technologies, procedures, and policies.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
UTILITIES	Water Treatment	Provide dependable and affordable water and sewer service to City residents and businesses.	Complete design and construction of two pipeline connections to provide GCDC with proper back-up capacity by Oct 1, 2014 (if necessary)
WATER TREATMENT PLANT	Water Distribution		Complete the electrical upgrades on Cedar Street Pumping Facility by April 2015
WATER POLLUTION CONTROL	Distribution System Maintenance		Complete the engineering design work for the Hamilton dam upgrades by June 30, 2015
WATER SERVICE CENTER	Sanitary Sewer Operation & Maintenance		Complete the rehabilitation of the Terex Road Booster Station by June 30, 2015.
	Storm Water Maintenance		Complete and implement a comprehensive pay scale evaluation for all WTP employees by July 1, 2015
	Dam Maintenance		Complete phase II (of III) of the WTP upgrade in preparation of transition to KWA by October 30,2015
	Water Turn On's/Off's	Routine preventative maintenance program - A program that includes written procedures, identification methods, scheduling, and measurable tracking.	Create GIS maps of utility assets (including base-layer) by September 30, 2014
	Cut & Plugs		*Implement tracking program for main breaks and sink holes by July 1, 2014, issuing monthly reports thereafter*
	Wastewater Treatment		Develop and implement a written and sustainable "water loss" program by September 30, 2014. Program is to target the identification of a "baseline" loss and create means to maintain a loss percentage of under 15%.
	Industrial Pretreatment Compliance		Replace 3,000 residential meters by June 1, 2015
			Develop and implement a written root control matrix to reduce infiltration into the sanitary sewer systems by March 31, 2015
			Develop a written pipe replacement matrix that uses multiple criteria to identify the priority pipes to replaced annually by September 1, 2014
		Long term Utilities planning - Continued implementation of objectives that increase the efficiency and sustainability of the Utility department. Including the use of Blue/Green infrastructure projects, right sizing neighborhood infrastructure, and shared services.	Issue an RFP to conduct comprehensive energy audit of all Utility facilities by August 30, 2014
			Develop list of shared service opportunities with Genesee County Drain Commissioner and setup a meeting schedule for talks by August 30, 2014
			Complete the de-commissioning of the incinerator and construction of a load out facility at the Wastewater Treatment Plant by October 31, 2014
			Complete the upgrade plan of turning methane gas from the digester into energy by March 31, 2015
		Increase community engagement, community input, and community awareness with Utility processes and procedures.	Complete the development and use of web site access for residents to report main breaks by May 30, 2014
			Complete Cut & Plug list for hardest hit demolitions by July 30, 2014
			Implement defined response time policy for WSC by July 31, 2014, including 100% capacity for shut-off's

PUBLIC WORKS

(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
TRANSPORTATION	Maintenance and repair of sidewalks	Implement processes, procedures and activities that enable the City to efficiently maintain and preserve a multi-modal transportation network that meets the needs of all motorists, pedestrians, and bicyclists	Complete a sidewalk inventory that identifies the location and surface conditional rating of all sidewalks within the City by June 30, 2015
STREET MAINTENANCE	Enforcement of Right-of-Way Ordinances		Implement a 50/50 Sidewalk Repair Program targeting enforcement of the sidewalk Ordinance and repair of 500 sidewalk squares by June 30,2015, and repair of 1,000 squares by June 30, 2016
	Maintenance of City owned streets including paving, plowing and sweeping		Perform preventive maintenance activities on 15 miles of streets by June 30, 2015, and pave 4.5 miles of streets in addition to preventive maintenance on another 15 miles of streets by June 30, 2016
	Maintenance of City street trees		Complete an inventory of city street trees before June 30, 2015; develop a Tree Maintenance Plan by June 1, 2016 that identifies the location of street trees, condition, risk factors, and schedule of planned maintenance activities over a six-year cycle beginning July 1, 2015
			Initiate a web-based application that will allow the public to electronically report pothole, street, street tree, and sidewalk complaints by January 1, 2015
CAPITAL PROJECTS ADMINISTRATION	Capital Improvement Projects (Planning and Management)		Develop a written Public Participation Plan that details how the public will be engaged in the transportation planning process by December 31, 2015, and implement beginning January 1, 2016
			Invest $20,000 in non-motorized facilities by March 31, 2015 by providing funding to secure preliminary engineering services for the Genesee Valley non-motorized trail project
			Develop a reconfiguration plan for Harrison Street and South Saginaw Street by June 30, 2015 that includes facilities for multi-modal travel and traffic calming devices
			Identify a funding source to develop engineering plans to reopen Leith Street by June 1, 2016
TRAFFIC CONTROL	Maintenance of signs, traffic signals, and pavement markings	Install, maintain, repair, and utilize traffic control devices to facilitate the efficient movement of vehicles and people and to improve traffic flow, and communicate same to the public	Perform an audit of all signalized intersections to identify unwarranted traffic signals by June 30, 2015, and implement a preventive maintenance plan for traffic signals to begin July 1, 2016
	Barricading Activities/Special Events		Perform regulatory and warning sign upgrades in 3 areas of the City by June 30, 2015, and an additional 3 areas each year thereafter
SANITATION (Contract Management)	Monitoring of residential waste collection, composting, and recycling	Assure the reliable and efficient collection and disposal of residential waste, compost, and recyclable materials.	Develop and execute a Compost Plan that will result in the processing and removal of compostable materials from the Chevy in the Hole site no later than June 30, 2015
			Monitor Waste Collection Services contractor's collection and disposal activities on a monthly basis to ensure compliance with contract provisions; formally evaluate performance of contractor by March 31, 2015, issue RFP by January 31, 2016 for new contract period beginning July 1, 2016
			Increase the City's recycling participation to 10% by June 30, 2015 and to 12% by June 30, 2016, provide timely instruction to public with respect to leaf pick up process by September 1, 2014
			Develop a recommendation on the feasibility of implementing a 96-gallon cart recycling program by December 30, 2015.
FACILITY MAINTENANCE	Maintenance of city facilities and grounds	Right size city facilities by consolidating uses and recommending disposal of unneeded facilities	Complete disposition of Police Academy, Fire Station, FAEC, McKinley, and Park Supply bldg by July 30, 2014
	Planning for optimal facility usage.		Complete the elimination of unneeded storage, and the relocation of employees into a permanent workspace by August 30, 2014.
	Facilitating use of city facilities	Plan for needed facility improvements that assures a clean, safe, and sanitary workplace environment for employees.	Implement new staffing plan for Facility Maintenance by July 1, 2014
			Increase capacity for maintenance services through a wider network of support services by October 1, 2014.
			Establish a contract management performance review that has a semi-annual written report by July 1, 2014
			Develop a comprehensive routine and preventive maintenance plan by January 31, 2015 that documents areas of concern, structures the way we effectuate repairs, and supports the CIP
			Develop 5 year capital improvement plan for city facilities by August, 2014, and update annually thereafter
		Adopt an energy efficiency and conservation policy that builds toward being carbon neutral.	Replace exterior City Hall lights with LED's and motion sensors by June 30, 2015
			Issue an RFP by August 1, 2014 that identifies a vendor and a funding mechanism to provide an energy evaluation of the City Hall campus, producing a 2015 energy "baseline" in which to measure progress.

PLANNING AND DEVELOPMENT

VISION Statement

The Planning and Development Department will partner with residents, businesses, and visitors to implement the Master Plan and help transform Flint into a safe, vibrant, sustainable, and healthy city.

MISSION Statement

The Planning and Development Department is committed to ensuring the public safety, health, and well-being of Flint's residents, businesses and visitors through targeted investment and rational, well-designed and physically integrated land use and development that advances economic prosperity, eliminates blight and stabilizes neighborhoods, protects the environment, and promotes a better quality of life in the City.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
CASE MANAGEMENT	Current Planning	Provide streamlined, business friendly plan review, permitting, property disposition, and business licensing in compliance with state and local laws in order to protect the health and welfare of the community.	Complete all plan reviews within 3 weeks and inspections within 72 hours, beginning January 1, 2015
	Permitting		Implement a comprehensive form-based zoning code that streamlines the approval process for projects that adhere to the regulations by November 1, 2014
	Service Counter/Business Support		Process all planning applications within the prescribed time limits and minimize the number of discretionary cases, beginning July 1, 2014, and reviewed quarterly thereafter
	Major Cases		Designate designated case manager to guide major projects through the City's determination process, beginning September 1, 2014
	Business Licensing		Implement P & D management of business licensing ordinance by July 1, 2014, and achieve 60% registration/licensing compliance by January 1, 2015, with progress as follows: 25% by July 1, 2016, 50% by July 1, 2017; 60% by January 1, 2018
BLIGHT ELIMINATION & NEIGHBORHOOD STABILIZATION	Code Enforcement	Eradicate blight in the City by 2020 and work with residents to stabilize Flint's neighborhoods.	Develop and implement a comprehensive code enforcement program by October 2014
	Rental Registration		Implement an updated rental registration ordinance before January 1, 2015 and achieve 90% registration/licensing compliance by January 1, 2018, with progress as follows: 25% by January 1, 2015, 50% by January 1, 2017, 90% by January 1, 2016
	Business License Enforcement		Secure funding and demolition assistance to demolish and 1,200 homes and 60 commercial buildings each year for 5 years with progress measured annually
	Blight Elimination & Street Lighting Coordination		Secure formal commitment of at least 60 neighborhood groups and community organizations to maintain 2,000 vacant parcels by June 30, 2015.
			Implement structure within P&D which has responsibility for developing a plan for improving street lighting within the City, for managing the lighting special assessment and payment of bills, beginning July 1, 2014.

PLANNING AND DEVELOPMENT

(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
COMMUNITY DEVELOPMENT & ECONOMIC DEVELOPMENT	Neighborhood Planning	Create safe, healthy, and desirable neighborhoods near quality community services.	Comply with all HUD regulations and time submission requirements for all reports beginning January 1, 2015
	Small Neighborhood Projects		Implement a grants management system utilizing GS&A to better track performance by January 1, 2015
	Fair Housing		Provide ongoing technical assistance and training to all sub-recipients and sub-contractors to insure full compliance and timely processing of payments; training to be scheduled by May, 2014
	Historic Preservation		Process all requests for economic development support (tax abatements, etc.) within prescribed time frames, beginning July 1, 2014, to be monitored quarterly beginning July 1, 2014
	Program Management (CDBG, HOME)		Define the ongoing role for city involvement in economic development by February 28, 2015 and present budgetary request for consideration in FY16 budget
	Economic Development	Promote a growing and diverse economy that spurs innovation and small business development and prepares the workforce for today's jobs and those of the future.	Implement a formally defined CDBG allocation process that is transparent and advances the goals of the Master Plan, beginning July 1, 2014
	Major Development Projects		Complete a formal written blight elimination framework for neighborhoods by October 31, 2014
	Workforce Development		Complete a formal written comprehensive housing investment strategy by April 1, 2015 including a housing program that provides rehabilitation and home buyer incentives to encourage residents to move to or remain in Flint
	Small Business Development		Secure other sources of grant funding for entire department to increase available revenue by 10% per year, beginning with FY15
			Respond in a timely manner to requests for assistance in expanding existing or attracting new businesses, with particular focus on small businesses and brownfields
	Oak Business Center & EDC		Implement the EDC Deficit Elimination Plan starting on July 1, 2014 and develop an EDC strategic plan for economic development activities especially around small business development by March 1, 2015, attract new businesses to Oak Business Center to reduce vacancy rate to less than 15% by July 1, 2015
LONG RANGE PLANNING	Master Plan Implementation	Guide the update and implementation of the Master Plan and provide data-driven, technical expertise to city officials and the public on land use and development matters.	Develop a commercial investment framework based on the Master Plan by June 30, 2015
	Performance Management		By February 28, 2015, in coordination with local, regional, and state economic development agencies, develop a formal long term strategy and role for the City government to help expand existing or attract new businesses, with particular focus on small businesses and brownfields; funding request to be presented for potential funding in FY16
	Transportation Planning		Create 6 subarea plans by July 1, 2014; develop the City's first combined Capital Improvement Plan by August 2014
	Public Safety Planning		Hold annual engagement to discuss progress of Master Plan and solicit additional feedback on action plan beginning April 1, 2015; begin update of the Master Plan by January 1, 2017
	GIS Services		Establish short-term (1-3 years) action plans for each chapter of the Master Plan by June 30, 2014
	Infrastructure Planning		Develop between 10-15 neighborhood plans covering every residential area by January 1, 2020, at the rate of 20% per year, beginning January 1, 2015
	Sustainability Planning		Develop a citywide sustainability plan by June 30, 2016
	Zone Changes		Maintain on an ongoing basis updated demographic and housing data easily available to internal and external customers, effective July 1, 2015
	Plan Amendments		Develop a proposal for providing citywide Geographic Information Services to internal and external customers by September 30, 2014 and implement by January 1, 2016
			Coordinate the implementation of at least 1 strategy in each chapter of the Master Plan every year, with progress measured annually

PLANNING AND DEVELOPMENT

(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
PARKS & OPEN SPACE	Parks Maintenance	Establish a new park management framework and secure resources necessary to maintain the City's parks and open spaces	Refine the City's parks classification system and develop service standards that align with the MDNR and the needs and desires of the Flint community
			Assure that all city parks are mowed at least twice per month based upon individual plan for land management; contractor performance to be reviewed on a quarterly basis starting September 1, 2014
	Parks Planning	Improve the ecological health of the City's parks and open spaces through responsible planning and development.	Complete a naturalization demonstration in Max Brandon Park by September 1, 2015; create a naturalization plan for 3 other parks by July 1, 2015
			Complete improvements to Riverbank Park and McKinley Park as specified in the MDNR grant by September 1, 2015, submit at least one grant proposal each year for MDNR funding beginning in 2015
			Update the Parks and Recreation Master Plan by March 1, 2016 with additional focus on park equity and enhancing recreational use of the Flint River and adjacent parks and open spaces
	Parks Partnership	Provide parks, open space, and recreation infrastructure that both meets the needs of the community and is maintainable by the City and its community partners.	Establish at least 3 "Adopt A Park" agreements every year; complete the establishment of the "Friends of Berston" group by October 1, 2014
			Work with the County to establish a joint maintenance agreement for at least one of the City's larger parks by July 1, 2015, Complete the transition of senior center operations to other entities contracting directly with the County for operational support by October 1, 2014
	Parks Programming	Engage the Flint Community to support the programming and use of park and recreation facilities	Develop a management plan for the City's 4 golf courses by January 1, 2015, issue RFP for Pierce Park Golf Course lease by July 31, 2014
			Develop the plan to adjust the CANUSA Games Housing and field of play locations by March 31, 2015
	Open Space		Coordinate with the Land Bank on the conversion of Chevy in the Hole to publically accessible open space with an attractive vegetative cap; ensure that construction of the cap can begin by September 1, 2014
	Trail Development		Complete construction of the Genesee Valley Trail by September 30, 2015 and the Grand Traverse Greenway Trail by June 30, 2016

FINANCE AND ADMINISTRATION

VISION Statement

A robust division capable of meeting the external and internal needs of the City of Flint in the areas of finance, treasury, assessments, human resources, information technology, and fleet.

MISSION Statement

To manage the financial and administration division of the City of Flint through promoting fiscal responsibility and industry best practices in order to respond to the needs of the City of Flint with efficiency and timeliness.

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
FINANCE			
ACCOUNTING	Payroll Production & Reporting	Provides for a financially secure organization with sound business practices providing for the purchase of goods and services and financial reporting. Provides professional and technical advise to departments regarding financial and purchasing needs and on grant administration processes.	Reduce the General Fund deficit by $1.8 million by June 30, 2015 and $1.8 million by June 30, 2016
	Vendor Management and Payment		Convert to new fixed asset accounting by Sept 1, 2014 and develop fixed asset policy by December 1, 2014
			Review rates and master fee schedule by June 30, 2105 to ensure they are appropriately set
AUDITING	Monitoring Financial Performance		Implement Finance Department reorganization by December 31, 2014
	Preparation of Financial Reports		Audit completed and filed with state by November 30, 2014
BUDGETING	Monitoring Grant Performance		Schedule and conduct 4 city wide finance and accounting training sessions by June 30, 2015
	Accounting for Revenues and Expenses		Establish and implement internship program for Finance, with first intern in place by September 15, 2014
RISK MANAGEMENT	Development of Long Term *Financial Projections, Deficit* Elimination Plans and Strategies for Financial Solvency		Establish a paperless process for procuring goods and services by June 30, 2015
			Establish an archiving policy and process before the issuance of copier RFP (document management process) by January 31, 2015
PURCHASING	Administration of Property and Liability Insurances		Provide recommendations for updating procurement policies to be used during and after transition and to increase efficiencies by July 1, 2014
	Selection and Monitoring of Benefit Program vendors		Prepare an RFP for copier services in FY15 in time to allow issuance of request before contract expires in FY16
GRANT ADMIN			Increase the usage of P-cards to boost the City's annual rebate by 15%, with progress to be measured at the end of February, 2015
			Establish management expectations of turn-around time on vendor payments, purchasing requests, position filling requests, and other areas; monitor performance, *beginning with FY15 first quarter results, evaluated by October 15, 2014, and monitored monthly thereafter*
			Establish expectations of turn-around time on purchasing requests and monitor performance, beginning with FY15 first quarter results, evaluated by October 15, 2014
TREASURY			
CUSTOMER SERVICE		Provides for a customer friendly accountable entity managing receipts and collections. Monitors collections of property taxes, income taxes, water and sewer, and other receivables to assess budgetary compliance.	Identify additional $500,000.00 to $1,000,000.00 in unreported income tax by June 30, 2015, utilizing the 2011 State income tax data.
			Increase the collection of delinquent taxes by 15 to 20% by June 30, 2015 through continued efforts to collect delinquent income tax and personal property taxes and by new efforts to collect delinquent Miscellaneous Receivables and Water bills, to be implemented by August 1, 2014
			Reorganize Customer Service by 7/1/15 to assure that after that time, that all utility bills are mailed two weeks prior to the due date, that checks are processed within 10 days from the postmark date; and that customer wait time in the office and on the phone are reduced by 25%
DELINQUENT COLLECTIONS			Replace the current vendor for processing electronic payments with Point and Pay by July 1, 2014, and by the same deadline install a kiosk in the City Hall lobby, in order to allow the City to accept water, property tax, miscellaneous receivables, special assessment and permit payments electronically
			Implement electronic income tax withholding no later than January 1, 2015
			Establish and implement an ongoing schedule of Customer Service", "Team Work" and "How to deal with difficult customer" training for all Treasury staff, beginning no later than 1/1/2015.

FINANCE AND ADMINISTRATION

(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
ASSESSING			
ASSESSORS OFFICE	Assessing of Properties	Assures the assessment of properties within the City in a professional and equitable manner in conformance with state law and professional practices; addresses appeals of values to Board of Review; represents City at state level appeals	Determine schedule by August 1, 2014 of staff training in Assessing.net as necessary and for annual compliance with state requirements during course of FY15, and annually thereafter.
	Administration of Valuation Appeals		Conduct comprehensive site inspections of residential and commercial tracts between April and November of each year in sufficient number annually to canvas 12 tracts annually
	Processing of Poverty exemption requests		Secure contract to achieve the conversion of remaining hard copy records and drawings to digital format utilizing APEX and/or digital scanning by March 1, 2015, with financial plan submitted for FY16 budget
	Provision of property and tax information to businesses and residents		Provide for the timely process of MTT appeals, and split/combination applications. 2012 and 2013 appeals will be completed by end of FY15 and appeals filed in 2014 will be resolved by end of FY16. The processing of splits and combination requests is required to be completed by December 31st of each year to be incorporated in the following year's assessment roll.
			Working with Facilities, finalize plan for relocating Assessing no later than October 1, 2014 from its temporary site
	Maintenance of Property descriptions and tax rolls		Analyze options by September 1, 2014 for lessening the workload impact of processing poverty exemption applications
			Participate with Planning and Development, IT, and others to develop by October, 2014 the ongoing process for establishing and maintaining of the parcel layer for City GIS, and for providing GIS services to internal and external customers.
HUMAN RESOURCES			
EMPLOYMENT	Recruitment and Selection	Recruit and oversee hiring of qualified employees in compliance with laws and ordinances	Update personnel rules and procedures, including ordinances, by March 31, 2015
	Testing		Update testing protocols for recruitment/selection by June 30, 2015
LABOR RELATIONS	Contract Negotiations	Recommend changes in personnel polices and labor contracts	Utilize a master position list for confirming the need to recruit, promote or reduce employees beginning July 1, 2014
	Grievances and Arbitrations	Train and assist departments in managing employees and resolving disputes	Answer 100% of all new grievances within required time frames, measured with quarterly reports starting end of quarter ending September 30, 2014
	Employment law allegations		Implement updated labor contracts and exempt fringe benefit programs by July 1, 2014
ENROLLMENT	Benefit administration	Enroll employees in payroll and benefit systems,	Inform department heads and supervisors of contract changes prior to July 1, 2014 implementation
	Payroll enrollment and changes		Develop ongoing training curriculum and schedule in conjunction with Department Heads by August 30, 2014 with implementation to begin in October, 2014
WORKERS SAFETY	FMLA oversight	Assure that city FMLA and worker safety policies and practices are in accord with law and properly administered	Implement new FSA program, new EAP program and new FMLA process by July 1, 2014
	Worker's Compensation Administration		Redesign Occupational Health and Safety Program for the City by June 1, 2016
	MIOSHA/OSHA Administration		Administrative policies/procedures to be updated by March 2016
	Employee Clinic		

FINANCE AND ADMINISTRATION

(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY18 & FY19
FLEET ADMINISTRATION SERVICE WRITING AND PARTS MANAGEMENT VEHICLE AND EQUIPMENT REPLACEMENT, ADDITION, DELETION VEHICLE AND EQUIPMENT REPAIR	Maintains fleet inventory	Complete and maintain a current fleet and equipment inventory	Complete 100% audit of City owned vehicles and equipment, including condition by September 1, 2014
			Annually update the replacement schedule to reflect replaced, required, and disposed of vehicles and equipment, to be complete by December 31, 2014, and annually thereafter, and used in preparation of annual budget
		Maintain vehicle/equipment replacement schedule	By April 30, 2015, and annually thereafter, complete 100% audit of City owned vehicles and equipment, including condition, to be used in preparation of annual budget
	Equips and repairs fleet	Complete 75% of work orders within 72 hours	Complete the Fleet Focus software upgrade, install a mechanic workstation and bar code labels in the Stock Room by September 30, 2014
			Complete a Stock Room audit and enter all parts into the Fleet Focus software program by October 31, 2014
		Maintain scheduled/actual preventative/maintenance ratio > 75%	Distribute to departments by October 31, 2014, PM and DOT schedule detailing responsibility of departments and drivers for daily inspections, compliance with DOT requirements, and maintenance responsibilities.
	Recommends specifications of vehicles and equipment to be purchased		Monitor department and driver compliance with PM and DOT schedules and responsibilities on a quarterly basis, beginning January 1, 2015
		Sustain average vehicle availability rates above 70%	Complete the bid process for DOT and PM services for heavy equipment and passenger vehicles by September 1, 2014
			Complete the bid process for vendor repair services, including 24-hour emergency response by August 1, 2014.
	Develops and maintains vehicle and equipment replacement schedule	By April 30, 2015, and annually thereafter, complete 100% audit of City owned vehicles and equipment, including condition, to be used in	Complete evaluation and develop schedule annual departmental training needs and tool purchases, beginning September 30, 2014.
			Complete the bid process for alternate emergency fuel source by October 1, 2014.
			Complete the sale and removal of the unused fuel tank at the Police Northside Precinct by July 1, 2014
		Implement fuel program to minimize fuel storage and cost	Determine if the fuel tank at Parks & Rec is still needed at this facility by December 1, 2014, and take action accordingly
			Complete the removal of underground storage tanks at Fire Station #3 by January 31, 2015; determine if the above ground storage tank at Parks & Rec can be utilized there.
			Recommend fueling station needs at current site by April 1, 2015.
		Improve interdepartmental communications of seasonal needs and expectations	By August 15, 2014, and annually thereafter, meet with all departments to discern fall and winter program needs.
			By February 28, 2015, and annually thereafter, meet with all departments to discern spring program needs.

FINANCE AND ADMINISTRATION
(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16
INFORMATION TECHNOLOGY			Implement Governance Modal by December 31, 2014
	Oversees the design, purchase, implementation, and operation of the City's technology infrastructure, provides professional and technical advice to departments in utilization of technology; identifies and provides technology related training	To ensure internal and external customers have appropriate and reliable technology which enables them to achieve their goals in an efficient manner	Complete implementation of BS&A net by July 31, 2014 (BS&A implementation contract complete)
			Develop and schedule implementation of a telecommunications infrastructure upgrade by February 28 th, 2015 with implementation complete by June 30 2016
			Establish and implement a Technology Training Calendar for all employees by October 30, 2014
			Install 22 new fully functioning mobile data computers by August 30 2014
			Maintain uptime for internet and intra net by 95% of the time, as measured by quarterly reports starting quarter ending June 30, 2014
			Reduce the number of shadow access systems by 40% by June, 2015 (base number as of May 1, 2014)
			First issue resolution and same day resolution achieved for 70% of Help Desk tickets, as measured by quarterly reports starting quarter ending June 30 2014
			Recommend vendor for Record Management System by October 1, 2014 and propose funding and implementation strategy by February 15, 2015 for inclusion in FY16 budget
			Complete a federally compliant IT Disaster Recovery and Security Plan by June 30, 2015
			Complete a Mobile Device Readiness Assessment by June 30, 2016
			Reduce telecommunication expenses by 30% by July 1, 2015
			Equip Mayor, Finance, South Bldg, Police and Fire Conference Rooms with access to technology by Oct 1, 2015
			Upgrade IT Training Room by November 30, 2014
			Develop plan to convert technology infrastructure to wireless by January 2016
			Upgrade space housing IT servers etc by December 31, 2015

Financial and Operating Plan for the City of Flint – Update 6
July 8, 2014

Introduction
This update to the Financial and Operating Plan for the City of Flint is submitted by the Emergency Manager for the City of Flint to Governor Rick Snyder, through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 17.

This report includes a summary of the financial conditions and goals for the City of Flint, the plan to conduct the operations of the City, the on-going actions being taken to resolve the financial emergency, and the outline of a plan to prepare for an eventual transition as prescribed in P.A. 436. This update will be posted on the City's website: www.cityofflint.com .

Summary of the EM/EFM Appointment Sequence and Development of the Operating and Financial Plan
The Flint Financial Review Team determined in November 2011 that the City of Flint was in a financial emergency. (See Attachment #1)

On December 1, 2011 Governor Rick Snyder appointed Michael K. Brown as Emergency Manager. EM Brown developed the Financial and Operating Plan utilizing the resources of a five person Advisory Committee as well as five additional advisory committees. EM Brown sought broad expertise to ensure public engagement and to maintain a sense of continuity with the Mayor and City Council. All nine City Council members and over fifty other citizens participated in the advisory committees.

EM Brown's original Financial and Operating Plan (45 Day Plan) was submitted to the State Treasurer on January 15, 2012; the first update to the Plan was submitted on June 1, 2012. On August 8, 2012, PA 4 was suspended and Edward J. Kurtz was appointed Emergency Financial Manager under P.A. 72. (Mr. Brown stepped aside as he was prohibited from serving as EFM due to his recent service as Interim Mayor for the City of Flint.)

EFM Kurtz established a new Advisory Committee in accordance with the requirements of P.A. 72. Utilizing the Advisory Committee and the City of Flint management team, EFM Kurtz presented a second update to the Financial and Operating Plan and submitted this to the State Treasurer on February 8, 2013.

When P.A. 436 took effect on March 28, 2013 Mr. Kurtz was re-appointed by Governor Snyder as Flint's Emergency Manager. Mr. Kurtz continued in that capacity until his resignation after the end of fiscal year 2013. At that time Mr. Kurtz submitted his closing memorandum and the third update to the Financial and Operating Plan. Governor Snyder then reappointed Mr. Brown as Emergency Manager. On October 8, 2013 I was

appointed by Governor Snyder as Flint's fifth Emergency Manager following Mr. Brown's resignation. On November 21, 2013 I submitted the 45 Day Plan as required by P.A. 436 Section 11(2); that plan became Update #4. The fifth update to the Financial and Operating Plan fulfilled P.A. 436, Section 17 six month report requirement.

This report, indicated as Update #6, fulfills P.A. 436, Section 17 requirement for an update each subsequent three months.

Priority List for the Resolution of the Financial Emergency

- Stabilize the financial future of the City: maintain a balanced budget, eliminate the accumulated General Fund deficit, seek increased revenue, and reduce unfunded pension and OPEB liability.

- Re-establish Flint as one of the safest cities in Michigan — both in reality and perception: provide public safety services, focusing on reducing violent crime, commensurate with cities of comparable size and resources, utilizing regional cooperation as appropriate.

- Implement the Blight Elimination Plan: manage demolitions, enforce blight ordinances.

- Maintain access to a clean, sustainable water source: implement the steps necessary to participate in the Karegnondi Water Authority (KWA) including interim water supply implementation, disposition of current pipeline sections, City Water Treatment Plant updates, a long term water supply back up plan, and a long term financial plan for the stability of the water and sewer funds.

- Implement the Master Plan of the City of Flint: update the Zoning Ordinance, evaluate the capital investment needs, and incorporate Master Plan activities in the annual budget development.

- Explore Governance Models for the City of Flint: receive report from the citizen's committee which was formed to evaluate city governance models, recommend course of action for Charter revision as a part of transition discussions.

- Implement the 7 Point Transition Management Plan (Attachment #2) which has been adopted by the Flint City Council and Mayor Walling. This Plan incorporates specific objectives which provide a strategy for determining and evaluating criteria for assessing when the City might be prepared to emerge from emergency management to home rule order with oversight of a Receivership Transition Advisory Board.

Operations of the City of Flint

Shortly after his appointment as EM, Michael Brown took steps to reorganize the city government operations including: elimination of departments, consolidation of

departments, elimination of management level positions, adjustment of the compensation of elected and appointed officials, elimination of the Civil Service operation and the Office of Ombudsman.

Management appointments were made to ensure that the essential services necessary for the public's health, safety and welfare are provided, and to continue conducting all aspects of the City of Flint's operation within the resources available. Necessary employment contracts were extended with the approval of the Treasury Department.

Department management reconfigurations were completed in anticipation of reductions in staffing levels as provided in the FY 13 Budget. Subsequently, as part of the FY 14 Budget process a Strategic Plan was adopted and more changes in the organizational structure occurred. The primary change was the inclusion of a new Planning and Development Department (See Attachment #3 Organizational Chart July 2014). I have made personnel adjustments to complete this reorganization of the Planning and Development Department.

The FY14/15 and FY15/16 biennial budget has now been adopted. This year the budget process involved over 30 hours of active participation by the Mayor and the City Council Finance and Administration Committee sitting as the committee of the whole. As part of this process the Council adopted a five year Strategic Plan and a list of priorities for the development of the two year budget (See Attachment #4 Strategic Plan of the City of Flint 2015-2019).

When P.A. 436 became effective in March 2013 the City Council members' and Mayor's compensation was eliminated. EM Kurtz partially restored compensation for Mayor and Council through Orders 1 and 2. These orders also defined specific responsibilities and requirements. For example, the City Council members were required to complete Level One of the Michigan Municipal League (MML) core course for municipal government and receive the MML education award within one year. I determined that this Order was still in effect, and the Council members all individually signed acceptance of these requirements as a condition of receiving compensation. All Council members have fulfilled these obligations. Now, through adoption of EM Orders 15 and 16, beginning with the FY14/15 budget, the Mayor and Council will receive an increase in compensation commensurate with the increased duties assigned to them.

All Orders and Directives issued by the Emergency Financial Manager (under P.A. 72) and Orders issued by the Emergency Manager (under PA4 and P.A. 436) are listed in Attachment #5: Orders and Directives of the EFM and EM.

The 7 Point Transition Management Plan which emphasizes re-engagement of the Mayor and City Council has been a top priority. The Council is meeting monthly on a regular basis; five new Council Committees have also been formed: Finance/Administration, Legislative, Public Works, Public Safety, and Planning and Development. Each Committee is meeting monthly and then reporting at the following Council meeting. Order 8 was issued in March 2014 and defines format of action and participation at the

Council meetings. Order 9 established monthly Council and Committee meetings; and Order 10 set the format of the Council meeting agenda. Additionally, Mayor Walling has been assigned day to day oversight of the Department of Public Works and the Department of Planning and Development. These steps as outlined in the 7 Point Transition Management Plan are part of preparing the City to resume local control under a Receivership Transition Advisory Board.

Financial Status

FY12 Budget and Audit

The Comprehensive Annual Financial Report (CAFR) for FY12 was completed and was filed with the State in a timely manner. The results were as expected, with fewer auditor comments than in past years. Deficits existed in the General Fund ($19.1 million) and in the Water Fund ($8.8 million).

The $19.1 million accumulated deficit reflected an excess of expenditures in the General Fund for FY12 of $10.2 million plus $8.9 million for FY11. This was anticipated by Emergency Manager Brown shortly after being appointed, which was almost six months into the FY12 year. Given that FY12 was nearly half over, and that significant unplanned reductions in services, primarily public safety, would need to occur if the projected deficit were to be immediately eliminated, the decision of the Emergency Manager, in consultation with Treasury, was to contain costs as much as possible but without significantly reducing services – especially public safety - for the balance of the year.

Pursuant to State statute, Deficit Elimination Plans for both FY11 and FY12 were submitted to the Department of Treasury. Both plans involved a mix of borrowing and expenditure reductions over the next five years. However, no final action was taken to implement the intended courses of action.

FY13 Budget and Audit

FY13 was the first budget developed and administered by Emergency Manager Brown and his team. Faced with a projected gap of more than $25 million, the FY13 budget was balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Previous reports detail the 25% increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, conversion of the waste collection millage to a fee and the creation of a special assessment for street lighting, elimination of 20% of the City's workforce, compensation decreases equivalent to a 20% wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

Results of FY13 year-end showed a surplus of revenues over expenses in the General Fund exceeding $6.2 million. This surplus reduced the City's accumulated $19.1 million deficit as of the end of FY12 to less than $12.9

million. Since the goal of the EM team was to assure that FY13 would not end with any additional deficit, this result significantly exceeded expectations.

The FY13 audit was completed and submitted to Treasury on December 20, 2013. All items surrounding the audit, including submission of the Form F-65 and Comprehensive Annual Financial Reporting Program were completed by December 31, 2013. The audit was presented to City Council as well on January 13, 2014.

FY 14 Budget and Strategic Plan

The FY14 budget was adopted via Emergency Manager Edward Kurtz Order #4 on June 7, 2013. This budget was developed with the same goal as FY13 – to assure the provision of essential services within the constraint of a balanced budget and continued deficit reduction. Accordingly, the FY14 budget included a $1.0 million commitment from the General Fund to further reduce the deficit. This was considered a minimum level of deficit reduction.

The Emergency Manager's team, crafted a draft strategic plan in preparation for the FY14 budget development. Vision, Mission and Goals were established for the City government. Department managers then set specific, measurable objectives. Within the strategic plan was a five year financial projection.

Achieving the balanced budget again required reducing the workforce; however, with significant efforts from department heads and others involved in developing the budget, and building on ongoing reorganization of city processes, the level of services currently provided generally continued at FY13 levels. Most importantly, the quest to at least maintain FY13 levels of police and fire staffing was achieved, although one consequence was that the additional reductions in staffing came from non-public safety areas. This was equivalent to an additional 10% reduction of staffing in those areas.

As the city has reached the end of FY14, the preliminary close shows a General Fund balance of more than $2.5 million of revenue over expenses; this balance will be applied to the deficit as planned. One set of budget adjustments, with approval of Treasury was implemented in December 2013. A second budget adjustment was approved by Treasury and was adopted on April 3, 2014. The closing budget amendment was approved by resolution on June 25, 2014.

The City's cash flow has improved significantly from the $13 million cash on hand in December of 2011. Thirteen million dollars is less than one month's operating expenses. By comparison, the cash on hand on June 30, 2014 was in excess of $52.1 million.

Deficit Elimination Plan 2014

A draft deficit elimination plan which also incorporates a reserve accumulation plan is currently under review by the Department of Treasury. The City

recognizes that a goal needs to be set to develop a reserve equal to 15% of General Fund revenues. This is one of many financial best practices which the City will incorporate to assure a sustainable municipal model. As of June 30, 2014 the deficit stands at $9 million, assuming Treasury concurrence with the City's plan. In budget years FY15-FY20, $1.8 million will allocated each year which will eliminate the deficit without need for borrowing.

FY 15-19 Strategic Plan and FY15 & FY16 Budget

The FY14 budget was developed within the context of an updated five year projection of revenues and expenses. This exercise pointed out the continuing challenge the City of Flint will have in achieving long term financial stability. The Finance Department and the Council Finance/Administration Committee developed the FY15-19 strategic plan and financial projections. The City Council has adopted a Strategic Plan which included Mission, Vision, Goals and a Budget Priorities statement (Attachment #4: Strategic Plan of the City of Flint 2015-2019). Consulting firm Ernst & Young assisted the City with an update to the five year financial projections.

The EM, in concert with the Mayor, developed a two year budget for FY15 and FY16. The goal, again, is to provide the best level of service possible within available resources while continuing to restore financial solvency. It is clear that in balancing these budgets the City will continue to be faced with addressing an on-going structural deficit; and the biggest challenge by far remains the outcome of the retiree health care lawsuit.

The City Council received the recommended two year budget April 30, 2014. The Finance/Administration Committee (sitting as the committee of the whole) used the first two weeks of May to hold five meetings on specific program areas. At the conclusion of the departmental reviews the Council sent a list of budget revisions proposals to me. Several of the recommendations were incorporated into the revised budget. The Council then held a public hearing on June 9, 2014.

This budget does include significant staffing reductions in public safety. In the two prior budgets other General Fund departments were reduced in size, combined, or contracted service provision. For this budget cycle, there were no other General Fund areas to reduce, except public safety services.

The targeted personnel reductions in public safety will not result in lay-offs prior to December 31, 2014. In the interim, the City has contracted for a comprehensive study of the police and fire operations. Based on the results of this study, and the managed attrition reductions, the personnel levels in both Police and Fire will be re-evaluated.

The State budget, as recently signed by Governor Snyder, contains an appropriation of $1.1 million for use in Flint's public safety departments. The boilerplate of the State budget states:

The appropriation of $1,100,000.00 in part 1 for the city of Flint shall be allocated to support city police and firefighters. The emergency manager shall determine which public safety personnel are to be funded from this award. If the city has an appointed receivership transition advisory board, then that board is vested with the authority to make the determination of which personnel are funded from this award.

The City is grateful to receive this funding and will use this to implement the recommendations of the Public Safety study which will be concluded in October 2014.

The Emergency Manager's Order 13 adopted the biennial budget; Order 11 adopted the street lighting assessment for FY2015 and FY2016; Order 14 adopted the Strategic Plan; Resolution EME3302014 adopted the FY2015 and FY2016 Master Fee Schedule (which includes water and sewer rates, and waste collection fee); Resolution EME3312014 adopted the 2014 and 2015 operating millage rates. (Attachment #6 FY15 & FY16 Biennial Budget)

I additionally note that Mayor Walling and the City Council have been fully engaged with City staff and me as this two year budget was developed. Also, as part of FY15, the day-today management of the Public Works Department and the Planning & Development Department will be handled by Mayor Walling.

Five Year Projection

FY15/FY16 budgets include more than $5 million each year in increased retiree health care, as a result of Judge Tarnow's injunction. FY15 & FY16 is balanced, but projections for FY17 indicate a deficit between projected revenues and status quo expenses of $5 million. If there is no relief from the $5 million in increased retiree health care expenses, or no new revenue source, balancing the FY17 budget without compromising the City's ability to provide even the most basic level of city services - including public safety, will most likely not be possible.

Operating Plan

The city continues to review all departments and services to reduce costs through contract rebidding, merger, consolidation, contracted service, shared services with other governmental entities, privatization or elimination. As a result of these reviews the City will determine what continuing activities should be subsidized with general property tax dollars, what will be paid by the users, which services can be eliminated, and which services or activities can be handled by lower cost vendors.

The functions, goals and key objectives of each department and functional area of the City of Flint have been encompassed in the Flint Strategic Plan 2015-2019. This plan also contains target dates for completion of each key objective. (Attachment #4 Strategic Plan for the City of Flint 2015-2019)

Key Actions To-Date

Finance Department

- Completion of a Water/Sewage Rate Study (prepared by Raftelis Financial Consultants) to address the long term financial stability of the Water and Sewer Funds;

- Transition from Detroit Water and Sewer District to the Flint River on a temporary basis while the Karegnondi Water Authority (KWA) pipeline is being constructed;
- Participation with KWA in the $220 million bond sale to finance construction of the KWA pipeline;

- Completion of the sale of a portion of the City's unneeded section of water line to Genesee County Drain Commission for $3.9 million;

- Continued effort to reduce pension and OPEB liabilities, including participation in defending the City's position in the retiree health care lawsuit;

- Continued aggressive monitoring of revenue and expense activities, with particular emphasis on revenue collections, position counts and overtime expenditures;

- Planning and implementation of employee development programs focusing on financial management, supervision and labor relations, and leadership development;

- Reorganization of city accounting functions based on the analysis and recommendations of an organizational study completed by Plante Moran;

- Update of the City's Strategic Plan and five year financial projections, developing a two year budget (FY15 and FY16) utilizing the City Council adopted Mission, Vision, Goals and Budget Priorities, as well as the Master Plan;

- Working with the Finance/Administration Committee of the Council to engage them and the City Council in the budgeting process and other financial matters;

- The City of Flint has met all reporting requirement dates for Economic Vitality Incentive Program (EVIP) in order to qualify for all disbursements of State Shared Revenue;

- The FERS to MERS transition will be complete when Model Labor Contracts have been finalized;

- Flint City Council has been provided with the terms of a proposed FPOA contract which the EM intends to impose, since no agreement has been reached. However, there has been agreement reached with AFSCME 1600, and an agreement with 1799 may be imminent. An initial proposal has been given to IAFF, and a meeting is scheduled for July 7. Contract changes to Captains/Lieutenants and the Sergeants unions are being drafted, as are changes to the exempt and appointed officials. The FY15 and FY16 budgets assume the proposed changes will be implemented. All of these changes reduce short term costs and reduce long term costs.

Retiree Health Insurance Revisions

The City's approach to containing its OPEB liabilities has been to restructure both active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million.

As previously reported, the City's effort to restructure retiree healthcare was challenged by a group of retirees in a federal lawsuit, *Welch v City of Flint.* On January 3, 2014, the U.S. 6th Circuit Court of Appeals reinstated an injunction prohibiting the City from modifying retiree health care benefits. The City is aggressively litigating this matter, as it does not have the resources to afford the current level of healthcare coverage, and projected cost increases for the upcoming fiscal years are substantial. If the federal district court's decision is not reversed, the City will be in an extremely precarious financial position, with insufficient resources to meet basic functions

The City is working to comply with the court's order, beginning with establishment of a reimbursement program for retirees whose expenses since January 3, 2013 are greater than their old plans. Work is also proceeding in anticipation of a court hearing sometime in the future, and settlement options are being explored.

On June 30, 2014 Judge Tarnow issued an order modifying in part his preliminary injunction barring the City from modifying retiree health care benefits. The Judge's order now permits the City to modify retiree health care as the City had proposed in a settlement proposal which was previously submitted to the Court.

While the details of the Judge's recent order are still being reviewed, and while the details of implementing the order are still being developed, it appears that the ruling will have a positive financial impact on the City, at least for the period while the litigation continues.

Otherwise, the City is utilizing the services of Cornerstone Municipal Consulting in ongoing review of various Employee/Retiree health care options including plan

design, delivery systems, Medicare Advantage, Medicare Wrap Around, benefit carve-outs, etc. in an effort to control health care costs. Administration of the City's health insurance benefits program is being handled by Cornerstone. In addition to the retiree lawsuit, attention is now focused on minimizing the City's cost for health care (for current employees and retirees) in the FY15 and FY16 budgets.

City Clerk

- The City has transferred the responsibility for Business Licensing to the Department of Planning and Development. The anticipated implementation date of this transition will be January 1, 2015.

Office of the City Attorney

- With the help of interns from Michigan State University, all City ordinances have been reviewed. Charter revisions which would increase flexibility for department reorganization and budget flexibility are also being considered.

- City Attorney's Office prepared draft revisions to the City Code concerning business licensing and regulation. Many ordinances and former business licenses are recommended for removal because they were obsolete, or could be put under the newly created General Business License. Several businesses also will be required to obtain a Business Endorsement.

68th District Court

- The City currently funds the operation of the 68th District Court; in FY14 this amounted to $3.5 million net. Senate Substitute for House Bill 5125 passed the Senate and the House in March 2014. The Bill authorizes consolidation of the 67th and 68th District Courts. It requires that the consolidation be approved by the City and the County. The County approval requires the affirmative vote of at least two-thirds of the County Board members. I strongly encourage the State to continue the process of working to consolidate the 67th and 68th District Courts; the City of Flint will work to support this consolidation.

Department of Public Works

Utilities Division

Karegnondi Water Authority (KWA)

- In March 2013 both the City Council and EM Kurtz adopted resolutions to enter into a contract with KWA to partner with Genesee County, City of Lapeer, Lapeer County and Sanilac County in the construction of a pipeline to deliver raw water to the City of Flint.

- Genesee County successfully held a $221 million tax-exempt debt offering on April 1, 2014 to finance the 63 mile pipeline. Genesee County is responsible for paying roughly 66% of the debt service and Flint 34%; the County agreed to back the City's share of the borrowing because the County holds an A-plus rating. This backing would only come into play if the city failed to perform, which it has no intention of doing. The County received a favorable 4.72% rate.

- The City has made the transition to utilize the Flint River as the primary water source for the City until the full operation of the KWA pipeline (approximately 36 months after construction begins) is available.

Water Department

- Upgrades to the City's Water Treatment Plant are required prior to the transition to the KWA water source and any on-going temporary use of the Flint River. DEQ mandated construction work for the use of the Flint River as a primary source has been completed. Ongoing upgrades are scheduled to improve efficiency and reliability.

- An evaluation is taking place to implement an effective Preventive Maintenance plan which focuses on controlling water loss (leakage). This is expected to involve a combination of outsourcing, in-house work, and shared services with the County.

- The exceptionally cold winter produced a large number of major water main breaks and several sinkholes have developed. Crews are working on these repairs according to a priority list based on severity of the break.

Sewage Treatment Division

- Automation of one of the City's pump stations (which was staffed 24 hrs a day) has been completed. This will result in the elimination of overtime and a savings of over $500,000 annually.

- **U. S. Department of Environmental Quality S2 Grant**
  An S2 DEQ grant to study infrastructure condition for water pollution control was accepted. The study was defined to encompass portions of the City's sanitary sewer system where considerable infiltration could be eliminated. The study produced a DEQ accepted project to rehabilitate manhole structures and cross connections. The work is planned throughout FY15.

Transportation Division

Solid Waste Management Division

- Outsourcing of Sanitation is complete. The process of establishing composting operations at Chevy in the Hole (CITH) is underway. A permit application to DEQ has been submitted and a site plan of action is being prepared for the EPA.

- An Administrative Consent Order on removing compost from the Chevy-in-the-Hole site has been agreed upon in principal with the DEQ and was signed in April. Work to prepare the compost for removal from the site has begun.

- Chevy in the Hole has become a priority level project. A management level staff member has been assigned to coordinate this project and to work with Congressman Kildee's office to identify additional funding to complete this project. Environmental beautification is the expected end result.

Street Maintenance and Engineering

- The City and MDOT agreed the State Trunkline Maintenance Contract that requires the City to perform maintenance activities on state trunklines (M-21 and M-54) would be temporarily suspended while capacity issues are resolved.

- Only crack sealing and pothole repair will be conducted this season; no repaving of any City streets will occur for a second year.

Facilities Management

- The Facilities manager is reviewing all city owned assets (both real property and capital equipment) to determine if disposal should be pursued.

- All city owned facilities are under review for energy savings, revenue generation from tenants, or possible liquidation.

Parks and Recreation

- On July 1, 2014 responsibility for management of Parks and Recreation was shifted to the reorganized Planning and Development Department, in alignment with the Master Plan.

- The City has contracted with two vendors who have the capacity to mow all of the city parks (64) multiple times at a rate that fits the current millage. The City also actively sought neighborhood groups and organizations who would adopt one or more of the City's parks, traffic triangles or medians through a partnership with

United Way and Keep Genesee County Beautiful. Eighteen parks have been adopted.

- The City is in the process of entering into a contract with the Genesee Conservation Group for tree evaluation and removal services, and to assess the status of over 22,000 City trees.

- Four City Parks (McKinley Park, Max Brandon Park, Thread Lake Park and Flint Park Lake Park) will be managed by the Genesee County Parks and Recreation Commission. Management will include maintenance and security.

- The City will work cooperatively with the County on park improvements through the recently awarded Department of Natural Resources (DNR) grant for McKinley Park and Ruth Mott Foundation grant for Max Brandon Park.

Department of Planning and Development

- As part of the new Planning & Development Department, five new divisions have been created: 1) Case Management and Building Services, 2) Blight Elimination & Neighborhood Stabilization, 3) Community & Economic Development, 4) Comprehensive Planning, and 5) Parks & Recreation. The strategic plan is aligned with these five divisions.

- The positions of Chief Planning Officer and Director of Planning and Development were combined as part of the recent city departmental reorganization. The purpose for this reorganization was to assure consistent and meaningful implementation of the City's new Master Plan while simultaneously establishing better organizational effectiveness for the Department of Development. As a result, I was able to eliminate one management position, and realize some budgetary efficiency in the process.

- A continued priority for the City is blight elimination and all associated blight enforcement activities will largely be coordinated through this department.

- The City was recently selected for the Strong Cities, Strong Communities (SC2) Program. As part of the next SC2 cohort, Flint has received additional technical assistance and support from the federal government including one embedded federal staff who will help advance implementation activities around public safety, brownfields redevelopment, and blight elimination and neighborhood stabilization. This federal staff member, Paul Joice from HUD started on June 2, 2014.

Case Management and Building Services

- The American SpiralWeld Pipe Company has begun to construct the first manufacturing facility at Buick City in decades. This $16 million development will generate fifty new jobs. The project has received its planning entitlements, permits, and its requested tax abatement was filed with the State.

- Construction on the General Motors Flint Assembly Plant, which includes facility upgrades and building of a new paint shop is already underway. Totaling over $600 million, Flint will be the third new paint facility in North America (Orion and Fairfax) to use an environmentally friendly wet-coat paint process. The 596,000-square-foot facility will be completed in 2016 involving 1 million construction man hours with full production scheduled for third quarter 2016.

Blight Elimination & Neighborhood Stabilization

- The Department of Planning and Development recently completed a draft blight framework based upon the Master Plan. We have begun to circulate the framework to the public for additional input and plan to finalize the plan at the end of the summer.

- As outlined in the blight elimination framework, the City needed to re-institute code enforcement. Through a private grant, eight part-time Neighborhood Safety Officers (NSOs) who alert residents to blight violations and issue citations have been functioning since October 2013. The program has been effective in addressing nuisance related issues such as tall grass and abandoned vehicles.

- In addition to code enforcement carried out by the NSOs, the blight framework indicated a strong need for building related code enforcement with over 6,000 structures in need of demolition. Over 71% of these structures are privately held. To address this issue, the City must have licensed building inspectors conducting code enforcement activities to place these on the demolition list. To accomplish this, the City recently included approximately $250,000 in the CDBG Action Plan this Fiscal Year to hire two full-time code enforcement officers and clerical staff to do this work.

- The City continues to coordinate with the Genesee County Land Bank on the demolition of nearly 2,000 homes through an approximately $3.7 million Michigan Blight Elimination Grant Program and $20.1 million Hardest Hit Grant. To date, approximately 600 homes have been demolished.

- The City was able to add funding and time to the Land Bank contract, extending mowing and trash removal through October of 2014 thereby ensuring that the Land Bank had the resources early enough to mow grass before it gets too high.

- This year The City received a $100,000 Cities of Service grant. An expanded volunteer and clean-up program is currently being launched, beginning with Love Your City Month, a citywide clean-up effort occurred during the month of May.

- The City participated in the Paint What Matters Campaign, a collaboration between Benjamin Moore and University Avenue Corridor, resulting in the painting of the building facades along University Avenue over the month of May.

Community and Economic Development

Smith Village Housing Development

- The Smith Village housing project is funded primarily with HUD and NSP2 grants. Seventeen of the 39 units that have been sold and six are under purchase agreements. The commitment to HUD is to have 51% of the purchasers meet low income guidelines (51% of Annual Medium Income).

- The City is also working on substantial landscape improvements to both the private and common open space and reaching out to homeowners of older buildings to conduct rehabilitation activities to improve the overall quality of the development.

Real Estate Transactions

- A quit claim deed for Chevy-in-the-Hole site has been transacted between the EDC and the City of Flint. EPA money for clean up has been agreed upon.

CDBG and HOME Allocations

- On March 18, 2014 the City received notification of its HUD allocation for Fiscal Year 2015: $3,629,629 - CDBG; $745,525 – HOME Investment Partnership; and $298,806 – Emergency Solutions Grant.

- The City transmitted the draft Action Plan to HUD on May 21, 2014 and anticipates receiving approval for expenditures in early July.

- The City is working with Communities First, Inc. on the development of a 36-Unit Supportive Housing Development in the Grand Traverse Neighborhood known as the Swayze Project. The project was recently awarded Low-Income Tax Credits and will receive up to $670,000 of the City's HOME allocations for this fiscal year.

Comprehensive Planning

- Drafts of eight subarea plans, the combined Capital Improvement Plan (CIP) and a complete revision of the Zoning Code were completed June 30, 2014. The City will conduct extensive outreach over the summer months to further refine these drafts and anticipates that the CIP and Zoning Code will be transmitted to the City Council for approval in November.

- The City of Flint was selected to receive technical assistance from MEDC as a Redevelopment Ready Community (RRC) with the goal of gaining certification as a RRC at the end of 2014.

- The City received two grants totaling $87,500 for Max Brandon Park to complete a park naturalization demonstration project that will create a healthier park environment while reducing long-term maintenance costs.

- The City also was recently awarded a Michigan Municipal League Place Plans Grant to develop an exercise trail that links important assets from Diplomat Pharmacy to Kettering University.

- The City has partnered with the Flint Community Schools to institute a form of the community schools model, the number one educational objective in the Master Plan. A joint town hall meeting was held in May and over 300 people attended.

- The City received a $15,000 grant from MSHDA to conduct a Target Market Analysis for multiple family housing in and around downtown, along Saginaw Street from Hamilton to Hemphill, and around Kettering University and Hurley Hospital. Various partners including Kettering, Diplomat, Habitat for Humanity, and Communities First, Inc. pledged to match the grant with another $15,000.

- Mayor Walling and the Flint/Genesee Green & Healthy Homes Initiative (GHHI), have been awarded $100,000 from the Lead Safe for Kids Sake Grant Competition to increase lead abatement, coordinate with related programs, and help Flint leverage local, federal and other funds to build a sustainable green and healthy homes initiative in Flint, as stated in the City of Flint's new Master Plan.

Public Safety

- A data-driven public safety study to assess the operations of the City's Police and Fire Departments began in May 2014 utilizing the services of the Center for Public Safety Management. This report is due in October 2014 and will be used to evaluate both departments' organization and staffing.

Police Department

- Chief James Tolbert has evaluated the operations of the Flint Police Department and has formulated several new crime fighting initiatives. Included in these initiatives are the new program to target the root causes of criminal behavior through the Area Crime Team (A.C.T.), the Arson Investigative Team and an expansion of the Lifeline Regional Crime Intervention Strategy.

- On April 1, 2014 several social media and internet based information sharing programs were introduced to the community. Through Flint Police Department's

new blog which can be accessed through http://cityofflintpd.blogspot.com/ links are provided to the new crime mapping webpage as well as Facebook and Twitter pages.

- Crimemapping.com is an easy to use tool which can pinpoint crimes on a map by type, date range, address or radius of an area and even the reporting police agency. Other services such as the COPLOGIC online reporting and calling Crimestoppers at 1-800-SPEAK-UP are complemented by these new tools.

- The City reports that Part I violent crimes were down 15.7% for the first six months of 2014 vs. the same period of 2013. Part I violent crimes include murder, rape, aggravated assault and robbery. In particular, homicide is down 38.1% and the clearance rate on 2014 homicides is 85%.
- The City continues to receive patrol assistance and detective assistance from Michigan State Police. Patrol assistance is a crime-deterrent and increases traffic safety compliance. The detective assistance has increased the capacity for investigations within the Flint Police Department.

Lock-up

- The Flint Lock-up (72 hour holding facility) is available to all Genesee County police agencies. The State Legislature has approved funding for an additional year of operation.

9-1-1 Operation

- In June 2014 the City responded favorably to a request to continue discussions with the Genesee County 9-1-1 Consortium to pursue a reconsolidation of the 9-1-1 systems.

- Cooperative work with the Genesee County 9-1-1 Consortium continues with the evaluation of a new phone system in preparation for the next generation 9-1-1 system.

Fire Department

- On April 7, 2014 the City was notified that FEMA denied a SAFER grant request to fully fund 39 firefighters. The City plans to support approximately 20 firefighters using the Police and Fire Operations millage; the balance will be reduced by attrition before December 2014.

- The City received a new fire truck in June 2014. The truck was purchased using CDBG money; it will be housed at the Pierson Rd. fire station.

- An evaluation of year over year fire calls for service shows a 58% decrease in total calls (1862 - 2014 YTD vs 4441 - 2013 YTD). Reasons for this decrease include: increased demolition activity on abandoned structures; continuous Firefighter Door-to-Door campaign educating residents; 9-1-1 use of better call

screening techniques – results in better equipment and personnel utilization; increased reliance on County EMS response, as planned.

Emergency Manager's Conclusions

Significant work has been accomplished to stabilize the financial situation of the City of Flint. The entire organization has been restructured to reflect a smaller, leaner government operation. Services which were routinely provided are being inspected to determine if they should continue and if so, in what format. Technology solutions which can increase efficiencies are being implemented.

The many improvements to-date and those represented in the Strategic Plan have been based on data-driven management plans. The approval of the KWA participation, water and sewer rates, capital improvements, departments' staffing and priorities are all based on the use of rational data analysis. The collection, analysis, and then utilization of data concentrates the use of personnel and other assets where the most beneficial results can be expected.

I acknowledge that substantial progress has been made, however the City is still experiencing an on-going financial emergency. Resolution of the financial emergency will not be complete without providing a basic framework for, and implementation of, an objective model for the organization to follow.

A sustainable municipal organization incorporates the utilization of best practices financially, structures a governance model which clearly delineates between legislative, policy, and administrative responsibilities, and develops a management plan to provide services to residents in a consistent, reliable manner.

The 7 Point Transition Management Plan which I have developed provides the roadmap to resolve the financial emergency and to achieve sustainability for the City of Flint.

For two years, FY13 and FY14, the goal of containing overspending has been achieved. The city must continuously function within a balanced budget, eliminate the accumulated deficit and further reduce the legacy and pension costs. Projections through 2019 demonstrate Flint's continuing challenges. Projecting current revenues and expenses into the future shows a continuing gap of $2 to $4 million annually.

Stable revenue is necessary in order for this City, and most other cities in Michigan, to continue to avoid a bankruptcy situation. We have asked our residents to accept a significant 6 mill Police and Fire Protection Millage; and they have done so. We have imposed a street lighting assessment, a waste collection fee and significant water and sewer rate increases. However, our residents have not enjoyed increasing services, increasing property valuations or increasing employment opportunities.

As noted previously, there are very few additional revenue options. We are approaching the limit of the City's borrowing capability. Capital improvement funds are drained and

the property tax millage rate in within .1 mill of maximum. State Revenue Sharing has increased but minimally and is now tied to EVIP and C-GAP competitive granting. We have made a request through our State Legislative representatives and the State Treasurer to push legislation to allow City voters the opportunity to decide to increase the income tax. This action could generate $7 million annually and would eliminate the City's structural deficit. A bill has been introduced but has not been acted upon.

If, by the beginning of FY17 the City of Flint does not receive some relief from retiree health care costs, either in the form of reduced city expenditures or additional revenues, it is unlikely that the City will be able to provide even the most basic level of city services. That will force the City to consider the alternative we have all worked diligently to avoid - bankruptcy.

I do not recommend beginning the transition back to the Mayor/Council management of the City at this time. However, I expect the overall situation to become much clearer in the next six to nine months, given the plans and organizational changes which have been put in place. The City still has critical on-going budgeting issues. There has been action on several sections of the 7 Point Transition Management Plan, but more needs to be completed. Also, the City Council is still adjusting to a new committee structure and Council meeting management.

Flint has twice been placed in the hands of a State appointed emergency manager. A third failure should be avoided at all costs. The Blue Ribbon Committee on Governance, which I appointed in January 2014, is completing their evaluation of governance revisions needed in the City. I expect to receive their report later this month. I feel that this is a key step in the City's preparation to successfully manage a fiscally sound city.

I feel strongly that it is incumbent upon me to make sure that the city reaches it goal of sustained financial solvency. The financial emergency is not fully resolved until the long-term sustainable structure is secured.

Another update of this report is expected to be presented in October 2014 as required by P.A. 436. Other updates will be provided as appropriate.

Respectfully submitted,

Darnell Earley, ICMA-CM, MPA
Emergency Manager
Flint, MI

Section Separator

(c) **A description of each loan sought, approved, or disapproved during the reporting period that has a cumulative value of $5000 or more and the proposed use of the funds.**

The City of Flint has not sought, approved or disapproved any loan during the reporting period of April 8, 2014 through July 8, 2014. However, as a partner in the Karegnondi Water Authority, we are in the market for a 30% share of a $220 million bond sale.

EM SUBMISSION NO.: EME 2362014

PRESENTED: 4-11-14

ADOPTED: 4-17-14

BY THE EMERGENCY MANAGER:

RESOLUTION APPROVING THE TEMPORARY APPOINTMENT OF CONCEPION DAVILA TO THE POSITION OF EXECUTIVE SECRETARY IN THE HUMAN RESOURCES AND LABOR REALTIONS DEPARTMENT

Pursuant to the authority granted the Emergency Manager by Public Act 436, Concepion Davila shall be employed by the City of Flint in the Human Resources and Labor Relations Department performing duties relative to complex secretarial and technical functions related to the personnel operations of the City. In order to provide temporary support to the Director of Human Resources and Labor Relations, the Emergency Manager has determined that it would be advantageous for the City to appoint Concepion Davila as the Executive Secretary in the Human Resources and Labor Relations Department.

Mrs. Davila possesses the necessary knowledge and experience, and is best suited to assist the Human Resources and Labor Relations Department; and

Compensation shall be at the rate of $15.00 per hour budgeted and funded from the Human Resources and Labor Relations budget line item 101-270.100-702.000 - Wages and Salaries. Mrs. Davila shall be paid in bi-weekly installments and subject to customary withholdings and receive direct fringes of 10.49%. No other benefits shall be provided.

IT IS RESOLVED, that the Emergency Manager shall, on behalf of the City of Flint appoint Concepion Davila as the Executive Secretary. The agreed upon compensation is $15.00 per hour and subject to customary withholdings. Further Mrs. Davila's appointment in this capacity is subject to the parameters set forth above.

CITY OF FLINT
Position Description

Class Title:	Associate Planner	Job Code Number:	22A-C-205
Established:	May 10, 2011	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES: The Associate Planner will assist the Chief Planner in managing a comprehensive master planning process for the City of Flint. Primary duties will include staffing city entities involved in the planning process and serving as a liaison among city entities, consulting firms, and the Chief Planner's office. This position requires strong analytical, project management, and communication skills, including the ability to provide critical feedback on the substantive work of developing the plan, facilitate and manage group processes, and communicate clearly among multiple stakeholder groups both in writing and orally. The position will also involve research and data collection and analysis. Activities will be performed under the supervision of the Chief Planner.

SUPERVISION RECEIVED:
Works under the general supervision of the Chief Planner who gives administrative guidance and instruction.

SUPERVISION EXERCISED:
None

ESSENTIAL DUTIES AND RESPONSIBILITIES:

1. Provides staff support to local governmental units and/or consultant teams as assigned, including: coordination and facilitation of meetings; recording minutes of meeting discussions; seeking and compiling information and data, as directed; preparation of documents that communicate information in a clear and concise manner.
2. Communicates regularly with Chief Planner regarding day-to-day duties and to enable effective coordination of the planning process across various units.
3. Attends meetings and makes presentations to various community and governmental groups on work-related activities.
4. Prepares written reports as necessary.

MINIMUM ENTRANCE REQUIREMENTS:

1. Bachelor's degree in Planning, Community Development, Urban Studies, Resource Development, or a related field; Master's degree is preferred.

   – OR –

   Bachelor's degree and two (2) years' professional planning experience in a planning office, private sector, or non-profit organization that primarily provides services to the public sector.
2. Knowledge of urban planning principles and practice.
3. Understanding of form-based zoning codes.
4. Knowledge of social, economic, and environmental issues facing Flint and similar post industrial cities.
5. Ability to communicate effectively both orally and in writing.

MINIMUM ENTRANCE REQUIREMENTS (Cont'd):

6. Ability to interpret and follow complex oral and written directions.
7. Ability to manage meetings among multiple stakeholders with divergent goals.
8. Knowledge of basic research techniques and reference sources.
9. Ability to read maps and other graphic materials.
10. Knowledge of word processing, Excel, and PowerPoint software.
11. Familiarity with Geographical Information Systems (GIS) mapping software is highly desirable.

NECESSARY SPECIAL REQUIREMENT(S):

* Requires the ability to travel to community meetings.

PHYSICAL DEMANDS:

While performing the duties of this job, the employee is frequently required to sit and talk or hear. The employee is occasionally required to walk; use hands to finger, handle, or feel objects, tools, or controls; and reach with hands and arms. The employee must occasionally lift and/or move up to 10 pounds. Specific vision abilities required by this job include close vision and the ability to adjust focus.

ADOPTED: 3-14-14

BY THE EMERGENCY FINANCIAL MANAGER:

RESOLUTION TO EMPLOY THE SERVICES OF CHRISTOPHER JONES

Pursuant to the authority granted the Emergency Manager by Public Act 436, Christopher Jones shall be employed by the City of Flint in the Community Development Department – Building Safety Inspections Division performing assignments related to the coordination of the Demolition Program. Mr. Jones's employment with the City of Flint shall be at the will of the Director of Planning and Development until such time as it is determined that his employment shall cease or until the grant funding is no longer available; and

Mr. Jones holds the knowledge and expertise in grant programs, understanding of grant processing procedures and is best suited to assist in meeting grant deadlines; and

Mr. Jones shall be compensated at an hourly rate of $18.00 per hour budgeted and funded through grants in the FY13-14 BSI Demolition Program from account CDBG (274-748.150-702.000) on a bi-weekly basis, subject to customary withholdings (FICA taxes, etc.). Deduction from line item would depend on what grant is being worked on during the specific pay period; and

Mr. Jones shall receive fringe benefits at a rate of 10.49% of wages coming from line item "Other-departmental Fringes." No other benefits shall be provided.

IT IS RESOLVED that the Emergency Manager shall, on behalf of the City of Flint, appoint Christopher Jones under the terms and conditions stated above. Compensation shall be drawn from appropriated funds in the respective budgets according to work performed.

APPROVED AS TO FORM:

Peter M. Bade, Chief Legal Officer

APPROVED AS TO FINANCE:

Gerald Ambrose, Finance Director

EM DISPOSITION:

ENACT ✓ **REFER TO COUNCIL**_____ **FAIL**_____

DATED: 3-14-14

RESOLUTION STAFF REVIEW FORM

DATE: March 6, 2014

Agenda Item Title: Resolution to Employ the Services of Christopher Jones

Prepared By: Matthew Williams, Associate Planner

Background/Summary of Proposed Action:
Christopher Jones employment is vital to replace an employee who is leaving this position. Mr. Jones holds the knowledge and expertise in grant programs, understanding of grant processing procedures and is best suited to assist in meeting grant deadlines.

Mr. Jones shall be employed by the City of Flint in the Community Development Department -Building Safety Inspections Division performing assignments related to the coordination of the Demolition Program.

In order to provide continuity of services, the Emergency Manager has determined that it would be advantageous for the City to employ Christopher Jones under the terms and conditions stated above.

Financial Implications:
This position is budgeted and funded through grants in the FY'13-'14 BSI Demolition Program from CDBG account (274-748.150-702.000). Mr. Jones shall be compensated at an hourly rate of $18.00 to include mandatory statutory benefits (FICA taxes) from various grant-funded sources, as identified in the respective budgets according to the work performed. Mr. Jones shall be paid in biweekly installments consistent with established written policies and procedures of the City of Flint and subject to customary withholdings.

Budgeted Expenditure: Yes __X__ No _____ **Please explain, if no:** _____

Pre-encumbered: Yes __X__ No _____ Funding available in the FY '14 budget from the various funding allocations to be distributed in accordance with the approved budget.

Staff Recommendation:
The Director of Department of Planning and Development/Chief Planning Officer recommends approval of this resolution.

Staff Person: for Matthew Williams

BY THE EMERGENCY MANAGER:

RESOLUTION TO EMPLOY THE SERVICES OF CALIX MARTINEZ AS A TEMPORARY PLANNING & GIS ASSISTANT

Pursuant to the authority granted the Emergency Manager by Public Act 72, Calix Martinez shall be employed by the City of Flint Planning and Development Department performing assignments related to geographic information systems while providing support to the master plan implementation process. Mr. Martinez's employment with the City of Flint shall be at the will of the Director of Planning and Development until such time as she determines that his employment shall cease or until the grant funding is no longer available. Funding has been identified and approved from the HUD Community Challenge Master Plan grant (Grant No. CCPMI0013-10)

Calix Martinez shall be compensated at a rate of $17.00 per hour - gross, budgeted and funded through the HUD Community Challenge Master Plan Grant (Account #296-690.400-702.000), while receiving fringe benefits at a rate of 10.49% of wages, coming from line item "Other Fringes" (Account #296-690.400-719.100). No other benefits shall be provided.

IT IS RESOLVED, that the Emergency Manager shall, on behalf of the City of Flint, appoint Calix Martinez under the terms and conditions stated above.

DATED: 4-28-14

RESOLUTION STAFF REVIEW FORM

DATE: **April 17th, 2014**

Agenda Item Title: Resolution to Employ the Services of Calix Martinez as temporary Planning & GIS Assistant

Prepared By: Kevin Schronce, Associate Planner

Background/Summary of Proposed Action:
Given the departure by an Associate Planner, planning staff is looking to secure immediate temporary support for the continuation of master plan development and plan implementation. Primary support is needed in GIS mapping and database management, with additional support also being required for master plan implementation project management.

The HUD Community Challenge Master Plan grant (Grant No. CCPMI0013-10) has available resources in the direct wages line item (Account #296-690.400-702.100), and will be active until June 30, 2014. At this time, temporary employment will cease unless additional funds have been identified.

Assistance is needed with basic mapping tasks including but not limited to: creating polygon topologies; conducting attribute updates and preparing visually appealing custom maps; geodatabase design, data classification and organization; and knowledge of spatial analysis tools. Calix Martinez has been identified to fill this temporary role and has previously served as a GIS/Master Plan intern and provides familiarity and understanding of on-going planning operations.

The GIS and Planning Assistant will work no more than 40 hours per week and would not be paid benefits. A wage of $17.00 per hour has been allocated for this position with fringe benefits at a rate of 10.49%, paid in biweekly installments consistent with established written policies and procedures of the City of Flint. Calix's pay rate should be $17.00 per hour - gross.

Financial Implications:
This position is budgeted and funded from the HUD Community Challenge Master Plan Grant (Grant No. CCPMI0013-10). Mr. Martinez shall be compensated at a rate of $17.00 per hour – gross - (Account #296-690.400-702.000) and receive fringe benefits at a rate of 10.49% of wages coming from line item "Other Fringes" (Account #296-690.400-719.100). No other benefits shall be provided.

Budgeted Expenditure: Yes __X__ No _____ **Please explain, if no:** _____

Pre-encumbered: Yes __X__ No _____ HUD Community Challenge Master Plan Grant (CCPMI0013-10)

CITY OF FLINT
Position Description

Class Title:	Associate Planner	Job Code Number:	22A-C-205
Established:	May 10, 2011	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES: The Associate Planner will assist the Chief Planner in managing a comprehensive master planning process for the City of Flint. Primary duties will include staffing city entities involved in the planning process and serving as a liaison among city entities, consulting firms, and the Chief Planner's office. This position requires strong analytical, project management, and communication skills, including the ability to provide critical feedback on the substantive work of developing the plan, facilitate and manage group processes, and communicate clearly among multiple stakeholder groups both in writing and orally. The position will also involve research and data collection and analysis. Activities will be performed under the supervision of the Chief Planner.

SUPERVISION RECEIVED:
Works under the general supervision of the Chief Planner who gives administrative guidance and instruction.

SUPERVISION EXERCISED:
None

ESSENTIAL DUTIES AND RESPONSIBILITIES:

1. Provides staff support to local governmental units and/or consultant teams as assigned, including: coordination and facilitation of meetings; recording minutes of meeting discussions; seeking and compiling information and data, as directed; preparation of documents that communicate information in a clear and concise manner.
2. Communicates regularly with Chief Planner regarding day-to-day duties and to enable effective coordination of the planning process across various units.
3. Attends meetings and makes presentations to various community and governmental groups on work-related activities.
4. Prepares written reports as necessary.

MINIMUM ENTRANCE REQUIREMENTS:

1. Bachelor's degree in Planning, Community Development, Urban Studies, Resource Development, or a related field; Master's degree is preferred.

   – OR –

   Bachelor's degree and two (2) years' professional planning experience in a planning office, private sector, or non-profit organization that primarily provides services to the public sector.
2. Knowledge of urban planning principles and practice.
3. Understanding of form-based zoning codes.
4. Knowledge of social, economic, and environmental issues facing Flint and similar post industrial cities.
5. Ability to communicate effectively both orally and in writing.

MINIMUM ENTRANCE REQUIREMENTS (Cont'd):

6. Ability to interpret and follow complex oral and written directions.
7. Ability to manage meetings among multiple stakeholders with divergent goals.
8. Knowledge of basic research techniques and reference sources.
9. Ability to read maps and other graphic materials.
10. Knowledge of word processing, Excel, and PowerPoint software.
11. Familiarity with Geographical Information Systems (GIS) mapping software is highly desirable.

NECESSARY SPECIAL REQUIREMENT(S):

* Requires the ability to travel to community meetings.

PHYSICAL DEMANDS:

While performing the duties of this job, the employee is frequently required to sit and talk or hear. The employee is occasionally required to walk; use hands to finger, handle, or feel objects, tools, or controls; and reach with hands and arms. RESOLUTION TO EMPLOY THE SERVICES OF CHRISTOPHER JONES

Pursuant to the authority granted the Emergency Manager by Public Act 436, Christopher Jones shall be employed by the City of Flint in the Community Development Department – Building Safety Inspections Division performing assignments related to the coordination of the Demolition Program. Mr. Jones's employment with the City of Flint shall be at the will of the Director of Planning and Development until such time as it is determined that his employment shall cease or until the grant funding is no longer available; and

Mr. Jones holds the knowledge and expertise in grant programs, understanding of grant processing procedures and is best suited to assist in meeting grant deadlines; and

Mr. Jones shall be compensated at an hourly rate of $18.00 per hour budgeted and funded through grants in the FY13-14 BSI Demolition Program from account CDBG (274-748.150-702.000) on a bi-weekly basis, subject to customary withholdings (FICA taxes, etc.). Deduction from line item would depend on what grant is being worked on during the specific pay period; and

Mr. Jones shall receive fringe benefits at a rate of 10.49% of wages coming from line item "Other-departmental Fringes." No other benefits shall be provided.

IT IS RESOLVED that the Emergency Manager shall, on behalf of the City of Flint, appoint Christopher Jones under the terms and conditions stated above. Compensation shall be drawn from appropriated funds in the respective budgets according to work performed.

APPROVED AS TO FORM:

Peter M. Bade, Chief Legal Officer

APPROVED AS TO FINANCE:

Gerald Ambrose, Finance Director

DATED: 3-14-14

RESOLUTION STAFF REVIEW FORM

DATE: March 6, 2014

Agenda Item Title: Resolution to Employ the Services of Christopher Jones

Prepared By: Matthew Williams, Associate Planner

Background/Summary of Proposed Action:
Christopher Jones employment is vital to replace an employee who is leaving this position. Mr. Jones holds the knowledge and expertise in grant programs, understanding of grant processing procedures and is best suited to assist in meeting grant deadlines.

Mr. Jones shall be employed by the City of Flint in the Community Development Department -Building Safety Inspections Division performing assignments related to the coordination of the Demolition Program.

In order to provide continuity of services, the Emergency Manager has determined that it would be advantageous for the City to employ Christopher Jones under the terms and conditions stated above.

Financial Implications:
This position is budgeted and funded through grants in the FY'13-'14 BSI Demolition Program from CDBG account (274-748.150-702.000). Mr. Jones shall be compensated at an hourly rate of $18.00 to include mandatory statutory benefits (FICA taxes) from various grant-funded sources, as identified in the respective budgets according to the work performed. Mr. Jones shall be paid in biweekly installments consistent with established written policies and procedures of the City of Flint and subject to customary withholdings.

Budgeted Expenditure: Yes __X__ No _____ **Please explain, if no:** _____

Pre-encumbered: Yes __X__ No _____ Funding available in the FY '14 budget from the various funding allocations to be distributed in accordance with the approved budget.

Staff Recommendation:
The Director of Department of Planning and Development/Chief Planning Officer recommends approval of this resolution.

Staff Person: for Matthew Williams
Megan Hunter, Chief Planning Officer, Director of Planning and Development

EM SUBMISSION NO.: EME248 2014

PRESENTED: 4-25-14

ADOPTED: 4-28-14

BY THE EMERGENCY MANAGER:

RESOLUTION TO EMPLOY THE SERVICES OF CALIX MARTINEZ AS A TEMPORARY PLANNING & GIS ASSISTANT

Pursuant to the authority granted the Emergency Manager by Public Act 72, Calix Martinez shall be employed by the City of Flint Planning and Development Department performing assignments related to geographic information systems while providing support to the master plan implementation process. Mr. Martinez's employment with the City of Flint shall be at the will of the Director of Planning and Development until such time as she determines that his employment shall cease or until the grant funding is no longer available. Funding has been identified and approved from the HUD Community Challenge Master Plan grant (Grant No. CCPMI0013-10)

Calix Martinez shall be compensated at a rate of $17.00 per hour - gross, budgeted and funded through the HUD Community Challenge Master Plan Grant (Account #296-690.400-702.000), while receiving fringe benefits at a rate of 10.49% of wages, coming from line item "Other Fringes" (Account #296-690.400-719.100). No other benefits shall be provided.

IT IS RESOLVED, that the Emergency Manager shall, on behalf of the City of Flint, appoint Calix Martinez under the terms and conditions stated above.

RESOLUTION STAFF REVIEW FORM

DATE: **April 17th, 2014**

Agenda Item Title: Resolution to Employ the Services of Calix Martinez as temporary Planning & GIS Assistant

Prepared By: Kevin Schronce, Associate Planner

Background/Summary of Proposed Action:
Given the departure by an Associate Planner, planning staff is looking to secure immediate temporary support for the continuation of master plan development and plan implementation. Primary support is needed in GIS mapping and database management, with additional support also being required for master plan implementation project management.

The HUD Community Challenge Master Plan grant (Grant No. CCPMI0013-10) has available resources in the direct wages line item (Account #296-690.400-702.100), and will be active until June 30, 2014. At this time, temporary employment will cease unless additional funds have been identified.

Assistance is needed with basic mapping tasks including but not limited to: creating polygon topologies; conducting attribute updates and preparing visually appealing custom maps; geodatabase design, data classification and organization; and knowledge of spatial analysis tools. Calix Martinez has been identified to fill this temporary role and has previously served as a GIS/Master Plan intern and provides familiarity and understanding of on-going planning operations.

The GIS and Planning Assistant will work no more than 40 hours per week and would not be paid benefits. A wage of $17.00 per hour has been allocated for this position with fringe benefits at a rate of 10.49%, paid in biweekly installments consistent with established written policies and procedures of the City of Flint. Calix's pay rate should be $17.00 per hour - gross.

Financial Implications:
This position is budgeted and funded from the HUD Community Challenge Master Plan Grant (Grant No. CCPMI0013-10). Mr. Martinez shall be compensated at a rate of $17.00 per hour – gross - (Account #296-690.400-702.000) and receive fringe benefits at a rate of 10.49% of wages coming from line item "Other Fringes" (Account #296-690.400-719.100). No other benefits shall be provided.

Budgeted Expenditure: Yes __X__ No _____ **Please explain, if no:** _____

Pre-encumbered: Yes __X__ No _____ HUD Community Challenge Master Plan Grant (CCPMI0013-10)

GENERAL STATEMENT OF DUTIES: Supervises sergeants, police officers, and civilians engaged in law enforcement duties and support activities; supervises and conducts police training programs; supervises community relations programs; supervises and participates in investigative activities and provides advice on investigations to sergeants and police officers. Performs relate work as required.

SUPERVISION RECEIVED: Works under the supervision of a Police Captain or an administrative employee of higher rank.

SUPERVISION EXERCISED: Exercises working supervision over sergeants, police officers and civilian employees engaged in patrol, traffic or investigative duties and support activates; acts as Officer-In-Charge in the absence of a Police Captain.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

1. Supervises the activities of a police patrol on an assigned shift including Sergeants, Police Officers and others; makes necessary inspections of employees on this shift and evaluates the quality of performance of employees under his/her supervision.
2. Supervises and directs, as assigned, a detail or squad of Sergeants in the control, detection, and elimination of crime or the investigation of the practices, associations and haunts of criminals; may investigate cases as required.
3. Supervises, when assigned to the patrol/traffic division, Sergeants in assuring that roll call is properly administered and that laws are enforced by officers under command in assignment of details and reassignment of personnel to meet emergencies and special events.
4. Reviews and assigns complaints; conducts, concludes and reviews results of investigations of crime or is assigned on a full/time basis, with responsibility for results to one ore more of the major details of criminal activity such as homicide, robbery, theft, arson, burglary, fraud, vice, automobile, juvenile or sexual offenses; reviews investigations with Prosecutor.
5. Supervises community policing activities. Develops programs to improve communication and understanding between the Police Department and various groups and individuals in the community.
6. Supervises sworn and civilian personnel engaged in support activities of the department.
7. Responsible for conducting investigations regarding Police Department Personnel and conducting inspections of all Police Department Bureaus.
8. Performs, as occasion demands, the duties of higher ranking officers in their absence and those of a deputy court clerk in the signing of complaints and warrants; serves on trial board within Police Department as required.
9. Assists outside police agencies in the investigation of crime and locating witnesses for crimes committed outside City of Flint; attends autopsies and confers with the Medical Examiner concerning questionable deaths. Arraigns prisoners; prepares reports and maintains records pertaining thereto.
10. Conducts surveillance and supervises the conduction of surveillance by subordinates.
11. Maintains and supervises the maintenance of modus operandi and criminal photograph files in such categories as burglary, arson, vice, hold-up, shoplifting and narcotics. Maintains an irregular patrol of the City in a police car as a means of inspecting the work of Police Officers and Sergeants on duty.
12. Assumes charge of police activities on scene in case of large fires, riots or other major emergencies.
13. Develops and is responsible for the implementation of in-service training programs, federally funded police projects, and research projects pertaining to equipment, uniforms, policies, procedures, training and grants; speaks before school groups and civic organizations on crime prevention.

MINIMUM ENTRANCE REQUIREMENTS:

A. Education equivalent to completion of high school.
B. Five (5) years of experience in the Flint Police Department immediately prior to the deadline date for filing for the promotional examination, at least (1) year of which must have been in the rank of Sergeant.
C. Thorough knowledge of the rules and regulations of the Police Department and of pertinent federal, state and city laws.
D. Thorough knowledge of modern approved principles, practices, and procedures in the investigation and prevention of crime and the apprehension of criminals.
E. Considerable knowledge of the rules relating to the admission of evidence in court procedures.
F. Ability to analyze involved police problems.
G. Ability to plan, assign and review varied police and investigating work.
H. Ability to deal courteously but firmly with the general public.
I. Ability to meet the physical, mental, and visual standards of the job.
J. Ability and willingness to work in a manner that will not needlessly endanger the safety to one's self, other persons and equipment.

LINE OF PROMOTION:

- Sergeant to Police Lieutenant

NECESSARY SPECIAL REQUIREMENT(S):

- Possession of a valid State of Michigan Driver's License.

PHYSICAL DEMANDS:

While performing the duties of this job, the employee is frequently required to sit and talk or hear. The employee is occasionally required to stand; walk; use hands to finger, handle or feel objects, tools or controls; reach with hands and arms; climb or balance; stoop, kneel, crouch or crawl; taste or smell.
The employee must occasionally lift and/or move more than 100 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and the ability to adjust focus.
The employee must be able to withstand exposure to traffic hazards continuously; withstand exposure to weather, wet conditions, high noise levels, hazardous materials and personal danger occasionally.
The employee may, at any time, be at risk of personal danger including, but not be limited to, the result of an intentional attack by people and/or animals as well as environmental hazards.
The employee frequently works in outside weather conditions. The employee occasionally works near moving mechanical parts; in high, precarious places; and with explosives and is occasionally exposed to wet and/or humid conditions, fumes or airborne particles, toxic or caustic chemicals, extreme cold, extreme heat and vibration.

(g) The salary and benefits of the emergency manager.

Salary and Benefits of the Emergency Manager:

Per the Emergency Manager's Contract Section 3. Compensation For Services Provided

3.1 Source of Payment. The State shall pay the compensation of the Emergency Manager for all services rendered under this Contract.

3.2 Salary. The Emergency Manager's salary for services rendered under this Contract shall be $180,000.00 per year. If this Contract is terminated after the Emergency Manager has provided services for a portion of the month, the Emergency Manager shall be entitled, for that portion of that month, to $15,000.00 multiplied by the proportion that the number of days of the month for which services were provided bears to the number of days of the whole month.

3.3 Payment for Services. The Emergency Manager shall be paid in installments consistent with the established written policies and procedures of the Michigan Department of Treasury. If requested by the State Treasurer, the Emergency Manager shall provide to the Michigan Department of Treasury additional information regarding services performed pursuant to the Contract.

3.4 Reimbursement for Actual and Necessary Expenses. The actual and necessary expenses of the Emergency Manager, including customary expenses related to travel, meals, and lodging which are incurred in connection with service to the City will be reimbursed by the City. The Emergency Manager shall provide original copies of all receipts for meals, lodging, and travel reimbursement with any request for reimbursement. Any reimbursement for expenses under this contract shall be reviewed and approved in writing by the City's Chief Financial Officer.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

CONTRACT FOR EMERGENCY MANAGER SERVICES

Rick Snyder, Governor of the State of Michigan (Governor) and the Michigan Department of Treasury retain and appoint Darnell Earley as the Emergency Manager (Emergency Manager) for the City of Flint (City) under Public Act 436 of 2012, the Local Financial Stability and Choice Act, MCL 141.1541 *et seq.* (the Act).

The Emergency Manager will provide services to the City pursuant to the terms and conditions set forth in this Contract and the Act.

The Emergency Manager's role is to remedy the financial distress of the City by requiring, within available resources, prudent fiscal management and an efficient provision of municipal services by exercising the necessary authority conferred herein to take appropriate action on behalf of the City and its residents. In accepting this appointment, the Emergency Manager agrees to leverage all the Emergency Manager's skills and abilities to accomplish these objectives on behalf of City residents.

1. PARTIES, PURPOSE, DUTIES, AND REPORTS

1.1 Parties. The parties to this Contract are the State of Michigan by the Department of Treasury and Darnell Earley.

1.2 Purpose. The parties to this Contract agree that Darnell Earley will act as the Emergency Manager for the City. The Emergency Manager's duties and responsibilities are delineated in the Act and include conducting all aspects of the operations of the City and establishing and implementing a written financial plan as required by Section 11 of the Act.

1.3 Duties. The Emergency Manager shall possess all the powers and duties authorized under the Act, including those specifically related to local governments. In addition, the Emergency Manager shall work cooperatively with the Office of the Governor and the State Treasurer. The Emergency Manager agrees to continue to keep these officials informed of major initiatives to be undertaken in furtherance of this Contract before their public announcement. The Emergency Manager shall seek the approval of the State Treasurer before entering into a new collective bargaining agreement.

1.4 Reports. The Emergency Manager shall file quarterly reports with the Department of Treasury beginning on January 15, 2014, for the immediately preceding quarter and shall file the first report required by Section 17 of the Act within six months of the Emergency Manager's appointment and every three months thereafter.

1.5 Communications. The Emergency Manager shall establish and maintain an appropriate protocol for ongoing communications with officials of the City, City residents, and the media. The communications protocol should include a variety of means, including personal interactions.

2. TERM OF CONTRACT

2.1 The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act.

2.2 Effective Date. This contract is effective on Tuesday October 8, 2013.

3. COMPENSATION FOR SERVICES PROVIDED

3.1 Source of Payment. The State shall pay the compensation of the Emergency Manager for all services rendered under this Contract.

3.2 Salary. The Emergency Manager's salary for services rendered under this Contract shall be $180,000.00 per year. If this Contract is terminated after the Emergency Manager has provided services for a portion of the month, the Emergency Manager shall be entitled, for that portion of that month, to $15,000.00 multiplied by the proportion that the number of days of the month for which services were provided bears to the number of days of the whole month.

3.3 Payment for Services. The Emergency Manager shall be paid in installments consistent with the established written policies and procedures of the Michigan Department of Treasury. If requested by the State Treasurer, the Emergency Manager shall provide to the Michigan Department of Treasury additional information regarding services performed pursuant to this Contract.

3.4 Reimbursement for Actual and Necessary Expenses. The actual and necessary expenses of the Emergency Manager, including customary expenses related to travel, meals, and lodging which are incurred in connection with service to the City will be reimbursed by the City. The Emergency Manager shall provide original copies of all receipts for meals, lodging, and travel reimbursement with any request for reimbursement. Any reimbursement for expenses under this contract shall be reviewed and approved in writing by the City's Chief Financial Officer.

4. ADDITIONAL STAFF AND CONSULTANT FEES

4.1 Staff. The Emergency Manager may, as provided in the Act, appoint additional staff as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional staff will be the obligation of the City. While authority to hire additional staff rests with the Emergency Manager, the Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before extending offers of employment for positions paying $50,000.00, or more, annually. The Emergency Manager shall issue a written employment contract to each individual hired pursuant to this Section, regardless of the compensation paid to that individual. The employment contract

issued pursuant to this Section shall, as of the date the individual is hired by the Emergency Manager, prohibit the individual from engaging in any other employment for remuneration without the express written approval of the Emergency Manager. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before approving outside employment for any individual. A breach of this Section shall be a material breach of this Contract.

4.2 Professional Assistance. The Emergency Manager may, as provided in the Act, secure professional assistance as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional professional assistance will be the obligation of the City. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before authorizing professional services contracts of $50,000.00, or more, per engagement or project. If a contract under this Section, or under Section 4.1, has a value of $50,000 or more, the Emergency Manager shall not execute the contract unless the contract is subject to competitive bidding by the Emergency Manager or the Emergency Manager receives prior written approval from the State Treasurer.

4.3 Security. The Emergency Manager will be entitled to receive security protection in connection with the Emergency Manager's duties under this Contract. Security personnel will be retained only upon the approval of the State Treasurer, or the designee of the State Treasurer, and only after consultation with the Director of the Michigan Department of State Police, or the designee of the Director of the Michigan Department of State Police. Payment of compensation for security personnel will be the obligation of the City.

5. REPRESENTATIONS

5.1 Qualifications. By signing this Contract, the Emergency Manager, represents that the Emergency Manager meets the minimum qualifications for appointment set forth in the Act. The Emergency Manager shall perform the duties of that office on a full-time basis, except as otherwise approved by the State Treasurer, and shall not accept any other employment or engage in any other activity for remuneration without the express written approval of the State Treasurer.

5.2 Conflict of Interest. The Emergency Manager represents and warrants that the Emergency Manager has no personal or financial interest, and will not acquire any such interest, that would conflict in any manner or degree with the performance of this Contract.

5.3 Non-competition. The Emergency Manager represents and warrants that the Emergency Manager is not subject to any non-disclosure, non-competition, or similar clause with current or prior clients or employers that will interfere with the performance of this Contract. The State will not be subject to any liability for any such claim.

5.4 Facilities and Personnel. The City will provide the Emergency Manager with proper facilities and personnel to perform the services and work required to be performed pursuant to this Contract.

5.5 Records. The Emergency Manager shall maintain complete records in accordance with

generally accepted accounting practices and sound business practices. This requirement applies to all information maintained or stored in the computer system of the Emergency Manager or computer system of the City. The State Treasurer and his designees shall have the right to inspect all records related to this Contract.

5.6 Non-Discrimination.

a) The Emergency Manager shall comply with Public Act 220 of 1976, the Persons with Disabilities Civil Rights Act, MCL 37.1101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against any employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of a disability that is unrelated to the individual's ability to perform the duties of a particular job or position. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

b) The Emergency Manager shall comply with Public Act 453 of 1976, the Elliott-Larsen Civil Rights Act, MCL 37.2101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against an employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of race, color, religion, national origin, age, sex, height, weight, or marital status. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

5.7 Unfair Labor Practices. The Emergency Manager shall not enter into a contract for the performance of any obligation imposed by this Contract with a subcontractor, manufacturer, or supplier whose name appears in the register prepared pursuant to Public Act 278 of 1980, MCL 423.322, of employers found in contempt of court for failure to correct unfair labor practices. The State may void this Contract if the Emergency Manager, or any subcontractor, manufacturer, or supplier of the Emergency Manager that is a party to a contract for the performance of any obligation imposed by this Contract, appears in the above mentioned register.

5.8 Independent Contractor. The relationship of the Emergency Manager to the State and to the City under this Contract is that of an independent contractor. Except as specifically provided in the Act, no liability, benefits, workers compensation rights or liabilities, insurance rights or liabilities, or any other rights or liabilities arising out of, or related to, a contract for hire, nor employer-employee relationship, shall arise, accrue, or be implied to either party under this Contract or to an agent, subcontractor, or employee of either party under this Contract, as a result of the performance of this Contract.

6. NOTICES

6.1 The State Treasurer is the designee for this Contract unless notice of another designa-

tion is provided by the Governor. All notices, correspondence, requests, inquiries, billing statements, and other documents mentioned in this Contract shall be directed to the attention of the State Treasurer, Andy Dillon, and to the following:

For the State:

Michigan Department of Treasury
Office of Legal Affairs
Richard H. Austin Building, 430 West Allegan Street
Lansing, Michigan 48922
Phone: (517) 373-3223

For the Emergency Manager:

Darnell Earley
Flint City Hall
1101 South Saginaw Street
Flint, Michigan 48502

7. LIMITATION UPON LIABILITY

7.1 The State. The State, the Governor, the State Treasurer, and all other State officials are not liable for any obligation of or claim against the City resulting from actions taken in accordance with the Act or this Contract.

7.2 The Emergency Manager. Pursuant to the Act, in performing this Contract the Emergency Manager is engaging in a governmental function and is immune from liability for any action taken which the Emergency Manager reasonably believes to be within the scope of the Emergency Manager's authority granted by the Act or by this Contract.

8. INSURANCE

8.1 General. The Emergency Manager may procure and maintain, at the expense of the City, health, worker's compensation, general liability, professional liability, and motor vehicle insurance for the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager as may be provided to elected officials, appointed officials, or employees of the City. The insurance procured and maintained by the Emergency Manager may extend to any claim, demand, or lawsuit asserted or costs recovered against the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager to the extent permitted by the Act.

8.2 Post-Contract. If, after the date that the service of the Emergency Manager is concluded, the Emergency Manager or any employee, agent, appointee, or contractor of the Emergency Manager is subject to a claim, demand, or lawsuit arising from an action taken during the service of the Emergency Manager, and not covered by a procured insurance policy, litigation expenses, including but not limited to attorney fees, payments in satisfaction of judgments, and

payments made in settlement as specified pursuant to the Act, shall be paid by the City. If such expenses are not paid by the City, they shall be treated as a debt owed to this State pursuant to section 17a(5) of Public Act 140 of 1971, the Glenn Steil State Revenue Sharing Act of 1971, MCL 141.917a.

8.3 Additional Insurance. If the City has purchased, or otherwise obtained, an errors and omissions policy, then the Emergency Manager may choose to be covered under such policy at the expense of the City.

8.4 Payment by City. All insurance required under this Contract shall be acquired at the expense of the City under valid and enforceable policies, issued by insurers of recognized responsibility. The State Treasurer reserves the right to reject as unacceptable any insurer.

9. TERMINATION OF CONTRACT AND APPOINTMENT

9.1 Termination by the State.

a) The State. The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act. The Governor has the power to rescind the appointment and terminate this Contract at any time, and without cause, by issuing a Notice of Termination to the Emergency Manager.

9.2 Termination Process. Upon receipt of a Notice of Termination, and except as otherwise directed, the Emergency Manager shall:

a) Cease work under this Contract upon the date and to the extent specified in the Notice of Termination;

b) Incur no costs beyond the date specified by the Notice of Termination;

c) Submit to the State Treasurer on the date the termination is effective all records, reports and documents as this State shall specify and carry out such directives as the State Treasurer may issue concerning the safeguarding and disposition of files and property; and

d) Submit within 30 calendar days a closing memorandum and final billing, which shall be paid within 30 days.

9.3 Termination by Emergency Manager. The Emergency Manager may terminate this Contract at any time, with or without cause, with 30 days written notice to the State Treasurer. Within 30 days of the Emergency Manager's final day of service, the Emergency Manager shall submit a closing memorandum and final billing, which shall be paid within 30 calendar days.

10. GENERAL PROVISIONS

10.1 Governing Law and Jurisdiction. This Contract shall be subject to, and construed according to, the laws of the State of Michigan, and no action shall be commenced against this State,

its agents, or employees for any matter whatsoever arising out of this Contract, in any court other than a Michigan State court.

10.2 No Waiver. A party's failure to insist on the strict performance of this Contract shall not constitute waiver of any breach of the Contract.

10.3 Other Debts. The Emergency Manager represents and warrants that the Emergency Manager is not, and will not become, in arrears on any contract, debt, or other obligation to the State of Michigan, including taxes.

10.4 Invalidity. If any provision of this Contract or its application to any persons or circumstances shall, to any extent, be determined by a court of competent jurisdiction to be invalid or unenforceable, the remainder of this Contract shall not be affected, and each remaining provision of this Contract shall be valid and enforceable to the fullest extent permitted by law.

10.5 Headings. Section headings contained in this Contract are for convenience only and shall not be used to interpret the scope or intent of this Contract.

10.6 Entire Agreement. This Contract represents the entire and exclusive agreement between the parties and supersedes all proposals or other prior agreements, oral or written, and all other communications between the parties.

10.7 Amendment. No Contract amendment will be effective and binding upon the parties to this Contract unless the amendment expressly makes reference to this Contract, is in writing, and is signed by duly authorized representatives of all parties and all the requisite State approvals are obtained.

10.8 Order of Priority. This Contract and the Act shall be read to be consistent one with the other. However, if a conflict is deemed to exist between the terms of this Contract and the Act, the Act shall supersede the terms of this Contract.

10.9 Counterparts. This Contract may be executed in separate counterparts, each of which when executed shall be deemed an original, but all of which when taken together shall constitute one and the same Contract.

IN WITNESS WHEREOF, the Governor and the Emergency Manager have signed and executed this Contract.

STATE OF MICHIGAN

Dated: 10/2/13

Rick Snyder, Governor

Dated: 10-3-13

Darnell Earley, Emergency Manager

Approved as to form and content pursuant to Section 9(3)(e) of Public Act 436 of 2012, the Local Financial Stability and Choice Act, MCL 141.1541 *et seq.*

CITY OF FLINT
Position Description

Class Title:	Rehabilitation Monitoring & Evaluation Specialist	Job Code Number:	25-C-172
Established:	January 16, 2003	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES: Monitor and coordinate CDBG funded rehabilitation; prepares specifications and reviews and approves work performed by contractors; insures compliance with HUD Rules and Regulations; performs related work as required.

SUPERVISION RECEIVED: Works under the general supervision of an administrative employee of higher level who reviews work for effectiveness and conformance to policies and procedures.

SUPERVISION EXERCISED: May exercise working supervision over a small number of employees engaged in rehabilitation work or clerical duties.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

1. Monitors the progress and contract compliance of contractors in the performance of rehabilitation work; performs periodic work-site inspections, prepares and reviews work progress schedules and reports from architects and contractors; initiates corrective action as required.
2. Prepares specifications and cost estimates for projects funded with Federal and State funds.
3. Assists in the bidding and is aware of procedures for contracted rehabilitation work, including assurance that necessary bid bonds, performance bonds, maintenance guarantees, warranties, certificates, tests and other issuances are furnished or performed.
4. Requisitions funds and monitors expenditures; ensures that all necessary budgetary forms and papers are processed relative to rehabilitation work.
5. Ensures compliance with HUD rules and regulations, monitors all phases of the rehabilitation process.
6. Advises affected staff, architects, engineers and other relevant parties regarding HUD policies and procedures and state and local laws, codes, ordinances and other regulations relevant to contracted rehabilitation work.

MINIMUM ENTRANCE REQUIREMENTS:

A. An Associate's degree from an accredited college with a major in business, construction management, public administration or other related field.
B. Two (2) years of paid experience in federal construction management, housing improvement or housing maintenance. Work experience may be substituted year-for-year for the education requirement.
C. Knowledge of the basic concepts of all the building and mechanical trades.
D. Knowledge of construction methods and of building materials and terminology.
E. Knowledge of HUD rules and regulations.
F. Ability to plan, lay out, write specifications and develop a cost estimate for housing rehabilitation work.
G. Ability to effectively meet and deal with homeowners/tenants, contractors, government officials, insurance agents, architects, engineers and others involved in rehabilitation and modernization work.
H. Ability to maintain records and prepare reports.

PHYSICAL DEMANDS:
While performing the duties of this job, the employee is frequently required to sit and talk or hear. The employee is occasionally required to walk; use hands to finger, handle or feel objects, tools or controls; and reach with hands and arms.
The employee must occasionally lift and/or move up to 25 pounds. Specific vision abilities required by this job include close vision and the ability to adjust focus. The noise level in the work environment is usually quiet.

Classification History

E. Ability to understand and follow oral and written instructions.
F. Ability to service and make minor repairs and adjustments to equipment used and to assist in major repair and overhaul of said equipment.
G. Ability to perform manual labor for extended periods under unfavorable climatic conditions.
H. Mechanical aptitude.
I. Working knowledge of the materials, methods, and practices of construction and maintenance.
J. Willingness to work in a safe manner that will not needlessly endanger the safety to one's self, other persons, and equipment.

NECESSARY SPECIAL REQUIREMENT(S):

- Possession of a Michigan Drivers License.
- Possession of a Commercial Drivers License Type A.

PHYSICAL DEMANDS:

While performing the duties of this job, the employee regularly works in outside weather conditions. The employee regularly works near moving mechanical parts and is exposed to inclement conditions, fumes or airborne particles, traffic, toxic or caustic chemicals, risk of electrical shock, and vibration. The employee is regularly required to reach with hands and arms and is required to stand and walk; and use hands to finger, handle, feel or operate objects, tools, or controls. The employee is occasionally required to sit; climb or balance; stoop, kneel, crouch, or crawl; and talk or hear.

The employee must frequently lift and/or move up to 25 pounds and occasionally lift and/or move more than 100 pounds. Specific vision abilities required by this job include close vision, and the ability to adjust focus.

Classification History:
Established: Personnel 1/07/93

The job description does not constitute an employment agreement between the employer and employee and is subject to change by the employer as the needs of the employer and requirements of the job change.

Lay Off Position

CITY OF FLINT
Position Description

Class Title:	Water Distribution Operator Trainee	Job Code Number:	16-N-035
Established:	June 26, 1961	Bargaining Unit:	Local 1600

GENERAL STATEMENT OF DUTIES: Under an on-the-job training program with close supervision installs, maintains and repairs water mains, valves, meters, hydrants and other appurtenances of the water supply system; performs related work as required. As the training progresses, supervision may be proportionately decreased and the responsibility of assignments increased. After completion of 2080 paid working hours, not including overtime, of on-the-job training, in the Water Service Center Division, the training period will be considered complete and the employee eligible for examination for promotion to Water Distribution Operator.

SUPERVISION RECEIVED: Works under the direct supervision of a foreman or employee of a higher grade who assigns work and checks for proper performance of duties.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

1. Installs water mains and new service lines; inserts tapping valves for new mains and service lines.
2. Lays and repairs water mains; repairs gate valves; installs, repairs and tests fire hydrants; constructs and repairs wells on line gates.
3. Installs service connections, including tapping water main and laying service pipe; connects and disconnects shut-off valves and stop box; digs and back-fills trenches; locates and digs up curb boxes as necessary; thaws frozen lines in winter.
4. Caulks joints, cuts pipe, cuts out broken pipe, puts on sleeves, shuts off gate valves, repairs stuffing boxes.
5. Installs and removes consumer water meters. Performs water turn on and off's.
6. Operates equipment such as air compressors, valve turning or other equipment associated with water distribution and repair.
7. Drives utility dump trucks or other vehicles; orders materials; makes out simple reports on work performed and materials used.
8. May work with one or more Water Service Center employees.
9. May clean and repack water meters and/or be assigned duties in the stockroom.
10. May be required to perform duties in Sewer Operations.

MINIMUM ENTRANCE REQUIREMENTS:

A. Ability to communicate orally and carry out oral instructions.
B. Skill in the use of the more common shop tools.
C. Ability to perform manual labor for extended periods under unfavorable climatic conditions or in mud or water.
D. Mechanical aptitude.
E. Ability to meet the physical, mental and visual standards of the job.
F. Ability and willingness to work in a manner that will not needlessly endanger the safety to one's self, other persons and equipment.
G. Underground excavation and heavy equipment experience preferred.

NECESSARY SPECIAL REQUIREMENT:

A. Possession and maintenance of a valid Driver's License.
B. Possession and maintenance of a valid CDL Class B Driver's License.
C. Progression in the training series to Senior Operator level is required to remain in the program. Must make continuous satisfactory progress in the training program including promotion to Operator within twelve (12) months to remain employed in the series. Operational knowledge and training progress will be assessed periodically by WSC supervision.
D. Employee must successfully complete six (6) month probationary period.

PHYSICAL DEMANDS:

While performing the duties of this job, the employee regularly works in outside weather conditions. The employee occasionally works near moving mechanical parts and is occasionally exposed to wet and/or humid conditions, fumes or airborne particles, traffic, toxic or caustic chemicals, risk of electrical shock, and vibration. The employee is occasionally required to stand; walk; use hands to finger, handle, feel or operate objects, tools, or controls; and reach with hands and arms. The employee is frequently required to sit; climb or balance; stoop, kneel, crouch, or crawl; talk or hear; and smell. The employee must frequently lift and/or move up to 50 pounds and occasionally lift and/or move up to 100 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception, and the ability to adjust focus.

Classification History

Allocated: CSC MTG. 05/15/61
Established: SC MTG. 06/26/61
Reallocated: CSC MTG. 12/12/69
Re-titled: CSC MTG. 07/02/74
Revised: Personnel 07/07/81, 03/17/82, 05/03/90, 02/01/01, 02/25/11
Revised, Reallocated, Retitled: Human Resources 11/08/2013
(Formerly Water Distribution Maintainer Trainee)

The job description does not constitute an employment agreement between the employer and employee and is subject to change by the employer as the needs of the employer and requirements of the job change.

SENIOR SEWAGE PUMPING STATION OPERATOR 19-N-25

GENERAL STATEMENT OF DUTIES: Operates, inspects, maintains, and repairs sewage pumping stations and lift stations; performs skilled maintenance and custodial tasks in and around the buildings and on the grounds; maintains logs, prepares written reports and takes readings; performs related work as required.

SUPERVISION RECEIVED: Works under the general supervision of a Water Pollution Control Facilities employee of higher grade who assigns and reviews work for conformance with established policies.

SUPERVISION EXERCISED: May exercise technical leadership over other employees of a lower classification engaged in lift station and pumping station operations, maintenance and custodial tasks.

EXAMPLES OF DUTIES:

1. In a lead role, operates, inspects, and performs preventative and corrective maintenance at sewage pumping and lift stations, including the associated buildings and grounds. Monitors control panels, Supervisory Control and Data Acquisition System, and other indicators to control flows and levels as required. Takes readings and maintains records and logs. Uses personal computers and other related equipment as part of performing daily duties.

2. Operates, inspects, maintains, lubricates and repairs as necessary where appropriate a variety of sewage pumping stations and lift stations and appurtenances associated with collection system, such as valves, sluice gates, weirs, motor operated controls, hoists, conveyors, augers, screws, pneumatic temperature and electric controls, belt and chain drive mechanisms, compressors, air dryers, meters regulators, instrumentation, circuit breakers, variable speed drives, grinders centrifugal pumps, limitorques, solenoids, check valves, bubbler tubes, sampling devices, heating and cooling devices, bar screens, odor control equipment and computer apparatus.

3. Responds to and troubleshoots lift station and pump station alarm conditions such as low wet well, high wet well, high bar screen differential, intruder alert and combustible gas in wet well.

4. Responds to and troubleshoots lift station and pump station equipment failures, including instrumentation, and when appropriate, contacts utility companies and/or designed personnel for repairs.

5. Transports, installs and operates portable generators where necessary.

6. Performs custodial tasks in and around the sewage pumping stations and lift stations such as cleaning, scrubbing, polishing, litter abatement, graffiti removal and window washing; mows lawns and removes snow from walks and driveways.

7. Prepares a variety of daily, weekly, monthly and annual reports on operational and maintenance activities; maintains operational and maintenance records; prepares work schedules; provides information for divisional budget such as equipment needs, material and repair requirements. Maintains overtime records and payroll records.

8. Participates in Water Pollution Control Facilities safety programs such as respiratory protection program, confined space entry program, process safety, hazardous waste operations and emergency response, laboratory hygiene, ladder safety, electrical lockout, asbestos awareness and right-to-know.

12. Interacts with the public regarding complaints and other issues as related to the operation and maintenance of the pump station and remote lift stations.

13. Maintains constant communication with Water Pollution Control by telephone, radio, or cellphone.

MINIMUM ENTRANCE REQUIREMENTS:

At least one (1) year of experience in the operations and maintenance of a wastewater treatment facility or related work.
Skill in the maintenance of mechanical equipment, buildings, and associated equipment.
Considerable knowledge of the functions, methods, operation, maintenance, and repair of a sewage pumping plant and its associated lift stations.
Considerable knowledge of the methods, materials, and tools used in performing semi-skilled to skilled maintenance and repair tasks.
Ability to work from blueprints, drawings, repair and operation manuals.

Lay Off Position

MINIMUM ENTRANCE REQUIREMENTS: (Cont)

Ability to maintain accurate records and detailed reports, using standard mathematical computations and formulas.
Ability to follow oral and written instructions.
Ability to perform routine, repetitive manual and technical tasks.
Ability to meet the physical, mental and visual standards of the the work.
Ability to deal courteously with the public.
Ability and willingness to work safely.

NECESSARY SPECIAL REQUIREMENTS:

Must possess and maintain a valid State of Michigan Drivers License during employment.
Must be willing to remain on stand-by as required.
Must obtain, within six (6) months of appointment, a Certificate of Completion for the following California State University, Sacramento correspondence courses: Operations and Maintenance of Wastewater Collection Systems, Volumes I & II.
Ability to obtain a fit test certification with respirator on an annual basis and maintain certification (facial hair and other articles must be maintained in a manner as to not interfere with the seal).
Ability to obtain and maintain a confined space entry attendant and entrant certification.
Ability to obtain and maintain the following hazardous waste operations and emergency response certification: first responder awareness, first responder operations and hazardous materials technician.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

ANALYSIS REPORT

TO: Edward Koryzno, Administrator; Office of Fiscal Responsibility

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Updated Flint Water System Status Assessment

DATE: February 21, 2013

Analysis Summary

On November 26, 2012, the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The overarching purpose of this study was to provide objective analyses to the State Treasurer and to Flint's Emergency Financial Manager (EFM) in order to secure potable drinking water for the City for the foreseeable future. The Office of Fiscal Responsibility (OFR) has been the lead office representing Treasury in this project.

On January 14, 2013, the State Treasurer requested responses to three questions: 1) Show the different, projected construction costs provided by TYJT and by the City of Flint/KWA. If these costs are different, explain why Treasury believes that the projects provided by Flint/KWA are acceptable; 2) identify the construction contingencies included in the TYJT and Flint/KWA projections; and 3) identify the options Flint will utilize in the event of a construction cost overrun or a delay in construction by KWA.

This has been a very difficult project to analyze because of the number of proposals to consider, differences of opinion about the conclusions of various engineering analyses that have been conducted, the fact that the analyses are comparing an existing, operational water system with one that has not yet been designed, and conditions within the City of Flint that make it difficult to assess their true water needs.

However, despite these difficulties, I believe that **KWA** presents the best future option to provide potable water for the City of Flint in the future. Long-term, KWA appears to be the cheaper option; the quality of water will almost certainly improve; Genesee County appears willing to assist the City in securing the financial resources for their portion of the project; this project could signify the beginning of better collaboration between the City of Flint and Genesee County; the KWA project has both political and popular support.

The following details how this recommendation was arrived at:

Background:

On December 21, 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, TYJT outlined 5 options that they had analyzed. These options were: 1) 100% water provision by the City of Flint Water Plant from its water source of the Flint River; 2) 100% provision of untreated Lake Huron Water by KWA (which would require treatment by the Flint Water Plant); 3) Effective 100% provision of treated drinking water by DWSD; 4) Provision of variable amounts of water from DWSD through the existing Potter & Baxter master meter (this option called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs); and 5) Provision of variable amounts of water from DWSD through the 72" Imlay City main (this option also called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs). Each of the blending options looked at Flint purchasing 4, 8, or 12 Million Gallons per Day (MGD) from DWSD and blending the balance in river water to achieve their maximum daily water needs of 18 MGD. The Imlay City option also provided for DWSD to sell the 72" main to the City of Flint, which would then become the operational and maintenance responsibility of Flint.

From the presentation of the preliminary report on December 21 to the submission of the final report to the State by TYJT on January 29, 2013, a number of developments occurred that made analysis and arriving at a final decision very difficult. They were:

- DWSD provided the City of Flint with at least two modified proposals to consider.
- TYJT and Rowe Professional Services Company (Rowe), the principal engineering firm for KWA (and Genesee County and the City of Flint), began disputing the others' conclusions and estimates regarding the construction of the KWA pipeline.
- The Flint EFM also disputed several of TYJT's conclusions. At a January 10, 2013, meeting with Treasury, the EFM also eliminated the 100% Water Plant option, using the Flint River as a 100% water source (which was cheapest option, as determined by TYJT).
- At a January 10, 2013 meeting, Flint officials eliminated all of the DWSD Imlay City options (which were the cheapest DWSD options) over concerns of owning and maintaining the 72" water main. They also eliminated consideration of any of the blending options originally proposed to DWSD, in part over concerns of added costs to soften the water. This effectively left the only options remaining under consideration by Flint to be the 100% DWSD option (which TYJT estimated to be more expensive than either of the KWA cost options) or joining KWA.

I believe that TYJT's analysis was hampered by the very short timeframe in which they attempted to conduct this analysis; which, may have led to be being more conservative in some of their estimates. I believe that some of the comparable systems used in their analysis may not have been the best options but given that KWA is still in the design phase, may represent the best selection of comparable. I also believe, for whatever reasons, that all of the information (from both DWSD and KWA) TYJT needed to effectively analyze these options was not provided to them.

Projected Construction Costs:

Based upon the provided construction estimates, TYJT estimates the KWA construction costs at **$357.6-million.** KWA estimates construction costs at **$272.4-million.** TYJT states in their final report that they received "limited information" from KWA, which might have resulted in more conservative estimates.

The primary differences between the two estimates center around 1) the cost of constructing the pumping stations; 2) land acquisition costs; 3) contingency costs (discussed below); 4) the provision of

construction management services; 5) design costs; and 6) redundant power at the pumping stations. Cost estimates were reasonably similar by both firms in other areas except for those noted above.

The cost of constructing the pumping stations is the biggest difference between the two estimates (**$24.6-million vs. $54.5-million**). TYJT stated that they believe KWA had not designed the pumping stations to the point where more accurate numbers could be achieved. TYJT also stated that their estimates were based on construction costs for a similar project in SE Michigan. KWA maintains that construction costs in Genesee County are much lower than in SE Michigan and that they have extensive experience in construction projects that will help keep costs in-line. KWA has also stated that the construction of the transmission pipeline will be done by multiple contractors in order to save time and allow more Michigan contractors to bid on the project.

TYJT added **$1.2-million** to their estimates for land and easement acquisition. KWA has stated that they have already secured nearly all of the land and easement accesses needed for this project. It is likely that TYJT was unaware of this when they developed their estimates.

TYJT also added 5% (**$14.4-million**) to their estimated base cost for construction management services. TYJT has stated that KWA has not taken these costs into account. KWA maintains that they have accounted for them and these costs will not be that high.

Nearly **$18-million** was added to TYJT's estimates for design costs and legal work for the design of both the pumping stations and the transmission pipeline. KWA maintains that they have accounted for these expenses.

TYJT also included **$1.3-million** in new costs for standby power at the pumping stations. KWA has made no provisions for redundant power at the pumping facilities. TYJT included the provision of redundant power in their estimates and notes that this is an industry standard. KWA officials have stated that the new water plant will have redundant power but that the pumping stations will not. The stated reasons for not including redundant power were cost containment, that Flint can use the Flint River as a backup water supply in the event of an extended power outage and that the KWA systems' water storage capacity will allow for 7 days of reserve supply. KWA has also stated that they will look at installing standby power later but can utilize portable generators at the pumping stations, if necessary.

If the additional costs are not included, then the TYJT and the KWA estimates are within 5% of each other. This may/may not be acceptable differences, but I believe the only way to verify the accuracy of either estimate would be to utilize a third engineering firm to independently review both TYJT and KWA's estimates.

Project Contingency:

Construction contingency costs, also known as Engineering, Land, Administration, and Contingency costs (ELAC) are summarized in an attached chart developed by Rowe for the City of Flint. KWA/Rowe estimates total construction at $272.4-million, with **$53.2-million** (25%) for ELAC contingencies. County Water and Sewer Administrator John O'Brien clarified at a January 28, 2013 meeting that there is a 15% contingency for unforeseen issues and 10% "extra." TYJT estimates total construction at $357.6-million, with **$107.3-million** (30%) for ELAC contingencies.

TYJT stated that they believe that 25% ELAC for a project of this scope that is (at the time of the final report) less than 15% designed is insufficient; hence the more conservative estimate. The 5% difference in ELAC costs adds nearly $40-million to the TYJT estimate.

Construction Cost Overrun/Construction Delay Options:

The OFR is not aware of any contingency plans developed by either KWA or the City of Flint to address construction cost overruns or significant construction delays. The final TYJT Water Supply Assessment Report does reference an October 31, 2012 letter from KWA to EFM Kurtz in which KWA anticipates a "worse-case scenario" of a 15% cost overrun and a one-year operational delay. KWA projects, under this scenario, that water from DWSD would be cheaper than KWA until 2020 as opposed to 2016; reducing projected cumulative savings from $19-million to $3.9-million by Year 8 (2020).

County Drain Commissioner Jeff Wright stated at a January 28 meeting that, if necessary, KWA has the authority to borrow more funds to complete the project in the event that delays or cost overruns necessitate the borrowing of more funds. However, Mr. O'Brien also stated that the January 28 meeting that KWA expects to purchase insurance policies to insure against delays to the project. It has been suggested that a one-year delay in completion could increase project costs by as much as $20-million. Further discussion with Mr. O'Brien reveals that KWA is looking into purchasing a "wrap-around" policy against construction delays and a builders' risk policy; the costs of which are still being determined by KWA. Drain Commission Wright also indicated at the January 28 meeting that if construction bids come-in significantly higher than estimated that KWA will likely reassess its approach to this project.

Conclusions:

It is likely that TYJT's estimates are overly conservative. Their own analysis concludes that KWA's projections are cheaper than their estimate of the KWA project. Even with a 15% cost overrun and a one-year delay (Worst-case scenario), KWA's estimate is still lower than TYJT. All estimates for KWA are cheaper than the 100% DWSD option (all other DWSD options were eliminated from consideration by the EFM).

That is not to say that the KWA estimates are without fault. KWA is a new venture and the "unknowns" exist at the initial phases of the project. KWA has the potential to be the cheaper, long-term cost for the City of Flint after the bond debt for construction is retired. Significant construction delays and/or cost overruns could greatly add to the cost of this project, which could add to the financial burden on Flint.

Realistically, the true cost for this project will likely be in the middle of the two estimates. The bids for construction of the KWA lake water intake will be opened on February 26, 2013, with the expectation of presenting a recommendation for bid award on March 20. Comparison of the bids and the estimates for intake construction could be an indicator of the more valid estimate.

There are also some additional factors that are outside of the three questions asked by the State Treasurer that influence a final recommendation on this project. The first is DWSD. DWSD is a "known" entity and the system is already in-place and in operation. DWSD may also be the cheaper option in the short term. However, selecting DWSD requires a 30-year commitment and the unknown aspect of future rate increases is very concerning to Flint officials. EFM Kurtz has stated that the City has experienced rate volatility over the history of its relationship with DWSD. According to the EFM, the average historical annual rate increase for the City is **6.7%**, but over the past 10-years the average annual rate increase has been **10.5%**.

All estimates show KWA being cheaper to Flint than DWSD after capital costs are retired. There also appears to be considerable local resistance to continuing a relationship with DWSD.

The upfront costs and the premium water charges assessed by DWSD while KWA is being constructed are of great concern to City officials. Flint officials have indicated that approximately **$3.5-million** in capital upgrades is needed for the Water Plant if the KWA option is selected. However, at a January 28,

2013 meeting, County Drain Commissioner Wright indicated that Genesee County will permit Flint to participate in its revenue bond sale for KWA for Flint's 30% share of capacity in the KWA System and for plant upgrades. Given Flint's current financial situation, were this participation to occur, it will be a positive development for the City because it is likely Flint would have a very difficult time issuing bonds on the strength of its own credit rating. The Drain Commissioner also indicated a willingness to discuss how KWA might mitigate the $5- to $6-million cost of the "premium" rate that would be charged to the City of Flint by DWSD for the City to purchase water while KWA was being constructed.

On February 4, 2013, a proposal was received from EFM Kurtz that outlined a two-phased approach to resolve the cost of this premium charge. First, the City will transfer six miles of 72" water main owned by the City that extends into Genesee County in lieu of the **$2.3-million** up-front payment the City would have to make for construction of the KWA system. The second phase involves KWA entering into negotiations with DWSD to purchase their 72" water main that runs from Imlay City to Genesee County and agreeing to purchase water from DWSD for redundant purposes in-exchange for DWSD eliminating the **15%** premium rate to Flint during the three-year KWA construction period.

Recommendation:

A recommendation is being made to support the City of Flint joining KWA. Given, the conservatism of TYJT's estimates and the fact that all KWA estimates are cheaper than the 100% DWSD option, KWA appears to be the logical choice. EFM Kurtz has stated that he believes the KWA option is the cheaper alternative over time. There appears to be public support for the KWA project and EFM Kurtz has also stated that he believes that the Flint Mayor and City Council will support the KWA Project.

Also, the potential inclusion of Flint in the issuance of revenue bonds by Genesee County and the potential for KWA to assist the City in mitigating some of the DWSD premium charges could greatly reduce Flint's financial concerns.

There also appears to be good cooperation between City and County officials in discussing this project and this level of engagement and dialogue between city and county officials because of this project could continue to grow and lead to additional areas of cooperation and collaboration.

If further analysis on this issue is needed, please let me know.

RESOLUTION STAFF REVIEW

DATE:
July 15, 2014

Agenda Item Title.
IDEXX

Prepared By:
Brent Wright, Supervisor

Background/Summary of Proposed Action:
The Flint Water Plant Laboratory is a state certified bacteriological lab. The Michigan Department of Environmental Quality (MDEQ) requires the City to perform a minimum of 100 bacteria samples on the water distribution system, along with an additional 14 samples within the Water Treatment Plant, because it is fully operational. The Lab has only been certified in using Colilert and Simplate media test for performing these samples by the State. Both of these media tests are only supplied by IDEXX. To become certified in using a different media test, the City staff would need to conduct side by side proficiency tests and become certified by the State, which can be very time consuming and costly. The City is requesting approval to procure these test media from the sole source provider of IDEXX

Financial Implications: Please approve the purchase order for IDEXX. The funds are available in the FY14 amended budget in an amount not to exceed $70,000.00

Budgeted Expenditure? Yes ☒ No☐ Please explain if no: N/A

Account No.: 591-545.200-726.000

Pre-encumbered? Yes ☒ No☐ Requisition # 140000602

Other Implications (i.e., collective bargaining): None

Staff Recommendation: Recommend Approval

Emergency Manager

July 14, 2014

Mr. R. Kevin Clinton, State Treasurer
Michigan Department of Treasury
Bureau of Local Government Services
4th floor Treasury building
430 West Allegan Street
Lansing, MI 48922

Dear Mr. Clinton:

I am attaching for your consideration the quarterly report of the Emergency Manager of the City of Flint as required by Section 9 (5) of P.A. 436 of 2012. The report details activities for the period of April 1, 2014 through June 30, 2014.

Respectfully submitted,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

QUARTERLY REPORT TO THE STATE TREASURER REGARDING THE FINANCIAL CONDITION OF THE CITY OF FLINT

July 15, 2014

This quarterly report covers the period from April 1, 2014 through June 30, 2014 and addresses the financial condition of the City of Flint.

Per P.A. 436 Section 9 (MCL141.1549) requires that you submit quarterly reports to the State Treasurer with respect to the financial condition of your local government, secondly, a copy to each state senator and state representative who represents your local government. In addition, each quarterly report shall be posted on the local government's website within 7 days after the report is submitted to the State Treasurer.

Status of the Financial Condition of the City of Flint
April 1, 2014 through June 30, 2014

Summary of FY14 Fourth Quarter and FY 14 Budget Status

As the city has reached the end of the fourth quarter of FY14, the budget continues to be in balance and the year is expected to end with approximately $3.8 million in revenue over expenses. One set of budget adjustments, with approval of Treasury was implemented in December 2013 and a second budget adjustment was made with approval by Treasury in April 2014. (Attachment A FY14 Revenue and Expense Report June 30, 2014)

Current Cash Flow

The City's cash flow has improved significantly from the $13 million cash on hand in December of 2011. Thirteen million dollars is less than one month's operating expenses. By comparison, the cash on hand on June 30, 2014 was in excess of $52 million. (Attachment B Cash Flow Comparisons)

FY 15 AND FY 16 Budget

The FY14 budget was developed within the context of a five year projection of revenues and expenses. This exercise pointed out the continuing challenge the City of Flint will have in achieving long term financial stability. The Finance Department and the Council Finance/Administration Committee completed the FY15-19 strategic plan and financial projections. The City Council has also adopted a Mission, Vision, Goals and Budget Priorities statement. This was incorporated into the FY 14/15 and FY 15/16 Budget document (Attachment C Final FY15 & FY16 Budget Document). Consulting firm Ernst & Young assisted the City with an update to the five year financial projections. The biennial budget was adopted on June 23, 2014 via EM Order #13.

Retiree Healthcare Lawsuit Status

As previously reported, the City's effort to restructure retiree healthcare was challenged by a group of retirees in a federal lawsuit, *Welch v City of Flint.* On January 3, 2014, the U.S. 6th Circuit Court of Appeals reinstated an injunction prohibiting the City from modifying retiree health care benefits. The City is aggressively litigating this matter, as it does not have the resources to afford the current level of healthcare coverage, and projected cost increases for the upcoming fiscal year are substantial. If the federal district court's decision is not reversed, the City will be in an extremely precarious financial position, with insufficient resources to meet basic functions.

On June 30, 2014 Judge Tarnow issued an order modifying in part his preliminary injunction barring the City from modifying retiree health care benefits. The Judge's order now permits the City to modify retiree health care as the City had proposed in a settlement proposal which was previously submitted to the Court.

While the details of the Judge's recent order are still being reviewed, and while the details of implementing the order are still being developed, it appears that the ruling will have a positive financial impact on the City, at least for the period while the litigation continues.

City of Flint 5-Year Financial Plan

Preface

This adopted budget for the City of Flint covers the FY15 and FY16 fiscal years which begin July 1, 2014 and July 1, 2015 respectively. Financial projections for the following 3 fiscal years are included as well.

This budget has been developed within the context of the City's recently adopted Master Plan, the Vision, Mission, and Goals for the City government as adopted by the City Council, and the Budget Priorities as adopted by the City Council. Accompanying this budget is a preliminary statement of objectives initially proposed to be accomplished during the two years.

Taken together, the budget and strategic plan will serve as a template to move the City government forward to become a well-managed, financially stable, and accountable organization focused on creating a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

However, this budget demonstrates the continuing financial challenges facing the City of Flint. Stagnant revenue growth in property tax and income tax revenues, coupled with significant increases in legacy costs, retiree health care in particular, create a significant gap between revenues and expenses which require increases in other revenues and decreases in City staffing and services including the possibility of adjustments in public safety services.

Unfortunately, the financial forecast for the next several years beyond FY16 show a continuing gap between projected revenues and expenses. Within the next few years, without significant means to identify and collect additional revenues, or to further reduce the cost base, the City of Flint will be extremely challenged to provide even the most basic of City services.

Over the last several weeks, this adopted budget has been reviewed by the City Council, which will also held a public hearing to receive citizen input. The Mayor and Council subsequently provided comments and recommendations pertaining to the budget to the Emergency Manager.

Background

The City of Flint has been in state receivership since December, 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, unrealistic budgeting, and unfunded liabilities for postemployment benefits. Significant progress has been made in addressing these financial issues, as the $19.1 million deficit at the end of FY12 had been reduced to $12.9 million at the end of FY13, cash position had improved, and the FY14 budget was realistically balanced, with further reduction of the deficit anticipated.

The FY14 budget was designed and implemented with the same goals in mind -- operating within the constraints of available revenues; restructuring operations and cost factors to enhance future financial stability, and continuing to reduce the remaining $12.9 million deficit. The FY14 budget was constructed with the specific intent of further reducing the deficit by a minimum of $1 million, by budgeting expenses at $1 million less than projected revenues. As of January 31, 2014, seven months into the FY14 year, revenues and expenses are on target.

In order to regain and maintain financial solvency, it is not only necessary to eliminate the remaining accumulated deficit but to have an adequate amount of reserves to protect the City in the event of unexpected financial losses. Planning to accomplish this requires a continual dedication of revenues over the next several years to eliminate the remaining deficit and establish an adequate reserve level. A draft deficit elimination plan to accomplish this is currently under review by the Michigan Department of Treasury.

Making progress to date has required hard decisions and sacrifices for all. The FY13 and FY14 budgets were balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Revenue increase included a 25 percent increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, establishment of a special assessment district for street lighting, and implementation of a fee sufficient to cover the cost of waste collection. Expenditure reductions included elimination of 20 percent of the City's workforce, compensation decreases equivalent to a 20 percent wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

The actions taken to-date to restructure healthcare benefits for current employees and retirees have also had a significant impact on reducing both current costs and long-term liabilities. The 20% reduction in the workforce required significant reorganizational activities focused on reducing current costs. Long term liabilities were reduced by eliminating traditional defined benefit pension programs for new employees in favor of hybrid plans; by moving the City's retirement system into the a state wide retirement system; by restructuring health insurance benefits for current employees and placing retirees into those same plans; and by eliminating the promise of retiree health care for new employees in favor of providing retiree medical savings accounts. Much of the positive financial result in FY13 came from these actions. The restructuring, which was implemented during the course of FY12, reduced the City's OPEB liabilities alone from nearly $900 million to less than $325 million as noted in the FY13 audit.

The efforts of the City to regain financial solvency have been aided by support from numerous Federal, State and private partners. State police troopers have been placed in the City to support local law enforcement efforts, and funds have been allocated to enhance prosecution activities and to operate the City's lock up. The Governor's proposed budget continues this support.

The steps taken to begin to restore the City to financial solvency have not been without conflict and changing circumstances. A significant legal challenge has been made to the decision to move retirees from their historical health insurance plans into the same plans offered current employees. This action resulted in an initial cost reduction in FY13 of $3.5 million to the City and imposed deductibles and co-pays on retirees. This challenge is currently pending in federal court. If the challenge is ultimately upheld, it will pose a significant challenge to the City in its efforts to regain and maintain financial and service solvency. Due to the stay imposed by the federal court, the City must increase its budget for retiree healthcare costs in the FY15 budget by $5 million and may even need to pay more as retirees seek reimbursement for past medical expenses. These healthcare expenses will continue to increase in subsequent years.

Legacy costs in total will continue to be a cost burden to the City of Flint. In FY 14, the City budgeted $30.2 million for its retiree healthcare and pension costs, an amount equal to 17% of its total revenues. The General Fund alone budgeted $16.4 million, an amount equal to 31% of its total revenues. By FY19, it is projected that the City will need to budget over $43 million, an amount equal to 23% of its total revenues. For the General Fund alone, the amount projected to be needed will exceed $21 million, an amount equal to 34% of General Fund revenues.

The future financial solvency of Flint will also be challenged by a continuing structural deficit. As part of the planning for future financial solvency, five year projections and a strategic plan were developed. This exercise indicated a significant financial challenge forthcoming in FY15, due to the current status of the retiree health care lawsuit and the ending of a major grant supporting firefighting resources. Future year projections also show a continuing gap between revenues and projections.

Finally, the most important challenge to be addressed in the City of Flint will be instituting structural changes in the organization of the City to foster financial solvency as a core value and to assure that future governance and management of the City is conducted in a financially responsible manner. To this end, the current Emergency Manager has created a Blue Ribbon Committee on Governance, charged with developing recommended changes to current ordinances, procedures, and the Charter. The recommendations of the Task Force are anticipated within six months.

Overview

The City of Flint has spent considerable time planning for the community's future through the comprehensive master plan and creating an organizational framework focused on the City's new vision, mission, and goals. The 2-Year budget has been developed in a balanced manner to best meet the needs of a variety of service areas and challenges.

However, challenges to changes in retiree healthcare and the loss of grant funds have required that a new service baseline be established; this also poses significant and immediate challenges to the City's financial viability. Current court rulings in regards to the retiree health care lawsuit have increased retiree health care expenses nearly $5 million in FY15, and the loss of the SAFER grant ($ 3.4 million) eliminates funding for 39 of the City's 65 firefighters.

The harsh winter increased the need to remove hundreds (if not thousands) of damaged and fallen trees throughout the city, and to repair damaged roads and sidewalks. The winter also placed additional stress on the antiquated city facilities as they faced water leaks and damage to walkways and sidewalks. Implementing the master plan, and continuing to eliminate blight will also require dedicated resources going forward.

The recently completed study of the water and sewer system finances also demonstrated a shortfall in revenues needed to operate this critical service and provide for necessary maintenance. As much as the high rates for providing water and sewer services pose significant financial challenges and community implications, the alternative of not addressing basic maintenance and adjustments based on guidance in the master plan is equally challenging.

These factors have a significant effect on the adopted staffing levels. Reductions in city staffing over the past two years have come almost exclusively from City services other than police, fire, and 911. As a result, those remaining city services are thinly staffed, and despite valiant efforts of dedicated employees, service levels have been reduced. In some cases, the reductions have been severe and counter-productive. For example, reductions in customer service at Treasury and staffing at Utilities has reduced capacity to effectively pursue collection of delinquent bills. Reductions in Information Technology have slowed the implementation of technology which can improve effective processing. Reductions in Human Resources have slowed the process of hiring employees. Reductions in Building Safety have slowed the process of conducting inspections and issuing permits, and have eliminated much in the way of code compliance efforts.

Therefore, balancing the budget in a financially sustainable way requires addressing the impact of these issues. It also requires that they are addressed within the context of the Mayor's and Council's stated budget priorities. The Council's stated priorities are:

- Maintaining police and fire staffing levels at the maximum level feasible
- Reducing the General Fund deficit by at least $1 million
- Continuing efforts to reduce blight, including demolition
- Hiring an experienced City Administrator
- Assure that capacity exists to implement the Master Plan
- Add capacity in the areas of Economic Development

- Fund years 1 & 2 of capital improvements identified in the Master Plan
- Improve street maintenance
- Establish parks partnerships
- Improve customer service through training and technology
- Increase removal of dead and diseased trees
- Evaluate ways to reduce water and sewer rates for constituents in the budget process

Balancing the budget responsibly in the context of these immediate and significant financial challenges, while addressing stated priorities, is a significantly difficult task. The unplanned addition of $5 million in expenses for increased retiree health care is a "Game-Changer" and seriously undermines the ability of the City government to move forward in becoming a positive force helping to create a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve quality of life.

As the development of the FY15 budget began, there was a significant gap between projected General Fund revenues and General Fund expenses alone. While some revenue sources indicated a slight increase over the current year, projected expenses were significantly above the current year. The expense increases are due primarily to a nearly $5 million increase in costs for retiree health care and an increase in the per person cost of pension contribution. In addition, there was recognition of the need to assure capacity to implement the Master Plan to continue addressing blight, to address increased costs of health care for current employees, and to address critically needed facility maintenance.

The budget presented here is balanced in a financially responsible manner, in that revenues and expenses meet. However, the consequence is that, where possible, revenues have been increased, and where necessary, expenses have been decreased. Whether the result is an acceptable result, in the context of the needs and the future of the City, is uncertain.

It is clear that proposed changes in service levels reflected in this budget are significant, and that at the same time the financial plan is being finalized within the confines of available revenues, considerable efforts will continue to mitigate the impacts. Continued efforts to achieve a satisfactory resolution of the retiree healthcare lawsuit, as well as to continue searching for additional sustainable funding, or to engage in mutually beneficial partnerships will continue. The changes necessary to achieve necessary balancing of revenues and expenses will be done in a managed way, not in a crisis response.

The financial projection for the years following FY15 and FY16 show the continuing challenge of a structural deficit. Without a means to identify a new significant revenue source or to sustain and even make further reductions in the City's cost base, such as retiree health care, Flint will be extremely challenged to provide even the most basic of City services in future years.

Highlights of the Adopted Budget

Costs to taxpayers are increased....

- Property tax levies remain unchanged
- Street lighting assessment increased to $71 in FY15 and $74 in FY16
- Solid Waste fee increased to $163 in FY15 and $169 in FY16
- Water and Sewer rates increased by a total of 6.5% in FY15 and 6% in FY16

Costs to City employees are increased....

- 20% premium share for health insurance implemented
- Premium contribution for non-Medicare eligible employees retiring after July 1, 2014 established
- 50% premium share for dental and vision insurance implemented
- Vacation and sick leave replaced with PTO, new accumulation caps established
- All new employees enrolled in hybrid pension plan
- All new employees enrolled in RMSA in lieu of promise of retiree health care

Legacy costs are increased significantly...

- General Fund costs for retiree health care are increased 25%, from $8 million to $10 million in FY15, increasing on an annual basis thereafter
- General Fund costs for retiree health care and pension in total are projected to increase from $16.4 million (31% of total revenues) in FY14 to $21.5 million (34% of total revenues) by FY19
- For all funds, total costs for retiree healthcare and pension are projected to increase from $30.4 million (or 17% of total revenues)in FY14 to $43.5 million (23% of total revenues) by FY19

City staffing is budgeted at 522 in FY15 and 523 in FY16.....

- Staffing is maintained in District Court, 911, Finance, Assessing, Transportation, IT, and Fleet
- Police Department – Total department staffing will be 115, with 7 vacant positions and 29 additional positions eliminated through attrition by end of FY15. Additionally, a recently offered COPS Hiring grant for six School Resource Officers will not be accepted. The next several months will be focused on mitigating the impact of this through reorganization with the assistance of consultants specialized in police and fire service; seeking additional funds; and obtaining assistance from law enforcement partners in order to achieve the best possible level of police response.
- Fire Department – Total department will be 75, with 19 positions eliminated as the SAFER grant expires. There are several vacant positions to be eliminated as part of this, with a goal of needed reduction no later than December, 2014. The next several months will be focused on mitigating the impact of this through reorganization and restructuring obtained with the assistance of consultants specialized in fire and police service.

- Planning and Development Department - Staffing is at 25, with adding 1 position. The department is being reorganized to assure capacity to implement the newly adopted Master Plan and continue efforts of blight management. Continued assistance in the form of grants and partnerships will be utilized, and general fund support for those activities is increased.
- Public Works Department - 6 positions are added to the Utilities division as the Water Treatment Plant begins operation as the primary source for Flint water; 1 position is added to Facilities to address critically needed maintenance issues.
- Finance and Administration Department - 3 positions are added to the Treasurer's Office to increase delinquent collections, with the added cost to be offset by additional revenues.
- Governance – As efforts to resolve the financial emergency progress, the position of City Administrator will be filled. Additionally, the salaries of Mayor and Council are partially restored as their role in governance increases.

Council budget priorities are addressed as follows:

- Maintaining police and fire staffing levels at the maximum level feasible – Due to revenue shortfall, increased retiree health care, and lack of other options, staffing is reduced. The Police and Fire millage funds will be used to fund 20 fire fighters and 26 police officers through FY15 and FY16. However, the accumulated millage funds will be fully used by the end of FY16.
- Reducing the General Fund deficit by at least $1 million – General Fund expenses are budgeted at $1 million less than revenues, and $800,000 in Capital Improvement Funds will be appropriated to the Utilities, thus reducing the General Funds debt to the Utility Fund by an additional $800,000. The plan is to continue this commitment for the next several years until the deficit is eliminated, and then the commitment will become one of building a financial reserve equal to 15% of General Fund revenues.
- Continuing efforts to reduce blight, including demolition – CDBG funds continue to be used for demolition and General Fund is assuming partial cost of the Blight Coordinator position
- Hiring an experienced City Administrator – Funds are included in budget.
- Assure that capacity exists to implement the Master Plan – General Fund is assuming partial cost of the Planning and Development Director, and Associate Planner, and a position of GIS technician is created, whose funding is shared among various city funds. Lead partners will be identified in each work area. Also, the Mayor has committed to overseeing the process of assuring that Master Plan implementation is an ongoing important part of city operations.
- Add capacity in the areas of Economic Development-The P&D Director is committed to defining a program for small business development, to be funded in FY16 through CDBG funds. Additionally, 20% of staff time of two DCED staffers and a portion of the Director's time will be devoted to economic development. Also, the Mayor has committed to leading the City's economic development efforts with partners and the assistance of this City staff.
- Fund years 1 & 2 of capital improvements identified in the Master Plan – the CIP portion of the Master Plan will be finalized in FY15, and the results will be considered for inclusion in the FY16 budget.

- Improve street maintenance – Due to minimal increases in state funding for streets, maintenance efforts will continue at the current levels. State financial support has been sought and obtained for some major street projects, in particular those related to economic development projects.

- Establish parks partnerships – The Planning and Development Department now has oversight of Parks, and as one of its strategic objectives, has committed to increase the number of parks partnerships in FY15 and FY16. Funding even the most basic of parks maintenance activities is increasingly challenging within the constraints of the parks millage funds. The goal is to eliminate General Fund support of these activities by the end of FY16.

- Improve customer service through training and technology– Human Resources, as it did in FY14, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. IT likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees. For example, the Treasury's customer service division is committed to specific customer service training for its front line employees.

- Increase removal of dead and diseased trees – Oversight of removal of trees within street right of ways is now the responsibility of the Transportation Division of Public Works, removal of trees within Parks is now the responsibility of Planning and Development; and removal of trees on other city properties is the responsibility of the Facilities Division of Public Works. Unfortunately, there is only a limited amount of funds available for these purposes, and the general effort will be focused on emergency responses. However, the Transportation Division is committed to attempting to secure assistance from other entities to increase capacity to address this problem.

- Evaluate ways to reduce water and sewer rates for constituents in the budget process-The results of the recent rate study confirm that it unlikely that water and sewer rates can be decreased at any time in the foreseeable future, and in fact, rates need to be increased. However, the actions taken to date to join KWA and to temporarily use the Flint River show that future rate increases will be less than had the City stayed with its prior provider.

Absent new sources of funding or reduced expenses in areas such as retiree healthcare, the commitments to progress and the staffing and service levels here are anticipated to continue for both FY15 and FY16. It is anticipated that the slight additional revenues in the General Fund for FY 16 will not be sufficient to cover increased costs, and it will be necessary to utilize additional funding from the police and fire millage to cover the costs of some police or fire positions in the General Fund in FY15. Depending on the rate of attrition in the Police Department, there should be sufficient remaining funds in the Police and Fire millage to avoid additional reductions in police or fire positions in FY16.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

June 3, 2014

Mr. Scott Kincaid, President
Members of the Flint City Council
1101 S. Saginaw St.
Flint, MI 48502

Dear Mr. Kincaid and Members of the Flint City Council:

Transmitted herewith are the final numbers for the biennial budget beginning FY14-15 and ending FY 15-16.

This budget is reflective of some of the recommended revisions offered following the Council's departmental budget hearings. All recommendations put forth by City Council were reviewed and thoroughly vetted at Treasury. The attached budget document was revised upwards by $90,000 and includes the details of the incorporated revisions.

The budget was revised to include your recommendations, along with those of the Mayor, which I felt could be implemented without adversely impacting the organizational structure, management, and the anticipated transition of the City of Flint to a Receivership Transition Advisory Board during the course of this spending plan.

Following the public hearing and consideration of the comments received, it is my intent to execute the order adopting the budget at the next Council meeting scheduled for June 23, 2014. At that time, Council will be able to officially receive the two-year budget consistent with PA 436 and the 7 Point Transition Management Plan.

You should also be aware that effective July 1, 2014, the day-to-day operations of the departments of Planning and Development, and Public Works will be shifted to Mayor Dayne Walling. The Mayor is currently putting together a plan for the allocation of resources within those departments. Similarly, Police Chief Tolbert and Fire Chief Cox are also putting together their work plans to utilize the final resource allocations for public safety.

The assistance and cooperation from you and the Council given to me, the Mayor, and the Administration in this process is greatly appreciated. I think we can agree that this is a responsible and realistic snapshot of the City's financial stability over the next two years, given its myriad financial challenges.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

CC: Dayne Walling, Mayor
Inez Brown, City Clerk
Administration

Proposed Changes to the City of Flint Proposed FY15 & FY16 Budget

On April 30, 2014, Emergency Manager Darnell Earley transmitted a proposed bi-annual budget to the Mayor and City Council, with a request that the Mayor and Council review and comment on the proposed budget. Accordingly, the City Council, acting as Committee of the Whole chaired by Finance Chair Josh Freeman, met five times to review the budget. At the conclusion, a set of recommendations was adopted and given to the Emergency Manager.

This document summarizes the key recommendations of the Council and Mayor and outlines changes made to the proposed budget as a result.

Summary of Council and Mayor Recommended Changes to FY15 & FY16 Proposed Budget

1. The recommendation of the Council identifies $1,824,510 in additional funds to be used by the Police Department:

- Specifically, $1 million of the $2.5 million in state appropriated revenues for the Lock-Up is proposed to be moved to the Police Budget.
- In addition, $1 million is identified by increasing the allocation in the CIP Fund for the purpose of reducing the deficit, thus freeing up the $1 million in the General Fund which has been identified for deficit reduction. Of that $1 million, $763,000) ($628,000 + $135,000) would be moved to the Police budget. Additionally, $61,510 is identified to be moved from the Finance Budget to the Police Budget.

2. The remaining funds from the proposed re-appropriation of the freed-up General Fund revenues ($237,000) would be used for the following:

- $50,000 - District Court
- $72,000 - City Clerk
- $50,000 - City Council Staff
- $45,000 – Additional Pay Raises for Council
- $10,000 – Brennen Center
- $10,000 – Hasselbring

3. Finally, there is a recommendation to eliminate funding for the Human Relations Commission ($22,547) and split those funds equally between Brennen Center and Hasselbring:

- Brennen - $11,274
- Hasselbring - $11,274

4. The Mayor has also made recommendations in other areas, including:

- Adding capacity to Economic Development by replacing the 20% of 2 DCED staff currently subsidized by the GF with CDBG funds and directing that staff to perform 100%

CDGB activities. The freed-up funds ($51,458) would then be used to contract for economic development services.

- Reduce DCED program staff by 1 FTE and utilize CDBG administrative funds for 50% of administrative staff support in Planning and Development
- Add 1 new FTE in Planning and Development dedicated to the new Business Licensing function
- Add to the Strategic Plan a key objective under Governance and Administration: "Respond to a minimum of 500 constituent services per month, including those formerly addressed by the Human Relations Commission staff."

Changes to the Proposed FY15 & FY16 Recommended Budget in response to Council and Mayor recommended changes

The changes proposed by the Mayor and Council have been reviewed, and changes made as considered appropriate within the context of maintaining a viable financial plan for the next two years. The proposed budget, as submitted to the Mayor and Council on April 30, 2014, will be revised as follows in response:

1. The Proposed Budget anticipates a reduction in public safety staffing of 36 officers and 19 firefighters. However, it also does not anticipate these reductions (other than vacancies occurring through attrition) until the comprehensive study of the police and fire departments is concluded. That study is to be completed prior to the end of 2014. At that time, depending on the study recommendations, a decision will be made as to the need for additional resources, and to the extent that funds in the General Fund which are currently targeted for deficit reduction can be used. Although the State will not agree to utilize funds appropriated for the operation of the Lock-Up to fund Flint police officers and firefighters, the Mayor and Emergency Manager will continue their efforts to obtain other state funding to support police and fire operations in Flint during this critical time.
2. The concern of the City Clerk, and supported by both the Council and the Mayor, of her inability to properly conduct the upcoming elections with the proposed staffing reduction, is acknowledged. Accordingly, the proposed budget is revised to continue FY14 budget level of staffing within the Clerk's Office. The business license position, originally moved to the Planning and Zoning Department in the FY15 and FY16 Proposed Budget, has been restored back to City Clerk's department. The new Business Licensing process is scheduled to be implemented by January 1, 2015; at which time, the responsibility for the process will be assumed by the Department of Planning and Development. Since the Clerk's Office staff will remain the same while reducing the responsibilities of the Clerks' Office, there should be adequate staff to conduct the elections and to provide additional support to the Council Office. Until such time as the

Business Licensing process is assumed by the Department of Planning and Development, the Clerk is authorized to increase the hours of the current part-time employee in the Council Office. $15,000 in temporary wages is added to the Council's budget for FY15.

3. The concern of the Council and the Mayor that financial support be continued to assist in the transition of the senior citizen programming at the Brennen Center and Hasselbring is acknowledged. The end goal is for there to be successful senior citizen programming at these locations, supported in their entirety by the County's senior citizen millage, which has been approved by voters within the City of Flint as well as the rest of Genesee County. Instead of adding additional funding to the FY15 and FY16 budgets, however, an amendment to the FY14 budget is being prepared to make a one-time appropriation to each center in the amount of $20,000, for a total expenditure of $40,000. The purpose of this appropriation is to support this transition.
4. The concern of the Council to add additional resources to the District Court is noted. However, during the presentation by the Court at its budget hearing, it became apparent that the proposed strategy of the Court to utilize part time employees may not be consistent with the requirement that temporary employees working in excess of 29 hours per week must be provided access to health care to the extent that full time employees are. Thus, additional funds in the amount of $40,000 is added to the Court's budget to address this potential problem.
5. The recommendation of the Mayor to add additional capacity to economic development as stated in #4 above is acknowledged. Additional resources for economic development was also a stated priority of the Council. The change recommended by the Mayor provides $50,000 in financial capacity, is revenue neutral, and is incorporated into the budget.
6. The recommendation of the Mayor with respect to reducing DCED staff by 1 FTE and redistributing the funds as noted above are also incorporated into the budget.
7. The recommendation of the Mayor to add one new FTE in Planning and Development dedicated to the new Business Licensing function is also acknowledged as being valuable in helping to assure that the new process is implemented aggressively and successfully. Accordingly, $64,000 for wages and fringes is added to the budget of Planning and Development for that purpose.
8. Finally, the recommendation of the Mayor to add an additional objective to the Governance and Administration section of the Strategic Plan is acknowledged and will be incorporated. Accordingly, while the Human Relations Commission may continue as a volunteer board, the proposed allocation is eliminated. As it has become apparent that the Human Resources Director is fully engaged with managing the Human Resources function, the portion of the Director's salary allocated to the HRC budget will be transferred to the Human Resources Budget.

Implementing the changes noted above require identifying $119,000 in FY15 General Fund appropriations and $104,000 in FY16 appropriations. The revenue and expense projections in the budget have been reviewed, and the necessary funds have been identified from the following sources:

FY15:

- $39,000 - reduction in audit costs
- $ 2,600 – net reduction in HRC budget
- $38,400 - additional projected revenue - income tax revenue
- $39,000 – additional projected revenue – delinquent income tax collections

FY16:

- $31,000 - reduction in audit costs
- $ 2,678 – net reduction in HRC budget
- $32,000 - additional projected revenue - income tax revenue
- $38,322 - additional projected revenue - delinquent income tax collections

Appreciation is extended to the Mayor, Council, and staff for the time and effort spent reviewing the proposed budget. The citizens of Flint will be better served by the changes made.

Proposed Budget FY15 and FY16 Technical Adjustments

1. Included the pension expense in the Office of the Clerk - $29,519

2. Removed wages and fringes for GIS Technician from Assessing Department because it was already budgeted in the Planning and Zoning Department - $60,518

3. Corrected the inclusion of all salaries, wages, and fringes in the Planning and Zoning department for all the approved positions - $123,596

4. Corrected Fund 202 FY15 and FY16 fund balance use. The indirect cost allocation was double reported in FY15. This was a $536,000 reduction in cost in FY15. In FY16, wages in administration was entered in error causing salaries to be overstated by $812,000. This correction was made.

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, and foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

ATTACHMENT D June 30, 2014 Quarterly Report

EMERGENCY MANAGER'S COMPLIANCE MONITORING REPORT

a) CONFIRM – That revenues recorded in the most recent quarterly financial statements are fairly stated in all material respects on a modified accrual basis of accounting, except that in the case of the water and sewer fund, revenues recorded in the most recent quarterly financial statements shall be fairly stated in all material respects on a full accrual basis of accounting.

b) CONFIRM – That expenditures recorded in the most recent quarterly financial statements are fairly stated in all material respects on a modified accrual basis of accounting, except that in the case of the water and sewer fund, expenditures recorded in the most recent quarterly financial statements shall be fairly stated in all material respects on a full accrual basis of accounting. Accounts payable, vouchers payable, and accrued payrolls are to be included in the determination of expenditures.

c) CONFIRM – That all appropriate inter-fund transactions have been recorded in the financial records of the City.

d) CONFIRM – That the City is in compliance with its budget for the fiscal year on a year-to-date basis and that the budget has been amended as required by law.

e) CONFIRM – That the reconciliation of bank accounts has been completed and appropriate adjusting journal entries have been made to the general ledger of the City. The City has completed bank reconciliations for major bank accounts up through May 2014.

f) CONFIRM – That remittance of payroll taxes, pension payments, 401(k) payments, debt payments, and taxes collected for other governmental units were completed on a timely basis.

g) CONFIRM – That cash flow reported for the most recent preceding month is fairly stated in all material respects.

h) CONFIRM – That overtime is properly disclosed and recorded in the most recent quarterly financial report of the City.

i) CONFIRM – That the originals of all source financial documents have been properly retained and preserved and that the City is in compliance with all other legal requirements, except to the extent specified in the report.

ANALYSIS REPORT – City of Flint – Section 9 Quarterly Report

DATE: July 18, 2014

TO: Randall Byrne, State Administrative Manager; Office of Fiscal Responsibility

FROM: Robert Widigan, Departmental Analyst; Office of Fiscal Responsibility

SUBJECT: City of Flint – July 2014 Section 9 Quarterly Report

---

Subject of Analysis:

Review of the Section 9 Quarterly Report submitted by the City of Flint Emergency Manager, Darnell Earley. The report details activities for the period of April 1, 2014 through June 30, 2014.

Analysis:

This report substantially complies with the requirements of the law. The following should be noted:

1. The budget continues to balance, and this fiscal year is expected to close with approximately $3.8M in revenue over expenses.
2. Cash on hand as of June 30, 2014 is in excess of $52M.

3. The biennial budget was adopted on June 23, 2014 through EM Order #13.
    - The biennial budget has a fiscal year (FY) 2019 projected total deficit of $46.4M.
    - Note: the adopted FY 2016 budget has a surplus of $3M, whereas the City projects a FY 2017 budget deficit of $9.3M. What is driving this deficit?

4. On June 30, 2014 Judge Tarnow granted the City to permission to modify retiree healthcare as previously requested in a settlement proposal submitted to the Court.
    - The City believes this ruling will have a positive financial impact on the City.

If additional information is desired, please let me know.

FLINT

Current Status Report as of June 3, 2014

Darnell Earley, Emergency Manager
Appointed October 6, 2013

Significant Actions/Issues

- Federal District Court Judge granted the Plaintiff's a TRO (six retirees challenged changes the EM made to healthcare coverage): the U.S. Court of Appeals approved the restraining order.
- New Police Chief, James Tolbert appointed September 2013.
- Water Plant placed into full time service.

Anticipated Exit: April 2015

- Eliminate City's structural deficit.
- Address City's unmet capital needs.
- Obtain a favorable decision in lawsuit challenging changes to retiree healthcare.
- Adopt a two-year budget including all contractual and employment agreements.
- Monitor completion of Karegnondi Water Authority project.

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Allen Park
Emergency Manager: Joyce Parker
Appointed: October 26, 2012
Anticipated Exit: September 2014

Recent Developments:
- Sale of Southfield Lease Properties to Time Equities for $12M expected to close during June 2014
- A $3.3M emergency loan application to pay debt service associated with Southfield Lease Property bonds and to pay outstanding MERS payment is expected to be considered by the Emergency Loan Board during June 2014

Significant Actions/Issues:
- A 10 year, 6.75 mill Public Safety Millage approved by voters on ?????
- Implemented a reduction of future OPEB liabilities in the amount of $????
- Litigation filed by retirees challenging EM's authority to reduce OPEB (Randy court date?)

Issues to Resolve before EM Exit:
- Complete bond tender offer
- Finalize compliance settlement with SEC
- Reduce pension liabilities and transfer pension from City to MERS

Detroit
Emergency Manager: Kevyn Orr
Appointed: March 14, 2013

Anticipated Exit: September 2014

Significant Actions/Issues:
- Kevyn Orr filed for Chapter 9 bankruptcy on July 18, 2013 and Federal Judge Rhodes ruled on December 3, 2013 the City is eligible.
- Kevyn Orr submitted plan of adjustment on February 21, 2014.

Flint
Emergency Manager: Darnell Earley
Appointed: November 28, 2013
Anticipated Exit: April 2015

Recent Developments:
- FY 14-15 Budget contains a reduction of 19 fire fighters and 36 police officers
- $1.1M FY 15 State appropriation to fund front line public safety positions
- EM proposal to City Council, pending State Treasurer approval, to impose collective bargaining agreement terms that will save the city $336K and long term projected savings of $4.3M
- Water plant placed into fulltime service durng ??? 2014 ending contractual relationship with DWSD
- $3.4M SAFER grant for fire fighter staffing expired during ?????

Significant Actions/Issues:
- Police Chief, James Tolbert appointed September 2013
- Federal District Court Judge granted plaintiff's a TRO (six retirees challenged modifications made by the EM to retiree healthcare coverage): the U.S. Court of Appeals approved the TRO. Annual increased cost to the city approximately $5M. (need date of decision???)
-

Issues to Resolve before EM Exit:
- Eliminate annual structural deficit projected at $1.7M for FY 17 and growing to $11.9M during FY 19
- Hire an experienced professional City Administrator
- Retiree Healthcare Litigation

Hamtramck
Emergency Manager: Cathy Square
Appointed: July 1, 2013
Anticipated Exit: July 2014

Recent Developments:
- A $2.1M emergency loan to resolve an equivalent liability to MERS is expected to be considered by the Emergency Loan Board during June 2014
- Retiree healthcare changes implemented during ? 2014

City of Flint Wednesday 9:00am Phone Conference Agenda

June 11, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD stats – homicides status
   b) FFD Vote
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update - Rich, Baird, H. Hollins**

3) **Lawsuits – Status, Issues**
   a) Kincaid v City of Flint – TRO has been denied.

   b) Retiree Lawsuit – Our attorneys filed a motion Friday, May 23, 2014 asking Judge Tarnow to reverse his decision on the injunction which is resulting in the additional $5 million in expenses in the upcoming budget, offset by significant reductions in police and fire staffing. A status conference has been scheduled for mid-June.

   c) Letters were sent last week via Registered Mail to pre-65 retirees because 40% did not respond to the requirement to enroll in health insurance.

4) **Financial Update**
   a) Budget revisions have been completed. Preparing EM Order to adopt 6/23/14. Also, as part of FY15, the day-today management of the Public Works Department and the Planning & Development Department will be handled by Mayor Walling.

   b) Preparing for close of the fiscal year 6/30/14. No surprises to report.

   c) Treasury financial support for FY15.

   d) Bid for Audit Services – see attached.

   e) Treasury has draft to impose FPOA contract; COF is awaiting response. This needs to be ready to go to City Council for the June 23rd meeting. Note also, AFSME Local 1600 voted to ratify new contract; a decision point is coming on Local 1799.

   f) EM is preparing to issue an Order approving the deficit elimination plan.

g) Treasury has been 3 weeks reviewing the EM Resolution for $250,000 to Ginosko for public areas landscaping at Smith Village. Can we get this moving?

5) **City Council Update**
   a) Public hearings on the biennial budget, the street lightening assessment were held on Monday, June 9, 2014. We did not hear any comments which will cause a revision to the proposed budget.

   b) The next monthly City Council meeting is scheduled for Monday, June 23, 2014 when the Council will officially receive the two year budget.

6) **Blue Ribbon Committee on Governance**
   a) Dr. Scorsone is writing the first draft of the report of the Blue Ribbon Committee's findings. The committee will meet to make any changes to the report at the end of June and expects to hold a public comment session in mid-July.

7) **Water Issues**
   a) River processed water continues to meet all DEQ standards.
   b) Pipe line sale – COF is waiting for corrected letter from Treasury approving sale.

8) **Other Items**

RE: Recommendation for Audit Firm

The Finance Department recently gave you a recommendation to retain the firm of Yeo and Yeo to conduct the City's audit for the five year period beginning with the FY14 audit. While three firms submitted proposals, only Plante Moran and Yeo& Yeo were considered for further evaluation. The third firm, Clark Schafer Hackett, was a firm from out of state, with no Michigan references. Plante Moran and Yeo & Yeo both have offices in the State of Michigan and in the Flint area.

Both firms are reputable, experienced with municipal governments in Michigan, and have a strong understanding of the City of Flint's financial conditions.

The analysis of the proposal submitted by Yeo and Yeo concluded their services would cost $689,000 over the five year period. The areas to be covered included the following:

City audit - $540,000

Single audit - $ 75,000

DDA – $ 37,000

EDC – $ 37,000

The analysis of the proposal submitted by Plante Moran concluded that their services would cost $766,766 for the same period. This total was based on the following:

City audit - $545,165

Single audit - $ 39,076 (base fee)

Single audit- $ 72,000 ($4,500 additional per major program,

(projected to be 16 programs over 5 years)

DDA - $ 60,860

EDC - $ 48,665

While the cost proposals from Yeo & Yeo and Plante Moran were very close for the City audit alone, the costs proposed for the Single Audit, DDA, and EDC by Plante Moran were significantly higher. In total, the Plante Moran cost proposal was $77,766 (or 11%) higher than Yeo & Yeo.

The attached evaluation documents the reasons for the recommendation to award the contract to Yeo & Yeo.

City of Flint Audit Recommendation
Fiscal Years 2014 – 2018

1. Scope of Audit

The City of Flint, a municipal corporation, requested proposals from qualified firms of Certified Public Accountants to audit its financial statement from the fiscal years ending June 30, 2014 thru June 30, 2018. The engagement also included and audit of any federal single audit(s) as needed.

2. Reports

a. Compiled and Audited Financial Statements (CAFS): Compiled and Audited Financial statements for the City including all funds, account groups and applicable component units. The auditor will prepare all financial statements, schedules, supplementary information and notes to the financial statements.

b. Management Discussion and Analysis (MD&A): The auditor will work with the City on an acceptable format and will update all charts, graphs, tables and figures. The City will provide the narrative\explanatory information.

c. A stand-alone, plain language, explanatory summary of the results of the City audit (separate from the MD&A) as a tool to aid the Council and public in understanding the audit results.

d. State of Michigan auditing procedures report.

e. A report on the financial statements, internal control and compliance in accordance with the audit guide and standards for compliance with the Single Audit Act, as may be required.

f. Any supplemental reports, schedules or other required by the State of Michigan, Federal Government, GASB or GAAP, including the F-65.

g. A management report containing comments and recommendations regarding a municipality's system of internal controls: its methods of safeguarding its assets, ensuring the accuracy of its financial information, promoting efficiency and adhering to municipal policies. This letter should contain comments and recommendations for

transition. Two partners and 2 senior managers have been assigned to the audit. It is my belief and confidence that while Plante & Moran has been an outstanding partner and knows a lot of the inner workings of the City of Flint's financial conditions, Yeo & Yeo has the experience and is willing to make the same commitment to serving the City.

E. The proposal from Yeo & Yeo met all of the requirements and expectations in the audit RFP.

controlling any internal weaknesses discovered and shall be reviewed by the Finance Department before finalizing.

h. Other mandatory or required reports.

3. Audit Schedule and Report Requirements

a. The City's fiscal year ends on June 30th and the selected auditors must be able to substantially adhere to the following timeline for the audit; with the understanding that the earlier the audit can be completed, the better:

b. Pre-Audit Meeting with commence during the month of July

c. Field work will begin during the month of October

d. Preliminary and field work completed by no later than November 8th

e. Draft reports completed by no later November 15th

f. Final reports by no later than November 26th

g. Presentation of Audit by no later than January 12th

h. If the proposing firm sees any problem with meeting this schedule, it should be noted in the proposal with an alternate schedule.

i. All deadlines for the CAFS and other reports shall be adhered to. The City will deliver the final report to the State.

4. Recommendation

The Finance Department of the City of Flint recommends the selection of Yeo & Yeo CPAs & Business Consultants as our auditor for the next five years. There were other bids from Plante & Moran and Clark Schaefer Hackett. Although Clark Schaefer Hackett's bid was the lowest, there were other reasons for our recommendation to go with Yeo & Yeo.

A. Clark Schaefer Hackett does not have a presence in the State of Michigan. The firm is located in Ohio. All the client references were Ohio based clients. It is our practice to put a premium on awarding contracts to Michigan based, especially Flint based businesses.

B. Plante & Moran has been a partner with the City of Flint more many years. They have been a valuable resource for expertise and assistance with helping the City to meet many of the challenges it faced. However, given the state of the financial conditions of the City of Flint, they were the highest bidder. The City is estimated to save $50,000 over the next 5 years with Yeo & Yeo's bid.

C. Yeo & Yeo is a reputable firm with high many qualifications noted throughout the accounting industry. They have experience with governmental entities under Emergency Managers and have expressed a strong understanding of the City of Flint's financial conditions. As Plante & Moran has a local presence, so does Yeo & Yeo.

D. I do not believe that the quality of the audit will suffer by changing auditors. Yeo & Yeo has committed to have the office most senior staff on the audit in the first year to assist with the

LANSING

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

May 30, 2014

Darnell Earley, Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

Mr. Earley:

This letter serves as a notice of my approval to sell the 72" (inch) pipeline and appurtenances from the DWSD connection at Potter and Baxter Roads; west to the proposed 36" (inch) KWA connection at Center and Pierson Roads for $3,987,700 to Genesee County Water & Waste.

Because the sale is referenced in the F&O Plan, no approval is necessary under Sections 12(1)(r) and 15(1) as the plan is considered adequate. However, 12(3) requires Treasurer approval for contracts over $50,000 because the sale was not competitively bid. In addition, Section 19 requires that this sale must be submitted to the City Council to approve or deny. The Flint City Council failed to take action on the matter by the required date; therefore, the proposed action is considered to be approved.

State Treasurer Approval:

I, R. Kevin Clinton, State Treasurer for the State of Michigan, pursuant to the authority assigned by Public Act 436 of 2012, do hereby:

__✓__ Approve Submitted Recommendation

_____ Deny Submitted Recommendation

Sincerely,

Wayne L. Workman

For Immediate Release

Michigan Department of Treasury Approves City of Flint's Sale of Section of 72" Pipeline to Genesee County Water & Waste, Sale Finalized This Week

Flint, Michigan – June 13, 2014 – The City of Flint's sale of a section of 72" pipeline to the Genesee County Drain Commission for $3,987,700 has been approved by the Michigan Department of Treasury and the sale was finalized this week. The pipeline section being sold is from the connection the City of Flint formerly used to receive water from the Detroit Water & Sewerage Department, located at Potter and Baxter Roads. "The sale of this 9 mile section of water main, which no longer provides any practical function to the City of Flint, is a fortuitous one-time revenue gain from which the proceeds will be reinvested into the ongoing maintenance and operations of the Flint water system," said Emergency Manager Darnell Earley. Genesee County was the sole prospective buyer of the pipeline.

The Emergency Manager presented the pipeline sale proposal to Flint City Council in May to be approved or denied, as provided under Public Act 436. City Council voted not to accept the proposal and did not provide an alternative proposal as required under PA 436, thereby allowing the Emergency Manager's recommendation to be considered approved by Treasury.

1. EXECUTIVE SUMMARY

1.1 BACKGROUND OF THE STUDY

On November of 2013, the City of Flint ("City") engaged Raftelis Financial Consultants ("RFC") to perform water and wastewater utility rate studies. The scope of services included the following:

- Evaluate the adequacy of existing water and wastewater revenues to meet each utility's projected revenue requirements
- Develop comprehensive water and wastewater financial plans based on sound financial management practices for a 10 year forecast period
- Determine water and wastewater rates which adequately recover the cost of operating the water and wastewater utilities under the existing rate structures and provide alternatives based on a comprehensive cost of service study
- Analyze the impact of transitioning from the use of purchased potable water from the Detroit Water and Sewerage District ("DWSD") to the treatment of raw water from the Karegnondi Water Authority ("KWA").
- Review the City's water and wastewater operations in comparison to Best Management Practices criteria.

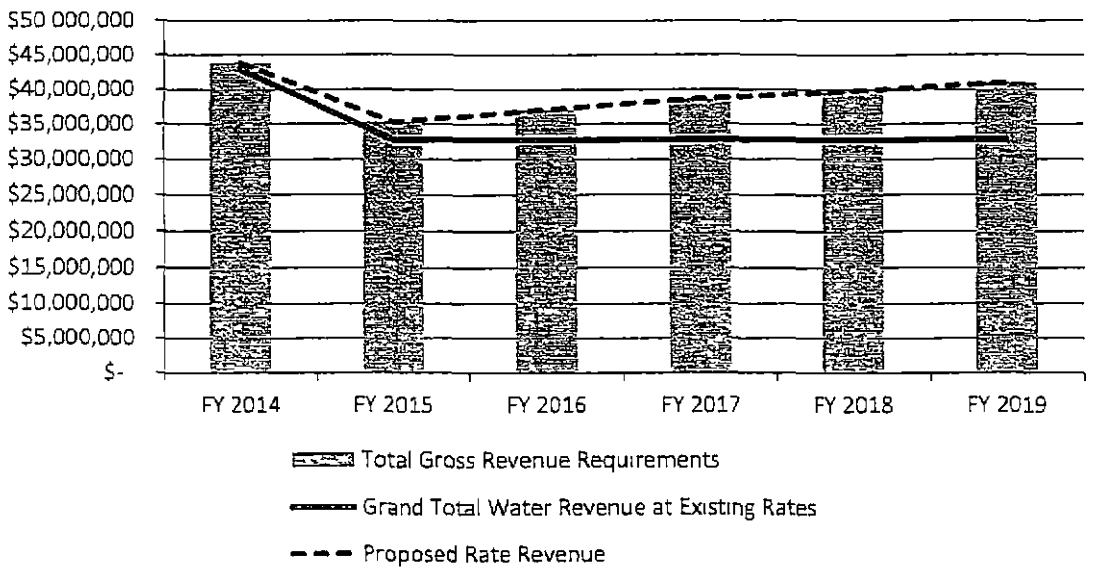
1.2 ADEQUACY OF EXISTING WATER AND WASTEWATER REVENUES

Charts ES-1 and 2 below summarize our conclusions with respect to the adequacy of water and wastewater revenue at existing rates. As the charts indicate, beginning in FY 2015, water and wastewater utility revenues are insufficient to recover each utility's revenue requirement. Key drivers of this disparity are:

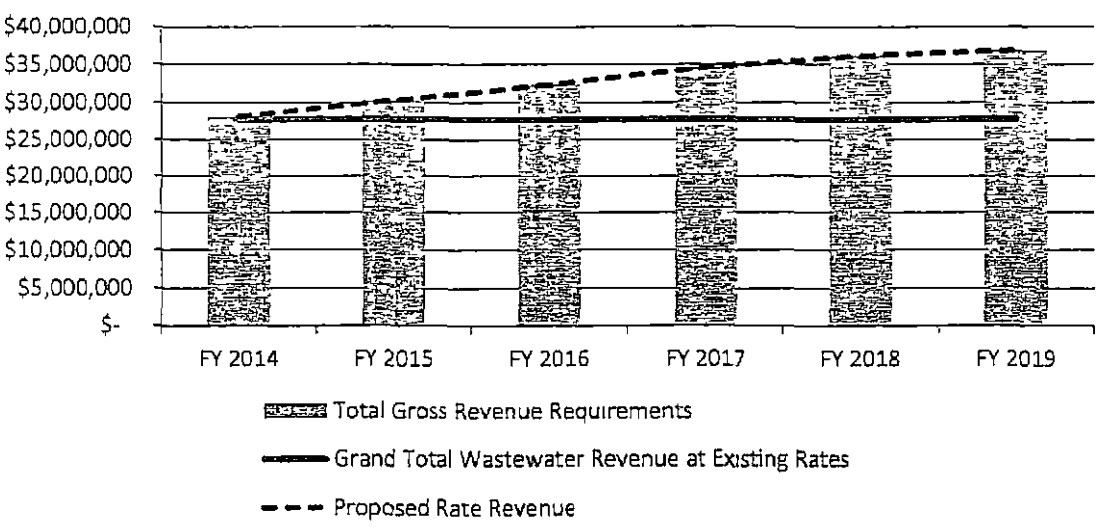
- A marked decrease in billed usage, the cause of which is currently being evaluated by RFC under a separate contract.
- A normal pattern of declining per customer usage for both utilities overall due to conservation, efficient appliances, etc.
- Increases in utility revenue requirements associated with the financial plans including operating cost inflation, capital improvements and policies which support the sound financial management of each utility in accordance with best management practices.

Consequently, the proposed increases in rate revenue are necessary to ensure each utility can adequately fund its operation and maintenance expenditures, make payments on existing debt service, provide funding for needed capital improvements and ensure adequate operating reserves.

ES-1: Water Utility Revenues at Existing Rates



ES-2: Wastewater Utility Revenues at Existing Rates



1.3 WATER AND WASTEWATER FINANCIAL PLANS

Tables ES-3 and ES-4 below summarize the proposed water and wastewater financial plans and rate revenue increases for the first 5 years of the forecast period.
The financial plans and proposed increased in rate revenues are driven by the following factors:

- Inflationary increases in O&M expenditures for both utilities
- For the water utility:
  - Decreases in revenues associated with the cessation of service to Genesee County
  - Decreases in O&M expenditures associated with an elimination of DWSD water purchases
  - Increases in O&M expenditures associated with transitioning from back-up to primary operation of the Flint WTP
  - Increases in capital expenditures associated with improvements to the Flint WTP in preparation for the treatment of raw water from KWA
  - Increases in debt service associated with Flint's share of projected KWA debt service
- Necessary cash funded recapitalization of wastewater utility assets
- A build-up, for each utility, of operating reserves equivalent to 90 days of projected O&M expenditures and debt service payments, the minimum, according to financial management practices ("BMP").

ES-3: SUMMARY OF WATER AND WASTEWATER FINANCIAL PLANS

Water Utility	Budget Year FY 2014	Test Year FY 2015	Forecast FY 2016	Forecast FY 2017	Forecast FY 2018	Forecast FY 2019

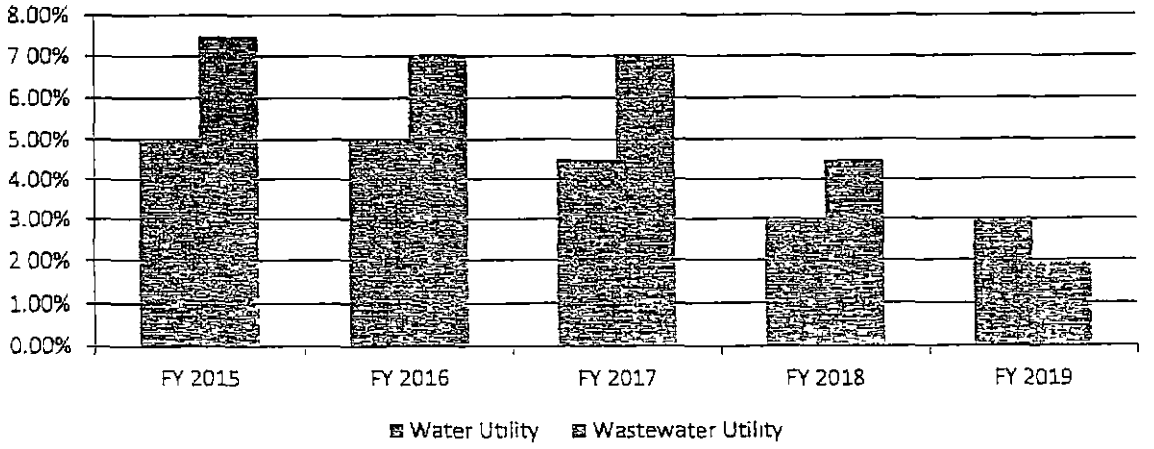
ES-4: Annual % Rate Revenue Increases



As indicated in the previous section, water and wastewater utility revenues at existing rates are not adequate to recover the projected costs each utility will incur over the forecast period. Consequently additional rate revenue will be needed to ensure adequate recovery of each utility's revenue requirements.

1.4 COST OF SERVICE STUDY AND WATER AND WASTEWATER RATES

Table ES-5 below summarizes the results of the water and wastewater cost of service studies. The customer classes included are those which are recognized in the City's existing customer information system ("CIS"). While the City does not currently have either a water or wastewater rate structure which recognizes these customer classes, rates by customer class have been calculated and are included as appendices A and B to this report. The totals for each customer class represent the contribution of that class to the overall costs of each utility. This is based on the allocation processes described in sections 4 and 5 of this report.

Given the transition from KWA to DWSD the City will not be making any rate structure changes at this time. It is our opinion that the current water and wastewater rate structures are reasonable. The declining block water rates generally recognizing the fact that higher volume customers (i.e. large commercial and industrial) contribute less to peak demand, and overall water utility costs. Additionally, the relatively high proportion of fixed charge revenue recovery provides a less climatically variable revenue stream, which given that the majority of the utility's costs are fixed, is entirely appropriate.

ES-5: SUMMARY OF COST OF SERVICE STUDY RESULTS

CUSTOMER CLASS	WATER	WASTEWATER
Allocated Cost of Service		
Total Inside City Residential COS	$ 18,345,672	$ 16,412,799
Total Inside City Commercial/Industrial COS	$ 15,263,704	$ 13,378,697
Total Inside City Lawn COS	$ 370,646	N/A
Total Inside City COS	$ 33,980,022	$ 29,791,496
Total Outside City Residential COS	$ 99,483	$ 2,382
Total Outside City Commercial/Industrial COS	$ 321,169	$ 66,796
Total Outside City Lawn COS	$ -	N/A
Total Outside City COS	$ 420,653	$ 69,178
Total System Cost of Service	$ 34,400,675	$ 29,860,674

Tables ES-6 and ES-7 summarize the projected fixed and volumetric rates for the first 5 years of the forecast period, given financial plans and rate revenue increases proposed above. For every dollar of rate revenue generated by each utility approximately $.66 is derived from volumetric charges and $.34 is derived from fixed charges.

It is typical for water and wastewater utilities to design fixed charges which recover, at a minimum, the costs of meter reading, billing and collection and customer service. Additionally, fixed charges may also relate to fixed investment in utility assets associated with providing service which is available at all times regardless of usage levels by City customers. These costs, known as readiness to serve costs, have also been incorporated into the water and wastewater fixed charges.

Volumetric rates recover the variable costs associated with operating the water and wastewater utilities. For the water utility variable costs are associated with water treatment, transmission and distribution, pumping, and storage and are driven primarily by the design requirements associated with peak water usage. For the wastewater utility variable costs are associated with wastewater treatment, collection, and pumping, and are driven by the wastewater volume and strength.

ES-6: SUMMARY OF WATER AND WASTEWATER VOLUMETRIC RATES

Water Volumetric Rates

CUSTOMER CLASS	CONSUMPTION BLOCK	UNITS	FY 2014 Existing Block Rates	Test Year FY 2015 Proposed Block Rates	Forecast FY 2016 Proposed Block Rates	Forecast FY 2017 Proposed Block Rates	Forecast FY 2018 Proposed Block Rates	Forecast FY 2019 Proposed Block Rates

1.5 TRANSITION FROM DWSD TO KWA

A key aspect of this study involved analyzing the impact of the anticipated April 1, 2014 transition from the Detroit Water and Sewerage District ("DWSD") to the Karegnondi Water Authority ("KWA"). The expectation is that the transition will strengthen the water utility's financial position going forward, by affording the City greater control over its operating and capital costs. As part of this engagement the City asked RFC to estimate the potential savings to a typical Flint customer as a result of transitioning from DWSD to the KWA.

A summary of the potential savings, based on an alternative water financial planning scenario is summarized in Table ES-8 below. For example, a City customer using 5 CCF per month would see a combined monthly bill of approximately $122.83 under the KWA. This is based on a 5% water rate increase over existing rates. That same customer, should the City continue receiving service from DWSD, is estimated to have a bill of approximately $127 70. This represents estimated 13% water rate increase over existing rates. Consequently, the savings to the typical City is approximately $4.87 per month, or $58.44 per year. Finally, note that the cumulative water rate increase over the next 5 years is estimated to be 18% under the KWA and 41% under DWSD.

ES-8: POTENTIAL RESIDENTIAL BILL SAVINGS (KWA VS. DWSD)

Cumulative Increase KWA (Water Rates)	0%	5%	10%	15%	19%	22%
Additional With DWSD (Water Rates)	0%	9%	19%	20%	21%	21%
Total Under DWSD	0%	14%	29%	35%	39%	44%

1.6 WATER AND WASTEWATER UTILITY OPERATIONS AND BEST MANAGEMENT PRACTICES

We reviewed the City's water and wastewater utility performance in relation to Best Management Practices ("BMP") that have been published by Fitch Ratings ("Fitch"). These criteria are used by Fitch when reviewing the performance of a utility as part of the bond rating process. Table ES-9 below summarizes our assessment of the City's water and wastewater utility operations with respect to BMP. The City's operations generally comport with BMP. The City is working to improve consistency in four areas: first, as mentioned above, the financial plans build-up to the minimum recommended 90 operating reserve and should achieve this reserve, all else equal, in the next 5 years. Second, the City is working with RFC, under a separate contract, to identify sources of lost water and wastewater revenue to improve the City's revenue collections, and reduce the cost of utility service theft to paying customers. Third, the City is currently determining arrangements whereby the general fund can repay its obligations to the water and wastewater utilities, ensuring the water and wastewater funds are not subsidizing general government operations going forward. Finally, the transition to KWA will allow the City greater control over its operating and capital costs, and as mentioned above, should result in more affordable rates than the alternative.

ES-9: FITCH BEST MANAGEMENT PRACTICES

2. INTRODUCTION AND STUDY OBJECTIVES

2.1 INTRODUCTION

In November of 2013, the City of Flint ("City") engaged Raftelis Financial Consultants ("RFC") to perform water and wastewater utility rate studies. The need for engagement was precipitated by the City's transition from the use of purchased water from the Detroit Water and Sewerage District ("DWSD") to participation in the Karegnondi Water Authority ("KWA") on April 1, 2014. Following the transition, the City will treat raw water from the KWA at its existing water treatment plant, which is currently undergoing the improvements necessary to become the primary source of treated water for the City of Flint. The expectation is that the transition will strengthen the water utility's financial position going forward, affording the City greater control over its operating and capital costs as a result.

From a financial perspective, the following are a few notable aspects of the transition:

- Water Operation and Maintenance ("O&M") expenditures are projected to decrease significantly as the cost of purchasing water from DWSD ceases as of FY 2015,
- Water Capital costs are projected to increase as the City begins paying its share of the Karegnondi Water Authority's debt service and incurs the cost of the necessary water treatment plant improvements.
- Water utility revenues will decrease as the City's wholesale customer, Genesee County ("County"), will no longer be receiving water service from the City as a result of the transition
- Projected water increases under the KWA are projected to be lower than they would have been, had the City continued to purchase water from DWSD
- City of Flint residential customer water bills are projected to be lower under the KWA than if the City had continued to purchase water from DWSD (see Table 1 below).

TABLE 1: ESTIMATED RATE INCREASES (KWA VS. DWSD)

CUMULATIVE % RATE REVENUE INCREASE	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
KWA	0%	5%	10%	15%	19%	22%
DWSD	0%	14%	29%	35%	39%	44%

ESTIMATED MONTHLY SAVINGS	FY 2014	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019

9	$ -	$ (7.32)	$ (16.31)	$ (17 62)	$ (18 15)	$ (18 69)
10	$ -	$ (7 93)	$ (17 68)	$ (19 10)	$ (19.67)	$ (20 26)

2.2 RATE STUDY OBJECTIVES

The objectives of this study are as follows:

- Evaluate the adequacy of existing water and wastewater revenues to meet the projected revenue requirements
- Develop comprehensive water and wastewater financial plans based on sound financial management practices for a 10 year forecast period
- Determine water and wastewater rates which adequately recover the cost of operating the water and wastewater utilities under the existing rate structures and provide alternatives based on a comprehensive cost of service study
- Evaluate the City's current financial position and adjust the comprehensive financial plans for both the mid-year transition to the KWA and going forward.

3. WATER AND WASTEWATER UTILITY FINANCIAL PLANS

3.1 THE FINANCIAL PLANNING PROCESS

The general objective of the financial planning process is to arrive at the level of water and wastewater rate revenue required to ensure the financial sustainability of each utility on a going forward basis. This revenue requirement is then distributed to each customer class as part of the cost of service study.

For this study financial plans were developed for the current fiscal year, the test year and a ten-year forecast period. The current year is typically the year in which the study occurs, in this case fiscal

year 2014 ("FY 2014"), or the year ending July 30, 2014. For the current year the financial plans represent an estimate, for each utility, of year-end financial position.

This serves as the basis for the test year financial plan. For this study, the test year is the following fiscal year, FY 2015. While the current year serves as an estimate of each utility's current financial position, the test year represents a projection of utility revenues, expenditures and operating reserve levels. The ten-year forecast period allows the City to evaluate trends over time and evaluate the impact of challenges that occur beyond the test year. For the purposes of this study separate financial plans were developed for each utility to ensure that each would be self-sustaining.

The following steps are necessary to arrive at the test year revenue requirement for each utility:

- Forecast customer units of service and revenue at existing water and wastewater rates
- Forecast operation and maintenance expenditures ("O&M") for each utility
- Forecast capital expenditures, including the payment of existing water and wastewater debt service and the financing of planned capital improvements
- Develop detailed cash flow forecasts summarizing planned O&M and capital expenditures, recommended rate revenue increases and operating reserve levels

3.2 WATER UTILITY FINANCIAL PLAN

3.2.1 Forecast Water Units of Service and Revenue at Existing Rates

Water Utility Rates

The City recovers the cost of operating the water utility via volumetric rates (rates based on the amount of water used) and fixed monthly service charges (a charge per customer bill). The City's existing water volumetric charge is a declining block rate, or a rate that decreases on a per unit basis as the amount of water consumed increases. The existing water volumetric rate structure is shown in Table 2 below:

TABLE 2: EXISTING WATER VOLUMETRIC RATES

CUSTOMER CLASS	CONSUMPTION BLOCK	UNITS	FY 2014 Existing Block Rates
Total Inside City All Classes			
Inside City Block 1	0-35 CCF	($/CCF)	$ 7.52
Inside City Block 2	36-2000 CCF	($/CCF)	$ 7.31
Inside City Block 3	above 2000 CCF	($/CCF)	$ 5.79
Total Outside City All Classes			
Outside City Block 1	0-35 CCF	($/CCF)	$ 11.26
Outside City Block 2	36-2000 CCF	($/CCF)	$ 10.77
Outside City Block 3	above 2000 CCF	($/CCF)	$ 8.68

A distinction is made between customers residing within in the City of Flint, and those who receive City water service, but do not reside within the City As Table 2 indicates, outside city volumetric rates are approximately 150% of inside city volumetric rates. This is a common policy for municipal water utilities and recognizes inside city customers as "owners" of the utility, who should be compensated for the risk of investing in and maintaining their utility system.

In addition to the volumetric rates, the existing water rate structure includes a fixed service charge which varies by customer water meter size. The rates are charged per customer bill and are shown in Table 3 on the following page.

TABLE 3: EXISTING WATER FIXED CHARGES

CUSTOMER CLASS	FY 2014 Proposed Fixed Charge
Inside City Residential Customers	
5/8"	$ 21.78
3/4"	$ 41.86
1"	$ 55.28
1-1/2"	$ 55.28
2"	$ 55.28
Inside City Commercial/Industrial Customers	
5/8"	$ 53 39
3/4"	$ 61.26
1"	$ 75 10
1-1/2"	$ 107 76
2"	$ 150.62
3"	$ 297 45
4"	$ 523.50
6"	$ 1,029 43
8"	$ 1,492.88
10"	$ 2,060 75
12"	$ 2,493.12
16"	$ 3,102.64
20"	$ 3,351.18
Outside City Residential Customers	
5/8"	$ 32.48
3/4"	$ 62.71
1"	$ 82.79
1-1/2"	$ 82.79
2"	$ 82.79
Outside City Commercial/Industrial Customers	
5/8"	$ 80.13
3/4"	$ 91.72
1"	$ 112.67
1-1/2"	$ 161.79
2"	$ 226.09
3"	$ 448.47
4"	$ 785 37
6"	$ 1,543.87
8"	$ 2,239 47
10"	$ 3,107.48
12"	$ 3,739.51
16"	$ 4,653.87
20"	$ 5,463.82

Most Flint residential customers have a 5/8" meter and currently pay the $21.78 fixed monthly service charge. For the monthly fixed charge the same distinction is made between inside and outside city customers, with the outside city charge set at approximately 150% of the inside city charge. Additionally, the current fixed charge structure further distinguishes between residential commercial customers.

In addition to the retail rates discussed above, the City currently serves a wholesale water customer, Genesee County. Genesee County pays a commodity charge of $346,863, a fixed monthly service charge of $114,000 and a volumetric rate of $1.30 per CCF. As mentioned above, as of April 1, 2014, the County will no longer be a customer of the City.

Forecast Water Units of Service

In order to forecast the level of revenue under existing water rates, the number of water accounts at each meter size and the level of water consumption in each consumption block must be estimated for the forecast period.

The number of accounts at each meter size was determined by dividing the number of annual bills at each meter size by the 12 monthly billing periods. The number of historical and forecast water utility customer accounts, by meter size, is indicated in Tables 4 and 5 on the following two pages. Note that the historical data appear to indicate a 14% increase in inside city accounts and a 27% increase in outside city accounts from FY 2012 to FY 2013. This increase in accounts does not appear to have been sustained into FY 2014. The City has indicated that water and wastewater billings have decreased approximately 12% from FY 2013 to FY 2014 year to date. Given this change and for the sake of developing a conservative estimate we have adjusted the forecast level of water accounts to 13% below their FY 2013 level. As no significant growth in the City's customer base is expected, no growth in water utility accounts has been projected over the forecast period.

In addition to forecasting the number of accounts by meter size, the level of water consumption in each consumption block must be estimated for the forecast period. The historical and forecast level of water consumption by customer class and block is indicated in Tables 6 and 7 on the following two pages.

Note that—consistent with the significant increase in inside city water accounts in FY 2013—inside city water consumption has increased significantly in FY 2013 (18%). Given the uncertainty surrounding the increase in billed consumption in FY 2013, and the subsequent decrease in billed revenues in FY 2014, we have forecast retail consumption at 6% below FY 2013 levels for FY 2014, FY 2015 and the remainder of the ten year forecast period.

As noted above, the City anticipates discontinuing DWSD water service as of April 1, 2014. At that point Genesee County will no longer be a wholesale customer of the City. Therefore the forecast of the County's consumption has been adjusted to account for the final 3 months of FY 2014 (i.e. April, May and June) during which the City will not be providing water service to the County

Forecast Water Revenue at Existing Rates

Water utility revenue at existing rates is the sum of the volumetric and fixed charge revenue. Fixed charge revenue at existing rates was determined by multiplying the number of forecast accounts at each meter size, by the existing rate for that size and again by 12, for each of the monthly bills. Volumetric revenue was determined by multiplying the level of consumption in each consumption block, by the existing rate for that block. Table 8 on the following page summarizes the level of water revenue at existing water rates.

The total level of water revenue at existing rates in FY 2014 is forecast to be approximately $43 Million. Of this, around 70% is derived from the volumetric rates and 30% is associated with the fixed monthly service charges. In FY 2015, the level of revenue at existing rates is forecast to decline to approximately $32 Million. This change can be attributed to the loss of Flint's existing wholesale customer Genesee County, which will occur as a result of the City's discontinuing DWSD water service. On a going forward basis, the level of revenues at existing water rates would remain at 32 Million assuming consumption and account growth remain flat and the City makes no adjustments to water rates.

3.2.2 *Forecast of Water Operation and Maintenance Expenditures*

Water O&M Inflation Rates

The budgets provided by the City are the basis for the forecast of water utility O&M expenditures. Given that the transition from DWSD to KWA involves significant shifts in budgetary expenditures on a relatively detailed level, the City provided uninflated estimates of budgeted O&M expenditures for FY 2014 through FY 2017. To forecast the level of water utility O&M expenditures that the City would incur over the forecast period we applied the escalation rates shown in Table 9 below.

TABLE 9: WATER O&M ESCALATION RATES

The rates shown above were developed based on discussions with City staff, and our experience with similar utilities.

Forecast Water Utility Operation and Maintenance Expenditures

Tables 10 and 11 on the following page indicate the estimated level of water utility O&M expenditures over the forecast period, both by the escalation rate categories and by department. In FY 2014, the largest O&M expenditures related to the "Water Plant-Operations" department within which the bulk water purchases from DWSD were included. Note that this amount decreases significantly in FY 2015 and going forward as the City transitions from DWSD to KWA. Excluding purchased water, the most notable expenditures are associated with personnel: Wages and Salaries, Benefits, Pension, and the City's share of retiree healthcare benefits ("Cost Alloc. Plan-Expense"). In general, water O&M expenditures are projected to decrease from around $36 Million currently to $21 Million in FY 2015 with inflationary increases thereafter.

3.2.3 Water Utility CIP and CIP Financing

Tables 12 and 13 on the following two pages indicate the water capital improvements program ("CIP") provided by the City and the CIP financing plan.

As the plan we received from the City was presented in current year dollars, we escalated the project amounts 3% per year from FY 2015 onward. The largest capital improvements in dollar terms are associated with the rehabilitation of the City's water treatment plant (i.e. Water Plant-Phase II projects). These projects are in large part associated with transitioning the City's water treatment plant from back-up status to the primary source of treated water for the City. As discussed above, the improvements to the water treatment plant will allow the City to treat raw water purchased from the KWA for distribution to City customers. In general, the level of spending in the CIP decreases from $10 Million to $7.5 Million as the plant improvements are completed and increases again in the out years due to planned annual recapitalization.

There are three items of note in Table 13. First, all projects are projected to be cash financed at this time. The City may seek to leverage its revenue stream in the future via use of the State of Michigan's ("State") Drinking Water Revolving Revenue Fund ("DWRRF") loan program. This would be particularly beneficial for major water capital improvements, as it would spread the financing responsibility over existing and future ratepayers who receive the benefit of the improvement throughout the asset's useful life. Second, note that the proceeds from the recently completed sale of the Flint pipeline to Genesee County have been included to offset the costs of the treatment plant improvements. Finally, note that the "uses" category includes a line for additional uses, which represent the KWA initiation payments required of the City until it begins paying its share of KWA debt service in FY 2017.

3.2.4 *Water Cash Flow Forecast*

The final step in the development of the water utility financial plan involves the preparation of a comprehensive cash flow forecast. A summary of the water cash flow forecast is presented in Table 14 on the following page. The key components of the forecast are Financial Plan Inputs, Revenues, Expenditures, and Operating Performance.

- The Financial Plan Inputs component indicates the forecast rate revenue increases. These increases were determined in consultation with City staff and are designed to:
- Ensure recovery of O&M expenditures and existing water utility debt service
- Provide cash financing for the capital projects outlined in the CIP including those necessary to transition from DWSD to the KWA
- Minimize the risk associated with operating a climate dependent enterprise via the build-up of operating reserves equivalent to 90 days of O&M and Debt Service

The Revenues component indicates the revenue at existing rates discussed previously, non-rate revenue and the additional revenue generated by the rate revenue increases shown in the inputs section. Given the forecast of water demand, O&M and capital expenditures and the 90 Day operating reserve benchmark, the "additional revenue" line represents the amount of revenue needed—above existing rate revenues --to ensure adequate recovery of the water utility's revenue requirement in each year of the forecast.

The Expenditures component indicates the major sources of expenditures for the City's water utility: O&M expenditures, Capital expenditures (Rate Revenue Financing and Debt Service) and Transfers to the Operating Reserve.

The Operating performance component indicates the year end position of the water utility with respect to a few key factors. Included are the estimated operating reserve balance, the target reserve balance (90 Days of O&M and Debt Service), the construction fund ending balance and the water utility's debt service coverage ratio.

3.3 WASTEWATER UTILITY FINANCIAL PLAN

3.3.1 Forecast Wastewater Units of Service and Revenues at Existing Rates

Wastewater Utility Rates

The City recovers the cost of operating the wastewater utility via volumetric rates (i.e. rates based on the amount of wastewater discharged) and fixed monthly service charges (a charge per customer bill). The City's existing wastewater volumetric charge is a uniform rate, or a rate that does not vary (on a per unit basis) as the amount of wastewater discharged varies. The existing wastewater volumetric rate structure is indicated in Table 15 below. Similar to the water utility volumetric rate structure a distinction is made between inside and outside city customers, with the outside city rate set at approximately 110% of the inside city rate.

TABLE 15: EXISTING WASTEWATER VOLUMETRIC RATES

CUSTOMER CLASS		Test Year FY 2014 Existing Rates
Total Inside City All Classes	($/CCF)	$ 4.80
Total Outside City All Classes	($/CCF)	$ 5.29

The existing wastewater rate structure includes a fixed service charge which varies by customer water meter size. The rates are shown in Table 16 on the following page. Most Flint residential customers have a 5/8" meter and currently pay the $32.00 fixed monthly service charge. Similar to the wastewater volumetric rate, the wastewater fixed charges include an inside outside city differential (120%).

In addition to the retail wastewater rates, the City currently serves a wholesale wastewater customer, Beecher Metropolitan District ("District"). The District currently pays $1.34 per CCF of wastewater discharged, an amount that was negotiated in the 1995 Contract between the City and the District.

TABLE 16: EXISTING WASTEWATER FIXED CHARGES

16"	$ 5,497.91
20"	$ 6,532.02

Forecast Wastewater Units of Service

In order to forecast the level of revenue expected under existing wastewater fixed and volumetric rates, the number of wastewater accounts and the level of wastewater usage must be estimated for the forecast period. The number of historical and forecast wastewater utility accounts is indicated in Tables 17 and 18 on the following two pages.

Note that the raw billing data appear to indicate a 14% increase in inside city accounts and an 18% increase in outside city accounts from FY 2012 to FY 2013. This increase in accounts does not appear to have been sustained into FY 2014. The City has indicated that wastewater billings have decreased approximately 12% from FY 2013. Given this change we have adjusted the forecast level of wastewater accounts to be around 13% less than their FY 2013 level. As no significant growth the City's customer base is expected, no customer growth has been forecast on a going forward basis.

TABLE 17: FORECAST INSIDE CITY WASTEWATER ACCOUNTS

Customer Class	Actual FY 2012	Actual FY 2013	Budget Year FY 2014	Test Year FY 2015	Forecast FY 2016	Forecast FY 2017	Forecast FY 2018	Forecast FY 2019	Forecast FY 2020	Forecast FY 2021	Forecast FY 2022	Forecast FY 2023	Forecast FY 2024	Forecast FY 2025

In addition to forecasting the number of accounts by meter size and customer class, the level of wastewater usage must also be estimated for the forecast period. The historical and forecast level of wastewater usage by customer class can be on Table 19 on the following page.

Note that—consistent with the significant increase in inside city water accounts in FY 2013—inside city wastewater usage has increased significantly in FY 2013 (18%). Given the uncertainty surrounding this most recent upswing in billed wastewater usage, and the subsequent decrease in billed wastewater revenues, retail usage has been forecast at 15% below FY 2013 levels for FY 2014, FY 2015 and the remainder of the ten year forecast period.

Forecast Wastewater Revenue at Existing Rates

Wastewater utility revenue at existing rates is the sum of wastewater volumetric and fixed charge revenue Fixed charge revenue at existing rates was determined by multiplying the number of forecast accounts at each meter size, by the existing rate for that size and again by 12 for each of the monthly bills. Volumetric revenue was determined by multiplying the level of consumption by customer class, by the existing volumetric rates. Table 20 on the following page indicates the level of wastewater revenue at existing rates.

Total wastewater revenue at existing rates in FY 2014 is forecast to be approximately $27 Million. Of this, approximately 54% is derived from the volumetric rates and 46% is associated with the fixed monthly service charges. On a going forward basis, the level of revenues at existing wastewater rates would remain at $27 Million assuming consumption remains flat and the City makes no adjustments to wastewater rates.

3.3.2 Forecast Wastewater Utility Operation and Maintenance Expenditures

Wastewater O&M Inflation Rates

The budgets provided by the City are the basis for the forecast of wastewater utility O&M expenditures. To forecast the level of wastewater utility O&M expenditures that the City is projected to incur over the forecast period we applied escalation rates shown in Table 21 below.

Forecast Wastewater Operation and Maintenance Expenditures

Tables 22 and 23 on the following page indicate level of wastewater O&M expenditures over the forecast period, by the escalation rate categories and by department.

Unlike the water utility there is no single large cost driver. The most notable expenditures are associated with personnel: Wages and Salaries, Benefits, Pension, and the City's share of retiree healthcare benefits ("Cost Alloc. Plan-Expense"). In general, wastewater O&M expenditures are projected to decrease from 24 Million in FY 2014 to 23 Million in FY 2015 with inflationary increases thereafter.

3.3.3 Wastewater Utility CIP and CIP Financing

Tables 24 and 25 on the following two pages indicate the wastewater capital improvements program ("CIP") provided by the City and the CIP financing plan. As the plan we received from the City was presented in current year dollars, we escalated the project amounts 3% per year from FY 2015 onward. The largest capital projects relate to rehabilitation of the City's wastewater treatment plant and pumping stations. In general, the level of spending in the CIP peaks at from $12 Million in FY 2018 and returns to an average level of around $8 Million going forward.

Table 25 summarizes the wastewater utility CIP financing plan. While the CIP financing plan used for this report only incorporates cash financing, the City may seek to leverage its revenue stream in the future via the issuance of revenue bonds or other alternative financing instruments. This would be particularly beneficial for major wastewater capital improvements, as it would spread the financing responsibility over existing and future ratepayers who receive the benefit of the improvement throughout the asset's useful life.

3.3.4 Wastewater Cash Flow Forecast

The final step in the development of the wastewater utility financial plan involves the preparation of a comprehensive cash flow forecast. A summary of the wastewater cash flow forecast is presented in Table 26 on the following page. The key components of the forecast are Financial Plan Inputs, Revenues, Expenditures, and Operating Performance.

The Financial Plan Inputs component indicates the forecast rate revenue increases. These increases were determined in consultation with City staff and are designed to:

- Ensure recovery of wastewater utility O&M expenditures
- Provide cash financing for the wastewater capital projects outlined in the CIP
- Minimize risk via the build-up of operating reserves equivalent to 90 days of O&M and Debt Service

The Revenues component indicates the revenue at existing rates discussed previously, non-rate revenue and the additional revenue generated by the rate revenue increases shown in the inputs section. Given the forecast of wastewater demand, O&M and capital expenditures and the 90 Day operating benchmark, the "additional revenue" line represents the amount of revenue needed—above existing rate revenues—to ensure adequate recovery of the wastewater utility's revenue requirement going forward.

The Expenditures component indicates the major sources of expenditures for the City's wastewater utility: O&M expenditures, Capital expenditures (Rate Revenue Financing and Debt Service) and Transfers to the Operating Reserve.

The Operating performance section indicates the year end position of the wastewater utility with respect to a few key factors. Included are the estimated operating reserve balance, the target reserve balance (90 Days of O&M and Debt Service), and the construction fund ending balance.

TABLE 26: WASTEWATER CASH FLOW FORECAST

4. WATER UTILITY COST OF SERVICE STUDY

Following the determination of the water utility financial plan, the next steps are to summarize the water utilities total rate revenue requirement, determine the proportion of that requirement which is attributable to each customer class, and calculate the volumetric and fixed rates.

4.1 WATER REVENUE REQUIREMENT FROM RATES

Table 27 below indicates the level of water utility expenditures which must be recovered from rates in the FY 2015 test year and each year of the forecast period. It is comprised of the forecast water utility O&M and capital expenditures, and is offset by non-rate revenues the water utility is anticipated to receive over the forecast period. The total test year revenue requirement is approximately $34 Million.

4.2 WATER REVENUE REQUIREMENTS BY CUSTOMER CLASS

Following the development of the total test year revenue requirement, the proportion of the total revenue requirement allocable to each customer class must be determined. This allocation represents the level of revenues that must be recovered from each customer class, given the operational demands that class places on the water utility system. This allocation is performed via the multi-step process described below.

4.2.1 O&M Allocation to Function Categories

The first step in determining revenue requirements by customer class is to allocate the test year O&M revenue requirement to functional categories. These categories are functions that the water utility must perform in order to deliver water service to City customers. For the water utility they are: Administrative and General, Customer Service, Source of Supply, Pumping, Treatment, Storage, Transmission Mains, Distribution Mains, Meters and Services and Hydrants.
The O&M allocations, by department, are shown in Table 28 on the following page.

TABLE 28: WATER O&M ALLOCATION TO FUNCTIONAL CATEGORIES

Account DEPARTMENT	Total $ Allocation	Administrative and General	Customer Service	Source of Supply	Pumping	Treatment	Storage	Transmission Mains	Distribution Mains	Meters & Services	Hydrants
Total Dept 536 100-Utilities - Water Administration	$ 7,718,611	$ 7,718,611	$ -	$ -	$ -	$ -	$ -	$ -	$ -	$ -	$ -
Total Dept 536 206-Utilities - Water Cross Connection P	$ 108,204	$ -	$ -	$ -	$ -	$ -	$ -	$ -	$ 108,204	$ -	$ -

GRAND TOTAL WATER UTILITY	$ 21,483,441	$ 8,848,611	$ 1,244,880	$ -	$ -	$ 7,050,319	$ -	$ -	$ 3,806,440	$ 533,281	$ -

4.2.2 O&M Allocation to Cost Components

Once O&M costs have been allocated to functional categories, the total O&M revenue requirement allocated to each functional category must be further allocated based on the operational need that function is designed to fulfill. For this allocation RFC has utilized the "Base Extra Capacity" method described in the American Water Works Association ("AWWA") publication, "Manual of Water Supply Practices M1, Principles of Rates, Fees and Charges (M1)."

The cost components utilized in this study are: base demand, or water demand under average conditions; maximum day and hour demand, or water demand under peak load conditions; customer service, for functions related to customer billing and service; and fire protection, for functions pertaining to the use of public hydrants and private fire lines. Table 29 below indicates the classification of water O&M expenditures to the cost components described above.

TABLE 29: WATER O&M ALLOCATION TO COST COMPONENTS

	$ Allocation									
			Max Day		Max Hour		Customer Units		Fire Protection	
		Base	Extra		Extra		Equivalent Meters		Private Fire	Public Fire
FUNCTIONAL CLASSIFICATION	Total $ Allocation	Demand	Capacity		Capacity		& Services	Bills	Equivalent Connections	Bills	Hydrants
Administrative and General	$ 8,848,511	$ 2,791,751	$ 4,451,013	$	360,456	$	1,245,291	$ -	$ -	$ -	$ -
Customer Service	$ 1,244,890	$ -	$ -	$	-	$	1,244,890	$ -	$ -	$ -	$ -
Source of Supply	$ -	$ -	$ -	$	-	$	-	$ -	$ -	$ -	$ -
Pumping	$ -	$ -	$ -	$	-	$	-	$ -	$ -	$ -	$ -
Treatment	$ 7,050,319	$ 2,717,572	$ 4,332,747	$	-	$	-	$ -	$ -	$ -	$ -

Meters and Services	$ 533,281	$ -	$ -	$	-	$	533,281	$ -	$ -	$ -	$ -
Hydrants	$ -	$ -	$ -	$	-	$	-	$ -	$ -	$ -	$ -
	$ 21,483,441	$ 6,778,137	$ 10,806,686	$	875,157	$	3,023,462	$ -	$ -	$ -	$ -

4.2.3 Capital Cost Allocation to Functional Components

Similar to the allocation of the O&M revenue requirement described in the previous section, the capital revenue requirement must be allocated to functional categories. Table 30 on the following page indicates the functional allocation of capital costs.

The basis for the allocation of capital costs was the existing level of water utility investment in fixed assets. The existing net book value of each major asset class was allocated to the functional categories. The total capital revenue requirement, approximately 14 Million in the test year, was then allocated according to the proportion of existing investment in each functional category. As indicated, a large proportion of investment in fixed assets pertains to upgrades to the City's water treatment plant. As such, the majority of the capital revenue requirement (68%) has been allocated to the treatment function.

TABLE 30: WATER CAPITAL ALLOCATION TO FUNCTIONAL CATEGORIES

Allocation of Capital Costs to Functional Categories	Total	Administrative and General	Customer Service	Source of Supply	Pumping	Treatment	Storage	Transmission Mains	Distribution Mains	Meters and Services	Hydrants
Breakdown of Fixed Assets by Functional Category	100%	0.21%	0.00%	9.63%	0.48%	68.39%	0.00%	0.00%	19.26%	2.09%	0.04%

4.2.4 *Capital Cost Allocation to Cost Components*

As with the allocation of the O&M revenue requirement described above, the functionally allocated capital revenue requirement must also be allocated according to the operational need for which each function is designed to fulfill.

The "Base Extra Capacity" method described in AWWA M1 is also used to allocate the capital revenue requirement to cost components. Table 31 below summarizes this allocation.

TABLE 31. WATER CAPITAL ALLOCATION TO COST COMPONENTS

	$ Allocation									
		Base	Max Day Extra	Max Hour Extra	Customer Units Equivalent Meters & Services	Bills	Fire Protection Private Fire Equivalent Connections	Bills	Public Fire Hydrants
FUNCTIONAL CLASSIFICATION	Total $ Allocation	Demand	Capacity	Capacity					
Administrative and General	29,611	-	-	-	29,611	-	-		-
Customer Service	-	-		-			-		-

Hydrants	5,613	5,613	-	-	-	-	-	-	-
Total Capital Expenditures	13,830,548	5,882,305	7,268,754	360,200	319,289	-	-	-	-

4.2.5 *Non-Rate Revenue Allocation to Cost Components*

Non-rate revenue must be excluded from the O&M and Capital revenue requirements as these amounts are an offset to the revenue requirement which will be recovered from rates. Consequently, non-rate revenues are allocated to the cost components so that they can be removed from the total revenue requirement. In this case, non-rate revenues were allocated proportionally according to the total O&M revenue requirement allocation and can be seen in Table 32 on the below.

TABLE 32: WATER NON-RATE REVENUE ALLOCATION TO COST COMPONENTS

			Allocation								
			Base	Max Day		Max Hour	Customer Units		Fire Protection		
			Base	Extra		Extra	Equivalent Meters		Private Fire		Public Fire

4.2.6 Determination of Maximum Day and Hour Peaking Factors

Once each component of the revenue requirements has been determined, maximum day and hour peaking factors for each customer class are estimated. These are the basis upon which the maximum day and hour cost allocations, determined in the previous step, are allocated to each customer class. In general, the guidelines for determining maximum day and hour peaking factors outlined in AWWA M1 were the basis for this component of the analysis.

The maximum day demand for each customer class is estimated as the average usage per day in the highest usage month, divided by the annual average usage per day, weighted by the ratio of maximum day demand to the average demand in the maximum month for the entire water system. In other words:

- System Max Day to Average Day in Max Month=(System Max Day Demand)/(System Max Month/30)
- Class Maximum Day=[(Class Max Month/30)/(Class Annual Total)/365]*[System Max Day to Average Day in Max Month]

The weighting occurs because the exact maximum day, by customer class is not known, but is assumed to have the same relationship to the average day in the maximum month as the entire system. As the exact customer class maximum hour is not known, a similar weighting process occurs to determine the customer class maximum hour demands:

- System Max Hour to Average Day in Max Month=(System Max Hour)/(System Max Month/30)
- Class Maximum Hour=Class Max Day*System Max Hour to Average Day in Max Month

The determination of customer class peaking factors is shown in Table 33 on the below.

TABLE 33: WATER PEAKING FACTOR CALCULATIONS

System Production Statistics											
	Annual Total	System Annual Average Day	System Max Month	Max Month to Average Day Ratio	System Max Day	System Max Day to Average Day	System Max Day to Average Day Ratio	System Max Hour Peak (Estimated)	System Max Hour to Average Day Ratio	System Peak Hour to Average Day	System Max Hour to Max Day Ratio
Total System	3,485,892	9,550	426,416	14,214	24,727	2.59	1.74	33,202	28,651	3.00	2.02

4.2.7 Calculation of Units of Service

The next step in the cost allocation process is to summarize the units of service, which are the basis for the allocation of the total revenue requirement to each of the customer classes. The units are Base units, Maximum Day Extra Capacity units, Maximum Hour Extra Capacity units, Customer units and Direct Fire Protection Units and are indicated in Table 34 on the following page.

Base units are the annual usage for each customer class. Maximum Day Extra Capacity units represent the water demand in excess of that which is used on an average day for that customer class, and is a function of the average daily usage and the customer class peaking factor determined in the prior step.

As an example, the residential class is forecast to use 1.7 Million CCF on an annual basis in the test year. This equates to 4,700 CCF/day on an average day. Based on the maximum day peaking factor determined in the previous step, Residential customers, on their highest usage day of the year, typically use 1.7 times their average day usage, or around 8,200 CCF. The difference between the maximum day and average day, around 3,500 CCF, represents the Maximum Day Extra Capacity units.

A similar calculation is used to determine the Maximum Hour Extra Capacity Units, which are simply the usage forecast in the highest hour of the test year, less the maximum day demand.

Customer Units are equivalent meters, and customer monthly bills. The number of bills for each customer class was ascertained via an examination of the billing data from the City's Customer Information System ("CIS"). The equivalent meters are the number of customer meters at each meter size weighted by the potential water demand each meter can place on the water system.

Private fire connections and hydrants were not included as the City does not currently bill separately for public or private fire protection.

TABLE 34: WATER UNITS OF SERVICE

Water Units of Service	Base Units		Maximum Day Extra Capacity Units			Maximum Hour Extra Capacity Units			Customer Units		Direct Fire Protection Units

4.2.8 *Unit Cost of Service*

Following the allocation of the water revenue requirements to each of the cost components and the calculation of the units of service, a unit cost of service for each cost component can be determined. These unit costs are basis by which the revenue requirements by customer class are determined. The unit cost of service is the revenue requirement, as allocated to the cost components, divided by the units of service attributable to that component and is shown in Table 35 below.

TABLE 35 WATER UNIT COST OF SERVICE

Check on Total System COS (Should be $0)	$ -								

As Table 36 indicates, the revenue requirement for each customer class is the total unit cost of service determined previously, multiplied by the units of service for each customer class. The total allocation is based on each customer class's contribution to the water utility's overall operating and capital costs, as represented by their units of service.

4.3 WATER RATE DESIGN

As mentioned previously, the water rates have been calculated under the City's existing rate structure. The rate calculation under existing rates will be presented here, with the alternative rates by customer class presented as Appendix A for informational purposes.

4.3.1 Volumetric Rate Calculations

As mentioned above, the City did not indicate a desire to significantly modify its water rate structure at this time. Therefore RFC maintained various components of the existing water volumetric rates including:

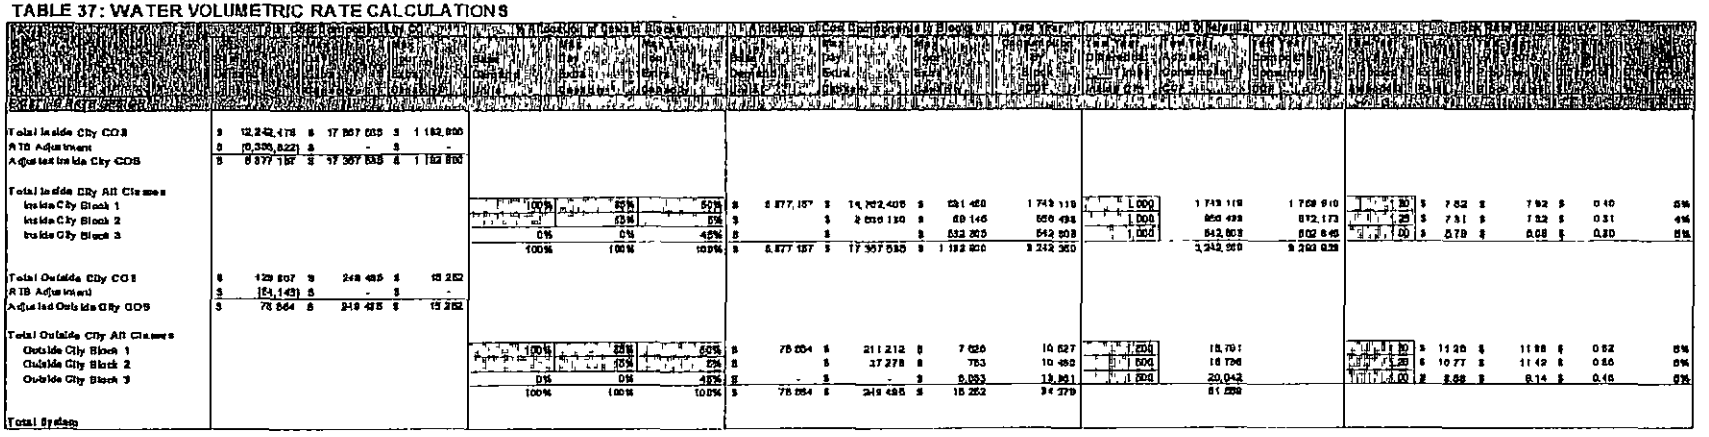
- The existing inside/outside city differential (i.e. outside=150% of inside)
- The existing steepness or difference between the highest, middle and lowest block rates
- The existing structure which charges the same volumetric rates for all customer classes
- The existing shift of some volumetric costs to the fixed service charge (i.e. a readiness to serve adjustment)

The calculation of the water volumetric rates involves the following steps

- Determine total composite volumetric revenue requirement:
    - Adjust the test-year volumetric revenue requirement (i.e. Base, Max Day and Max Hour costs) by the readiness to serve amount
    - Allocate the adjusted volumetric revenue requirement to the three consumption blocks
    - Add the block allocation for inside and outside city customers to determine a composite volumetric revenue requirement for all customer classes
- Determine the composite water volumetric units:
    - Multiply the consumption, by block, for inside and outside city customers, by their respective differentials (Outside=150% of Inside).
    - Add those units together.
- *Calculate Inside and Outside City Volumetric Rates:*
    - Determine a composite rate, for each block, for all customer classes:
        - Multiply the composite consumption for each block by the proposed steepness for that block and sum the result
        - *For the lowest block divide the total composite revenue requirement* by the total determined above.
        - For Blocks 2 and 3 multiply the Block 1 rate by the proposed steepness for Blocks 2 and 3.
    - Multiply the composite rates, by block determined above, by the outside and inside city differentials to determine the block rates for inside and outside city customers.

A summary of the water volumetric rate calculations are indicated in Table 37 below.

TABLE 37: WATER VOLUMETRIC RATE CALCULATIONS



4.3.2 *Fixed Charge Calculations*

As noted above, the City did not express a desire to change rate structures at this time. Consequently, the following aspects of the existing rate structure have been maintained including:

- The existing inside/outside city differential (i.e. outside=150% of inside)
- The existing shift of some volumetric costs to the fixed service charge (i.e. a readiness to serve adjustment)
- The flow equivalencies for the various meter sizes

The calculation of the water fixed charges involves the following steps

- Determine total composite fixed charge revenue requirement by summing the fixed charge revenue requirements (i.e. those allocated to the customer service related cost components) and the readiness to serve revenue requirement
- Determine the composite fixed charge water units.
    - Multiply the number of inside and outside city equivalent accounts by the existing I/O differential (Outside=150% of Inside)
    - Add those units together to determine the composite number of equivalent customer accounts
- Calculate Inside and Outside City Volumetric Rates.
    - Determine an annual composite rate for all customer classes by dividing the total composite revenue requirement determined above, by the total composite water equivalent accounts
    - Determine a monthly rate for the 5/8" equivalent account by dividing the annual rate by 12.
    - Multiply the composite fixed charges by the Inside and Outside City differentials (100% for Inside City and 150% for Outside City) to determine the monthly fixed charge per 5/8" equivalent account for inside and outside city customer classes.
    - Multiply the monthly fixed charge for a 5/8" equivalent account by the meter equivalencies for each meter size to determine the monthly fixed charge for the remaining meter sizes

The fixed charge calculations are shown in Table 38 on the following page.

TABLE 38: WATER FIXED CHARGE CALCULATIONS

4.3.3 Summary of Existing and Forecast Water Rates

Based on the calculations from the previous two sections, the existing and proposed rates for the forecast period are shown on Tables 39 and 40 on the following two pages. Note that while the test year rates have been calculated within the cost of service study, the rates for FY 2016 and beyond are based on the overall rate revenue increase from the water utility financial plan.

4.3.4 *Projected Residential Water Bills*

Table 41 below indicates projected water bills for Residential Inside City customers with a 5/8" meter. Also included are estimates of the bills, which residential customer may have seen, had the City continued to purchase water from DWSD. For example, had the City continued to purchase water from DWSD, a typical Flint customer using 5 CCF per month would have an estimated water bill in FY 2015 of $67.38 Given the shift to KWA, that same customer would see a bill of $62.51, a savings of $4.87 per month, or $58.44 per year

5. WASTEWATER UTILITY COST OF SERVICE STUDY

Following the development of the wastewater utility financial plans the next step is to determine the level of rate revenues required to adequately recover the cost of providing wastewater service This is typically performed for a test year, which—as mentioned previously—is the year ending June 30, 2014 (FY 2015).

5.1 WASTEWATER REVENUE REQUIREMENT FROM RATES

Table 42 below indicates the level of wastewater utility expenditures which must be recovered from rates in the FY 2015 test year. As the table indicates, the total test year revenue requirement is approximately $29 Million.

5.2 WASTEWATER REVENUE REQUIREMENTS BY CUSTOMER CLASS

Following the development of the total test year revenue requirement, the proportion of that revenue requirement attributable to each customer class must be determined. This allocation is performed via the multi-step process described below.

5.2.1 O&M Allocation to Function Categories

The first step in determining revenue requirements by customer class is to allocate the test year O&M revenue requirement to functional categories. These categories are functions that the wastewater utility must perform in order to deliver wastewater service to City customers. For the wastewater utility they are: Administrative and General, Customer Service, Collection, Pumping, and Treatment.

The O&M allocations, by department, are shown in Table 43 below:

TABLE 43: WASTEWATER O&M ALLOCATION TO FUNCTIONAL CATEGORIES

DEPARTMENT	Total $ Allocation	Administrative and General	Customer Service	Collection System	Lift Stations and Pumping	Wastewater Treatment
Total Dept 536 101-Utilities - Sewer Administration	$ 7,853,942	$ 7,653,942	$ -	$ -	$ -	$ -
Total Dept 540 100-Water Service Center Management	$ 839,476	$ -	$ 839,476	$ -	$ -	$ -
Total Dept 540 300-WSC - Capital Improvements	$ -	$	$ -	$ -	$ -	$ -
Total Dept 540 207-Wsc-Meter Reading - Sewer	$ 738,419	$ -	$ 738,419	$ -	$ -	$ -
Total Dept 540 208-Wsc-Sewer Maint./Construction	$ 2,797,696	$ -	$ -	$ 2,797,696	$ -	$ -
Total Dept 550 100-Wpc Operations	$ 5,516,166	$ -	$ -	$ -	$ -	$ 5,516,166
Total Dept 550 200-Wpc-Third Ave Pump Station	$ 735,282	$ -	$	$ -	$ 735,282	$ -
Total Dept 550 202-Wpc-Maintenance Expense	$ 2,912,411	$ -	$	$ -	$ -	$ 2,912,411

Total Dept 550 800-Non_dep_Exp-Sewer Portion	$ -	$ -	$	$ -	$ -	$ -
Total Dept 966 101-Transfers out to fund 101	$ 1,860,000	$ 1,860,000	$ -	$ -	$ -	$ -
GRAND TOTAL WASTEWATER UTILITY	$ 23,053,392	$ 9,513,942	$ 1,577,894	$ 2,797,696	$ 735,282	$ 8,428,576

5.2.2 O&M Allocation to Cost Components

Once O&M costs have been allocated to functional categories, the total O&M revenue requirement allocated to each functional category must be further allocated based on the operational need which they are designed to fulfill. For this allocation RFC has generally utilized the cost allocation methodology described in the Water Environment Federation's Manual of Practice No. 27, "Financing and Charges for Wastewater Systems."

The costs components utilized in this study are: volume or wastewater utility costs which are incurred on the basis of the quantity of wastewater discharged into the system, strength measures such as Biochemical Oxygen Demand ("BOD"), Total Suspended Solids ("TSS") and Phosphorus; and customer measures such as equivalent meters and monthly bills. A summary of the allocation of the wastewater O&M revenue requirement is included in Table 44 on the following page.

TABLE 44: WASTEWATER O&M ALLOCATION TO COST COMPONENTS

			Strength			Customer	
FUNCTIONAL CLASSIFICATION	Total $ Allocation	Volume Allocation	Allocation to BOD	Allocation to TSS	Allocation to Phosphorus	Customer Meters	Customer Bills
Administrative and General	$ 8,513,942	$ 2,482,564	$ 1,974,206	$ 1,974,206	$ 1,974,208	$ 1,108,760	$ -
Customer Service	$ 1,577,894	$ -	$ -	$ -	$ -	$ 1,577,894	$ -
Collection System	$ 2,797,696	$ 2,797,696	$ -	$ -	$ -	$ -	$ -
Lift Stations and Pumping	$ 735,282	$ 735,282	$ -	$ -	$ -	$ -	$ -
Wastewater Treatment	$ 8,428,578	$ -	$ 2,809,526	$ 2,809,526	$ 2,809,526	$ -	$ -
	$ 23,053,392	$ 6,015,542	$ 4,783,732	$ 4,783,732	$ 4,783,732	$ 2,686,654	$ -

5.2.3 *Capital Cost Allocation to Functional Components*

Similar to the allocation of the O&M revenue requirement described in the previous section, the capital revenue requirement must be allocated to functional categories. Table 45 below indicates the allocation of capital costs.

TABLE 45: WASTEWATER CAPITAL ALLOCATION TO FUNCTIONAL CATEGORIES

Allocation of Capital Costs to Functional Categories						
	Total	Administrative and General	Customer Service	Collection System	Lift Stations and	Wastewater Treatment
Breakdown of Fixed Assets by Function	100%	0.32%	0.00%	82.79%	4.31%	12.58%
Total Capital Expenditures	$ 7,230,846	$ 22,823.92	$ -	$ 5,986,709	$ 311,745	$ 909,567

$ Allocation of Water Fixed Assets to Functional Categories						
FIXED ASSET CATEGORY	Net Book Value	Administrative and General	Customer Service	Collection System	Lift Stations and	Wastewater Treatment
01Land	$ 38,077	$ 120	$ -	$ 31,526	$ 1,642	$ 4,790
02Construction-in-progress	$ 527,286	$ 1,664	$ -	$ 436,561	$ 22,733	$ 66,327
11Land Improvements	$ 3,480,377	$ 10,986	$ -	$ 2,881,545	$ 150,050	$ 437,796
12Building Improvements	$ 752,957	$ 2,377	$ -	$ 623,399	$ 32,462	$ 94,714
13Sewage disposal plant & equipment	$ 6,581,444	$ -	$ -	$ -	$ -	$ 6,581,444
14Vehicle	$ 456,125	$ -	$ -	$ 456,125	$ -	$ -
15 Sewage Pumping Station	$ 2,255,719	$ -	$ -	$ -	$ 2,255,719	$ -
16Office & Other Equipment	$ 28,892	$ 28,892	$ -	$ -	$ -	$ -
17Sewer SSR	$ 42,852,474	$ -	$ -	$ 42,852,474	$ -	$ -
18Sanitary Sewers (Engg only)	$ 136,257	$ 136,257	$ -	$ -	$ -	$ -
Total Water Fixed assets	$ 57,119,603	$ 180,296	$ -	$ 47,291,630	$ 2,462,606	$ 7,185,071
% Breakdown	100.00%	0.32%	0.00%	82.79%	4.31%	12.58%

As the table above indicates, the basis for the allocation of capital costs was the existing level of wastewater utility investment in fixed assets. The existing net book value of each major asset class was allocated to the functional categories. The total capital revenue requirement, approximately 7 Million in the test year, was then allocated according to the proportion of existing investment in each functional category. For example, a large proportion of investment in wastewater fixed assets relates to the rehabilitation of the City's collection system ("Sewer SSR"). As such, the majority of the capital revenue requirement (82%) has been allocated to the collection system function.

5.2.4 *Capital Cost Allocation to Cost Components*

As with the allocation of the O&M revenue requirement described above, the functionally allocated capital revenue requirement must also be further allocated according to the operational need that each function is designed to fulfill.

Table 46 below summarizes this allocation.

TABLE 46: WASTEWATER CAPITAL ALLOCATION TO COST COMPONENTS

			Strength			Customer	
FUNCTIONAL CLASSIFICATION	Total $ Allocation	Volume Allocation	Allocation to BOD	Allocation to TSS	Allocation to Phosphorous	Customer Meters	Customer Bills
Administrative and General	22,824	19,944	960	960	960	-	-
Customer Service	-	-	-	-	-	-	-
Collection System	5,986,709	5,986,709	-	-	-	-	-
Lift Stations and Pumping	311,745	311,745	-	-	-	-	-
Wastewater Treatment	909,567	-	303,189	303,189	303,189	-	-
Total Capital Expenditures	7,230,845	6,318,397	304,149	304,149	304,149	-	-

5.2.5 *Non-Rate Revenue Allocation to Cost Components*

Non-rate revenue must be excluded from the O&M and Capital revenue requirements as these amounts are an offset to the revenue requirement which will be recovered from rates. Consequently, non-rate revenues are allocated to the cost components so that they can be removed from the total revenue requirement. In this case, non-rate revenues were allocated proportionally according to the total O&M revenue requirement allocation and can be seen in Table 47 below.

TABLE 47: WASTEWATER NON-RATE REVENUE ALLOCATION TO COST COMPONENTS

			Strength			Customer

5.2.6 *Plant Balance Analysis*

Once each component of the revenue requirements has been determined, wastewater strength units, by customer class must be estimated. These are the basis upon which the strength costs, determined in the previous step, are allocated to each customer class.

This allocation is performed via a proportional distribution of each measure of strength to each customer class, based on the contribution of that class to overall billed wastewater volumes. This calculation is shown in Table 48 below.

TABLE 48 WASTEWATER PLANT BALANCE ANALYSIS CALCULATIONS

CUSTOMER CLASS	Test Year Volume (CCF)	Biochemical Oxygen Demand mg/L	Biochemical Oxygen Demand Pounds	Total Suspended Solids mg/L	Total Suspended Solids Pounds	Phosphorous mg/L	Phosphorous Pounds	Test Year Combined Pounds
Treatment Plant Volumes	3,669,016	84.5	1,935,231.27	78.5	1,797,911.30	4.225	96,768.56	3,830,009
Less:								
Total Inside City Residential	1,576,666	100	989,080	93	916,437	2	17,177	1,922,694
Total Inside City Commercial/Industrial	1,398,721	100	877,451	93	813,007	2	15,238	1,705,696
Total Outside City Residential	208	100	129	93	120	2	2	251
Total Outside City Commercial/Industrial	7,012	100	4,399	93	4,076	2	76	8,550
Total System Billed Volumes	2,982,604	100	1,871,059	93	1,733,639	2	32,494	3,637,192
Total Infiltration and Inflow	686,412	15	64,272.49	15	64,272.49	15	64,272.49	192,817
Balance	-		(0)		(0)			-
Gallons per CCF	748							
Milligrams per Pound	453,592							
Liters per Gallon	3.785411							
% Infiltration and Inflow	23%							

As an example, consider Biochemical Oxygen Demand. The proportion of BOD contributed to the wastewater system by each class, is function of the overall volume contributed by that class. Therefore the BOD units are allocated to each customer class based on their proportion of total billed volumes. Inside City Residential customers, for example, are forecasted to contribute 1.5 Million CCF in billed wastewater volumes in the test year, or 53% of total billed volumes. Consequently, they are assigned 53% of total forecast BOD. The same calculations are performed for the remaining strength units, TSS and Phosphorous.

The result is a total level of strength units for each customer class, which is then used to determine unit costs by customer class and allocate the test year revenue requirement.

5.2.7 *Calculation of Units of Service*

The next step in the cost allocation process is to summarize the units of service, which are used as the basis for the allocation of the total revenue requirement to each of the customer classes. The units pertain to each of the cost components mentioned above (i.e. strength, volume and customer units). In the following step, the units will be used to determine a unit cost for each cost component.

The wastewater units of service are shown in Table 49 below.

TABLE 49: WASTEWATER UNITS OF SERVICE

WASTEWATER UNITS OF SERVICE		Residential		Commercial/Industrial	
	Total System (CCF)	Total Inside City Residential	Total Outside City Residential	Total Inside City Commercial/Industrial	Total Outside City Commercial/Industrial
Volume Units					
% Breakdown		52.9%	0.0%	46.9%	0.2%
Total System Billed Volumes	2,982,604	1,576,666	206	1,398,721	7,012
Total Infiltration and Inflow	686,412	362,852	47	321,900	1,614
Total Volume	3,669,016	1,939,517	253	1,720,620	8,625
Strength Units					
BOD	1,671,059	989,080	129	677,451	4,399
TSS	1,733,639	916,437	120	813,007	4,076
Phosporous	32,494	17,177	2	15,238	76
Total Wastewater Strength (Pounds)	3,637,192	1,922,694	251	1,705,696	8,550
Customer Units					
Meters	33,177	25,436	6	7,699	35
Bills	315,952	301,096	71	14,646	137

As mentioned above the units determined for each customer class are volume (the total forecast wastewater contribution) strength (the proportion of wastewater strength units determined in the plant balance analysis) and customer (equivalent meters and customer bills as in the water cost of service study).

5.2.8 Unit Cost of Service

Following the allocation of the wastewater revenue requirements to each of the cost components and the calculation of the units of service, a unit cost of service for each cost component can be determined. These unit costs are the basis by which the revenue requirements by customer class are determined.

The unit cost of service is the total revenue requirement, as allocated to the cost components, divided by the units of service attributable to each component and is shown in Table 50 on the following page.

TABLE 50: WASTEWATER UNIT COST OF SERVICE

Wastewater Units of Service		Strength			Customer	
CUSTOMER CLASS	Volume Allocation	Allocation to BOD	Allocation to TSS	Allocation to Phosphorous	Customer Meters	Customer Bills
Total Inside City Residential	1,939,517	989,080	916,437	17,177	25,436	301,096

Wastewater Cash Basis Revenue Requirements			Strength			Customer	
REVENUE REQUIREMENT	Total	Volume Allocation	Allocation to BOD	Allocation to TSS	Allocation to Phosphorous	Customer Meters	Customer Bills
Total Operation and Maintenance Expenditures	$ 23,053,392	$ 6,016,542	$ 4,783,732	$ 4,783,732	$ 4,783,732	$2,686,854	$ -
Unit Cost		$ 1.64	$ 2.56	$ 2.76	$ 147.22	$ 80.98	$ -
Total Capital Expenditures	$ 7,230,845	$ 6,318,397	$ 304,149	$ 304,149	$ 304,149	$ -	$ -
Unit Cost		$ 1.72	$ 0.16	$ 0.18	$ 9.36	$	$ -
Total Non-Rate Revenues	$ (423,562)	$ (110,524)	$ (87,892)	$ (87,892)	$ (87,892)	$ (49,362)	$ -
Unit Cost		$ (0.03)	$ (0.05)	$ (0.05)	$ (2.70)	$ (1.49)	$ -
Total System Revenue Requirements	$ 29,860,674	$ 12,223,415	$ 4,999,989	$ 4,999,989	$ 4,999,989	$2,637,292	$ -
Total System Unit COS	$ -	$ 3.33	$ 2.67	$ 2.88	$ 153.87	$ 79.49	$ -

For example, the total volume units are 3.6 Million CCF. This means that the O&M, Capital and Non-Rate Revenue Requirements cost $1.64, $1.72 and $(.03) per unit of wastewater volume. The total unit cost associated with wastewater volume is $3.33/CCF. The calculation is repeated for each cost component to determine the overall unit cost associated with wastewater volume, strength (BOD, TSS and Phosphorous) and customer service

5.2.9 Revenue Requirements by Customer Class

The customer class revenue requirements are the basis for establishing alternative rates by customer class. The City's existing wastewater rate structure does not include distinct rates by customer class. At this time the City does not wish to make major rate structure changes. However, the revenue requirements by customer class are shown in Table 51 on the following page and are the basis for the alternative wastewater rates presented as appendix B to this report.

TABLE 51: WASTEWATER REVENUE REQUIREMENTS BY CUSTOMER CLASS

Wastewater Units of Service			Strength			Customer	
CUSTOMER CLASS		Volume Allocation	Allocation to BOD	Allocation to TSS	Allocation to Phosphorous	Customer Meters	Customer Bills
Total System Revenue Requirements	$ 29,860,674	$ 12,223,415	$ 4,999,989	$ 4,999,989	$ 4,999,989	$2,637,292	$ -

Total System Cost of Service	$ 29,860,674	$ 12,223,415	$ 4,999,989	$ 4,999,989	$ 4,999,989	$2,637,292	$ -
Check on Total System COS (Should be $0)	$ -						

The revenue requirement for each customer class is the total unit cost of service determined previously, multiplied by the units of service for each customer class. The result is a total allocation to each customer class made up of each of the cost components discussed previously. The allocation is based on each customer class's contribution to the wastewater utility's overall operating and capital costs, as represented by their units of service.

5.3 WASTEWATER RATE DESIGN

The wastewater rates have been calculated under the existing rate structure and under a new structure which recognizes the customer classes present in the City's CIS. The rate calculation under existing rates will be presented here, with the alternative rates by customer class presented as an appendix B.

5.3.1 Volumetric Rate Calculations

As mentioned above, the City did not indicate a desire to significantly modify the existing wastewater rate structure. Therefore RFC maintained various components of the existing water volumetric rates including:

- The existing inside/outside city differential (i.e. outside=110% of inside)
- The existing structure which charges the same volumetric rates for all customer classes
- The existing shift of some volumetric costs to the fixed service charge (i.e. a readiness to serve adjustment)

The calculation of the wastewater volumetric rates involves the following steps

- Determine total composite volumetric revenue requirement:
  - Adjust the test-year revenue requirement allocated to the volume cost component by the readiness to serve amount
  - Add the wastewater strength related cost components (BOD, TSS and Phosphorous)
  - Remove Beecher Metro Revenue
  - Add the inside and outside city revenue requirements to determine a composite revenue requirement for all customer classes
- Determine the composite wastewater units:
  - Multiply the units of inside and outside city customers by the existing I/O differential (Outside=110% of Inside)
  - Add those units together.
- Calculate Inside and Outside City Volumetric Rates:
  - Determine a composite rate for all customer classes by dividing the total composite revenue requirement determined above, by the total composite wastewater units
  - Multiply the composite rates by the Inside and Outside City differentials (100% for Inside City and 110% for Outside City) to determine the rates for each customer class.

The above calculations are summarized in Table 52 on the following page.

5.3.2 *Fixed Charge Calculations*

As noted above, the City did not express a desire to change rate structures at this time. Consequently, the following aspects of the existing rate structure have been maintained including:

- The existing inside/outside city differential (i.e. outside=120% of inside)
- The existing shift of some volumetric costs to the fixed service charge (i.e. a readiness to serve adjustment)
- The flow equivalencies for the various meter sizes

The calculation of the wastewater fixed charges involves the following steps:

- Determine total composite fixed charge revenue requirement by summing the fixed charge revenue requirements (i.e. those allocated to the customer service related cost components) and the readiness to serve revenue requirement.
- Determine the composite fixed charge wastewater units:
    - Multiply the number of inside and outside city equivalent accounts by the existing I/O differential (Outside=120% of Inside)
    - Add those units together to determine the composite number of equivalent customer accounts
- Calculate Inside and Outside City Volumetric Rates by:
    - Determine an annual composite rate for all customer classes by dividing the total composite revenue requirement determined above, by the total composite wastewater equivalent accounts
    - Determine a monthly rate for the 5/8" equivalent account by dividing the annual rate by 12.
    - Multiply the composite fixed charges by the Inside and Outside City differentials (100% for Inside City and 110% for Outside City) to determine the monthly fixed charge per 5/8" equivalent account for inside and outside city customer classes.
    - Multiply the monthly fixed charge for a 5/8" equivalent account by the meter equivalencies for each meter size to determine the monthly fixed charge for the remaining meter sizes.

The calculations described in the narrative above are summarized in Table 53 on the following page.

TABLE 53: WASTEWATER FIXED CHARGE CALCULATIONS

5.3.3 *Summary of Existing and Forecast Wastewater Rates*

Based on the calculations from the previous two sections, the existing and proposed rates for the forecast period are shown in Tables 54 and 55 on the following page.

Note that while the test year FY 2015 rates have been calculated within the cost of service study, the rates for FY 2016 and beyond are based on the overall rate revenue increase from the wastewater utility financial plan.

6. DISCUSSION OF BEST MANAGEMENT PRACTICES (BMP)

We reviewed the City's water and wastewater utility performance in relation to Best Management Practices that have been published by Fitch Ratings ("Fitch"). These criteria are used by Fitch when reviewing the performance of a utility as part of the bond rating process.

6.1 FINANCIAL PROFILE

"Long term integrated financial forecasting that considers future demand, expected rate increases, regulations, and infrastructure renovation and renewal needs."

In general, the City's practices are consistent with this BMP. This report includes ten year comprehensive financial plans for both the water and wastewater utilities. These were developed in collaboration with City staff and reflect the rate revenue increases necessary to adequately fund operation and maintenance expenditures, make necessary capital improvements and ensure fiscal sustainability for each utility on a going forward basis. In addition to these general objectives, the water utility financial plans reflect the transition from DWSD to the KWA, which is expected to lower the level of future rate increases and afford the City greater control over the water utility's operating costs.

"Policies ensure appropriate financial margins, including debt service coverage and operating liquidity levels."

In general the City is taking steps to improve consistency with this BMP. The aforementioned water and wastewater utility financial plans move the City towards an operating reserve target of 90 days

of O&M and debt service. These reserves are critical to mitigate the risk inherent in operating a seasonal enterprise. That said, it is also importance to recognize the sensitivity of ratepayers to further increases, especially given the relatively high level of existing rates. Consequently, the City has decided to work up to the 90 day target over the next few fiscal years to mitigate the potential rate impact.

Coverage of existing water utility debt service is quite strong. This stems primarily from the fact that, given the City's past financial difficulties, it has limited access to capital markets for the purpose of funding its capital improvements. At this time, all major capital improvements are forecast to be made out of current rate revenues. If this policy is maintained throughout the forecast period, water utility debt service coverage will likely continue to improve In the future the City may choose to leverage its water revenues via the Michigan Drinking Water Revolving Revenue Fund, which would spread the rate impact of the forecast capital improvements. Currently, the City does not have any outstanding wastewater debt.

"Regular financial reporting and monitoring systems enable policymaker's access to timely information on fiscal performance relative to the budget."

It is our understanding that the City's reporting systems are consistent with this BMP.

"Limited exposure to growth sensitive revenues, such as tap, connection, or impact fees."

The City's practices are consistent with this BMP. The City currently receives little to no revenue from growth related fees, mostly due to the fact that customer account growth has largely been negative or flat in recent years. Consequently the City is not overly reliant on such fees. However, if customer account growth becomes positive in the future, the City should consider implementing growth related fees to ensure that new customers are adequately compensating existing customers for their investment in the water and wastewater systems.
"Collection policies that regularly track the rate of timely payment receipts and enforce penalties against late payers or terminate service for non-payment."

The City has taken steps to improve consistency with this BMP In recent years, account delinquency and non-payment has become a significant problem for the City. In addition, City staff has cited issues regarding potential water theft. Given these challenges, the City has engaged a consulting firm to aid in the analysis of their customer information system data, in an effort to recover the lost revenue associated with these issues. This is a critical in that it ensures paying customers are not bearing the burden of water theft going forward.

"Willingness of political leaders to adjust rates when necessary."

The City's practices are consistent with this BMP. Emergency Manager Darnell Early has the authority to raise rates as necessary to ensure the ongoing financial sustainability of the water and wastewater utilities. It is our understanding however, that input from political stakeholders will continue to be part of that City's rate adjustment process going forward.

"Limited exposure to financial operations of the general government, so that system revenues can be relied upon for use to operate and improve the utility For transfers to the general fund policies that specifically limit their scope and growth are favorable."

The City is taking steps to improve consistency with this BMP. It is our understanding that approximately $10 million is due from the City's general fund to the water and wastewater utilities. A potential course of action would be to reduce the amount of administrative fees the water and wastewater utilities pay each year to the general fund, until the amount owed is paid back in full. Regardless of the method, the City has indicated that, as a worst case scenario, the general fund would repay the amount owed to the water and wastewater utilities by FY 2019

"Compliance with industry accounting practices and establishment of appropriate internal controls."

It is our understanding that the City's accounting practices adhere to the generally accepted accounting practices ("GAAP") set forth by the Governmental Accounting Standards Board ("GASB").

"Rate affordability guidelines that consider absolute levels of rates and their affordability relative to income levels."

The City is working to improve consistency with this BMP. Affordability is a critical consideration for the City especially given the relatively high level of existing rates. As mentioned above, a key component of this study involved analyzing the impact of transitioning from DWSD to the KWA, a policy which should generate savings to ratepayers in lieu of what would have happened had the City continued to purchase water from DWSD.

6.2 DEBT PROFILE RELATED

"Prioritized capital improvement plans that cover at least five years and consider capacity, supply, regulatory and replacement and renewal needs."

The City's practices are consistent with this BMP. The City has provided five year capital improvements plans for the water and wastewater utilities as well as guidance for forecasting beyond that period, both of which have been incorporates into the water and wastewater financial plans. Based on our experience with utility operations and an examination of the provided plans, it is our opinion that the City is working to address capacity, supply and regulatory issues.

"Debt issuance policies including types, terms, and suitability under specific conditions, as well as the amount of variable-rate debt deemed appropriate."

Currently the City's wastewater utility has no debt and the level of water utility relatively modest. Though the debt associated with the joining KWA will increase this amount in the coming years, it will not reach unsustainable levels.

"Development of comprehensive policies on the use of hedge agreements and their disclosure prior to entering into any such agreements."

The water and wastewater utilities are not currently party to any such agreements and there are no plans to utilize such agreements in the future.

6.3 OPERATING PROFILE RELATED

"Key management industry experience and active participation in organizations that keep pace with sector issues, regulatory mandates and technological advances."

The City's practices are consistent with BMP in this regard

"Use of professional engineers, either within the utility or outside of it, to prepare objective reviews of system performance and needs on regular basis and provide periodic revisions to construction cost estimates."

The City's practices are consistent with BMP in this regard.

"Regular consultation with regional and local growth planners, community development officials, and demographers to predict and, if possible, limit infrastructure needs related to population and business growth."

The City has been very active in such activities in recent years, as evidenced by their participation in the KWA effort to secure a more economical source of water to better meet the City's needs in the future.

Angela,

FYI. I am holding on this.

I cannot determine if this project was bid or if this is a sole source expenditure.

Subject: One Resolution for Approval EME1792014

Angela,

We are submitting the following resolution for State approval:

EME1792014 - Resolution to Metron-Farnier for Residential Water Meters - $199,645.00 (Water Fund, Sewer Fund)

Please see attached.

14-5041

(Bid #14-095)

EM SUBMISSION NO.: EME179 2014

PRESENTED: 2-28-14

ADOPTED: _____

BY THE EMERGENCY MANAGER:

RESOLUTION TO METRON-FARNIER FOR RESIDENTIAL WATER METERS

BY THE EMERGENCY MANAGER

RESOLUTION

The Utilities/Water Service Center has estimated the need to purchase 1,065 each 5/8" residential water meters to process requests for water turn-ons and to replace non-functioning older meters through the remainder of the fiscal year budget, and

Metron-Farnier, LLC, 5661 Airport Blvd., Suite B, Boulder, Colorado is the manufacturer of said 5/8" residential composite water meters that are supported by the city's automated meter reading system. Funding will come from the following account numbers 591-540.200-726.000 ($89,840.25), 590-540.207-726.000 ($109,804.75); and

IT IS RESOLVED, that the Department of Purchases and Supplies, upon the Emergency Manager's approval, is hereby authorized to issue a purchase order to Metron-Farnier, LLC for purchase of 1,065 each 5/8" residential water meters in the amount of $199,645.00. (Water Fund, Sewer Fund)

APPROVED-PURCHASING DEPT:

Derrick F. Jones, Purchasing Manager

APPROVED AS TO FINANCE:

Gerald Ambrose, Finance Director

APPROVED AS TO FORM:

Peter M. Bade, City Attorney

EM DISPOSITION:

ENACT _____ REFER TO COUNCIL _____ FAIL _____

RESOLUTION STAFF REVIEW

DATE: 1-25-14

Agenda Item Title: Water Meters

Prepared By: Cheri Priest, WSC Support Technician

Background/Summary of Proposed Action: The Water Service Center is requesting the purchase of 1065 5/8" residential water meters. The WSC meter stock is currently depleted with very limited stock on hand. Unfortunately, without meters, the City is unable to process water turn-ons or any other order that requires a meter to be set or changed.

Financial Implications: Adequate funding exists in the below listed accounts

Budgeted Expenditure? Yes ☒ No☐ **Please explain if no:**

Account No.: 590-540.207-726-000 $109,804.75
591-540.200-726-000 $ 89,840.25

Pre-encumbered? Yes ☒ No☐ **Requisition #** 140000039

Other Implications (i.e., collective bargaining): None

Staff Recommendation: Recommend Approval

Staff Person: Robert Burial
(Dept Head or other authorized staff)

Maxine,

Good morning.

I have a question on this specific resolution. Was this project bid and Metron-Farnier is the winning bid?

I am unclear if they are the winning bid or if they are a sole source provider of these water meters. I want to ensure that other providers have been examined.

Please clarify.

Thank you.

I spoke with Mr. Craig at the DEQ and he was working on the current version of the Consent Order when I called.

Mr. Craig indicated that the order is intended to temporarily reopen the lime disposal area so the WTP upgrades can go forward. In the future the area would be evaluated for clean-up or capping (or other measures after an environmental assessment occurs).

Mr. Craig stated that he hopes to send his comments back to the City's attorney at Werner, Norcross & Judd either tomorrow or Monday.

I requested periodic updates on the status of this project but if anyone wishes any follow-up, please let me know.

ELECTRONIC COMMUNICATION

March 7, 2014

Ms. Sue McCormick
Detroit Water and Sewer Department
Detroit, Michigan

RE: DWSD Water Rates

Dear Ms. McCormick:

Thank you for the correspondence dated February 12, 2014 which provides Flint with the option of continuing to purchase water from DWSD following the termination of the current contract as of April 17, 2014.

Following DWSD's April 17, 2013 notice of termination of the water service contract between the City of Flint and DWSD, the City of Flint has actively pursued using the Flint River as a temporary water source while the KWA pipeline is being constructed. We expect that the Flint Water Treatment Plant will be fully operational and capable of treating Flint River water prior to the date of termination. In that case, there will be no need for Flint to continue purchasing water to serve its residents and businesses after April 17, 2014.

We are aware that Genesee County has been in negotiations with DWSD to purchase water from DWSD following the termination of our contract, and we understand that an agreement may be imminent. Should that occur, there would be no further need for the City to discuss with DWSD any continuing purchase of water. Should that not occur, however, we would be interested, if Genesee County were to so request, to purchase water from DWDS for some period of time. In such an event, our demand for water would be only for the amount necessary to provide Genesee County with water. That amount would be approximately half of the amount Flint is currently purchasing from DWSD.

However, in the very unlikely event that the City of Flint is not able to draw water from the Flint River no later than April 17, 2014, then the City would like the option of continuing to purchase water from DWSD for a period of time, up to the time water is available from KWA.

Consequently, I am requesting that you clarify your proposal for the City of Flint to continue purchasing water from DWSD under the following scenarios:

- Flint, upon the request of Genesee County, purchases water for sale to Genesee County for up to 3 years, beginning April 17, 2014, in an amount approximately 50% of the volume currently purchased by the City;
- Flint purchases water from DWSD in approximately the same volume as currently, for up to 3 years, beginning April 17,2014, with the ability to reduce that volume by up to 50% during that period, upon 30 days notice to DWSD
- Flint purchases water from DWSD in approximately the same volume as currently, for up to 3 years, beginning April 17, 2014, with the ability to reduce that volume by up to 50% during that period, upon 30 days notice to DWSD, and further, to terminate the reduced volume purchase should Genesee County and DWSD reach an agreement whereby Genesee County directly purchases water from DWSD.

Thank you and please contact me if you have any questions. I look forward to your response.

Sincerely,

Darnell Earley, ICMA-CM, MPA

Mr. Cline,

This is to let you know that we just send the revised draft consent order regarding the City's Bray Road site to Mr. Michael Robinson, Warner Norcross & Judd. As I discussed with you earlier this week, Mr. Robinson is representing the City regarding its Safe Drinking Water Act permit and the environmental issues at the Bray Road site – the site the City intends to use to manage the residuals from its water treatment plant as it moves forward to use the Flint River as source water for the treatment plant. I expect that Mr. Robinson will be contacting the Department of Environmental Quality staff that he has been working with to schedule a meeting to discuss the draft document.

If you require any information regarding the progress of the discussions between the City and DEQ, please do not hesitate to contact me.

Sincerely,

John

Angela,

I have received a reply from Flint regarding the following resolution:

EME1792014 - Resolution to Metron-Farnier for Residential Water Meters - $199,645.00 (Water Fund, Sewer Fund)

It appears that the quoted price for these meters was bid out and this price was the lowest bid and this cost has been continued by the vendor for a while.

As such, I am recommending approval of this resolution.

Please note that I have also been informed that the City's supply of spare meters is currently exhausted, so they are requesting prompt attention to this resolution.

If there are further questions, please let me know.

Subject: Re: FW: One Resolution for Approval EME1792014
To: Maxine Murray <mmurray@cityofflint.com>

Good Morning Max;
Please see the explanation below concerning the resolution in question:

The City of Flint has nearly 35,000 water meters, in which approximately 30% of these meters are well past their expected life cycle. The City solicited a proposal in 2009 to determine the most feasible and cost effective solution for replacing meters, while retaining our current water meter remote reading system. The City also must obtain meters that adhere to the NSF/ANSI Standard 61 that require meters with no lead while continuing to be compatible to our system. After reviewing the proposal it was determined that the City would continue to purchase meters from the lowest price vendor, Metron. The product is compatible with our current remote reading system and adheres to the aforementioned standard.

The City is requesting to replenish the stock of meters and it is not feasible to change meters when the inventory is depleted, therefore, Metron the sole provider for our requirements.

Please let me know if Mr. Cline needs additional information.

Subject: RE: Fund Names, Flint DEP/RAP

Suzanne,

Our comments regarding the Flint DEP are as follows:

1. Item #1 for $142,183 repayment of loan, while not necessarily a bad thing, doesn't reduce the deficit (only impacts balance sheet).
2. Item #2 for $2,110,000 loan forgiveness – we're okay here.
3. Item #3 for $1,000,000, do we want copy of future budgets showing revenue > expenditures by $1,000,000? We think this will be okay.
4. Item #3 for $800,000, we can't confirm what they're doing here based on their explanation. We think we know what they want to do (transfer from other fund to general fund), but need to confirm – will probably be okay.
5. FY19 shows $843,459 budget surplus instead of $1,000,000. Looks like this is a plug to get accumulated deficit to $0. Should confirm it's still $1,000,000, and will be transferred to sewer fund.

I will provide details of the above when needed.

Harlan

Subject: Fund Names, Flint DEP/RAP

Hi Suzanne,

Attached please find the fund names referenced in the draft DEP/RAP. When we get to finalizing the document, we can include the names if that is more appropriate.

Thanks for the quick review and please contact me if you have any other questions or comments.

Angela,

I have reviewed the following resolution:

EME1982014 - Resolution to Zito Construction for Initial Watermain Cut-In @ the Water Plant - $676,300.00 (Water Fund)

The recommended vendor was the only submission to the City's request for bid. Typically, I have concerns about awarding bids to only one bidder

However, the City has a very aggressive timeline in order to meet an April completion date before losing service from DWSD. The City also stated that they held multiple meetings to encourage maximum vendor participation, however, this aggressive timeline may have impacted the number of bids received.

The City appears confident that this contract can execute the requested work. Given the aggressive timeline, I am, therefore, recommending approval of this resolution.

RESOLUTION TO ZITO CONSTRUCTION FOR INITIAL WATERMAIN CUT-IN @ WATER PLANT

BY THE EMERGENCY MANAGER

RESOLUTION

The Department of Purchases and Supplies has solicited a bid for an initial watermain cut-in @ the Water Plant as part of an upgrade project to said facility; and

Zito Construction was the sole bidder from eight solicitations for said requirements. The funding for this request will come from the following account number: 591-545.300-801.000; and

IT IS RESOLVED, that the Proper City Official, upon the Emergency Manager's approval, are hereby authorized to enter into a contract with Zito Construction for watermain cut-in at the Water Plant in an amount not to exceed $676,300.00. (Water Fund)

RESOLUTION STAFF REVIEW

DATE:
March 13, 2014

Agenda Item Title:
Water Main Cut-in

Prepared By:
Brent Wright, Water Plant Supervisor

Background/Summary of Proposed Action:
The City of Flint is upgrading its Water Treatment Plant to become our Primary Drinking water source. As part that overall project the Initial Water Main Cut-in and midpoint Chlorination process systems must be completed This will allow for the use of the River as source water and prepare the connection for the KWA source once completed.

The City did have two pre-conference meeting to discuss the aforementioned projects to encourage maximum participation from the vendor community. The City received one vendor to submit and we are requesting the approval of Zito Construction to perform the work.

Financial Implications: Funding available for purchase

Budgeted Expenditure? **Yes** ☒ **No** ☐ **Please explain if no: N/A**

Account Nos: **591-545.300-801.000**

Pre-encumbered? Yes ☐ **No** ☐ **Requisition # (Various)**

Other Implications (i.e., collective bargaining): None
The City is requesting that this request be expedited in order to meet aggressive timeline.

City of Flint Wednesday 9:00 am Phone Conference Agenda
March 19, 2014

1) **Public Safety Update – FPD, MSP (FFD if needed)**

a) Per H. Hollins request Criminal Justice System Advisory Council met with a hybrid group March 12, 2014. Results: see attachment A.

b) Series of supportive stories for SAFER grant renewal from Flint Journal.

c) Other update by Chief Tolbert and MSP.

2) **Governor's Office Update –Rich Baird, H. Hollins**

3) **Retiree Lawsuit – Status, Issues**

There was a 3/14/14 meeting with attorneys and healthcare consultant. There are 3 objectives going forward: 1) reimbursement process in place; 2) provide financial impact to plaintiff attorney; 3) work toward goal of getting judge to reverse injunction.

4) **Financial Update**

a) Deficit Elimination Plan – S. Schafer found no accounting concerns. COF is intending to proceed along lines of DEP as we await formal approval.

b) Approval of the budget amendment still pending – 4 weeks. Because of Water Treatment Plant update expense and timeline, we are proceeding as we await formal approval of the amendment. That is also important because the amendment maintains the $1million in deficit reduction.

c) Thanks to Treasury for assistance in moving Administrative Consent Order through the DEQ, however the process is still moving slowly. ACO is still not approved.

d) Update on E&Y contract: held a phone conference with Treasury about Hurley, Water and Sewer study and their update of the 5 year financial projections.

5) **City Council Update**

a) A timeline has been issued for the FY15 and 16 Budget prep and approval process (see attachment B). Strategic Plan revisions are also approaching

completion – Council is to vote on Mar 24 meeting. This process re-engages Mayor and Council in the planning and budget process.

b) Council is also re-scheduling the Mar 12, 2014 meeting to receive MML training on Ethics and Parliamentary Procedure. Cancelled due to bad weather for trainer's travel.

c) 7 Point Plan for Transition Management is being refined and will be on City Council agenda in March 24 for approval/acceptance.

d) The next City Council meeting is scheduled for Monday, March 24, 2014.

6) **Blue Ribbon Committee**

BRC held its fifth meeting on 3/13/14. Committee is working its way through a list of issues for form of government revision; seeking to achieve group consensus. Council-Manager form of government is receiving strong support.

7) **Water Issues**

The Water Plant held a ceremonial ground-breaking for the update to the water treatment plant in preparation to transition to Flint River use as drinking water source.

We will know by the first of next week the certainty of being on the river in April.

We are currently in negotiations with GCDC on purchase of pipeline. COF is making counter-proposal on sale of pipeline (using $4million appraisal value). Need to know Treasury will approve sale using this appraisal.

8) **Scrap Metal Bill (HR 4593)**

Brian Larkin to update at this meeting.

9) **Other items**

Created on: 03/17/14

Wayne and Ed,

We greatly appreciate the call made after our last meeting to DEQ by Eric Cline regarding the pending ACO. It has moved along, but still in process.

Any additional assistance you an give would be greatly appreciated. As you can see from Dave Massaron's email, formal approval of the ACO is required in order for the bond sale to proceed.

Thanks and see you tomorrow.

Jerry

Jerry,

As you know the KWA is far along in the process of issuing the first series of bonds (approximately $220,000,000) for the construction of the pipeline. It has received Treasury Approval, engaged an underwriter, and begun the rating process. Paul Stauder, as financial advisor to KWA, and TJ Whitehouse, as KWA's investment banker at JPMorgan, are working hard on the rating agencies now in hopes of having a rating by the end of the week.

The next step is to post investor disclosure after receipt of ratings. Once that investor disclosure, or preliminary official statement, is posted, KWA can close on its bond issue within two weeks according to its banker and financial advisor.

However, we cannot take that step until the DEQ Administrative Consent Order ("ACO") is effective. The DEQ order is necessary for two reasons: 1) There is extensive disclosure on the water treatment plant, ACO and Flint's ability to use that plant in the POS and 2) More importantly, if the KWA project is done to comply with an ACO, the debt associated with the project would not "count" towards the City's debt limit. As you know, the City of Flint has lived through a dramatic decline in property values and state revenue sharing. These declines have dramatically reduced its debt capacity under the Home Rule City Act. In order to ensure that the entire project can be financed (1st and 2nd series of bonds) and that the City will have some debt capacity in the future, the ACO is a condition precedent to proceeding with transaction. Put another way, we will cannot continue with the transaction without the ACO. If there is much more of a delay, the KWA will have expended its initial resources and be forced to stop construction and the project will be delayed for at least one construction cycle. Assuming the ratings come in as planned, the City needs the ACO in place by the end of this week.

By way of background, it is my understanding that there is not disagreement at DEQ about what is being ordered in the ACO. In fact, what is being ordered is exactly why Flint is moving forward with KWA. The ACO simply states that after Detroit cancelled the contract and Flint decided to use its water treatment plant, the City has two options under current DEQ standards. It can either undertake the KWA Improvement project or it will need to undertake other public improvement projects to use the Flint River as a water source. Flint, in consultation with its engineers, has decided that improvements needed to use the river are more costly than the KWA project.

Hope this helps,

-Dave

Present Value Analysis of 72-inch Water Transmission Main for City of Flint

Final Report – January 28, 2014

Lockwood, Andrews & Newnam, Inc.

Project # 130-10701-001

Lockwood, Andrews & Newnam, Inc.
A LEO A DALY COMPANY

PLANNING ENGINEERING PROGRAM MANAGEMENT

Introduction

Lockwood, Andrews, & Newnam, Inc. (LAN) was retained by the City of Flint (City) to perform a pipeline value assessment of the existing 72-inch water transmission main from the Detroit pipeline connection at the intersection of Baxter and Potter Roads to the Flint Water Treatment Plant (FWTP). The 72-inch transmission main was constructed from 1966 to 1968 to supply the FWTP with water from the Detroit Water and Sewerage Department (DWSD). With the original 30 year contract with DWSD expired, the City of Flint plans to establish a new contract with the Karegnondi Water Authority (KWA) beginning in 2015, which would require the KWA to provide raw water to the FWTP.

In order to provide raw water to the FWTP, the KWA will connect a 36-inch transmission main to the existing City-owned 72-inch water main near the northeast corner of Center and Pierson Roads. The Genesee County Drain Commissioner's Office-Division of Water & Waste is interested in purchasing the east portion of the 72-inch transmission main from this connection to the DWSD connection at Baxter and Potter Roads which is being defined in this analysis as Segment 1, while KWA has requested the use of the 72-inch pipeline west of this connection point to the FWTP which is being classified as Segment 2. Our analysis of these two segments is intended to help the City establish an equitable monetary value of both sections. A schematic of the limits of the pipeline and segments 1& 2 is shown in Attachment A.

Analyses

In order to value the segments of the 72-inch transmission main requested, quantities were derived from original construction drawings. Using the as-built cost established from the quantity take off, two (2) analyses were performed on the water main based on different valuation methods. Original Cost Less Depreciation (OCLD) and Reproduction Cost New Less Depreciation (RCNLD) methods were used in conjunction with the sinking fund depreciation technique to develop a credible current value assessment of the pipeline.

Quantity Take-Off

Using the Consoer, Townsend & Associates construction drawings dated 1966 (Attachment B) and the payment document dated January 1969 (Attachment C), a quantity take-off analysis was performed to determine the original construction cost of the section of 72-inch water main as described above. Line items originally listed as "linear feet" or "each" were summed to determine the value within the evaluation limits. Lump sum line items with information available, such as "gate valves complete in place" and "rubber seated butterfly valves," were counted and the ratio of the items within the limits to the whole project was applied to the lump sum price. For any unit with no quantifiable documentation, such as "sand and gravel refill" and "sand and gravel backfill," the ratio of the 72-inch pipeline within the evaluation limits to the whole project was applied to the total cost for the unknown line item. Line items determined to be outside the limits of the valuation were listed with a zero percent ratio.

OCLD Analysis

The Original Cost Less Depreciation valuation method uses the original cost of the project when constructed minus the depreciated value to determine the current value. The initial asset value was determined using the information established from the quantity take-off analysis and the original cost information found in the payment document dated January 1969.

RCNLD Analysis

Reproduction Cost New Less Depreciation is a valuation method that translates initial project costs to present day cost of construction. A new present day construction cost is calculated based on the original construction, followed by a depreciation method used to calculate the current book

value of the asset. The Engineering News-Record (ENR) Construction Index and the Handy-Whitman Cost Index for Concrete Cylinder Mains were possible references to determine the ratio used in calculating the present day cost. For this evaluation, the ENR index was selected to calculate the RCNLD initial asset value. A ratio of the current ENR index from September 2013 (9551.58) to the bid date ENR index from May 1966 (1014) was multiplied by the OCLD asset value to get the RCNLD initial asset value.

Sinking Fund Depreciation

The sinking fund depreciation method is commonly used within the utility industry. This method of depreciation accurately reflects the service life of a utility line, having a low initial depreciation upon installation due to low maintenance during the early years of a utility. As the service life of a utility progresses and maintenance becomes more frequent and comprehensive, the depreciation of the asset increases over time.

Due to the fact that a transmission pipeline must be functional and meet all necessary standards of service until the day it is taken out of service, an intrinsic value will always remain; therefore, a salvage value must be determined prior to the depreciation calculation. Similarly, the useful life of the asset must be pre-determined. The industry standard for the useful life of a pipeline ranges from 50 to 100 years. Typically, lower useful life values are used for distribution mains, whereas higher values are used for transmission systems. For transmission mains similar to the 72-inch being analyzed, a useful life of 75 to 90 years is common. We have selected a useful life of 80 years for this analysis.

In addition to the salvage value and useful life, sinking fund depreciation requires a sinking fund rate, which was selected as 4.50% and 0.75% for OCLD and RCNLD respectively, reflecting the federal discount rate during the construction time analyzed. Due to the sinking fund rate, the annual depreciation varies depending on the year and can be calculated using Eq. 1 and Eq. 2 below.

Eq. 1 $$D_t = \frac{(A-S)*(1+j)^{(t-1)}}{S_{n|j}}$$

Eq. 2 $$S_{n|j} = \frac{(1+j)^n-1}{j}$$

where:

t	=	Evaluation time (years)
D_t	=	Depreciation at year t
A	=	Initial asset value
S	=	Salvage value of asset
J	=	Sinking fund rate

The sum of the annual depreciation values until the evaluation year is subtracted from the initial value to calculate the current book value of the asset value.

Results

Segment 1

RCNLD and OCLD analyses were performed using a sinking fund depreciation of the 72-inch pipeline and appurtenances from the DWSD connection at Baxter and Potter Roads, west to the

proposed 36-inch KWA connection at Center and Pierson Roads. Due to the size of the project and the portion involved in this segment (similar size piping and valves only) the RCNLD value of $27,400,000 was determined to be unrepresentative of the actual asset value. Utilizing the OCLD values listed below, **a book value of $3,988,000** was calculated for this portion of the pipeline.

Table 1 – Segment 1 OCLD Analysis

ORIGINAL COST LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 4,735,900
Useful Life (years)	80
Salvage Value at End of Life*	$ 1,184,000
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
S_{nlj}	729 56
Total Depreciation at Year 47	$ 748,200
Book Value	**$ 3,987,700**

*25% Salvage value

Segment 2

RCNLD and OCLD analyses were performed using a sinking fund depreciation of the 72-inch pipeline and appurtenances beginning at the KWA tie-in at Center and Pierson Roads, west to the property line of the FWTP. Utilizing the RCNLD values listed below, a book value of $5,269,600 was calculated for this portion of the pipeline using the following evaluation criteria:

Table 2 – Segment 2 RCNLD Analysis

REAL COST NEW LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 8,953,900
Useful Life (years)	80
Salvage Value at End of Life*	$ 1,790,800
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
S_{nlj}	109.07
Total Depreciation at Year 47	$ 3,684,300
Book Value	**$ 5,269,600**

*20% Salvage value

Utilizing the OCLD values listed below, a book value of $790,400 was calculated for this portion of the pipeline using the following evaluation criteria:

Table 3 – Segment 2 OCLD Analysis

ORIGINAL COST LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 950,600
Useful Life (years)	80
Salvage Value at End of Life*	$ 190,100
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
S_{nlj}	729.56
Total Depreciation at Year 47	$ 160,200
Book Value	**$ 790,400**

*20% Salvage value

The asset value of segment 2 was determined using the average of the OCLD and RCNLD analyses. **A current book value of $3,030,000 was calculated.**

Summary

OCLD and RCNLD analyses are an effective method of calculating the depreciation of an installed utility, as well as the opportunity cost to the buyer of purchasing an installed utility. After performing these analyses using the sinking fund method of depreciation, current book values of the segments were determined. The portion of the 72-inch transmission main from the DWSD connection at Baxter and Potter Roads, west to the proposed 36-inch KWA connection at Center and Pierson Road, **Segment 1, has a current book value of $3,987,700.** The portion of the 72-inch transmission main beginning at the KWA tie-in at Center and Pierson Roads, west to the property line of the FWTP, **Segment 2, has a current book value of $3,030,000.**

Hi Randy,

Can you please advise when we can expect approval?

This is beginning to impact our time schedule.

Thanks,

Jerry

Subject: 72 inch Water Transmission Main Present value analysis

Jerry:

I wanted to follow-up on our earlier telephone conversation on the valuation analysis for this water main. You have approval to discuss this with the Genesee County Drain Office. The number for the sale needs to the book value stated in the study. This will also need to be approved by the Treasurer. Let me know if you have any questions.

Thanks,
Randy,

Randall D. Byrne, Manager, Office of Fiscal Responsibility

Importance: High

Maxine,

Good morning.

The .pdf's attached to this document are defective and unable to be read. Please resend them, though it might require the creation of a new .pdf.

I was able to read a very small portion of the Zito resolution. If the repair is a true emergency and poses a potential threat then consideration should be given to addressing the issue. I don't want to see a true crisis develop while we are sorting out defective .pdf's.

If you have additional questions, please let me know.

Good morning Angela,

We are submitting the following two resolutions for State approval:

1. Resolution to Zito Construction for Emergency Underground Utility Excavation and Repair in the 716 W. Pierson Road Area - $82,500.00 (Sewer Fund)

2. Resolution to Mersino Dewatering for Emergency Pumping/Bypass Services for the Sewer Repair in the 716 W. Pierson Road Area - (Sewer Fund)

Please see the attached.

Thank you.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

MEMORANDUM

TO: Darnell Early, Emergency Manager; City of Flint

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: City of Flint Emergency Manager Spending Resolutions

DATE: March 26, 2014

The Department of Treasury has been reviewing the requirements regarding the City's submission of Emergency Manager Spending Resolutions that are over $50,000 in total value to the Office of Fiscal Responsibility for review and recommendation prior to execution. Treasury staff has determined that the current review process is generally inconsistent with the provisions contained within Public Act 436 of 2012 and largely unnecessary. Therefore, I am ordering an immediate end to this review process for an spending resolution that does not fall within the parameters outlined in P.A. 436.

P.A. 436 contains three sections where Treasury must review items with a total value exceeding $50,000. These sections are Section 12 (3), Section 15 (1), and Section 19 (1). Section 12 (3) requires an Emergency Manager to competitively bid any contract with a cumulative value exceeding $50,000 unless the State Treasurer authorizes a waiver from this requirement.

Section 15 (1) requires an Emergency Manager to acquire the approval of the State Treasurer before selling an asset with a value in excess of $50,000 unless said action is already contained within the Financial and Operating Plan. Section 19 (1) requires that the actions taken under Section 12 (1)(r) or Section 14 (d) and have a value in excess of $50,000 must be submitted to the governing body of the local government for approval.

Provided that any future Emergency Manager actions conform to the three aforementioned sections, all other review of Emergency Manager spending resolutions can stop immediately.

If you have further questions regarding this issue, please contact me.

Subject: Contracts for Flint Water Treatment Plant expansion

Hello Wayne and Ed.

There are 2 contracts related to the Flint WTP expansion at Treasury for approval. As you know, time is of the essence and the contractor (Zito) is unwilling to begin work without knowledge that the proposed contract is approved.

Any assistance you can give in getting these contracts approved is greatly appreciated.

Thanks!

Jerry

You're right, if it's in the F&O plan it doesn't need approval. I thought when we discussed this last week or so it wasn't in the F&O plan. Is this the same project related to sale of the water pipeline? Maybe this project is different than what I thought it was. We'll talk in a bit.

MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY

PERMIT APPLICATION FOR WATER SUPPLY SYSTEMS

(CONSTRUCTION - ALTERATION - ADDITION OR IMPROVEMENT) AS DESCRIBED HEREIN

Required under the Authority of 1976 PA 399, as amended

This application becomes an Act 399 Permit only when signed and issued by authorized Michigan Department of Environmental Quality (DEQ) Staff. See instructions below for completion of this application.

1. **Municipality or Organization, Address and WSSN** that will own or control the water facilities to be constructed This permit is to be issued to: City of Flint 4500 North Dort Highway Flint, MI 48505 **WSSN:** 02310	Permit Stamp Area (DEQ use only) MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY PERMIT NO. W 140026 APR 09 2014 EXAMINED AND APPROVED FOR COMPLIANCE WITH ACT 399, P.A. 1976	
2. **Owner's Contact Person** (provide name for questions). Contact: Brent Wright Title: Plant Supervisor Phone 810-787-6537		
3. **Project Name** (Provide phase number if project is segmented) Flint WTP Phase II, Segment II - Lime Residual Disposal	4. **Project Location** (City, Village, Township): City of Flint	5. **County** (location of project): Genesee County

ISSUED UNDER THE AUTHORITY OF THE DIRECTOR OF THE DEPARTMENT OF ENVIRONMENT QUALITY

cc:

Issued by: _____

Reviewed by Patrick Cook for MFP
for Mike Prysby

☐ **If this box is marked see attached special conditions.**

Instructions: Complete items 1 through 5 above and 6 through 21 on the following pages of this application. Print or type all information except for signatures. Mail completed application, plans and specifications, and any attachments to the DEQ District Office having jurisdiction in the area of the proposed construction.

Please Note:

a. This **PERMIT** only authorizes the construction, alteration, addition or improvement of the water system described herein and is issued solely under the authority of 1976 PA 399, as amended.
b. The issuance of this **PERMIT** does not authorize violation of any federal, state or local laws or regulations, nor does it obviate the necessity of obtaining such permits, including any other DEQ permits, or approvals from other units of government as may be required by law.
c. This **PERMIT** expires two (2) years after the date of issuance in accordance with R 325.11306, 1976 PA 399, administrative rules, unless construction has been initiated prior to expiration.
d Noncompliance with the conditions of this permit and the requirements of the Act constitutes a violation of the Act.
e. Applicant must give notice to public utilities in accordance with 1974 PA 53, (MISS DIG), being Section 460.701 to 460 718 of the Michigan Compiled Laws, and comply with each of the requirements of that Act.
f. All earth changing activities must be conducted in accordance with the requirements of the Soil Erosion and Sedimentation Control Act, Part 91, 1994 PA 451, as amended.
g All construction activity impacting wetlands must be conducted in accordance with the Wetland Protection Act, Part 303, 1994 PA 451, as amended.
h. Intentionally providing false information in this application constitutes fraud which is punishable by fine and/or imprisonment.
i. Where applicable for water withdrawals, the issuance of this permit indicates compliance with the requirements of Part 327 of Act 451, Great Lakes Preservation Act.

6. **Facilities Description** – In the space below provide a detailed description of the proposed project. Applications without adequate facilities descriptions **will be returned**. SEE EXAMPLES BELOW. Use additional sheets if needed.

Improvements to the City of Flint Lime Sludge Lagoons at Bray Road to allow lime sludge from the the Flint WTP to be stored during the interim period when the plant will be treating Flint River water. The lagoons will not be needed for continuous use when the plant switches to treatment of raw water from the KWA Lake Huron Water Supply:

PHASE II, SEGMENT II - LIME RESIDUAL DISPOSAL (@BRAY ROAD):
* Plugging and abandonment of 8" inlet piping; construction of 306 LF of new 10" inlet piping; installation of bulkhead on existing outlet structure to prevent discharge to surface water.
* Clay Berm barrier improvements to separate concrete debris pile from lime sludge.
* Construction of new decant tower structure, 8" gravity sewer, and decant pump station (duplex submersible) with CO2 feed system for pH adjustment. Vortex impeller pumps (2) shall each be rated at 140 gpm at 22' TDH; CO2 feed consists of 6 ton storage tank, 15 pph pH controlled feed system, SS gas piping, and diffusers installed in the decant tower.
* Construction of approx. 3,800 LF of 6" HDPE decant forcemain and connection to existing City santiary sewer system.

EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES	
Water Mains	500 feet of 8-inch water main in First Street from Main Street north to State Street. **OR** 250 feet of 12-inch water main in Clark Road from an existing 8-inch main in Third Avenue north to a hydrant.
Booster Stations	A booster station located at the southwest corner of Third Avenue and Main Street, and equipped with two, 15 Hp pumps each rated 150 gpm @ 200 feet TDH. Station includes backup power and all other equipment as required for proper operation.
Elevated Storage Tank	A 300,000 gallon elevated storage tank located in City Park. The proposed tank shall be spherical, all welded construction and supported on a single pedestal. The tank shall be 150 feet in height, 40 feet in diameter with a normal operating range of 130 – 145 feet. The interior coating system shall be ANSI/NSF Standard 61 approved or equivalent. The tank will be equipped with a cathodic protection system, and includes a tank level control system with telemetry.
Chemical Feed	A positive displacement chemical feed pump, rated at 24 gpd @ 110 psi to apply a chlorine solution for Well No. 1. Chlorine is 12.5% NaOCL, ANSI/NSF Standard 60 approved and will be applied at a rate of 1.0 mg/l of actual chlorine.
Water Supply Well	Well No. 3, a 200 foot deep well with 170 feet of 8-inch casing and 30 feet of 8-inch, 10 slot screen. The well will be equipped with a 20 Hp submersible pump and motor rated 200 gpm @ 225 feet TDH, set at 160 feet below land surface.
Treatment Facilities	A 5 million gpd water treatment plant located at the north end of Second Avenue. The facility will include 6 low service pumps, 2 rapid mix basins, 4 flocculation/sedimentation basins, 8 dual media filters, 3 million gallon water storage reservoir and 6 high service pumps. Also included are chemical feed pumps and related appurtenances for the addition of alum, fluoride, phosphate and chlorine.

General Project Information – Complete all boxes below.

7. Design engineer's name, engineering firm, address, phone number, and email address:

Jeremy N. Nakashima, PE
Lockwood, Andrews & Newnam, Inc.
1 Oakbrook Terrace, Suite 207
Oakbrook Terrace, IL 60181
630-495-4123 / jnnakashima@lan-inc.com

8. Indicate who will provide project construction inspection:
☒Organization listed in Box 1.
☒Engineering firm listed in Box 7.
☐Other - name, address, and phone number listed below.

9. Is a basis of design attached?
☒YES ☐NO

If no, briefly explain why a basis of design is not needed. Submitted previously under separate cover.

10. Are sealed and signed engineering plans attached?
☒YES ☐NO

If no, briefly explain why engineering plans are not needed. Plans and specs submitted previously under separate cover.

11. Are sealed and signed construction specifications attached?
☒YES ☐NO

If specifications are not attached, they need to be on file at DEQ.

12. Were Recommended Standards for Water Works, Suggested Practice for Water Works, AWWA guidelines, and the requirements of Act 399 and its administrative rules followed?
☒YES ☐NO

If no, explain which deviations were made and why.

13. Are all coatings, chemical additives and construction materials ANSI/NSF or other adequate 3rd party approved?
☒YES ☐NO

If no, describe what coatings, additives or materials did not meet the applicable standard and why.

14. Are all water system facilities being installed in the public right-of-way or a dedicated utility easement? (For projects not located in the public right-of-way, utility easements must be shown on the plans.)
☐YES ☒NO

If no, explain how access will be obtained. Most work will be on City owned property, except forcemain.

15. Is the project construction activity within a wetland (as defined by Section 324.30301(d)) of Part 303, 1994 PA 451?
☐YES ☒NO

If yes, a wetland permit must be obtained.

16. Is the project construction activity within a 100-year floodplain (as defined by R 323.1311(e)) of Part 31, 1994 PA 451, administrative rules?
☐YES ☒NO

If yes, a flood plain permit must be obtained.

17. Is the project construction activity within 500 feet of a lake, reservoir, or stream?
☒YES ☐NO

If yes, a Soil and Erosion Control Permit must be obtained or indicate if the owner listed in box 2 of this application is an Authorized Public Agency (Section 10 of Part 91, 1994 PA 451) ☐ Owner is APA.

18. Will the proposed construction activity be part of a project involving the disturbance of five (5) or more acres of land?
☐YES ☒NO
If yes, is this activity regulated by the National Pollutant Discharge Elimination System storm water regulations?
☐YES: NPDES Authorization to discharge storm water from construction activities must be obtained.

☐NO: Describe why activity is not regulated:
Please call 517-241-8993 with questions regarding the applicability of the storm water regulations.

19. Is the project in or adjacent to a site of suspected or known soil or groundwater contamination?
☐YES ☒NO

If yes, attach a copy of a plan acceptable to the DEQ for handling contaminated soils and/or groundwater disturbed during construction. Contact the local DEQ district office for listings of Michigan sites of environmental contamination.

20. IF YOU ARE A CUSTOMER/WHOLESALE/BULK PURCHASER, COMPLETE THE FOLLOWING

1) Name and WSSN of source water supply system (seller) _____

2) Does the water service contract require water producer/seller to review and approve customer/wholesale/bulk purchaser water system construction plans?
☐YES ☐NO

If yes to #2, the producer/seller approval letter must be attached when submitted to DEQ.

21. **Owner's Certification** The owner of the proposed facilities or the owner's authorized representative shall complete the owner's certification. It is anticipated that the owner will either be a governmental agency (city, village, township, county, etc.) or a private owner (individual, company, association, etc.) of a Type I public water supply.

OWNER'S CERTIFICATION

I, BRENT F. WRIGHT (print) (name), acting as the WATER PLANT SUPERVISOR (print) (title/position) for

CITY OF FLINT (print) (entity owning proposed facilities) certify that this project has been reviewed and approved as detailed by the Plans and Specifications submitted under this application, and is in compliance with the requirements of 1976 PA 399, as amended, and its administrative rules.

Signature* 3-31-2014 Date (810)787-6537 Phone

*Original signature only, no photocopies will be accepted.

PROJECT BASIS OF DESIGN – FOR WATER MAIN PROJECTS

PROJECT NAME: _____

For this PROJECT the following information must be provided per Act 399 unless waived by the Department. For projects other than water main installation, or if additional space is needed, attach separate sheet(s) with detailed Basis of Design calculations.

A. A general map of the initial and ultimate service areas
☐ Included on engineering plans ☐ Attached separately

B. Number of service connections served by this permit application _____

C. Total number of service connections ultimately served by entire project _____

D. Residential Equivalent Units (REUs) served by this permit application _____

E. Total Residential Equivalent Units (REUs) ultimately served by entire project _____

F. Water flow rates for proposed project based on REUs listed in "D' and "E" above

1. Initial design average day flow (mgd) _____
2. Initial design maximum day flow (mgd) _____
3. Total design average day flow (mgd) _____
4. Total design maximum day flow (mgd) _____
5. Required fire flows: (1) _____ gpm for _____ hours

G. Actual flows and pressures of existing system at the connection point(s) (2)
_____ gpm at _____ psi
_____ gpm at _____ psi
_____ gpm at _____ psi
_____ gpm at _____ psi

H. Estimated minimum flows and pressures within the proposed water main system (3) _____ gpm at _____ psi

(1) Every water system must decide what levels of fire fighting flows they wish to provide. Fire flow should be appropriate for the area (residential, commercial, industrial) being served by the project. Typical fire flow rates can be obtained from the water supply, local fire dept., ISO or AWWA. The water system must then be designed to be able to provide the required fire flows while maintaining at least 20 psi in all portions of the distribution system.

(2) Flows and pressures at the connection points must be given to determine if the existing water main(s) are able to deliver water to the new service area. These numbers can be obtained from a properly modeled and calibrated distribution system hydraulic analysis or hydrant flow tests performed in the field. If more than one connection is proposed, list as needed.

(3) List what the estimated minimum flows can be expected in the proposed water mains based on estimated water demands, head losses, elevation changes and other factors that may affect flows, such as dead end mains.

Good Morning Max;

Listed below is the additional information for Mr. Cline for the approval of the resolution for ozone parts:

The City purchased ozone generators in 2005 as part of a facility upgrade at the Water Plant. The manufacturer selected for these generators was Ozonia North America. This manufacturer was selected instead of the Fuji or General Electric brand. The Water Plant is requesting to purchase dielectrics and there corresponding components for said generators. These are internal parts of the Ozonia generators, and other manufacturer parts are not compatible. Therefore, Ozonia is the only vendor that can provide these parts.

The City originally canvass vendors that service the generators to procure the requested parts, however, it was determined that these vendors also order their parts from Ozonia. It was determined that the City order parts directly from Ozonia.

If you need additional information, please let me know. Thanks.

Maxine,

Good afternoon.

Earlier today you received a copy of a memo explaining how Treasury is going to change its review process for EM Spending Resolutions.

The attached resolution falls under these new rules. The attached resolution is a no bid contract that is in-excess of $50,000 in value. As such, approval of the State Treasurer is needed.

In order to formulate a recommendation, I need more information as to why the contract is no bid. The resolution states that the recommended vendor is the original producer of the equipment but are they the only source? Will only their equipment work? More detail is needed.

Please forward this request to the proper department.

Thank you for your ongoing help on these projects.

Rating: See "RATING" herein

In the opinion of Miller, Canfield, Paddock and Stone, P.L.C., Bond Counsel, under existing law, assuming compliance with certain covenants by the Issuer, the interest on the Bonds is excludable from gross income for federal income tax purposes and the Bonds and the interest thereon are exempt from all taxation by the State of Michigan or by any taxing authority within the State of Michigan, except inheritance and estate taxes and taxes on gains realized from the sale, payment or other disposition thereof. See" TAX MATTERS" and "FORM OF APPROVING OPINION" herein for a description of certain provisions of the Internal Revenue Code of 1986, as amended (the "Code"), which may affect the tax treatment of interest on the Bonds for certain Bondholders.

KAREGNONDI WATER AUTHORITY
COUNTIES OF GENESEE, LAPEER AND SANILAC
STATE OF MICHIGAN

$220,500,000
WATER SUPPLY SYSTEM BONDS
(KAREGNONDI WATER PIPELINE), SERIES 2014A

Dated: Date of Delivery

Principal Due: November 1, as shown on Inside Cover Page

The Water Supply System Bonds (Karegnondi Water Pipeline), Series 2014A (the "Bonds") are issued under the provisions of Act 233, Public Acts of Michigan, 1955, as amended, and a resolution adopted by the Board of Trustees of the Karegnondi Water Authority, Counties of Genesee, Lapeer and Sanilac, State of Michigan (the "Issuer") on November 20, 2013. The Bonds are being issued for the purpose of paying a portion of the cost of acquiring and constructing the Issuer's Water Supply System (the "System") to serve initially the City of Flint and the County of Genesee (individually a "Local Unit" and collectively, the "Local Units"), funding a debt service reserve account, paying capitalized interest and paying the costs of issuing the Bonds. The Bonds are to be issued in anticipation of, and are payable primarily as to principal and interest from, payments (the "Contractual Payments") to be made by the Local Units to the Issuer pursuant to a Contract among the Issuer and the Local Units dated as of August 1, 2013 (the "Contract"). The Contractual Payments will be in installments that will equal the principal and interest payments on the Bonds. Further, each Local Unit has pledged its limited tax full faith and credit for the payment of its Contractual Payments and is obligated, to the extent necessary, as a first budget obligation to levy ad valorem taxes on all taxable property within its boundaries for such purpose, subject to applicable constitutional, statutory and charter tax limitations. Each Local Unit is expected to make its Contractual Payments from revenues collected from charges imposed on the customers of its respective water supply system. The County of Genesee in the Contract has pledged to make all payments that the City of Flint fails to make to the Issuer under the Contract. The Issuer has irrevocably pledged the Contractual Payments for the payment of the principal of and interest on the Bonds.

The Bonds are issuable only as fully registered Bonds without coupons, and when issued, will be registered in the name of Cede & Co., as Bondholder and nominee for The Depository Trust Company ("DTC"), New York, New York. DTC will act as securities depository for the Bonds. Purchases of beneficial interests in the Bonds will be made in book-entry only form, in the denominations of $5,000 or any integral multiple thereof. Purchasers will not receive certificates representing their beneficial interest in Bonds purchased. So long as Cede & Co. is the Bondholder, as nominee of DTC, references herein to the Bondholders or registered owners shall mean Cede & Co., as aforesaid, and shall not mean the Beneficial Owners of the Bonds. See *BOOK-ENTRY ONLY SYSTEM* herein.

Interest on the Bonds will be payable semiannually on May 1 and November 1 of each year commencing on November 1, 2014. The Bonds will be registered Bonds, of the denomination of $5,000 or multiples thereof not exceeding for each maturity the principal amount of such maturity. The principal and interest shall be payable at the corporate trust office of The Huntington National Bank, Grand Rapids, Michigan or such other transfer agent as the Issuer may hereafter designate by notice mailed to the registered owner not less than sixty (60) days prior to any change in interest payment date (the "Transfer Agent"). Interest shall be paid when due by check mailed to the registered owner as shown by the registration books as of the fifteenth day of the month preceding the payment date for each interest payment. Payment of principal and interest to Beneficial Owners shall be made as described in *BOOK-ENTRY ONLY SYSTEM* herein.

The Bonds are subject to redemption at par, as described herein.

The Bonds are offered when, as and if issued by the Issuer and subject to receipt of the approving opinion of Miller, Canfield, Paddock and Stone, P.L.C., Detroit, Michigan, Bond Counsel. Certain legal matters will be passed upon for the Underwriters by their counsel, Dickinson Wright PLLC, Troy and Lansing, Michigan. It is expected that delivery of the Bonds through DTC will be made in New York, New York on or about April 16, 2014.

THIS COVER PAGE CONTAINS CERTAIN INFORMATION FOR QUICK REFERENCE ONLY. IT IS NOT A SUMMARY OF THIS ISSUE. INVESTORS MUST READ THE ENTIRE OFFICIAL STATEMENT TO OBTAIN INFORMATION ESSENTIAL TO THE MAKING OF AN INFORMED INVESTMENT.

No dealer, broker, salesman or other person has been authorized by the Issuer to give any information or to make any representations, other than those contained in this Official Statement, and, if given or made, such other information or representations must not be relied upon as having been authorized by any of the foregoing. This Official Statement does not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the Bonds by any person in any jurisdiction in which it is unlawful for such person to make such offer, solicitation or sale. The information set forth in this Official Statement has been obtained from the Issuer, the County of Genesee, the City of Flint and other sources which are believed to be reliable, including The Depository Trust Company with respect to the information contained under the heading BOOK-ENTRY ONLY SYSTEM, but is not guaranteed as to accuracy or completeness by, and is not to be construed as a representation by, the Issuer. The information and expressions of opinion in this Official Statement are subject to change without notice, and neither the delivery of this Official Statement nor any sale made under this Official Statement shall, under any circumstances, create any implication that there has been no change in the affairs of the parties referred to above or that the other information or opinions are correct as of any time subsequent to the date of this Official Statement. The Transfer Agent has not participated in the preparation of this Official Statement and assumes no responsibility for it.

The Underwriters have provided the following sentence for inclusion in this Official Statement. The Underwriters have reviewed the information in this Official Statement in accordance with, and as part of, their respective responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information

IN MAKING AN INVESTMENT DECISION INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE ISSUER AND THE TERMS OF THE OFFERING, INCLUDING THE MERITS AND RISKS INVOLVED. THESE SECURITIES HAVE NOT BEEN RECOMMENDED BY ANY FEDERAL OR STATE SECURITIES COMMISSION OR REGULATORY ISSUER. FURTHERMORE, THE FOREGOING AUTHORITIES HAVE NOT CONFIRMED THE ACCURACY OR DETERMINED THE ADEQUACY OF THIS DOCUMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

IN CONNECTION WITH THIS OFFERING, THE UNDERWRITERS MAY OVER-ALLOT OR EFFECT TRANSACTIONS WHICH STABILIZE OR MAINTAIN THE MARKET PRICE OF THE BONDS AT A LEVEL ABOVE THOSE WHICH MIGHT OTHERWISE PREVAIL IN THE OPEN MARKET. SUCH STABILIZING, IF COMMENCED, MAY BE DISCONTINUED AT ANY TIME.

This Official Statement contains forward-looking statements, which can be identified by the use of the future tense or other forward-looking terms such as "may," "intend," "will," "expect," "anticipate," "plan," "management believes," "estimate," "continue," "should," "strategy," or "position" or the negatives of those terms or other variations of them or by comparable terminology. In particular, any statements express or implied, concerning future receipts of federal grants or the ability to generate cash flow to service indebtedness are forward-looking statements. Investors are cautioned that reliance on any of those forward-looking statements involves risks and uncertainties and that, although the Issuer's management believes that the assumptions on which those forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate. As a result, the forward-looking statements based on those assumptions also could be incorrect, and actual results may differ materially from any results indicated or suggested by those assumptions. In light of these and other uncertainties, the inclusion of a forward-looking statement in this Official Statement should not be regarded as a representation by the Issuer or that its plans and objectives will be achieved. All forward-looking statements are expressly qualified by the cautionary statements contained in this paragraph. The Issuer undertakes no duty to update any forward-looking statements.

OFFICIAL STATEMENT

KAREGNONDI WATER AUTHORITY
COUNTIES OF GENESEE, LAPEER AND SANILAC
STATE OF MICHIGAN
$220,500,000
WATER SUPPLY SYSTEM BONDS
(KAREGNONDI WATER PIPELINE)
SERIES 2014A

The purpose of this Official Statement, which includes the cover page and Appendices, is to furnish information in connection with the issuance and sale by the Karegnondi Water Authority, Counties of Genesee, Lapeer and Sanilac, State of Michigan (the "Issuer") of its Water Supply System Bonds (Karegnondi Water Pipeline). Series 2014A (the "Bonds") in the aggregate principal amount of $220,500,000.

PURPOSE

The Bonds are issued under the provisions of Act 233, Public Acts of Michigan, 1955, as amended ("Act 233"), and a resolution authorizing the issuance of the Bonds (the "Resolution") adopted by the Board of Trustees of the Issuer on November 20, 2013. The Bonds are being issued for the purpose of paying a portion of the cost of acquiring and constructing the Issuer's Water Supply System (the "System") that is being established for the purpose of supplying raw water to its member communities, funding the Debt Service Reserve Account as hereinafter described, paying capitalized interest on the Bonds and paying the costs of issuing the Bonds. The Issuer was incorporated in October, 2010 pursuant to Act 233 by the County of Genesee ("Genesee"), the County of Lapeer, the County of Sanilac, the City of Flint ("Flint") and the City of Lapeer for the purpose of providing its member communities with a new source of water. Although the Issuer was incorporated in 2010, planning and design for the System in its present configuration began in 2001.

The System is expected ultimately to supply raw water for the three county area consisting of over 2,232 square miles and a population of over one half million residents, but the System will initially provide raw water to Genesee and Flint (individually a "Local Unit" and collectively, the "Local Units"). Currently, Genesee and Flint receive finished water from the City of Detroit, through its Detroit Water and Sewerage Department ("DWSD"), but Flint expects that it will no longer receive water from DWSD after April 17, 2014 and as a result, Genesee is pursuing a separate contract for an interim water supply from DWSD. Genesee and Flint participated in the establishment of the Issuer in order to have a more reliable supply of water at rates that they expect ultimately to be less than what would otherwise be payable to DWSD. For a description of the proposed System and the interim arrangements for water supply for Genesee and Flint until the System is completed and operational, see the heading KAREGNONDI WATER AUTHORITY SYSTEM herein.

SECURITY

Contractual Payments

The Bonds are being issued in anticipation of, and are payable primarily as to principal and interest from, payments (the "Contractual Payments") to be made by the Local Units to the Issuer pursuant to the Karegnondi Water Authority Financing Contract among the Issuer and the Local Units dated as of August 1, 2013 (the "Contract"). The Contractual Payments will be in installments that will equal the principal and interest payments on the Bonds. Further, each Local Unit has pledged its limited tax full faith and credit for the payment of its Contractual Payments and is obligated, to the extent necessary, as a first budget obligation to levy ad valorem taxes on all taxable property within its boundaries for such purpose, subject to applicable constitutional, statutory and charter tax limitations as to rate and amount. After credit is given to Genesee for payment of the principal of and interest on the Genesee Bonds (as described under the heading KAREGNONDI WATER AUTHORITY – The System below), Genesee is responsible for paying approximately 66% of the principal of and interest due on the Bonds, and Flint is responsible for paying approximately 34% of the principal of and interest on the Bonds. In addition, pursuant to the Contract, if Flint fails to make any of its Contractual Payments when due, Genesee is obligated under the Contract to make such Contractual Payments within one day of being notified of Flint's failure to pay. Further, the Issuer is obligated under the Contract to undertake all legal action and make use of all remedies available under the Contract to enforce the payment obligations of Flint under the Contract.

Each Local Unit expects to make its Contractual Payments from revenues collected from charges imposed on the customers of its respective water supply system. The water supply system of Genesee is hereinafter referred to as the "Genesee System" and the water supply system of Flint in hereinafter referred to as the "Flint System." The Issuer has irrevocably pledged the Contractual Payments for the payment of the principal of and interest on the Bonds. See The Report of the Engineering Consultant in APPENDIX I for a description of the Genesee System and the Flint System.

The rights or remedies of bondholders may be affected by bankruptcy, insolvency, fraudulent conveyance or other laws affecting creditors' rights generally, now existing or hereafter enacted, and by the application of general principles of equity, including those relating to equitable subordination.

A copy of the Contract is included as APPENDIX H. For additional information on Genesee, see APPENDIX A and APPENDIX B hereto, and for additional information on Flint, see APPENDIX C and APPENDIX D hereto.

Debt Service Reserve Account

Pursuant to the Resolution, the Issuer has established a Debt Retirement Fund, and within the Debt Retirement Fund has established a Debt Service Reserve Account. All Contractual Payments as received are required to be deposited in the Debt Retirement Fund and used to pay the principal of and interest on the Bonds. The Debt Service Reserve Account will be funded from the proceeds of the Bonds in an amount equal to $15,237,437.50, which is equal to the lesser of (1) maximum annual principal and interest requirements during any calendar year on the

Bonds then outstanding, (2) ten percent (10%) of the original principal amount of the Bonds, and (3) one hundred twenty-five percent (125%) of the average annual principal and interest requirements during any calendar year on the Bonds then outstanding (the "Reserve Account Requirement"). Moneys in the Debt Service Reserve Account shall be used solely for the payment of the principal of and interest on the Bonds when due whenever and to the extent that the Contractual Payments being held by the Issuer shall be insufficient for such purposes.

There shall be credited to the Debt Service Reserve Account beginning on the first day of the month following any month in which the amount in the Debt Service Reserve Account shall be less than an amount equal to the Reserve Account Requirement as a result of the failure of a Local Unit to pay its Contractual Payments, and continuing on the first day of each month thereafter, an amount equal to one-thirty-sixth (1/36) of any deficit therein, until the amount on deposit is equal to the Reserve Account Requirement; however, if the amount on deposit in the Debt Service Reserve Account is less than 100% of the Reserve Account Requirement as a result of investment losses with respect to the Debt Service Reserve Account, commencing on the first day of the month following such evaluation, and continuing on the first day of each month thereafter, an amount equal to one-fourth (1/4) of the amount necessary to restore the Debt Service Reserve Account to 100% of the Reserve Account Requirement, unless and until the amount on deposit in the Debt Service Reserve Account shall equal 100% of the Reserve Account Requirement. Further, if a Local Unit fails to pay its Contractual Payment causing a shortfall and the Debt Service Reserve Account is drawn upon to pay the Bonds, the replenishment of such Debt Service Reserve Account shall be an obligation of the Local Unit that failed to pay such Contractual Payment, in the manner described in the preceding sentence; provided, however, if Flint fails to fulfill its obligation to replenish the Debt Service Reserve Account, as with the failure to make Contractual Payments under the Contract, Genesee has agreed in the Contract to make such payments.

ESTIMATED SOURCES AND USES OF FUNDS

Sources of Funds

Par amount of Bonds	$220,500,000.00
Net Original Issue Premium	11,815,544.05
Total Sources	$232,315,544.05

Use of Funds

Deposit to Construction Fund	$187,137,367.59
Capitalized Interest	28,282,364.06
Deposit to Debt Service Reserve Account	15,237,437.50
Costs of Issuance	712,000.00
Underwriters' Discount	946,374.90
Total Uses	$232,315,544.05

THE BONDS

The Bonds will be dated the date of delivery thereof, will bear interest from the date of delivery at the rates and will mature in the amounts and on the dates set forth on the inside cover page of this Official Statement and will be subject to redemption prior to maturity as described below. Interest on the Bonds will be payable semiannually on May 1 and November 1 of each year commencing on November 1, 2014. Interest on the Bonds shall be computed using a 360-day year and twelve 30-day months.

The Bonds will be issued as fully registered Bonds as described in APPENDIX G, BOOK-ENTRY-ONLY SYSTEM. Subject to the provisions for the book-entry system, the principal of and any redemption premium on the Bonds will be payable upon surrender thereof at the designated office of the Transfer Agent, and interest will be payable by check or draft mailed by the Transfer Agent to the registered owners of the Bonds as shown on the registration books of the Issuer maintained by the Transfer Agent as of the close of business on the fifteenth day of the calendar month preceding the month in which the interest payment is due. The Transfer Agent also may pay interest on Bonds by wire transfer or such other method as is acceptable to the Transfer Agent and the Bondholder to whom payment is being made.

PRIOR REDEMPTION OF BONDS

Optional Redemption

Bonds maturing in the years 2017 to 2023, inclusive, shall not be subject to redemption prior to maturity. Bonds or portions of Bonds in multiples of $5,000 maturing in the year 2024 and thereafter shall be subject to redemption prior to maturity, at the option of the Issuer, in any order of maturity and by lot within any maturity, on any date on or after November 1, 2023, at par and accrued interest to the date fixed for redemption.

Mandatory Redemption of Term Bonds

The Bonds maturing in the years 2040 and 2043 (the "Term Bonds") shall be subject to annual mandatory redemption on November 1 of the following years and in the following amounts, at par, plus accrued interest to the date of mandatory redemption.

Term Bonds due November 1, 2040

Redemption Dates	Principal Amounts
November 1, 2036	$10,190,000
November 1, 2037	$10,725,000
November 1, 2038	$11,290,000
November 1, 2039	$11,880,000
November 1, 2040 (Maturity)	$12,505,000
TOTAL	$56,590,000

Term Bonds due November 1, 2043

Redemption Dates	Principal Amounts
November 1, 2041	$13,160,000
November 1, 2042	$13,820,000
November 1, 2043 (Maturity)	$14,510,000
TOTAL	$41,490,000

When Term Bonds are purchased by the Issuer and delivered to the Transfer Agent for cancellation or are redeemed in a manner other than by mandatory redemption, the principal amount of Term Bonds affected shall be reduced by the principal amount of the Term Bonds so purchased or redeemed in the order determined by the Issuer.

In case less than the full amount of an outstanding Bond is called for redemption, the Transfer Agent, upon presentation of the Bond called for redemption, shall register, authenticate and deliver to the registered owner of record a new Bond in the principal amount of the portion of the original Bond not called for redemption.

Notice of redemption shall be given to the registered owner of any Bond or portion thereof called for redemption by mailing of such notice not less than thirty (30) days prior to the date fixed for redemption to the registered address of the registered owner of record. A Bond or portion thereof so called for redemption shall not bear interest after the date fixed for redemption, whether presented for redemption or not, provided funds are on hand with the Transfer Agent to redeem said Bond or portion thereof.

[The remainder of this page intentionally left blank]

DEBT SERVICE SCHEDULE

The following schedule sets forth the principal and interest payable with respect to the Bonds.

*Capitalized interest; paid from Bond proceeds.

KAREGNONDI WATER AUTHORITY SYSTEM

The Issuer is expected ultimately to supply raw water for the three county area (Genesee, Lapeer and Sanilac) consisting of over 2,232 square miles and a population of over one half million residents. The Issuer will supply metered, untreated water to each contracting member. The actual cost for appurtenances and maintenance of the System will be allocated based on water sold and each contracting member will be responsible for its proportional share of the cost. Each contracting member will be responsible for treating and distributing treated water to its individual customers.

The Issuer currently has entered into two water purchase contracts (the "Water Purchase Contracts"), effective October 1, 2013: one with Flint to supply up to 18 mgd and one with the Genesee County Drain Commissioner, as County Agency of Genesee under Act 342, Public Acts of Michigan, 1939, as amended (the "County Agency"), on behalf of Genesee, to supply 42 mgd. The charges to be paid by Flint and the County Agency in the Water Purchase Contracts are broken down into two distinct portions: an annual fixed or capital fee and an annual commodity or operations and maintenance fee. Flint and the County Agency expect to pay such charges from the revenues of their respective water supply systems as an operation and maintenance expense in the same manner that each presently pays for water furnished by DWSD.

The size of the System is based on the volume identified in the Water Purchase Contracts and any additional water purchase contracts entered into with additional parties, up to a maximum of 85 mgd, the Issuer's permit limit. Each contracting party will be responsible for the annual fixed fee regardless of the amount of water taken. The other members of the Issuer had until October 16, 2013 to enter into a water purchase contract with the Issuer at the same rates set forth in the Water Purchase Contracts. No additional water purchase contracts were entered into on or before such date and as a result, members entering into water purchase contracts with the Issuer subsequent to such date will pay any incremental costs associated with accommodating their water purchase contracts.

The System

To supply water to its contracting members, the Issuer will be required to construct a lake intake on Lake Huron, approximately 63 miles of pipe from the intake plant to the City of Flint and 2 pump stations, one of which will be located near the intake facility. Such facilities collectively constitute the System. The engineering design of the System is to withdraw water from Lake Huron and pump it to a standpipe in Lynn Township in St. Clair County, and from there the water will be pumped to a site in Oregon Township in Lapeer County, approximately 14 miles east of Flint, which site will contain a 150 million gallon earthen reservoir and Genesee's new water treatment plant (discussed below). The reservoir and new treatment plant will be owned by Genesee. Raw water flowing to the site in Oregon Township will be directed to Flint's water treatment plant and to Genesee's water treatment plant and reservoir. Figure 1 shows the location of the System facilities, the Flint water treatment plant and the proposed Genesee treatment plant and reservoir.

Source Water and Waste Advisory Board Meeting Slide Show – April 10, 2013, Genesee County

The intake facility and the site therefor (the "Genesee Project") were financed through the issuance of bonds by Genesee in the principal amount of $35,000,000 in October, 2013 (the "Genesee Bonds"), with the understanding that Genesee would make the Genesee Project available to the Issuer for use by the Issuer as part of the System. Genesee is solely responsible for paying the principal of and interest on the Genesee Bonds from the net revenues derived from the users of the Genesee System and Genesee has pledged its limited tax full faith and credit as additional security for the Genesee Bonds. The lake intake is currently under construction, the County Agency having supervised the design of the facility and the receipt and award of construction bids for the facility. The lake intake is expected to be completed in October, 2014.

The Issuer has retained the services of the County Agency to administer the design and construction of the System. In addition, it is expected that the Issuer will also contract with the County Agency for operation and maintenance of the System after the System is completed and fully operational. The County Agency has significant experience in planning, operating and managing wastewater systems, having been responsible for planning, operating and managing the Genesee System since 1972. The County Agency currently employs approximately 128 people in connection with the operation and management of the Genesee System, and it is

expected that from this group, 5 full time equivalent employees will be involved in the operation and maintenance of the System. The Issuer is not expected to have any full time employees.

On behalf of the Issuer, the County Agency has acquired 40 acres of land with 100 feet of frontage on Lake Huron in Sanilac County for the intake plant and pump station and 40 acres of land on the northwest corner of Martin Road and Hull Road in Lynn Township in St. Clair County for the standpipe and second pump station. The County Agency has also acquired approximately 76 acres of land on the northeast corner of Marathon Road and Stanley Road in Oregon Township in Lapeer County to serve as the site for Genesee's new water treatment plant and reservoir.

In anticipation of the construction of the System, the County Agency has obtained a permit from the Michigan Department of Environmental Quality ("MDEQ") authorizing the withdrawal of up to 85 million gallons per day ("mgd") from Lake Huron. Such permit will not need to be renewed at any time while the Bonds are outstanding. In addition, the County Agency has hired project managers which have to date secured the route of the pipe line, identified all environmental issues and prepared preliminary permits for the entire 63-mile route, and also has retained consulting firms to complete the design of the remaining System facilities.

The County Agency has commissioned the design of the two pump stations and 63 miles of pipeline (36" to 66" in size). The design and construction is broken up into seven individual projects. They are as follows:

Lake Huron Pump Station
12 miles of 66-inch transmission main
12 miles of 66-inch transmission main
Intermediate Pump Station and Standpipe
12 miles of 60-inch transmission main
13 miles of 60-inch transmission main
14 miles of 36-inch transmission main

Since the contractor needs 15 months of good weather to complete each pipeline project, the pipeline projects were broken down into projects for a construction period of 15 months each. The design of the pipelines is 60 percent complete. The pipelines will be bid in a staggered format beginning in April, 2014 through September, 2014. Each contract will be awarded within two months of bid opening. Final pipeline contracts will be awarded no later than November, 2014, and with a 15-month construction period, the final pipeline is expected to be completed on or before March, 2016.

The System facilities call for 63 miles of large diameter piping, and the Issuer recognized that with limited capacity in the United States to produce the needed materials within the necessary time frame for construction, alternative methods of procurement would be required. In 2013, the Issuer Authority requested proposals for large diameter piping and valves, and in October, 2013, the Issuer entered into a contract with American Cast Iron Pipe Company (ACIPCO) for the delivery of all 66-inch diameter, 60-inch diameter, and 36-inch diameter pipe. In addition, ACIPCO will provide all large diameter valves for the pipeline and pump station yard piping and valves.

The Issuer has acquired all lands and easements necessary for construction of the System. In January 2014, MDEQ held four public hearings with regard to the Issuer's wetland crossing permit. MDEQ has participated in the 30 percent, 60 percent and 90 percent reviews of the design, and its comments have been incorporated. Upon 100% design completion of each pipeline project, the Issuer will submit an application to MDEQ for its construction permit for such project. In addition, the Issuer will submit for its local permits from the local road commissions and soil erosion enforcement agencies. The Issuer expects to receive all such permits for the construction of the System in time to complete the System as anticipated.

The design of the two pump stations is 90 percent complete. Final site plans have been submitted to the local municipalities, and bids for the pump stations are expected to be received in April, 2014, with the contracts to be awarded no later than June, 2014. There is a 22-month construction schedule for the pump stations, and they are expected to be completed and in operation on or before May, 2016.

Based upon the foregoing, the System is expected to be available for service no later than May 1, 2016. Each contract for construction has a completion date of at least 30-days prior to May 1, 2016 and a liquidated damage clause for failure to complete on a timely basis. Each contract identifies substantial completion (operation of the pipeline) and final completion (pipeline, clean-up, and paperwork). The County Agency can begin operation of the pipeline on behalf of the Issuer after substantial completion but prior to final completion.

The estimated construction costs for the System, including the lake intake and site financed by Genesee, are $268,844,053 based on water purchase contracts of 60 mgd. The Issuer and the Local Units have entered into the Contract, whereby the Issuer has agreed to issue the Bonds and other bonds of the Issuer, in an aggregate amount not to exceed $300,000,000 (collectively, the "System Bonds"), to finance the remaining facilities for the System in anticipation of the Contractual Payments to be made by the Local Units as provided therein. The estimated construction costs of the remaining facilities for the System is $233,725,381, and the amount of System Bonds to be issued to finance the costs of the remaining System facilities, including capitalized interest, amounts to fund the Debt Service Reserve Account, and issuance costs, is estimated to be $300,000,000. The Contract is contemplated in the Water Purchase Contracts and sets forth the manner in which the capital costs of the System facilities will be allocated. Under the Contract, Flint and Genesee are responsible for paying 34.2% and 65.8%, respectively, of the debt service on the System Bonds. This allocation takes into account and credits Genesee for financing and being responsible for the payment of 100% of the costs of the Genesee Project. In addition, in the event and to the extent that Flint fails to pay its share of the debt service on the System Bonds, Genesee will be responsible for making up the shortfall. Flint and Genesee each expects to make such payments from the revenues to be derived from the customers of the Genesee System and the Flint System, respectively, but each has pledged its limited tax full faith and credit to the making of such payments.

Interim Water Supply Arrangements for Genesee and Flint

Flint has purchased treated water from DWSD for approximately 30 years. The County Agency has a contract with Flint that requires Flint to purchase water from DWSD and provide that water to the County Agency. Historically, the County Agency has not had a contract directly with DWSD.

On April 17, 2013, DWSD notified Flint that it was terminating its contract with Flint for the supply of water in one (1) year as required by the contract. As a result, no later than April 17, 2014, Flint intends to begin withdrawing water from the Flint River, treat the water in its water treatment plant and then make such treated water available to the customers of the Flint System until the System is completed and operational. After the notification from DWSD, Flint sought another source of water and determined to use its water treatment plant to provide water to its customers. In order to do so it negotiated an administrative consent order with MDEQ that permitted the temporary use of the Flint River (the "ACO"). The ACO requires Flint to either undertake a public improvement project to connect to the System or undertake other public improvements to continue to use the Flint River. In order to comply with the ACO, Flint has determined that connecting to the System is the most cost effective means to obtain untreated water and to comply with the ACO.

However, the Flint River will not be able to supply the volume of water needed to provide water to the customers of the Genesee System. Inasmuch as the County Agency has a valid contract with Flint for the supply of water via DWSD, Flint is contractually obligated to continue to purchase water from DWSD in order to supply water to the County Agency. This may be accomplished, notwithstanding Flint utilizing the Flint River for a water source, by Flint continuing to purchase water from DWSD and directing the water to be transmitted directly to the County Agency by isolation valves currently installed in the Flint System.

In January, 2014, the County Agency entered into contract negotiations with DWSD to secure a water supply directly from DWSD for the customers of the Genesee System without using Flint as a pass through, until the System has been completed and is operational. DWSD representatives have indicated that in the event that an agreement cannot be reached with the County Agency during these negotiations, DWSD will continue to supply water to the County Agency via Flint without a contract in place. The County Agency and DWSD are negotiating two separate contracts, the first to satisfy Genesee's need for a short-term (3 year) contract for the supply of water during the time in which the System is being constructed, and the second that would require DWSD to provide a long-term emergency stand-by service to ensure the delivery of water to customers of the Genesee System if the System fails at any time in the future. Although no assurances can be made as to the eventual outcome of contract negotiations, both parties are negotiating in good faith.

In the event that the County Agency and DWSD are unable reach agreement on a proposed short-term contract for the supply of water during the construction period for the System, the County Agency has the ability to adjust Genesee's rates to the extent necessary, but cannot predict with certainty the price to be paid by customers of the Genesee System for water from DWSD until the System is completed and operational. See BONDHOLDERS' RISKS herein.

Related Facilities

In order to provide finished water to its customers, Flint expects to utilize its existing water treatment plant, which is currently operating in a back-up role with a capacity of 36 mgd and will be permitted to treat water drawn from the Flint River until the System is operational. Flint will be required to make an estimated $8,000,000 in improvements to convert the plant from stand-by to fully operational and to accommodate the flow of water from the System.

Additional improvements to Flint's water treatment plant may be made in the future. In order to provide finished water to Genesee's customers, the County Agency will be required to build a new water treatment plant, reservoir, pump station and approximately 5 miles of watermain running from the new treatment plant to Genesee's main distribution facility at Henderson Road, at an estimated cost of $60,000,000. The County Agency has acquired 76 acres approximately 14 miles east of the City of Flint in Oregon Township in Lapeer County, which is expected to serve as the site of Genesee's new water treatment plant, reservoir and pump station. In addition, on or before April 17, 2014, the County Agency expects to acquire 9 miles of 72-inch watermain from Flint, which will be used to support Genesee's distribution system to its customers. The new water treatment plant, reservoir, pump station and watermain are expected to be constructed and fully operational on or before May 1, 2016, the date on which the System is expected to be fully operational.

The completion date for the System is projected for May 1, 2016, at which time Flint expects to cease pumping water from the Flint River and the County Agency expects to discontinue purchasing water from DWSD, and Flint and the County Agency expect to begin purchasing water from the Issuer and producing their own water.

REPORT OF THE ENGINEERING CONSULTANT

Jones & Henry Engineers, Ltd., Toledo, Ohio, has prepared the Report of the Engineering Consultant, dated as of March 17, 2014, a copy of which is attached hereto as Appendix I. The Report of the Engineering Consultant describes key factors that will affect water rates to be charged by Flint and the County Agency to customers of the Flint System and the Genesee System, respectively, from 2014 through 2018, and sets forth the assumptions on which the conclusions in the Report are based.

As set forth in the Report of the Engineering Consultant, the long term projections comparing the rates to be charged by KWA to Flint and the County Agency for use of the System plus other expenses related to operating, maintaining and improving their current treatment systems compared with rates historically charged to Flint and the County Agency by DWSD for comparable service show more stable rates from KWA for customers of both the Flint System and the Genesee System. Most of the future expenses for the Flint System and the Genesee System are expected to be capital which will not increase annually and operating costs which will increase annually due to inflation. DWSD charges to Flint and the County Agency, which historically have constituted a significant portion of both Flint's and the County Agency's total water expenses, have increased annually at a rate greater than the rate of inflation. Rates are not expected to increase under KWA as they have under DWSD, and with appropriate rate increases Flint and the County Agency will be able to pay their respective share of the debt service on the System Bonds and the operation and maintenance expenses of the System plus other expenses related to operating, maintaining and improving, respectively, the Flint System and the Genesee System.

The Report of the Engineering Consultant should be read in its entirety for a complete understanding of the assumptions and conclusions contained therein. As noted in the Report of the Engineering Consultant, any conclusions are subject to uncertainties, and some assumptions used to develop the conclusions will not be realized, and unanticipated events and circumstances

may occur. Therefore, there could be differences between the conclusions and the actual results and those differences could be material.

BONDHOLDERS' RISKS

The following discussion of some of the risk factors associated with the Bonds is not, and is not intended to be, exhaustive, and such risks are not necessarily presented in the order of their magnitude.

This Official Statement does not describe all of the risks of an investment in the Bonds and the Underwriters disclaim any responsibility to advise prospective investors of such risks as they exist at the date of this Official Statement or as they change from time to time. Prospective investors should consult their own legal and tax advisors as to the risks associated with an investment in the Bonds and the suitability of investing in the Bonds in light of their particular circumstances. Prospective investors should be able to bear the risks relating to an investment in the Bonds and should carefully consider, among other factors, the matters described below.

Assumptions With Regard to Local Unit Revenues

Certain assumptions have been made with regard to the ability of Genesee and Flint to charge and collect revenues from the customers of the Genesee System and the Flint System, respectively, in amounts sufficient to pay their respective Contractual Payments. These assumptions are believed to be reasonable, but to the extent that such revenues are not sufficient to enable Genesee and/or Flint to pay their Contractual Payments, the Contractual Payments would nevertheless be required to be paid from the general fund of Genesee and/or Flint, which could strain such general fund. The assumptions are based on factors beyond Genesee's and Flint's control and there is no assurance that these projections will be achieved. Many factors may prevent the projections from being achieved. These include yearly changes in water consumption, population, population growth, household income, competitive facilities, accessibility, absorption, occupancy, vacancy and market penetration.

NO GUARANTEE CAN BE MADE THAT THE PROJECTIONS CONTAINED HEREIN WILL CORRESPOND WITH THE RESULTS ACTUALLY ACHIEVED IN THE FUTURE BECAUSE THERE IS NO ASSURANCE THAT ACTUAL EVENTS WILL CORRESPOND WITH THE ASSUMPTIONS MADE IN FORMULATING THE PROJECTIONS. ACTUAL OPERATING RESULTS MAY BE AFFECTED BY MANY FACTORS, INCLUDING, BUT NOT LIMITED TO, INCREASED COSTS, LOWER THAN ANTICIPATED REVENUES, CHANGES IN EMPLOYEE RELATIONS, APPLICABLE GOVERNMENTAL REGULATION, ECONOMIC AND DEMOGRAPHIC TRENDS, AND COMPETITION.

Inability to Finance the System; System Completion Risk

As described under the heading KAREGNONDI WATER AUTHORITY SYSTEM, the System is intended initially to supply raw water for customers of the Genesee System and the Flint System. If for any reason the Issuer is unable to acquire, construct, complete or place the System in service, the System facilities to be financed with the proceeds of the Bonds will not be

useful to the Genesee System or the Flint System unless Genesee and/or Flint constructs its own pipeline. At this time, it is unclear whether Genesee and/or Flint would undertake constructing its own pipeline.

The rates and charges currently established by Genesee and Flint are projected to be sufficient to pay the Contractual Payments and their share of the principal of and interest on the Bonds. However, if the System is not placed in service, the additional costs associated with paying for the debt service on the Bonds without a tangible benefit to be derived from the System could ultimately have an adverse effect on the ability of Genesee and Flint to generate sufficient revenues from the customers of their respective water supply systems and their ability to pay their share of debt service on the Bonds.

In order to provide customers for the System, the County Agency and Flint have entered into the Water Purchase Contracts. Genesee and Flint have also entered into the Contract, under which they are responsible for paying their respective share of the Bonds and the second series of the System Bonds to be issued to finance the costs of the remaining System facilities (approximately $80,000,000). Genesee's share of the Bonds and the approximately $80,000,000 of the second series of the System Bonds will be the entire amount if Flint fails to fulfill its obligation to pay its Contractual Payments under the Contract for any reason.

Genesee and Flint each faces potential exposure to its general fund and to the rates and charges to be paid by its water customers served by the Genesee System and Flint System, respectively, for the debt service associated with the Genesee Bonds (only in the case of Genesee) and up to an estimated $300,000,000 for the System Bonds if for any reason the remaining System facilities are not completed. The remaining System facilities could fail to be completed because of an inability to gain market access for the financing for all or part of such facilities, cost overruns in construction, or acts of God.

Genesee intends for its obligations with respect to the Genesee Bonds and the System to be paid for by rates and charges from the users of the Genesee System. If Flint fails to pay its share of the System Bonds, either from rates and charges to users of the Flint System or from its general fund, Genesee would be responsible for making up the shortfall. If Genesee's general fund is needed to pay a significant portion of the System Bonds, it could cause significant financial strain on Genesee.

As noted under the heading KAREGNONDI WATER AUTHORITY SYSTEM, in order for Flint to provide finished water to its customers, it needs to undertake approximately $8,000,000 in improvements to its existing water treatment plant. If Flint is unable to timely complete such improvements for any reason (including without limitation, a referendum on the financing, an inability to gain market access for the financing for the improvements, cost overruns in construction, or acts of God), Flint may be unable to generate sufficient rates and charges from its customers to cover its share of the debt service on the System Bonds as provided in the Contract. Without sufficient rates and charges, it is unclear whether Flint's general fund will have sufficient funds to fulfill its obligations under the Contract, which in turn could strain Genesee's general fund or the amount of rates and charges to be charged to Genesee's customers.

Finally, similar to Flint, Genesee needs to construct a water treatment plant, reservoir, pump station and 5 miles of watermain at an estimated cost of $60,000,000 as described under the heading KAREGNONDI WATER AUTHORITY SYSTEM in order to provide finished water to its customers. If Genesee is unable to timely complete the new treatment plant, reservoir, pump station and watermain for any reason (including without limitation, an inability to gain market access for the financing, cost overruns in construction, or acts of God), Genesee may be unable to generate sufficient rates and charges from its customers to cover its share of the debt service on the System Bonds as provided in the Contract, which could strain Genesee's general fund.

Financial Condition of the City of Flint and Genesee for future Obligations to Issuer

Flint is currently operating under a State-appointed Emergency Manager under the Local Financial Stability and Choice Act, Act No. 436, Public Acts of Michigan, 2012 ("Act 436"). Flint's options to improve its fiscal health are limited. The United States Bankruptcy Code, 11 U.S.C. Section 101, *et. seq.* (the "Bankruptcy Code") does not authorize municipalities to be subject to involuntary bankruptcy cases. Flint must be specifically authorized to be a debtor under chapter 9 of the Bankruptcy Code by State law or by a governmental officer or organization empowered by State law to authorize Flint to be a debtor under chapter 9 of the Bankruptcy Code. Act 436 provides such authorization after Flint first complies with certain requirements set forth therein. The effect of a Flint bankruptcy on its obligations to the Issuer is unknown at this time, including without limitation its obligations to continue to make payments to the Issuer under its Water Purchase Contract with the Issuer and under the Contract. If Flint fails to fulfill its payment obligations under the Contract for any reason, including a bankruptcy filing by Flint, Genesee will be required to pay Flint's share of the debt service on the System Bonds. While this provides protection for the Issuer, such payments could cause significant financial strain on the general fund of Genesee and the net revenues of the Genesee System, potentially limiting the extent of this protection. Similarly, if Flint fails to fulfill its payment obligation under its Water Purchase Contract, the Issuer could be obligated to continue supplying raw water to Flint without payment for a period of 60 days, or longer in the event of a Flint bankruptcy case.

For a discussion of litigation that could affect Flint's financial condition and the rates that are charged to customers of the Flint System, see the heading LITIGATION – Other Litigation herein, and for a discussion of the financial condition of Flint see the information under the heading "Update on City of Flint Financial Position" in APPENDIX C.

Although no Act 436 proceedings have ever occurred with respect to Genesee, nor has the Michigan Department of Treasury ever indicated the intent to begin such proceedings, if Genesee were to experience severe financial difficulties, the same analysis that applies to Flint applies with respect to the County Agency's and Genesee's respective obligations under the Water Purchase Contract and the Contract.

LITIGATION

Pending Litigation

The Issuer has no litigation pending or, to its knowledge, threatened, wherein an unfavorable decision, ruling or finding would adversely affect the issuance of the Bonds or materially affect the Issuer's ability to pay the principal of and interest on the Bonds.

Other Litigation

Flint Health Care Retirement Benefits

Flint's Emergency Manager has issued several orders under Act 436 which modified existing contracts and collective bargaining agreements with respect to health care benefits of municipal retirees. While the modifications stand to save Flint $5 million per year and potentially more in future years, the changes also shift some out-of-pocket medical expenses to retirees.

As a result of such orders, a class action lawsuit has been filed by individual retired municipal workers, their eligible spouses, dependents, and the United Retired Governmental Employees ("URGE"), an organization that represents the interests of municipal retirees (collectively, the "Plaintiffs") seeking injunctive relief and damages under 42 U.S.C. § 1983, against Flint, its current and former Emergency Managers, its Retirement Officer Manager, and its Finance Director (collectively, "Defendants"). (Welch et al v. Brown, et al. Case No.12-13808, Judge Arthur Tarnow, ED Michigan). According to Plaintiffs, Defendants violated the Contract and Bankruptcy Clauses of the United States Constitution and deprived them of a property interest without due process or just compensation. The class has not yet been certified by the federal district court.

Plaintiffs requested a preliminary injunction to enjoin Defendants from modifying the contracts and ordinances governing their health-care benefits and to restore any already modified agreements to the status quo ante. Defendants maintain that reducing retiree benefits is a necessary change to avoid bankruptcy. The federal district court was not persuaded by Defendants' position based on the evidence and argument presented and granted preliminary injunctive relief to the Plaintiffs. Defendants appealed to the United States Court of Appeals for the Sixth Circuit. The Sixth Circuit reviewed the matter and affirmed the district court's order granting preliminary injunctive relief. (COA Case # 13-1476 decided 1/3/14).

The Sixth Circuit made clear the door remains open for Flint to prove its case, stating that "additional fact finding may illuminate whether the orders were indeed appropriate under the circumstances of this case." The Welch case comes down to whether Flint's modifications of retiree healthcare benefits were reasonable and necessary to remedy the economic problems facing Flint. In order to prove that, Flint must show that the modifications were virtually the only choice it had to avoid significant social harm, including:

1. That bankruptcy was/is imminent if the changes were not made;
2. That Flint was/is contemplating bankruptcy if it cannot modify the retiree healthcare benefits;

3. That alternative strategies to addressing the economic problems have been considered and will not work to address the economic problems; and
4. That the alternatives proposed by the Plaintiffs to address the economic problems will not work.

Flint intends to vigorously contest this litigation and pursue all available remedies to have the orders of the Emergency Manager sustained. If the Plaintiffs ultimately prevail in this litigation, Flint projects that it will incur an additional $5 million annually for retiree health care costs and that it will be in an extremely precarious financial position, with insufficient resources to meet basic functions. This projection of $5 million in additional costs could increase significantly based on future increases in premium costs that the City's modifications require be borne by retirees. The health care changes as well as all of the other changes made by the Emergency Manager were deemed to be necessary for Flint to avoid insolvency. Flint is unable to predict the outcome of this litigation at this time. See the information under the heading "Update on City of Flint Financial Position" in APPENDIX C.

Flint Water Rates

On August 15, 2011, the Mayor of Flint directed a rate increase for Flint's water and sewer rates because the City was spending more to provide water and sewer services than it was receiving in user funds. Flint increased rates for 2012 by approximately 35 percent. The President of the Flint Council, William Kincaid, and others filed an original action in the Michigan Court of Appeals, Kincaid v City of Flint, alleging that the fee increases were unconstitutional taxes levied without the approval of the electors of Flint that violated the Headlee Amendment to the Michigan Constitution. Flint filed a motion for summary disposition, arguing that there was no issue of fact that the fees charged were proportionate to the costs of providing water and sewer service, and as such were valid user fees, not taxes. Flint introduced evidence that the fee increases were required to pay the projected costs of the water and sewer systems for Fiscal Year 2012. The Michigan Court of Appeals agreed that the water and sewer fees charged by the City were valid user fees, not disguised taxes, as they were proportionate to the costs of providing service. As such, the Headlee Amendment did not apply. The plaintiffs filed an application for leave to appeal the decision to the Michigan Supreme Court, and for peremptory reversal of the Court of Appeals' decision. The Supreme Court denied the application for leave to appeal.

The plaintiffs then filed an action in Genesee County Circuit Court alleging that water rate increases which were accomplished by a directive dated August 15, 2011 were implemented in a manner that was in violation of a Flint ordinance which required that action to modify water rates be done on or before April 15 of the year in which it was to take effect. Additionally, the plaintiffs alleged that the City failed to create a first lien in favor of bondholders for water and sewer funds, as required by the Revenue Bond Act (Act 94, Public Acts of Michigan, 1933, as amended). The Court granted Flint's motion for summary disposition, finding that the powers of the Emergency Manager pursuant to Act 4, Public Acts of Michigan, 2011 rendered the alleged violation of the Flint ordinance moot and dismissed the claim with respect to the Revenue Bond Act. The plaintiffs have since filed an appeal with the Court of Appeals, which is currently pending. Flint is unable to predict the outcome of this litigation at this time.

TAX MATTERS

In the opinion of Miller, Canfield, Paddock and Stone, P.L.C., Bond Counsel, under existing law, the interest on the Bonds is excludable from gross income for federal income tax purposes and is not an item of tax preference for purposes of the federal alternative minimum tax imposed on individuals and corporations. It should be noted, however, that with respect to corporations (as defined for federal income tax purposes) such interest is taken into account in determining adjusted current earnings for the purpose of computing the alternative minimum tax imposed on such corporations. Bond Counsel is also of the opinion that, under existing law, the Bonds and the interest thereon are exempt from all taxation by the State of Michigan or by any taxing authority within the State of Michigan, except inheritance and estate taxes and taxes on gains realized from the sale, payment or other disposition thereof. Bond Counsel will express no opinion regarding any other federal or state tax consequences arising with respect to the Bonds and the interest thereon.

The opinion on federal and State of Michigan tax matters is based on the accuracy of certain representations and certifications, and continuing compliance with certain covenants, of the Issuer contained in the transcript of proceedings and which are intended to evidence and assure the foregoing, including that the Bonds are and will remain obligations the interest on which is excludable from gross income for federal and State of Michigan income tax purposes. The Issuer has covenanted to take the actions required of it for the interest on the Bonds to be and to remain excludable from gross income for federal income tax purposes, and not to take any actions that would adversely affect that exclusion. Bond Counsel's opinion assumes the accuracy of the Issuer's certifications and representations and the continuing compliance with the Issuer's covenants. Noncompliance with these covenants by the Issuer may cause the interest on the Bonds to be included in gross income for federal income tax purposes retroactively to the date of issuance of the Bonds. After the date of issuance of the Bonds, Bond Counsel will not undertake to determine (or to so inform any person) whether any actions taken or not taken, or any events occurring or not occurring, or any other matters coming to Bond Counsel's attention, may adversely affect the exclusion from gross income for federal and State of Michigan income tax purposes of interest on the Bonds or the market prices of the Bonds.

The opinion of Bond Counsel is based on current legal authority and covers certain matters not directly addressed by such authority. It represents Bond Counsel's legal judgment as to the excludability of interest on the Bonds from gross income for federal and State of Michigan income tax purposes but is not a guarantee of that conclusion. The opinion is not binding on the Internal Revenue Service ("IRS") or any court. Bond Counsel cannot give and has not given any opinion or assurance about the effect of future changes in the Internal Revenue Code of 1986, as amended (the "Code"), the applicable regulations, the interpretations thereof or the enforcement thereof by the IRS.

Ownership of the Bonds may result in collateral federal income tax consequences to certain taxpayers, including, without limitation, corporations subject to the branch profits tax, financial institutions, certain insurance companies, certain S corporations, individual recipients of Social Security or Railroad Retirement benefits and taxpayers who may be deemed to have incurred (or continued) indebtedness to purchase or carry the Bonds. Bond Counsel will express no opinion regarding any such consequences.

Tax Treatment of Accruals on Original Issue Discount Bonds

Under existing law, if the initial public offering price to the public (excluding bond houses and brokers) of a Bond is less than the stated redemption price of such Bonds at maturity, then such Bond is considered to have "original issue discount" equal to the difference between such initial offering price and the amount payable at maturity (such Bonds are referred to as "OID Bonds"). Such discount is treated as interest excludable from federal gross income to the extent properly allocable to each registered owner thereof. The original issue discount accrues over the term to maturity of each such OID Bond on the basis of a constant interest rate compounded at the end of each six-month period (or shorter period) from the date of original issue with straight-line interpolations between compounding dates. The amount of original issue discount accruing during each period is added to the adjusted basis of such OID Bonds to determine taxable gain upon disposition (including sale, redemption or payment on maturity) of such OID Bonds.

The Code contains certain provisions relating to the accrual of original issue discount in the case of purchasers of OID Bonds who purchase such OID Bonds after the initial offering of a substantial amount thereof. Owners who do not purchase such OID Bonds in the initial offering at the initial offering prices should consult their own tax advisors with respect to the tax consequences of ownership of such OID Bonds.

All holders of the OID Bonds should consult their own tax advisors with respect to the allowance of a deduction for any loss on a sale or other disposition of an OID Bond to the extent such loss is attributable to accrued original issue discount.

Amortizable Bond Premium

For federal income tax purposes, the excess of the initial offering price to the public (excluding bond houses and brokers) at which a Bond is sold over the amount payable at maturity thereof constitutes for the original purchasers of such Bonds (collectively, the "Original Premium Bonds") an amortizable bond premium. Bonds other than Original Premium Bonds may also be subject to an amortizable bond premium determined generally with regard to the taxpayer's basis (for purposes of determining loss on a sale or exchange) and the amount payable on maturity or, in certain cases, on an earlier call date (such bonds being referred to herein collectively with the Original Premium Bonds as the "Premium Bonds"). Such amortizable bond premium is not deductible from gross income. The amount of amortizable bond premium allocable to each taxable year is generally determined on the basis of the taxpayer's yield to maturity determined by using the taxpayer's basis (for purposes of determining loss on sale or exchange) of such Premium Bonds and compounding at the close of each six-month accrual period. The amount of amortizable bond premium allocable to each taxable year is deducted from the taxpayer's adjusted basis of such Premium Bonds to determine taxable gain upon disposition (including sale, redemption or payment at maturity) of such Premium Bonds.

All holders of the Premium Bonds should consult with their own tax advisors as to the amount and effect of the amortizable bond premium.

Market Discount

The "market discount rules" of the Code apply to the Bonds. Accordingly, holders acquiring their Bonds subsequent to the initial issuance of the Bonds will generally be required to treat market discount recognized under the provisions of the Code as ordinary taxable income (as opposed to capital gain income). Holders should consult their own tax advisors regarding the application of the market discount provisions of the Code and the advisability of making any of the elections relating to market discount allowed by the Code.

Information Reporting and Backup Withholding

Information reporting requirements apply to interest paid after March 31, 2007 on tax-exempt obligations, including the Bonds. In general, such requirements are satisfied if the interest recipient completes, and provides the payor with, a Form W-9, "Request for Taxpayer Identification Number and Certification," or unless the recipient is one of a limited class of exempt recipients, including corporations. A recipient not otherwise exempt from information reporting who fails to satisfy the information reporting requirements will be subject to "backup withholding," which means that the payor is required to deduct and withhold a tax from the interest payment, calculated in the manner set forth in the Code. For the foregoing purpose, a "payor" generally refers to the person or entity from whom a recipient receives its payments of interest or who collects such payments on behalf of the recipient.

If an owner purchasing the Bonds through a brokerage account has executed a Form W-9 in connection with the establishment of such account no backup withholding should occur. In any event, backup withholding does not affect the excludability of the interest on the Bonds from gross income for federal income tax purposes. Any amounts withheld pursuant to backup withholding would be allowed as a refund or a credit against the owner's federal income tax once the required information is furnished to the IRS.

Future Developments

Bond Counsel's engagement with respect to the Bonds ends with the issuance of the Bonds and, unless separately engaged, bond counsel is not obligated to defend the Issuer in the event of an audit examination by the IRS. The IRS has a program to audit tax-exempt obligations to determine whether the interest thereon is includible in gross income for federal income tax purposes. If the IRS does audit the Bonds, under current IRS procedures, the IRS will treat the Issuer as the taxpayer and the beneficial owners of the Bonds will have only limited rights, if any, to obtain and participate in judicial review of such audit.

NO ASSURANCE CAN BE GIVEN THAT ANY FUTURE LEGISLATION OR CLARIFICATIONS OR AMENDMENTS TO THE CODE, IF ENACTED INTO LAW, WILL NOT CONTAIN PROPOSALS WHICH COULD CAUSE THE INTEREST ON THE BONDS TO BE SUBJECT DIRECTLY OR INDIRECTLY TO FEDERAL OR STATE OF MICHIGAN INCOME TAXATION, ADVERSELY AFFECT THE MARKET PRICE OR MARKETABILITY OF THE BONDS, OR OTHERWISE PREVENT THE HOLDERS FROM REALIZING THE FULL CURRENT BENEFIT OF THE STATUS OF THE INTEREST THEREON. BOND COUNSEL EXPRESSES NO OPINION REGARDING ANY PENDING OR PROPOSED FEDERAL OR STATE OF MICHIGAN TAX LEGISLATION.

FURTHER, NO ASSURANCE CAN BE GIVEN THAT ANY ACTIONS OF THE INTERNAL REVENUE SERVICE, INCLUDING, BUT NOT LIMITED TO, SELECTION OF THE BONDS FOR AUDIT EXAMINATION, OR THE COURSE OR RESULT OF ANY EXAMINATION OF THE BONDS, OR OTHER BONDS WHICH PRESENT SIMILAR TAX ISSUES, WILL NOT AFFECT THE MARKET PRICE OF THE BONDS.

INVESTORS SHOULD CONSULT WITH THEIR TAX ADVISORS AS TO THE TAX CONSEQUENCES OF THEIR ACQUISITION, HOLDING OR DISPOSITION OF THE BONDS, INCLUDING THE IMPACT OF ANY PENDING OR PROPOSED FEDERAL OR STATE OF MICHIGAN TAX LEGISLATION.

APPROVAL BY THE MICHIGAN DEPARTMENT OF TREASURY

The Issuer has received a letter from the Department of Treasury of the State of Michigan, dated February 28, 2014, approving the issuance of the Bonds as provided in the Revised Municipal Finance Act, Act No. 34, Public Acts of Michigan, 2001, as amended.

BOND COUNSEL'S RESPONSIBILITY

The fees of Miller, Canfield, Paddock and Stone, P.L.C. ("Bond Counsel") for services rendered in connection with its approving opinion are expected to be paid from Bond proceeds. Except to the extent necessary to issue its approving opinion as to the validity of the Bonds and tax matters relating to the Bonds and the interest thereon, and except as stated below, Bond Counsel has not been retained to examine or review, and has not examined or reviewed, any financial documents, statements or materials that have been or may be furnished in connection with the authorization, issuance or marketing of the Bonds and accordingly will not express any opinion with respect to the accuracy or completeness of any such financial documents, statements or materials.

Bond Counsel has reviewed the statements in this Official Statement under the headings entitled "PURPOSE," "SECURITY," "THE BONDS," "PRIOR REDEMPTION OF BONDS," "TRANSFER OUTSIDE BOOK-ENTRY-ONLY SYSTEM," "TAX MATTERS," "APPROVAL BY THE MICHIGAN DEPARTMENT OF TREASURY," "BOND COUNSEL'S RESPONSIBILITY," and "CONTINUING DISCLOSURE" (first two paragraphs only). Bond Counsel has not been retained to review and has not reviewed any other portions of the Official Statement for accuracy or completeness, and has not made inquiry of any official or employee of the Issuer or any other person and has made no independent verification of such other portions hereof, and further has not expressed and will not express an opinion or belief as to any such other portions hereof.

CONTINUING DISCLOSURE

Prior to the delivery of the Bonds, the Issuer and each Local Unit will execute a Continuing Disclosure Undertaking (individually an "Undertaking" and collectively, the "Undertakings") for the benefit of the holders of the Bonds or Beneficial Owners to send certain information annually and to provide notice of certain events to certain information repositories pursuant to the requirements of Rule 15c2-12(b)(5) (the "Rule") adopted by the Securities and

Exchange Commission under the Securities Exchange Act of 1934. The information to be provided on an annual basis, the events which will be noticed on an occurrence basis, and the other terms of the Undertaking are set forth in *APPENDIX E-FORM OF CONTINUING DISCLOSURE UNDERTAKINGS* to this Official Statement.

A failure by the Issuer or a Local Unit to comply with its Undertaking will not constitute an event or default under the Resolution authorizing the issuance of the Bonds and holders of the Bonds or Beneficial Owners are limited to the remedies described in the Undertakings.

Genesee discovered in the summer of 2013 it had failed to comply with certain of its continuing disclosure obligations under previous undertakings entered into pursuant to the Rule with respect to annual information filings required for fiscal years 2008-2010. Genesee was required to file this information within a period of time specified in each previous undertaking after the end of the fiscal year which ends on September 30. The filings were subsequently made for fiscal year 2008 in December 2010, for fiscal year 2009 in June 2010 and for fiscal year 2010 in December 2011 for the Genesee's sewer, water supply, capital improvement and general obligation bonds. The filings for fiscal years 2008-2010 were subsequently made for the Issuer's building authority bonds on July 23, 2013. Genesee has filed its annual audited financial statements for fiscal years 2011 and 2012 on a timely basis.

In addition, Genesee failed to provide notice of certain underlying rating changes that occurred in 2010 affecting its sewer, water supply, building authority, capital improvement and general obligation bonds. Genesee subsequently filed notice of these rating changes and the current ratings on those bonds with a filing dated July 16, 2013. Furthermore, Genesee failed to provide notice of certain insured rating downgrades affecting its sewer, water supply and building authority bonds, of which Genesee was not separately notified by the relevant rating agencies, and which resulted from a series of widely reported downgrades of the applicable municipal bond insurer for those bonds. Genesee subsequently filed notice of these rating changes and the current ratings on those bonds with a filing dated July 16, 2013. Genesee has taken steps to assure that it will comply with its Undertaking and its previous undertakings, including the annual filing requirements, in the future. Genesee entered into an agreement in October, 2011 with Stauder, Barch & Associates, Inc. to serve as disclosure agent and assist Genesee in completing all required filings on a timely basis.

Flint has not entered into any previous continuing disclosure undertakings under the Rule.

A failure by the Issuer or either Local Unit to comply with its Undertaking must be reported by the Issuer or such Local Unit in accordance with the Rule and must be considered by any broker, dealer or municipal securities dealer before recommending the purchase or sale of the Bonds in the secondary market. Consequently, such failure may adversely affect the transferability and liquidity of the Bonds and their market price.

LEGAL OPINION

Legal matters incident to the authorization, issuance and sale of the Bonds are subject to the approval of Miller, Canfield, Paddock and Stone, P.L.C., attorneys of Detroit, Michigan,

Bond Counsel. A copy of the opinion of Bond Counsel will be furnished with the Bonds, which opinion will be substantially in the form set forth in APPENDIX F.

FINANCIAL ADVISOR

Stauder, Barch & Associates, Inc., Ann Arbor, Michigan, (the "Financial Advisor") has been retained by the Issuer to provide certain financial advisory services including, among other things, preparation of portions of the deemed "final" Preliminary Official Statement and the final Official Statement (the "Official Statements"). The information contained in the Official Statements was prepared in part by the Financial Advisor and is based on information supplied by various officials from records, statements and reports required by various local county or state agencies of the State of Michigan in accordance with constitutional or statutory requirements.

To the best of the Financial Advisor's knowledge, all of the information contained in the Official Statements, which it assisted in preparing, while it may be summarized is (i) complete and accurate; (ii) does not contain any untrue statement of material fact; and (iii) does not omit any material fact, or make any statement which would be misleading in light of the circumstances under which these statements are being made. However, the Financial Advisor has not and will not independently verify the completeness and accuracy of the information contained in the Official Statements.

The Financial Advisor's duties, responsibilities and fees arise solely from that as financial advisor to the Issuer and they have no secondary obligations or other responsibility. The Financial Advisor's fees are expected to be paid from Bond proceeds.

UNDERWRITING

The Bonds are being purchased by the Underwriters listed on the cover page of this Official Statement. The Underwriters have agreed, subject to certain conditions, to purchase all of the Bonds from the Issuer at an underwriters' discount of $946,374.90 from the initial offering prices set forth in this Official Statement. The Underwriters are obligated to purchase all of the Bonds, if any are purchased, the obligation to make such purchase being subject to certain terms and conditions set forth in the Bond Purchase Agreement with respect to the Bonds, the approval of certain legal matters by counsel and certain other conditions. The initial public offering prices of the Bonds may be changed from time to time by the Underwriters. The Bonds may be offered and sold by the Underwriters to certain dealers (including dealers depositing the Bonds in unit investment trusts, some of which may be managed by the Underwriters) and certain dealer banks and banks acting as agents at prices lower than the public offering prices set forth in this Official Statement.

J.P. Morgan Securities LLC ("JPMS"), one of the Underwriters of the Bonds, has entered into a negotiated dealer agreement ("Dealer Agreement") with Charles Schwab & Co., Inc. ("CS&Co.") for the retail distribution of certain securities offerings, at the original issue prices. Pursuant to the Dealer Agreement (if applicable to this transaction), CS&Co. will purchase Bonds from JPMS at the original issue price less a negotiated portion of the selling concession applicable to any Bonds that CS&Co. sells.

Wells Fargo Securities is the trade name for certain securities-related capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including Wells Fargo Bank, National Association ("WFBNA"). WFBNA, one of the underwriters of the Bonds, has entered into an agreement (the "Distribution Agreement") with its affiliate, Wells Fargo Advisors, LLC ("WFA"), for the distribution of certain municipal securities offerings, including the Bonds. Pursuant to the Distribution Agreement, WFBNA will share a portion of its underwriting or remarketing agent compensation, as applicable, with respect to the Bonds with WFA. WFBNA also utilizes the distribution capabilities of its affiliates, Wells Fargo Securities, LLC ("WFSLLC") and Wells Fargo Institutional Securities, LLC ("WFIS"), for the distribution of municipal securities offerings, including the Bonds. In connection with utilizing the distribution capabilities of WFSLLC, WFBNA pays a portion of WFSLLC's expenses based on its municipal securities transactions. WFBNA, WFSLLC, WFIS, and WFA are each wholly-owned subsidiaries of Wells Fargo & Company.

The Underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage activities. The Underwriters have, from time to time, and may in the future perform, various investment banking services for the Issuer for which it received or will receive customary fees and expenses.

In the ordinary course of its various business activities, the Underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (which may include bank loans and/or credit default swaps) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities may involve securities and instruments of the Issuer.

RATING

Moody's Investors Service has assigned the Bonds a rating of "A2," and Standard & Poor's Ratings Service, a division of The McGraw-Hill Companies, Inc., has assigned the Bonds a rating of "A+." No application was made to any other rating agency for the purpose of obtaining an additional rating on the Bonds. Any explanation of the significance of each such rating may only be obtained from the rating agency. Generally, a rating agency bases its rating on such information and materials and on investigations, studies and assumptions by the rating agency. There is no assurance that such rating will continue for any given period of time or that it will not be revised downward or withdrawn entirely by such rating agency, if in the judgment of the rating agency circumstances so warrant. Any such downward revision or withdrawal of such rating may have an adverse effect on the market price of the Bonds.

OTHER MATTERS

All information contained in this Official Statement is subject, in all respects, to the complete body of information contained in the original sources thereof. In particular, no opinion or representation is rendered as to whether any projection will approximate actual results, and all opinions, estimates and assumptions, whether or not expressly identified as such, should not be considered statements of fact.

Article 1 – Statement of Work (SOW)

Note to Contractors: Proposals must include detailed responses to all tasks as requested in Article 1. Contractors should provide thorough responses to each task, or, when appropriate, state their agreement that the Contractor will provide the requested services. Contractors are encouraged to provide detailed responses in order to allow the State to fully evaluate the Contractor's capabilities.

Throughout this SOW, language referring to Contract or Contractor(s) refers to any Contract awarded from this SOW. This SOW in itself is not to be construed as a Contract.

1.010 Project Identification

1.011 Project Request

This is an SOW for a Municipal Water Supply Assessment on behalf of the Department of Treasury and the City of Flint in Genesee County. This is a formal request to prospective Contractors to solicit bids or price quotations. Contractors must submit written proposals according to the instructions contained within this document, discussing how they will meet the specific requirements.

Any awarded Purchase Order(s) between the State and any awarded Contractor(s) is a separate document, whose terms are limited by the Contract.

1.012 Background

The Treasury Department is charged with monitoring, oversight and provision of assistance to local units of government under various statutes, including but not limited to, the Home Rule City Act (Act 279 of 1909), the Uniform Budgeting and Accounting Act (Act 2 of 1968), and the Glenn Steil State Revenue Sharing Act (Act 140 of 1971). In providing such monitoring and assistance to local units of government, the Treasury Department strives to preserve the capacity of local units to provide those services essential to the public health, safety and welfare of the citizens of this State.

The City of Flint is currently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is provided through a single 72-inch water main that terminates at a master meter. The City of Flint's water treatment plant uses the Flint River as a back-up and redundancy supply source to the DWSD supply, as required by the Michigan Department of Environmental Quality (MDEQ). The City of Flint also provides potable water to Genesee County downstream of the DWSD master meter.

The newly formed Karegnondi Water Authority (KWA) plans to construct a raw water supply system that will feed Flint's water treatment plant with water directly from Lake Huron. The Flint water treatment plant could be upgraded to accommodate and treat this new raw water source. DWSD has also proposed alternatives to the existing agreement with the City of Flint that could also be pursued.

A Contractor is needed to provide services to the Department of Treasury and the City of Flint upon request of the Treasury Department. The Department of Treasury is requesting a Contractor provide an analysis of the water supply options for the City of Flint to assist the Department of Treasury and the City of Flint in determining the best available option.

1.020 Scope of Work and Deliverables

1.021 In Scope

The Contractor must provide Water Supply Assessment as requested by the Department of Treasury These services will include data collection and review, an engineering evaluation and the generation of recommendations.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services

1.022 Work and Deliverable

Contractor must provide Deliverables/Services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below:

A Data Collection and Review

1 Provide all labor, materials and equipment to fully perform the work of data collection and review for an assessment of water supply options for the City of Flint.

Bidder Response

Our Price Proposal in Attachment A includes all labor, materials and equipment to perform the base work described in our Sample Project Plan.

2 Perform an analysis and comparison of the KWA and DWSD proposals that includes all capital, financing, operational and maintenance costs

Bidder Response

Agreed; our attached Sample Project Plan describes our approach for these services.

3 Prepare and submit for Department of Treasury and City of Flint review a preliminary report on the findings by Thursday, December 20, 2012; additionally, a final inspection report of findings and recommendations must be presented no later than January 8, 2013 (also see Section 1 022.E).

Bidder Response

Agreed. however, meeting these dates are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

B Data collection and analysis services must include the following:

1 DWSD's proposed contract with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan

2. DWSD's proposed water rates with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

3. Other relevant DWSD documents or information regarding the provision of municipal water to the City of Flint.

Bidder Response.

Agreed

4 KWA's proposed contract with the City of Flint

Bidder Response·

Agreed, this is included in our attached Sample Project Plan

5 Any engineering or environmental reports that evaluate KWA's proposal to provide municipal water to the City of Flint.

Bidder Response·

Agreed

6 Other relevant KWA documents or information regarding the provision of municipal water to the City of Flint

Bidder Response·

Agreed

C **Engineering Evaluation:**

1. Evaluation and recommendation of a potential water supply for the City of Flint must be based upon: 1) Cost; 2) System redundancy and reliability; and 3) The capacity for the Flint River to supply all of the City of Flint's water needs

Bidder Response·

Agreed, this is included in our attached Sample Project Plan

2 Evaluation and recommendation of a potential water supply for the City of Flint will also be based upon any additional criteria mutually agreed upon by the Department of Treasury, the City of Flint and the Contractor

Bidder Response·

Agreed

D The Contractor must carry out its operations in strict accordance with local, state, federal regulations.

Bidder Response:

Agreed.

E. Provide electronic copies (in the most suitable format) of the final inspection report of findings and recommendations to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013:

Bidder Response:

Agreed.

1. Describe format of findings and recommendations. Format should also include a description of all work performed.

Bidder Response.

Our attached Sample Project Plan describes our approach for the findings and recommendations. TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified

a) Preliminary inspection report of findings and recommendations must be presented by December 20, 2012.

Bidder Response

Agreed this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012

b) Final inspection report of findings and recommendations must be presented no later than January 8, 2013

Bidder Response

Agreed, this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012

2. Describe electronic formats available

Bidder Response.

Document formats would include PDF's or in their initial format (Word, Excel, GIS/CAD, etc.).

F Submit findings and recommendations to an independent Quality Control and Quality Assurance (QA/QC) review process for validation

Bidder Response:

Agreed; the independent QA/QC approach is included in our attached Sample Project Plan.

1 Provide electronic copies (in the most suitable format) of the independent QA/QC review to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013, with the final inspection report

Bidder Response:

Agreed; however, meeting this date are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

1.030 Roles and Responsibilities

1.031 Contractor Staff, Roles, and Responsibilities

1. Contractor must identify staff who will be involved in the project, including the name of each individual, work locations, and detailed descriptions of their roles and responsibilities.

   Note: If an overall organization chart has been developed, provide a reference to that chart as well. Note any part-time personnel

Bidder Response

The staff will be comprised of our senior management. Messrs David Guastella and Awni Qaqish Also, we will be supported by our part-time staff member, former Finance Director of Redford Their roles will include meeting with Flint, KWA, and DWSD; estimating capital costs of all options, estimating all operation and maintenance costs of all options a financial analysis for funding capital; and all other issues related to the costs of service

2 Specific work schedules for this project are Monday through Friday, 8:00 a.m. to 5:00 p m Eastern Time, however, possible night and weekend hours may be required

Bidder Response

Agreed

1.032 State Staff, Roles, and Responsibilities

1. Contract Compliance Inspector (CCI) The State's CCI provides oversight and monitoring of the selected Contractor's adherence to the terms and conditions of this project and the Contract

2 Project Manager: The State's Project Manager will monitor the project activities.

1.040 Project Plan

1.041 Project Plan Management

1 The Contractor will carry out this project under the direction and control of the CCI or designee.

2 Although there will be continuous liaison with the Contractor team, the CCI or designee will meet quarterly as a minimum, or as requested by the CCI or designee, with the Contractor's Project Manager for the purpose of reviewing progress and providing necessary guidance to the Contractor in solving problems which arise.

3 Contractors must provide a sample project plan with proposal for the deliverables proposed in section 1 022 The plan must include the details noted in section 1.041.4

Contractor Response

Agreed, the Sample Project Plan is attached.

4 Within five working days of Contract or purchase order award, the Contractor must submit to the CCI or designee for final approval a detailed project plan. This final project plan must be in agreement with the Contractor's proposal and accepted by the State for Contract, and must include the following:

   a. The Contractor's project organizational structure.

   b. The Contractor's staffing table with names and title of personnel assigned to the project. This must be in agreement with staffing of accepted proposal. Necessary substitutions

due to change of employment status and other unforeseen circumstances may only be made with prior approval of the State

c. The project breakdown showing sub-projects, activities and tasks, and resources required and allocated to each (e.g., estimated levels of effort for each level of personnel for Contractor personnel, including any contractual employees, and State personnel).

1.042 Reports

1 The Contractor must submit written bi-weekly summaries of progress which outline the work accomplished during the reporting period, work to be accomplished during the subsequent reporting period, problems, real or anticipated, which should be brought to the attention of the CCI; and notification of any significant deviation from previously agreed-upon work plans

1.050 Acceptance – Deleted – N/A

1.060 Proposal Pricing

1.061 Proposal Pricing

1 For authorized Services and Price List, see Attachment A (Price Proposal) Please complete Attachment A and submit with proposal.

2 Bidders are encouraged to offer quick payment terms (i e. _0__% discount off invoice if paid within _____ days) This information can be noted on the Bidders price proposal (see Attachment A). This may be a factor considered in the award decision.

3. Contractor's out-of-pocket expenses are not separately reimbursable by the State or local unit of government unless, on a case-by-case basis for unusual expenses, the State has agreed in advance and in writing to reimburse Contractor for the expense at the State's current travel reimbursement rates See www.michigan.gov/dtmb for current rates

4. Invoicing and payment must occur per Article 2 (Compensation) of Indefinite Scope Indefinite Delivery Contract No 263 (Discretionary Contract Number 00263) and Attachment A.

1.070 Additional Requirements – Deleted – N/A

Attachment A, Price Proposal

Bidders are encouraged to offer quick payment terms (i e __0__% discount off invoice if paid within _____ days) This information can be noted on the price proposal. This may be a factor considered in the award decision.

Provide the price per deliverable for the proposed services in section 1 022.

2012 Professional General Architectural/Engineering Services

CITY OF FLINT WATER SUPPLY ASSESSMENT
SAMPLE PROJECT PLAN

November 2012

1. Scope of Work

Tucker, Young, Jackson, Tull, Inc (TYJT), at the request of the State Treasurer is providing a proposal to perform an analysis of the water supply options being considered by the City of Flint The work would be completed as an authorized task under the reference contract, Contract No 00383 This proposal provides a background of our understanding of the issues, our approach, schedule dates, and the level of effort to perform the task.

2. Background

The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD) This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint's Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining the best course going forward for the City of Flint.

3. Scope of Work

The proposed scope of work summarizes TYJT's approach to perform the analysis. The work includes data collection and review, an engineering evaluation, and recommendations. The recommendations would be provided in a report that would also include a description of all the work performed under this task.

3.1. Data Collection and Review

To perform an analysis of competing proposals it is important to provide a relative or "apples-to-apples" comparison. As example, DWSD's cost of service includes all capital, financing, and operation and maintenance costs to deliver the water to Flint's system. Therefore, it will be necessary for an assessment of KWA's proposal to also include all of these costs in the comparison.

Additionally, DWSD is proposing other alternatives to its existing agreement with Flint that will also need to be evaluated. The options currently proposed include:

- Using DWSD's new model contract that provides reduction in cost for communities with their own storage,
- Moving the location of supply from Potter and Baxter to the Imlay Pumping Station to reduce fees associated with elevation and distance from DWSD's water plants,
- Providing finished (potable) non-pumped water from the Lake Huron Water Treatment Plant, and
- Providing raw (not treated) non-pumped water from the Lake Huron Water Treatment Plant.

This phase of the work would include the collection and review of the following documents.

- The Lake Huron Water Supply Karegnondi Water Authority Preliminary Engineering Report, dated September 2009 and the 2012 update by Rowe Engineering;
- The Analysis of the Flint River as a Permanent Water Supply for the City of Flint Report, dated July 2011,
- Proposed or draft contract agreements that would be used between the KWA and the City of Flint;
- DWSD's contract rates based on the new model contracts,
- Information related to other DWSD proposals for service to Flint; and
- Other letters, minutes, etc. from all parties that provide information that could be used in the evaluation

All information provided would be evaluated and subsequent meetings would be held with the DWSD, Flint and the KWA to address any data gaps or clarifications that may be required. These meetings would be coordinated with the Treasurer so that its representatives can be present at the meetings. For the purpose of this proposal, TYJT has assumed a total of two meetings for both the DWSD and KWA.

3.2. Engineering Evaluation

The City of Flint Emergency Financial Manager has indicated that he believes the determination of who supplies water to the City's system should mainly be based on the following criteria (in order of importance).

- Cost,
- System redundancy/reliability, and
- The recognized limitation of the Flint River as a source to supplying all of Flint's water needs.

In consultation with the Treasurer, these factors plus additional ones that may be identified in the evaluation process would be used.

An analysis will be performed for the options identified and a comparison will be made based on cost, reliability of supply, and any limitations that may identified by both suppliers in providing the needed service.

TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified. TYJT will then incorporate comments from the Treasury's review and submit a final document to the Department of Treasury for their use.

Furthermore, as is done as a standard of practice at TYJT for quality control and quality assurance (QA/QC), an independent review will be completed by staff or outside consultants not directly involved in the project. These reviewers will have noted experience in the field necessary to complete the QA/QC reviews. Two reviews are envisioned, one to review the evaluation process and the other to review the findings and recommendations.

4. Schedule

At the meeting between all interested parties on November 1, 2012, two dates were identified by the Treasurer. The first date identified was December 20, 2012 for the preliminary evaluation to be provided to the State. The second date was January 15, 2013 for the Treasury to make a decision on the City of Flint water supply. TYJT proposes to complete the draft report for submittal on December 20th. This will provide a two week review period by the Treasury. The final report would then be completed and submitted one week prior to the January 15th deadline. TYJT will also be available, if requested by the Treasurer, to attend a general meeting with all parties involved at the conclusion of the work.

Review of TYJT December 21, 2012 Presentation
City of Flint Water Supply Assessment
Prepared by Rowe Professional Services Company

DWSD Supply (Slides 7 through 9)

1 The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river. To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs

2 Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations

3 The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates" Options and rates shown are different than presented by DWSD previously

	DWSD 11/29/2012	TYJT Estimates
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16.31
8 mgd Maximum Day -P&B		$12 68
12 mgd Maximum Day - Imlay	$14.38	$14 38
8 mgd Maximum Day - Imlay		$11 11

4 Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

5 We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint The analyses show a capital cost of $4 7 million, we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details

6 If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main. It does not appear this is included in the TYJT analyses.

7. If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main. The TYJT analysis did not include this.

8 Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

9. If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses

Flint River Supply (Slide 10)

1 If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

Data Collected (Slide 14)

1 The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality. Flint will need to soften water for these options

Benchmarking Comparisons (Slide 16)

1 The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor" It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation. For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base. O&M expenses and rates are different and care should be exercised not to mix the two during analyses The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent

2 The KWA will supply raw water; SOCWA and YUCA both supply finished water Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc

3 DWSD has a history of rates to Flint and other suburban wholesale customers. Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance. It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases

Capital Financing (Slide 17)

1. KWA bonds are planned to be general obligation bonds, backed by member counties.

O&M Inflation Factor (Slide 20)

1. SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA
2. KWA will be a supplier of raw water. O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water.

3. The KWA study assumed power, labor, and chemical costs increase at an annual average of 3%. TYJT indicated this is too low and suggested 5%.

4 Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)
   a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003
   b Electricity Rates in Michigan (per U.S Energy Information Administration) have increased an average of 3.2% since 1999
   c The U.S Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

Finished Water Rate Inflation (Slide 21)

1 TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD TYJT assumed DWSD rate increases of 4.4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay) Based on the actual charges by DWSD to Flint, DWSD historical rates are as follows:
   a. 10 year increase in DWSD rates to Flint 10.5% annually
   b Average annual increase through 45 year history 6.7%

2 Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation. Rate inflation will likely be different than O&M inflation. Other factors impacting rates:
   a. Debt – the amount of debt varies widely between utilities
   b Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates. Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation"

3 Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

4 Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce; it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis. This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators)

Capital Financing with Revenue Bonds (Slide 24)

1 Note that the KWA bonds will be general obligation bonds backed by the member counties

2 The 2009 KWA Study assumed 6%, 25 year financing. The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today

3 Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit =	$532,950,000
3 years * 60 units * $32,300 / unit =	$ 5,814,000
	$538,764,000

4 For a KWA project cost of $272,421,558, total P&I is $483 million The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc) and additional contingencies.

5 Bond holder reserve is not a requirement for general obligation bonds.

6 TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds

7 Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it. This will reduce their project costs

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low The primary differences in cost estimates for the project appear to be the following components

1 Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs. $24,618,080) KWA estimates were based on actual construction costs from recent projectd completed by Genesee County within the last eight years.
   a. 32mgd water pump station including two-10 MG ground storage tanks - $13 4 million
   b 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
   c 30 mgd wastewater pump station, 50 feet deep wetwell – $9 4 million

   The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan)

2 Redundant Power – There is no need for redundant power; other provisions will provide reliability of supply.

3 Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced. Options have been obtained on all properties which must be

purchased, so purchase prices are known. It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

4 Engineering, Legal, Administration & Contingencies

a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including:

i. The intake design has been completed and all regulatory permits obtained

ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of-way. Environmental review and permitting are in process

b TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total.

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

c Combining this with the $72,139,566 totals $104,693,997 or 43% of the estimated construction cost We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed.

Cost Comparison (Slide 30)

1 The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects. The KWA estimate is believed to be sufficient for the proposed pumping stations

2 Redundant power is not required, this does not need to be included in the TYJT estimate.

3 Land for LHPS – actual price is $360,000

4 Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding $16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted". The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient.

5. Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

Other Considerations – Redundancy / Reliability (Slide 33)

1 Unfunded Mandates/ Future Regulations
   a. The proposed KWA supply will deliver raw water; it is not anticipated to be affected by future changes to regulations. Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA Some compliance costs may actually be less with the higher-quality Lake Huron water rather than Flint River water as the source

2 State Goals
   a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities. The raw water supplied by KWA will make a new commodity, raw water, available to the region. A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area.
   b The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

3 Redundancy
   a. We agree that the KWA and DWSD options are similar with respect to redundancy Both provide the primary water supply; customers are responsible for their backup supply

Other Considerations – Cost Slide 34

1 TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative
   a. The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis During summer months, water from the river will need to be softened before blending. More than half of the water supplied will be provided from the river. When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option.

2. For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules. Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

3 Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water

4 The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period. The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank. There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity Capacity expansion is planned to be financed through capacity charges to new users.

5 The provision for redundant connections between the City's water system and the GCDC system was included in the most recent wafer supply agreement between the two, in 2011 Although not a KWA cost, the cost of the redundant connections should be considered with all options

6. The $2.3 million budgeted for land by KWA was intended to cover all land requirements. Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized. Total land costs are now estimated to be about $1.5 million.

7 The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC) The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined. For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.

a. The detailed design (plans and specifications) and permitting have been completed.
b. The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation.

It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase

8 Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too

9 It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

10 Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives. However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built

Mr Eric Cline
Unit Operations Specialist
430 West Allegan Street
Lansing, Michigan 48922

Dear Mr Cline,

RE SOW No 271Q3209, Flint Municipal Water Supply Assessment

Subject Response to Rowe Professional Services Company Comments on TYJT's December 20, 2012 Presentation

The purpose of this letter is to respond to the subject comments provided to TYJT on January 9, 2013. The comments are provided below followed by our response. The presentation is provided as an attachment for reference

It should be noted that due to the time constraints identified, our evaluation was completed in a very short duration. Our analysis is therefore based on the limited information that was provided We believe that the assumptions made are valid, however, if further analysis is required, TYJT suggests that more information such as the KWA route including topography and easement information, pump station siting, condition of the Flint WTP, and water chemistry information related to blending is obtained

Furthermore, per the Treasury's direction, Flint has indicated that they do not want to pursue the stand-alone option of only using their plant nor do they want to consider being supplied from the Imlay Station because they are concerned with long-term costs associated with the 72" line Therefore, responses to comments specific to these options are not provided

DWSD Supply (Slides 7 through 9)

Rowe Comment No 1 The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs.

TYJT's Response: Flint's email dated 12/6/12 indicates that the average production rate when they operate the plant is 11 MGD. It was assumed that plant water quality produced was sufficient to meet the necessary water quality requirements since it is to serve as a backup to the DWSD supply.

If softening is required then its cost required for maximum flow rate analyzed would need to be included. Another question that should be addressed is if softening is required, why it is not part of the current treatment for the backup supply

Furthermore, from the meeting on November 20, 2012, KWA indicated that the Flint River would serve as a backup supply to the KWA system This would mean that the Flint WTP would have to maintain two treatment trains, one for lake water and one for river water Depending on how long the plant would have to operate as a backup could trigger the need under the KWA option to improve the river infrastructure as the Flint WTP would need to produce up to 18 MGD

Rowe Comment No 2: Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations.

TYJT's Response: As indicated in our previous response, it was assumed that the plant has capacity to supply up to 11 MGD Furthermore, per the LAN/Rowe report on the Flint River dated July 2011, the summary on Page 12 states that without making any modifications to the river infrastructure, the water plant is limited to 11 6 MGD. Therefore, if the maximum needed from the plant under the various scenarios presented is 10 MGD, no additional work to the dams should be required

Rowe Comment No 3: The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates" Options and rates shown are different than presented by DWSD previously

	DWSD 11/29/2012	TYJT Estimates
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16.31
8 mgd Maximum Day -P&B		$12 68
12 mgd Maximum Day - Imlay	$14.38	$14.38
8 mgd Maximum Day - Imlay		$11 11

TYJT's Response. The rates presented were provided by DWSD and are provided as an attachment to this response.

Rowe Comment No 4: Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

TYJT's Response: Per DWSD, the allocated costs of service and rates computed for Flint follow an "all else being equal" application of the current (FY 2012-13) DWSD unit costs. This is consistent with the figures used in discussions with Flint representatives previously. Whenever the actual service requirements get applied, the lower DWSD System units associated with lower Flint units will raise the unit costs for all customers, creating a moderate impact for all customers. This has been described to Flint representatives.

As such, in DWSD's discussions with Flint they've identified these figures as hypothetical results indicative of rate calculations, as opposed to firm offers. So, while the rates are still estimates until the volume and type of the purchase is determined, it can be assumed that the actual rates will be similar to the estimates shown

Rowe Comment No 5 We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint. The analyses show a capital cost of $4 7 million; we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details

TYJT's Response In the Treasurer's email to TYJT, dated January 9, 2013, this option is no longer being considered by Flint Therefore, a response is not required

Rowe Comment No. 6 If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main It does not appear this is included in the TYJT analyses.

TYJT's Response In the Treasurer's email to TYJT, dated January 9, 2013, this option is no longer being considered by Flint Therefore, a response is not required

Rowe Comment No. 6 If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main The TYJT analysis did not include this

TYJT's Response In the Treasurer's email to TYJT, dated January 9, 2013, this option is no longer being considered by Flint Therefore, a response is not required

Rowe Comment No 6: Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

TYJT's Response TYJT has not been party to the discussions regarding a reliability credit, so we assume that the rates used in our presentation do not include the credit.

Rowe Comment No. 9: If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses

TYJT's Response: In the Treasurer's email to TYJT, dated January 9, 2013; this option is no longer being considered by Flint. Therefore, a response is not required

Flint River Supply (Slide 10)

Rowe Comment No. 1: If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

TYJT's Response: Please refer to our response to Comments No. 1 and No. 2 for Slides 7 through 9.

Data Collected (Slide 14)

Rowe Comment No 1. The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD. For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality Flint will need to soften water for these options.

TYJT's Response. Please refer to our response to Comments No 1 for Slides 7 through 9

Benchmarking Comparisons (Slide 16)

Rowe Comment No. 1. The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor" It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base O&M expenses and rates are different and care should be exercised not to mix the two during analyses The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent.

TYJT's Response It is widely acceptable to compare O&M costs of similar facilities and communities and Benchmarking the Flint WTP rate was one item used in determining the best way to account for inflation associated with O&M costs for the planning period. Based on our analysis, we believe that the 4.51% is appropriate. It is also worth noting that in the letter to Mr Kurtz from the Flint Finance Director, Mr Ambrose, he used and inflation factor of 5% for the Flint WTP operations with the KWA system.

Rowe Comment No 2: The KWA will supply raw water; SOCWA and YUCA both supply finished water Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA. Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc.

TYJT's Response: Benchmarking the KWA rate was one item used in determining the best way to account for inflation associated with O&M costs for the planning period. Additionally, per Mr. O'Brien's statement in our meeting on November 20, 2012, he suggested that we use GC-WWS inflation rate. Over the last 10 years, GC-WWS increase was 10.5%

Based on our analysis, we believe that the 5% is appropriate It is also worth noting that in the letter to Mr. Kurtz from the Flint Finance Director, Mr. Ambrose, he used and inflation factor of 5% for the KWA system.

Rowe Comment No 3 DWSD has a history of rates to Flint and other suburban wholesale customers Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases

TYJT's Response This is incorrect Please see the attachment provided by DWSD that shows the historical rates for Flint

Capital Financing (Slide 17)

Rowe Comment No 1. KWA bonds are planned to be general obligation bonds, backed by member counties

TYJT's Response: Reference is made to an email from Mr Kurtz, dated 12/4/12 that indicated revenue bonds would be used to finance the capital needs of KWA and this has been our basis of analysis We would need to recalculate the capital cost if general obligation bonds are used

It is worth noting that general obligation bonds are backed by the full faith and credit of the issuer. Our previous discussions with Flint indicated that they were not even sure if they could get a bond rating Furthermore, Genesee County indicated that they would not back Flint's share of the obligations We are surprised that general obligation bonds are now being considered

O&M Inflation Factor (Slide 20)

Rowe Comment No 1 SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA.

TYJT's Response: Please refer to our response to Slide 16, Comment No 2

Rowe Comment No 2 KWA will be a supplier of raw water O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water

TYJT's Response: Please refer to our response to Slide 16, Comment No 2.

Rowe Comment No 3. The KWA study assumed power, labor, and chemical costs increase at an annual average of 3% TYJT indicated this is too low and suggested 5%.

TYJT's Response: Please refer to our response to Slide 16, Comment No. 2.

Rowe Comment No 4 Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)

a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003

b Electricity Rates in Michigan (per U.S Energy Information Administration) have increased an average of 3.2% since 1999

c The U.S. Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

TYJT's Response. *Please refer to our response to Slide 16, Comment No. 2.*

Finished Water Rate Inflation (Slide 21)

Rowe Comment No 1 TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD. TYJT assumed DWSD rate increases of 4 4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay) Based on the actual charges by DWSD to Flint, DWSD historical rates are as follows.

a 10 year increase in DWSD rates to Flint: 10 5% annually

b Average annual increase through 45 year history 6 7%

TYJT's Response. Please provide documentation of the referenced increases Per our response to Slide 7 through 9, Comment No. 3, DWSD has provided their historic rates over the past 10 years It could also be argued that these rate increases are skewed higher than they will be in the future since a dramatic reduction in water sales due to the recession required DWSD's fixed costs to be distributed over less units

Rowe Comment No. 2. Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation Rate inflation will likely be different than O&M inflation. Other factors impacting rates

a Debt – the amount of debt varies widely between utilities

b. Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation".

TYJT's Response: Rowe's comment is noted.

Rowe Comment No 3: Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

TYJT's Response: DWSD's rates do include these variables as their rates are inclusive of their total costs; operations and fixed. It is also worth noting that once the KWA construction begins, Flint fixed costs will be set regardless of their actual water use.

Rowe Comment No 4 Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce, it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators)

TYJT's Response Please see our response to Slide 16, Comment No. 3.

Capital Financing with Revenue Bonds (Slide 24)

Rowe Comment No 1 Note that the KWA bonds will be general obligation bonds backed by the member counties

TYJT's Response: Please refer to our response to Slide 17, Comment No. 1

Rowe Comment No 2 The 2009 KWA Study assumed 6%, 25 year financing The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today

TYJT's Response We believe that it was prudent to use 5% as a conservative assumption This is consistent with the KWA study.

Rowe Comment No 3. Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit = $532,950,000

3 years * 60 units * $32,300 / unit = $ 5,814,000

$538,764,000

TYJT's Response: Please refer to our response to Slide 17, Comment No. 1

Rowe Comment No. 4: For a KWA project cost of $272,421,558, total P&I is $483 million. The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc.) and additional contingencies.

TYJT's Response: Please refer to our response to Slide 17, Comment No 1.

Rowe Comment No 5: Bond holder reserve is not a requirement for general obligation bonds.

TYJT's Response: Please refer to our response to Slide 17, Comment No. 1

Rowe Comment No. 6. TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period. Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds.

TYJT's Response: Although the current interest rate is less than 1% it was assumed that current fiscal policy could not be sustained for 30 years Therefore 3% was assumed. Note that this is interest coming back to KWA and actually reduces the total cost.

Rowe Comment No 7· Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it This will reduce their project costs.

TYJT's Response: The reserve was only applied over the duration of the loan

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low The primary differences in cost estimates for the project appear to be the following components

Rowe Comment No 1 Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs $24,618,080). KWA estimates were based on actual construction costs from recent projects completed by Genesee County within the last eight years

a. 32 mgd water pump station including two-10 MG ground storage tanks - $13 4 million
b. 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
c. 30 mgd wastewater pump station, 50 feet deep wetwell – $9.4 million

The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan)

TYJT's Response. Of the three projects identified only the first one is a water system project, the other two are wastewater lift stations. Since these estimates are based on a preliminary design, TYJT believes that our estimate is a more prudent representation of cost.

Rowe Comment No 2 Redundant Power – There is no need for redundant power, other provisions will provide reliability of supply

TYJT's Response TYJT disagrees with this statement. Backup power is a standard practice in the water industry. Furthermore, a loss of power at either pumping facility will prevent the supply of water to both Flint and Genesee County. TYJT is not aware of what "other provisions" are being provided.

Rowe Comment No 3 Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced Options have been obtained on all properties which must be purchased, so purchase prices are known It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

TYJT's Response: Our analysis has been based on the information provided to us. Revising and changing numbers will require another analysis.

Rowe Comment No 4: Engineering, Legal, Administration & Contingencies.

a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including

   i. The intake design has been completed and all regulatory permits obtained

   ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of- way. Environmental review and permitting are in process

b. TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC. These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total:

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

c. *Combining this with the* $72,139,566 totals $104,693,997 or 43% of the estimated construction cost. We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed

TYJT's Response. In an email from Mr O'Brien on December 5, 2012, the design is less than 15% complete on the pipeline and the final route is only 90% confirmed Since these estimates are based on a preliminary design, TYJT believes that our estimate is a more prudent representation of cost.

The $72,139,566 is for construction contingencies only This figure includes $5,519,213 for ELAC of 25% per KWA's cost estimate for the intake construction which is reasonable for a project at the 90% design completion The balance of the construction contingency of $66,620,335 is based on 30% contingency since the design for the transmission mains and the IPS is at only 15% preliminary design.

The $32,554,431 is a budget for:

a. completing the design of the IPS and transmission mains to 100% bidding stage,

b. construction management fee for the firm responsible to oversee the construction startup and commissioning of the project,

c. legal and survey fee to acquire the land and 277 easements (per KWA 2009 report), and

d. for the KWA staff to administer the project.

In summary the $72 million is for construction contingency and the $32 million is for the engineering and administration of the project.

Cost Comparison (Slide 30)

Rowe Comment No 1 The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects The KWA estimate is believed to be sufficient for the proposed pumping stations.

TYJT's Response Please see our response to Slide 26 through 29, Comment No 1.

Rowe Comment No 2 Redundant power is not required, this does not need to be included in the TYJT estimate

TYJT's Response Please see our response to Slide 26 through 29. Comment No 2

Rowe Comment No 3 Land for LHPS – actual price is $360,000

TYJT's Response. The $2.3 million for land came from the KWA Preliminary Engineering Report, dated September 2009 and Appendix 20 the updated report, dated October 4, 2012 Paragraph 2 3.2 (page 3) of Appendix 2 of the Preliminary Engineering Report dated September 2009 states, "Genesee County purchased 230 acres of land in Worth Township, Sanilac County in 2002. The land was purchased for the potential use as a water supply facility The land was purchased for $2.3 million." This same $2.3 million is shown as the cost for the land (Figure 1-KWA Water Supply Project Cost) in, Appendix 20 October 2012 Preliminary Engineering Report Update- Final Report

Rowe Comment No. 4: Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding 16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted" The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient

TYJT's Response: TYJT did not double count the ELAC. TYJT broke down the ELAC into engineering fee for design, legal cost to acquire easements and land for the project, KWA administrative and management cost, and construction management fee. These cost amount to approximately $32.5 million The 30% contingency listed in TYJT's cost estimate is a construction contingency since the design is at 15% (other than the intake) according to John O'Brien's statement during the meeting with the City of Flint on November 20, 2012.

Rowe Comment No. 5: Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

TYJT's Response: Appendix 5 of the KWA 2009 report listed the cost for land acquisition for the Lake Huron Transmission at $615, 740, for the North Transmission Main at $214,300, and the Flint Transmission at $336,130 for a total of $1,166,170. TYJT estimated the land cost for the IPS and

reservoir only at $75,000 since the LHPS land has already been purchased by Genesee County TYJT estimate for easements and land (not the LHPS) to be $1,241,170 versus Rowe's recent information of $1,140,000 for a difference of $101,000 For all practical matter TYJT and KWA estimates are the same

Other Considerations – Redundancy / Reliability (Slide 33)

Rowe Comment No 1 Unfunded Mandates/ Future Regulations

a The proposed KWA supply will deliver raw water, it is not anticipated to be affected by future changes to regulations Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA Some compliance costs may actually be less with the higher quality Lake Huron water rather than Flint River water as the source.

TYJT's Response: This is obviously hard to quantify since identifying regulation requirements over 30 years is hard to determine However, it is widely understood that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base

Rowe Comment No 2 State Goals

a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested. However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities The raw water supplied by KWA will make a new commodity, raw water, available to the region A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses. The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area

b. The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

TYJT's Response: Reference is made to the Treasury policy that promotes consolidation of resources and services Therefore, two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (Lapeer, Mayfield, Imlay City) separating to form another water system is counter to the initiative

Rowe Comment No. 3: Redundancy:

a. We agree that the KWA and DWSD options are similar with respect to redundancy. Both provide the primary water supply; customers are responsible for their backup supply.

TYJT's Response. Agreed, however, from the meeting on November 20, 2012, KWA indicated that the Flint River would serve as a backup supply to the KWA system. This would mean that the Flint WTP would have to maintain two treatment trains; one for lake water and one for river water. Whether there is sufficient space or additional capital required for the WTP was not investigated as part of this study

Other Considerations – Cost Slide 34

Rowe Comment No 1. TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative

a The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis During summer months, water from the river will need to be softened before blending More than half of the water supplied will be provided from the river When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option

TYJT's Response Please see our response to Slide 7 through 9, Comment No 1 Furthermore, our operating costs for the Flint WTP were increased per the analysis provided to KWA for review

Rowe Comment No 2. For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

TYJT's Response Please see our response to Slide 7 through 9, Comment No 1 and No 2

Rowe Comment No 3: Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water

TYJT's Response. Please see our response to Slide 7 through 9, Comment No. 1. Additionally, we used the chemical costs from February 2009 preliminary design report adjusted for inflation

Rowe Comment No. 4: The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity. Capacity expansion is planned to be financed through capacity charges to new users

TYJT's Response The point made here is that replacement costs of equipment were not included e g., pumps, motors, etc.

Rowe Comment No 5: The provision for redundant connections between the City's water system and the GCDC system was included in the most recent water supply agreement between the two, in 2011 Although not a KWA cost, the cost of the redundant connections should be considered with all options

TYJT's Response Noted, but the redundancy is limited since both of the water systems would be supplied by KWA and a loss of power to one of the pumping facilities without backup power would interrupt the supply

Rowe Comment No 6 The $2 3 million budgeted for land by KWA was intended to cover all land requirements Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized Total land costs are now estimated to be about $1.5 million

TYJT's Response. Please see our response to Slide 7 through 9, Comment No. 1

Rowe Comment No 7. The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC) The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.

a The detailed design (plans and specifications) and permitting have been completed

b The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation

It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase

TYJT's Response Please see our response to Slide 30, Comment No 4

Rowe Comment No 8 Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too

TYJT's Response: Please see our response to Slide 33, Comment No 3.

Rowe Comment No 9: It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

TYJT's Response. It would be recommended to determine what the water loss is in Flint and what the implication would be on sizing the KWA pipe. A determination could then be made once this analysis was performed.

Rowe Comment No. 10. Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built

TYJT's Response Noted.

Please let us know how we should proceed Should you have any questions or need any additional information, please contact me

Wayne and Ed:

I just spoke to Jerry Ambrose regarding the pipeline sale. I've asked for a copy of the sale agreement and advised him that it would have to go to the City Council for approval. I am attaching several e-mail discussions on the issue between Ashley and Drew outlining the required steps. Please let me know if you have any questions.

Thanks,
Randy,

Randall D. Byrne, Manager, Office of Fiscal Responsibility
State of Michigan 430 W. Allegan St. , Lansing, MI 48922

Ashley,

Sounds good. In my mind, the key would be for all EMs to post complete section 17 quarterly reports on their websites (as mandated by MCL 141.1557). If these reports always contained an updated F&O plan as they should (See MCL 141.1557(h)) then our office can simply compare the approval request to the latest F&O plan, and determine what approvals are necessary.

It is my hope that the upcoming EM conference will be an opportunity to get all the EMs submitting proper reports.

It is still the plan for my office to operate as if the Governor has delegated approvals for sales of all assets <100k, under 12(1)(r)?

Drew,

I agree with everything you've outlined below. You're correct that if there was no competitive bidding process the Treasurer's approval would still be needed. I'm curious as to why it wasn't bid out somehow though ... maybe just too few buyers.

Anyhow, Fred and I spoke about this today and he agrees that the mention in the F&O plan, such as it is, is sufficient. After some discussion, we'd recommend a two-pronged approach going forward:

- Amend the PA 436 guidance document (the one I sent to you yesterday) to clarify that OFR expects to be kept up to date on projects mentioned in the F&O plan as they develop. This can be done via memo, meeting, or in the weekly calls that OFR has with the EMs. Absent such updates, OFR may still require separate approval under PA 436.

- If an EM is not willing to share information, or if they aren't as politically savvy as one may hope (to be clear, I don't think this is a problem with the current EMs, just thinking worst-case scenario), OFR may additionally require that the F&O plan be updated on a more regular basis to ensure that the necessary details are included therein.

I hope this is helpful. Thanks.

>
> Where the F&O plan is at issue is in Subsections 12(1)(r) and 15(1). These subsections respectively require Governor and Treasurer approval for sales of municipal assets. Should decision makers determine that the F&O plan language is sufficient, then approval under these sections is not necessary. Ashley has explained that the Governor has requested that only sales >100k which are not in the F&O plan are to be submitted to him.

This sale is also a contract and so subsection 12(3) is implicated. This law mandates that contracts >50k which were not subject to competitive biding must be approved by the Treasurer. I understand that this sale was not subject to such a competitive process, and so this action must be submitted for Treasurer approval under this section.

Note again that all actions under 12(1)(r) must comply with Section 19. Regardless of the contents of the F&O plan or any competitive bidding process, this action must be taken to council. Then they have 10 days to disapprove and 7 more to propose an alternate proposal. In this situation, an ELB meeting will be held to select the best plan.

Is this enough to avoid having to present to City Council for an alternative plan?

WATER TRANSMISSION MAIN

ACQUISITION AGREEMENT

BY AND BETWEEN

CITY OF FLINT

AND THE

GENESEE COUNTY DRAIN COMMISSIONER AS COUNTY AGENCY

DATED _____, 2014

ACQUISITION AGREEMENT

THIS ACQUISITION AGREEMENT ("Agreement") is made this ____ day of _____, 2014 ("Execution Date"), and effective April 1, 2014 ("Effective Date"), by and between the City of Flint, a Michigan municipal corporation (hereinafter "Flint"), and the Genesee County Drain Commissioner, as County Agency, a public agency pursuant to the County Public Improvement Act of 1939, as amended (the "County Agency"). The Effective Date of this Agreement shall be contingent upon a condition antecedent that the Agreement has been reviewed by the City of Flint City Council and no alternative has been proposed and the State of Michigan Department of Treasury has approved this Agreement as required by Act 436 of the Michigan Public Acts of 2012, as amended, which is commonly referred to as the Local Financial Stability and Choice Act. If either the City of Flint City Council or the State of Michigan Department of Treasury fails to approve this Agreement prior to May 1, 2014, then the Agreement shall be effective immediately upon the City of Flint City Council failing to offer an alternative and the Michigan Department of Treasury approving this Agreement.

PREAMBLE

It is the intent of the Parties for Flint to sell to the County Agency the Water Main, *subject only to the restrictions more fully set forth in this Agreement*, for the mutual consideration set forth in this Agreement for the County Agency's unrestricted use.

RECITALS

A. Flint desires to sell the Water Main to the County Agency; and

B. The County Agency desires to purchase the Water Main from Flint; and

C. The Parties have determined that it is in their respective best interests for the County Agency to acquire, upon the terms and subject to the conditions set forth herein, the Water Main from Flint if the Karegnondi Water Authority constructs a new raw water pipeline from Worth Township, Michigan to Genesee County, which shall furnish raw water to the City of Flint; and

D. In furtherance thereof, it is proposed that the County Agency acquire the Water Main for the mutual consideration set forth in this Agreement.

NOW, THEREFORE, in consideration of the mutual promises and representations set forth in this Agreement, the Parties agree as follows:

ARTICLE I
INTRODUCTORY PROVISIONS; DEFINITIONS

1.1. Adoption of Preamble and Recitals. All of the matters stated in the preamble and recitals of this Agreement are true and correct and are hereby incorporated into the body of this Agreement as through fully set forth in their entirety herein, provided that in cases of

conflict, provisions of this Agreement shall control over matters stated in the preamble and recitals.

1.2. Definitions. The following terms and expressions as used in this Agreement, unless the context clearly shows otherwise, shall have the following meanings:

a. "Closing" means the closing of the transactions contemplated by this Agreement.

b. "Closing Date" means the mutually acceptable date to be scheduled within thirty (30) days after execution of this Agreement or on a date as mutually acceptable to the Parties for the Closing to take place.

c. "County Agency" means the Genesee County Drain Commissioner, as County Agency, Genesee County, Michigan, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended.

d. "Emergency Manager" means an emergency manager or financial emergency manager as defined by law that is appointed by the Governor of the State of Michigan pursuant to law.

e. "Flint" means the City of Flint, Genesee County, Michigan.

f. "Party" or "Parties" means the Genesee County Drain Commissioner, as County Agency, individually, the City of Flint, individually, or the Genesee County Drain Commissioner, as County Agency and the City of Flint, collectively.

g. "Real Property Agreements" means all agreements that affect real property, including, but not limited to, licenses, leases, easements, or similar documents.

h. "Water Main" means the water transmission main as more fully described in **Exhibit A**, including, but not limited to, all appurtenances thereto including any meter pits connected thereto, along with the water contained therein and all drawings, files, laying schedules, records of repairs, maintenance files, repair parts, etc. Including by way of example, and not as a limitation, meter vaults, meters, pumps, air relief valves, sump pumps, electrical connections, communication devices and all other mechanical, electrical, or other equipment used to pump water through the Water Main or bring attention to an emergency situation.

ARTICLE II
THE PURCHASE AND SALE

2.1 Transfer to the County Agency. In accordance with the provisions of this Agreement, in consideration for the payment of the Purchase Price as set forth in Section 2.3 of this Agreement and other good and valuable consideration, and subject to the contingencies set forth in Article 8 and Article 9, Flint shall transfer and convey the Water Main to the County

Agency, effective either when Flint provides the County Agency thirty (30) days written notice of its intent to transfer the Water Main or at 12:01 a.m. local time on July 1, 2014, whichever event occurs first in time, including all rights as Flint may have pursuant and any and all Rights of Way and Easements, copies of which are attached hereto as **Exhibit B**, and other instruments of transfer to be delivered at the Closing, as set forth in Article III of this Agreement, in accordance with the provisions relating to the Closing.

2.2 Acquisition by the County Agency. The County Agency, in reliance upon the covenants and representations of Flint contained herein and the documents provided by Flint, hereby agrees to acquire the Water Main from Flint.

2.3 Purchase Price. As part of the consideration for the transfer and conveyance of the Water Main to the County Agency from Flint, the County Agency shall make a lump sum payment within thirty (30) days from the execution of this Agreement, in a sum equal to Three Million Nine Hundred Eighty-Seven Thousand Seven Hundred Dollars and Zero Cents ($3,987,700.00), inclusive of all interest, fees, charges, or other costs (the "Purchase Price").

ARTICLE III
CLOSING

3.1 Closing. The Closing will take place at the offices of Sargent's Title Company, 625 S. Grand Traverse, Flint, Genesee County, Michigan, on such date as shall be mutually acceptable to the Parties within thirty (30) days after the execution of this Agreement or on a date as mutually acceptable to the Parties.

3.2 Deliveries. At the Closing, the transactions listed below shall occur.

a. The County Agency shall deliver to Flint:

1. A certified letter from the Genesee County Drain Commissioner stating that he has the authority, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, to execute and deliver this Agreement and the transactions contemplated hereby; and

2. An opinion of legal counsel to the County Agency reasonably satisfactory to Flint, providing that the transactions contemplated by this Agreement do not violate the provisions of Act 342 of the Michigan Public Acts of 1939, as amended, or other applicable laws and such additional matters and in form and substance satisfactory to Flint and its counsel; and

3. A certified letter from the Genesee County Drain Commissioner as to the accuracy of its representations and warranties as of the date of this Agreement and as of the Closing and as to its compliance with and performance of its covenants and obligations to be performed or complied with at or before the Closing; and

b. Flint shall deliver to the County Agency:

1. A certified resolution of the City Council of the City of Flint or an Order of the Emergency Manager, if applicable, or both, authorizing the execution and delivery of this Agreement and the transactions contemplated hereby; and

2. An executed bill of sale for all of the Water Main that is tangible personal and real property executed by a representative of Flint authorized to sign the bill of sale or an Order of the Emergency Manager, if applicable, or both; and

3. An Assignment of Rights of Way and Easements, or such other appropriate document or instrument of transfer, as the case may require, and executed by a representative of Flint authorized to sign the bill of sale or an Order of the Emergency Manager, if applicable, or both; and

4. Such other documents and other instruments of transfer and conveyance as may reasonably be needed to complete the transactions contemplated hereby; and

5. A certified letter from the Mayor or Emergency Manager as to the accuracy of its representations and warranties as of the date of this Agreement and as of the Closing and as to its compliance with and performance of its covenants and obligations to be performed or complied with at or before the Closing; and

6. An opinion of legal counsel of Flint, reasonably satisfactory to the County Agency, providing that the transactions contemplated by this Agreement do not violate the City Charter of Flint, local ordinances or laws, and such additional matters and in form and substance satisfactory to the County Agency and its counsel and

3.3 Transfer of Operation. The County Agency shall take over from Flint all of the operation, maintenance and administration of the Water Main upon the happening of one of the following events, whichever event occurs first in time:

a. As of the date and time set forth in the written notice to be provided by Flint to the County Agency of Flint's intent to transfer the Water Main; or

b. Upon the execution of this Agreement; or.

c. Upon the County Agency executing an agreement or contract with Detroit Water and Sewerage Department ("DWSD") to purchase water directly from DWSD.

3.4 Expenses. Flint and the County Agency shall each bear their own expenses incurred by them in connection with the transactions contemplated by this Agreement, including without limitation, consultants' fees, legal fees and accounting fees, whether or not such transaction is consummated.

3.5 Closing Costs. If there are any costs associated with the Closing, including costs to be paid to the title company, filings, recording costs, or other costs, fees, or expenses, the costs shall be paid by the County Agency.

ARTICLE 4
REPRESENTATIONS AND WARRANTIES OF FLINT

Flint makes the following representatives and warranties to the County Agency:

4.1 Corporate Organization. Flint is a municipal corporation duly organized, validly existing and in good standing under the laws of the State of Michigan.

4.2 Authorization. Flint or the Emergency Manager has the requisite power and authority to execute and deliver this Agreement and to consummate the transactions contemplated hereby and thereby. Assuming due and valid authorization, this Agreement will constitute a legal, valid and binding obligation of Flint, enforceable against Flint in accordance with its terms, except as the enforcement thereof may be limited by applicable principles of bankruptcy, insolvency, reorganization, moratorium, or similar laws affecting the rights of creditors and subject to general principles of equity.

4.3 Easements and Rights of Way.

a. **Exhibit C** identifies all of the real property occupied by the Water Main.

b. Upon reasonable title search and review provided by the County Agency to Flint of all of the real property occupied by the Water Main, Flint possesses all necessary, permanent, perpetual and transferable real property rights including easements, licenses or rights of way by prescription, necessity, implication or acquiescence necessary for the use, routine operation, and maintenance of the Water Main, except as disclosed on **Exhibit D**.

c. Flint has good and marketable title to the Water Main.

d. As of the Execution Date, there are no pending or threatened disputes or pending or threatened litigation with respect to any real property rights pertaining to the Water Main.

e. Flint agrees to provide access to the County Agency to any and all documents that are in Flint's possession regarding the Water Main. These documents include, but are not limited to, as built drawings, shop drawings, maintenance records, land records and easements, and any other document that relates to the

Water Main. The County Agency is free to take possession of the documents for the limited purpose of making any copies that are deemed necessary in the opinion of the County Agency. All original documents shall be returned by the County Agency to Flint in a timely manner.

4.4 WATER MAIN. **THE WATER MAIN SHALL BE CONVEYED BY FLINT TO THE COUNTY AGENCY IN "AS IS", "WHERE IS" AND "WITH ALL FAULTS" PHYSICAL CONDITION, WITH NO ADDITIONAL WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE PHYSICAL CONDITION OF THE WATER MAIN THAT EXTEND BEYOND THE WARRANTIES EXPRESSLY STATED IN THIS AGREEMENT. EXCEPT FOR ANY EXPRESS WARRANTIES STATED IN THIS AGREEMENT, THE WATER MAIN SHALL BE CONVEYED WITH NO EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR USE.**

4.5 Litigation. As of the Execution Date there is no action, suit or proceeding pending or threatened against or affecting Flint before any governmental entity in which there is a reasonable possibility of an adverse decision which could have a material adverse effect upon the ability of Flint to perform its obligations under this Agreement or which in any manner questions the validity of this Agreement.

4.6 Water Main Parts and Equipment. Flint agrees that it will provide to the County Agency any spare parts or equipment which, in the sole discretion of Flint, may only be used exclusively on the Water Main.

ARTICLE 5
REPRESENTATIONS AND WARRANTIES OF THE COUNTY AGENCY

The County Agency makes the following representations and warranties to Flint and delivered to Flint on Execution Date, a copy of which is attached hereto:

5.1 Corporate Organization. The County Agency was established pursuant to Act 342 of the Michigan Public Acts of 1939, as amended. As County Agency, it is organized and validly existing under the laws of the State of Michigan and has all requisite power and authority to execute, deliver and perform this Agreement and to consummate the transactions contemplated hereby.

5.2 Authorization. The County Agency has the requisite power and authority to execute and deliver this Agreement and to consummate the transactions contemplated hereby and thereby. This Agreement will constitute a legal, valid and binding obligation of the County Agency, enforceable against the County Agency in accordance with its terms, except as the enforcement thereof may be limited by applicable principles of bankruptcy, insolvency, reorganization, moratorium, or similar laws affecting the rights of creditors and subject to general principles of equity.

5.3 No Conflict. The execution, delivery and performance by the County Agency of this Agreement, the compliance by the County Agency with any of the provisions hereof and thereof, and the consummation by the County Agency of the transactions contemplated hereby and thereby: (i) do not violate any Applicable Law; (ii) do not require the consent,

approval, clearance, waiver, order or authorization of any person, organization, or entity; and (iii) do not conflict with, or result in any breach of, or default or loss of any right under (or an event or circumstance that, with notice or the lapse of time, or both, would result in a default), or the creation of any encumbrance pursuant to, or cause or permit the acceleration prior to maturity of any amounts owing under any indenture, mortgage, deed of trust, lease or other agreement to which the County Agency is a party, which failure, violation, conflict or breach would, in the aggregate, materially hinder or impair the consummation of the transactions contemplated by this Agreement.

5.4 Litigation. As of the Execution Date, there is no action, suit or proceeding pending or threatened against or affecting the County Agency before any governmental entity in which there is a reasonable possibility of an adverse decision which could have a material adverse effect upon the ability of the County Agency to perform its obligations under this Agreement or which in any manner questions the validity of this Agreement.

5.5 Due Diligence and Inspection. The County Agency acknowledges that it is being afforded the opportunity to conduct due diligence and investigation with respect to the transaction contemplated by this Agreement. The County Agency represents and warrants that it has conducted any and all such legal, factual, and other examinations, inquiries, investigations, and inspections, including conducting any tests, studies and examinations, that it, in its sole discretion, has determined necessary to complete such due diligence inspection to determine that the subject matter of this Agreement is suitable for the County Agency's intended use.

5.6 Environmental Matters. The County Agency represents and warrants that it has conducted any and all such legal, factual, and other examinations, inquiries, investigations, and inspections, including conducting any tests, studies and examinations, that it, in its sole discretion, has determined necessary to complete such due diligence inspection to have full knowledge of the environmental condition of the subject matter of this Agreement. County Agency shall enter into this Agreement subject to any and all environmental conditions present upon the subject matter of this Agreement.

5.7 Emergency Water Supply. The County Agency warrants that it will provide, to the extent the Detroit Water and Sewerage Department has available capacity treated water through the water main that is the subject matter of this Agreement in an emergency situation to Flint until such time as the Karegnondi Water Authority Water Transmission Pipeline construction is completed (which is estimated to be completed by May 2017) and the Karegnondi Water Authority is providing raw water to its customers.

The emergency supply of treated water to the Flint by the County Agency during the construction of the Karegnondi Water Authority Water Transmission Pipeline shall be at the prevailing rate and any additional charges, fees, special charges, and penalties, as billed by the Detroit Water and Sewerage Department to the County Agency.

If Flint shall need an emergency water supply after the Karegnondi Water Authority Water Transmission Pipeline has been installed and is operational, the County Agency will provide, to the extent the County Agency has available capacity, treated water through the water main that is the subject matter of this Agreement in an emergency situation to Flint. The emergency supply of treated water to Flint by the County Agency after the Water

Transmission Pipeline has been installed and is operational, shall be at the prevailing rate and any additional charges, fees, special charges, and penalties, if applicable, as billed by the Detroit Water and Sewerage Department to the County Agency.

ARTICLE 6
COVENANTS OF FLINT

Flint covenants and agrees with the County Agency as follows:

6.1 Operation and Maintenance of the Water Main until Closing. Between the Execution Date of this Agreement and the Effective Date of this Agreement, Flint shall:

a. Operate the Water Main in the ordinary course of business; and

b. Maintain all books and records relating to the operation of the Water Main in the ordinary course of business; and

c. Fix any known breaks or leaks in the Water Main, except those set forth on **Exhibit F**; and

c. Promptly notify the County Agency of any emergency or other change in the normal course relating to the Water Main (or communications indicating that the same may be contemplated.

6.2 Litigation and Claims. Flint shall promptly inform the County Agency in writing of any Claims of which Flint is or becomes aware that are or might reasonably be expected to become the subject of litigation affecting the Water Main or the transactions contemplated by this Agreement.

6.3 Notice of Changes. Flint shall inform the County Agency in writing if it becomes aware that any representation or warranty made by Flint in this Agreement has ceased to be accurate or if Flint becomes aware of the occurrence of any breach of any covenant or other agreement required by this Agreement to be performed or complied with by Flint.

ARTICLE 7
COVENANTS OF THE COUNTY AGENCY

The County Agency hereby covenants and agrees with Flint as follows:

7.1 Cooperation. Subject to the terms and conditions of this Agreement, the County Agency shall cooperate with Flint to use its best efforts to secure all necessary consents, approvals, authorizations, exemptions and waivers from all persons and entities as shall be requested by Flint or required to be obtained in order to consummate the transactions contemplated hereby.

7.2 Litigation and Claims. The County Agency shall promptly inform Flint in writing of any claims (or communications indicating that the same may be contemplated) of which the County Agency is or becomes aware that are or might reasonably be expected

to become the subject of litigation affecting the Water Main or the transactions contemplated by this Agreement.

7.3 Notice of Changes. The County Agency shall inform Flint in writing if it becomes aware that any representation or warranty made by the County Agency in this Agreement has ceased to be accurate or if the County Agency becomes aware of the occurrence of any breach of any covenant or other agreement required by this Agreement to be performed or complied with by the County Agency.

ARTICLE 8
CONDITIONS AND OBLIGATIONS OF FLINT

The obligations of Flint to consummate the transactions contemplated by this Agreement shall be subject to the satisfaction (or waiver by Flint) on or prior to the Closing of all of the following conditions:

8.1 Accuracy of Representations and Warranties. Except as otherwise noted in this Agreement, the representations and warranties of Flint set forth in this Agreement shall be true and correct in all material respects as of the date when made and as of the Closing.

8.2 Performance of Covenants and Agreements. Flint shall have duly performed and complied in all material respects with the covenants, agreements and conditions required by this Agreement to be performed or complied with by it prior to or at the Closing. None of the events or conditions entitling the County Agency to terminate this Agreement under Article 10 hereof shall have occurred and be continuing.

8.3 Consents. Any consent required for the consummation of this purchase and sale under any agreement, contract, law, license or other instrument described in any exhibit hereto or referred to herein, or for the continued enjoyment by the County Agency of any benefits of such agreement, contract, license or other instrument after the Closing, which consent Flint is specifically obligated to obtain pursuant to this Agreement shall have been obtained and be effective as set forth in this Agreement.

8.4 Governmental Approvals. All requisite regulatory approvals, if any, shall have been obtained or made and shall be in full force and effect. There shall be no injunction, restraining order or decree of any nature that restrains or prohibits the transactions contemplated by this Agreement.

8.5 No Proceedings. Since the Execution Date of this Agreement, there shall not have been commenced or threatened against Flint, including any proceeding (a) involving any challenge to, or seeking damages or other relief in connection with, the transactions contemplated by this Agreement, or (b) that may have the effect of preventing, delaying, making illegal, imposing limitations or conditions on or otherwise interfering with any of the transactions contemplated by this Agreement.

8.6 Documents. Flint shall have received from the County Agency all of the documents identified in Sections 3.2.a.1, 3.2.a.2, and 3.2.a.3 of this Agreement.

ARTICLE 9
CONDITIONS AND OBLIGATIONS OF THE COUNTY AGENCY

The obligations of the County Agency to consummate the transactions contemplated by this Agreement shall be subject to the satisfaction (or waiver by the County Agency) on or prior to the Closing of all of the following conditions:

9.1 Accuracy of Representations and Warranties. Except as set forth in the Exhibits, the representations and warranties of the County Agency set forth in this Agreement shall be true and correct in all material respects as of the date when made and at and as of the Closing.

9.2 Performance of Covenants and Agreements. The County Agency shall have duly performed and complied in all material respects with the covenants, agreements and conditions required by this Agreement to be performed or complied with by it prior to or at the Closing. None of the events or conditions entitling the County Agency to terminate this Agreement under Article 10 hereof shall have occurred and be continuing.

9.3 Consents. Any consent required for the consummation of the transactions contemplated by this Agreement under any agreement, contract, license or other instrument described in any schedule or exhibit hereto or referred to herein, which consent the County Agency is specifically obligated to obtain pursuant to this Agreement shall have been obtained and shall be effective as set forth in this Agreement.

9.4 Governmental Approvals. All requisite regulatory approvals shall have been obtained or made and shall be in full force and effect. There shall be no injunction, restraining order or decree of any nature that restrains or prohibits the transactions contemplated by this Agreement.

9.5 No Proceedings. Since the Execution Date of this Agreement, there shall not have been commenced or threatened against the County Agency any proceeding (a) involving any challenge to, or seeking damages or other relief in connection with, the transactions contemplated by this Agreement, or (b) that may have the effect of preventing, delaying, making illegal, imposing limitations or conditions on or otherwise interfering with any of the transactions contemplated by this Agreement.

9.6 Documents. The County Agency shall have received the documents identified in all of the Sections of this Agreement to be provided by Flint.

ARTICLE 10
TERMINATION PRIOR TO CLOSING

10.1 Termination.

a. This Agreement may be terminated at any time prior to the Closing:

1. By the mutual written consent of Flint and the County Agency;

2. By Flint in writing if the County Agency fails to perform any condition, obligation of any provision of this Agreement and fails to correct the non-performance within five (5) days (or other period of time as mutually agreed to by the Parties) of being notified by Flint;

3. By the County Agency in writing if Flint fails to perform any condition, obligation of any provision of this Agreement and fails to correct the non-performance within five (5) days (or other period of time as mutually agreed to by the Parties) of being notified by the County Agency;

4. By Flint if the transaction is not approved by all its governing body, the emergency manager, or the Treasurer of the State of Michigan, if such approval is required;

5. By either Party, if the other Party fails to timely satisfy those conditions set forth in Article 8 or Article 9, as appropriate.

b. This Agreement may be terminated by the County Agency in writing on or before May 1, 2014, if it shall not have been satisfied in its sole discretion with the results of the County Agency's continuing due diligence investigations of the Water Main, including, without limitation, with respect to all operational, financial, environmental, legal and accounting matters.

c. This Agreement may be terminated by either party upon written notice if the Karegnondi Water Authority fails to construct the proposed Water Main from Worth Township to Genesee County.

d. This Agreement may be terminated by either party upon written notice if the cost of construction of the Water Main from Worth Township to Genesee County by the Karegnondi Water Authority exceeds the limitations set forth in the Financing Agreement between the Karegnondi Water Authority, Flint, and the County Agency. A unit is defined as one million gallon per day, U.S. Liquid Measure.

e. In the event of any termination pursuant to this Article 10, any amounts paid by the County Agency to Flint or from Flint to the County Agency shall be refunded within thirty (30) days. In the event that either party to this Agreement fails to refund any amounts paid within thirty (30) days, the amount due and owing shall

accumulate interest at the rate of 1.5% per month, until such time as the debt is paid.

10.2 Effect on Obligations. Termination of this Agreement pursuant to this Article 10 shall terminate all obligations of the Parties hereto; provided, however, that termination pursuant to Sections 10.a.2 or 10.a.3 hereof shall not relieve any defaulting party from any liability to the other party hereto resulting from such failure to perform. Notwithstanding the foregoing, any and all existing agreements (other than this Agreement) between Flint and the County Agency which are related to the Water Main shall remain in full force and effect following any termination of this Agreement unless and until such existing agreements are otherwise terminated pursuant to the terms thereof.

ARTICLE 11
TERMINATION AFTER CLOSING BY COUNTY AGENCY

This Agreement may be terminated at the sole discretion of the County Agency after Closing, if Flint fails to provide the County Agency with an easement, license, or similar document for the portion of the Water Main that is located on private property as identified in **Exhibit D,** prior to Friday, June 30, 2015, unless Flint has filed an action in a court of competent jurisdiction to condemn the property or a portion of the property necessary to ensure that the County Agency has access to the Water Main under the private property to replace, repair, maintain, or perform any other action commonly associated with the ownership of a water main.

In the event of a termination by the County Agency pursuant to this ARTICLE 11, the County Agency shall be entitled to a complete refund or repayment of any amounts paid to Flint pursuant to ARTICLE 2, Section 2.4 of this Agreement. If this Agreement is terminated by the County Agency for any reason set forth herein, then Flint shall immediate become responsible for the operation, maintenance and administration of the Water Main beginning at 12:01 a.m. (local time) the next business day after the notice of termination is received by Flint.

After the County Agency receives all amounts to be refunded or repaid by Flint as set forth in the preceding paragraph, the County Agency shall execute any and all documents necessary to return title to the Water Main to Flint. Additionally, the County Agency shall assign or transfer any property easements and execute any other documents necessary to fully transfer the Water Main back to Flint as if this Agreement did not exist. Flint shall be responsible for all costs of recording the documents and any closing costs in the event of a termination pursuant to this ARTICLE 11 by the County Agency.

ARTICLE 12
REMEDIES FOR BREACHES OF THIS AGREEMENT

12.1 Survival of Representations and Warranties. All of the representations, warranties and covenants of the County Agency and Flint contained in this Agreement and the Exhibits

hereto shall survive the Closing and continue in full force and effect forever thereafter (subject only to any applicable statutes of limitations applicable to their breach).

12.2 Remedies Generally. It is not intended hereby to specify (and this Agreement shall not be considered as specifying) an exclusive remedy for any default, but all such other remedies existing at law or in equity may be availed of by any Party hereto and shall be cumulative. The Parties agrees that failure in the performance of this Agreement cannot be adequately compensated in money damages alone. In the event of any default by a Party, the other Party shall have available to it the equitable remedy of mandamus and specific performance in addition to any other legal or equitable remedies which may also be available. No waiver or waivers of any breach or default (or any breaches or defaults) by any Party hereto or of performance by any other Party of any duty or obligation hereunder shall be deemed or construed to be a waiver of subsequent breaches or defaults of any kind, character or description, under any circumstance.

12.3 Remedies for Breach of Representations, Warranties and Covenants. If a Party sustains any losses because the representations or warranties provided by the other Party are incorrect or untrue or because the other Party has breached its covenants given herein, the other Party shall be liable for all losses incurred by the Party to cure such representations, warranties or covenants, including attorney fees. In addition or in the alternative, the Party may require the other Party to take such actions as required to cure such misrepresentations, warranties or breached covenants, within three (3) months or other amount of time mutually agreed to by the Parties.

12.4 Limitations on Certain Remedies.

a. The injured Party will take reasonable steps to mitigate all losses relating to a claim, including availing itself of any defenses, limitations, and will provide such evidence and documentation of the nature and extent of a claim as may be reasonably requested by the other Party. The injured Party's reasonable steps include the reasonable expenditure of money to mitigate or otherwise reduce or eliminate any loss or expense for which a remedy would otherwise be due under this ARTICLE 12, and the reimbursing Party will reimburse the injured Party for the injured Party's reasonable expenditures, including attorney fees and costs.

b. Notwithstanding anything contained to the contrary in any other provision of this Agreement, except in cases of a Party's gross negligence, willful misconduct or fraud, the obligations of each Party under Sections 12.2 and 12.3, and the recovery by any injured Party of any liabilities suffered or incurred by it as a result of any breach or non-fulfillment by a Party or any of its representations, warranties, covenants, agreements or other obligations under this Agreement, shall be limited to actual damages.

12.5 Survival of Remedies. The rights and obligations to remedies given in this Article 11 shall survive the Closing indefinitely.

ARTICLE 13
TERMINATION OF WATER SUPPLY CONTRACTS, AMENDMENTS, AND WAIVER OF NOTICE TO TERMINATE

Flint and Genesee County by and through its Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, have executed several Agreements in the past that shall be affected upon the execution of this Agreement. By executing this Agreement, Flint and the Genesee County by and through its Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, hereby expressly mutually terminate the following agreements in their entirety and further expressly waive any notice provisions set forth therein:

1. Agreement between the CITY OF FLINT, a Michigan Home Rule City Corporation and the COUNTY OF GENESEE, a Michigan County Corporation, by and through the Genesee County Drain Commissioner, having been designed as such by appropriate legislation in compliance with Act 342 of the Public Acts of 1939, and any subsequently named Agent for the County of Genesee dated June 28, 1972 (hereinafter "Water Agreement"); and

2. Agreement to amend the Water Agreement dated March 5, 1981; and

3. SUPPLEMENTAL AGREEMENT AND AMENDMENT TO CITY/COUNTY WATER AGREEMENT, dated March 31, 1988; and

4. AGREEMENT between the CITY OF FLINT, a Michigan municipal corporation, and the GENESEE COUNTY DRAIN COMMISSIONER, a designated County Agency dated February 20, 2001; and

5. 3rd AMENDMENT TO 1973 CITY/COUNTY WATER SUPPLY AGREEMENT, dated October 21, 2003, between the City of Flint, a Michigan municipal corporation and the County of Genesee, a political subdivision of the State fo Michigan and the Genesee County Dain Commissioner, the County Agency designated by the Genesee County Board of Commissioners pursuant to Act 342 of the Public Acts of 1939, as amended; and

6. 4th AMENDMENT TO 1973 CITY/COUNTY WATER SUPPLY AGREEMENT, dated December 30, 2011, between the City of Flint, a Michigan municipal corporation and the County of Genesee, a political subdivision of the State of Michigan by and through the Genesee County Drain Commissioner, the County Agency designated by the Genesee County Board of Commissioners pursuant to Act 342 of the Public Acts of 1939, as amended.

7. Any other Agreement or part of Agreement that directly conflicts with this Agreement and the intent contained therein as mutually agreed upon in writing by the parties hereto.

ARTICLE 14
MISCELLANEOUS

14.1 Construction. The Parties have participated jointly in the negotiation and drafting of this Agreement. In the event an ambiguity or question of intent or interpretation arises, this Agreement shall be construed as if drafted jointly by the Parties and no presumption or burden of proof shall arise favoring or disfavoring any Party by virtue of the authorship of any of the provisions of this Agreement. Any reference to any federal, state, local, or foreign statute or law shall be deemed also to refer to all rules and regulations promulgated there under, unless the context requires otherwise. The word "including" shall mean including without limitation.

14.2 Incorporation of Exhibits. The following Exhibits attached hereto are incorporated herein by reference and made a part hereof:

Exhibit A: Description of Water Main

Exhibit B: Rights of way and easements held by Flint

Exhibit C: Real property occupied by the Water Main

Exhibit D: Flint's disclosure of real property occupied by the Water Main that Flint does not have the necessary transferable easement or real property rights for the use, routine, operation, and maintenance of the Water Main

Exhibit E: Flint's disclosure of any breaks or leaks in the Water Main that are known by Flint and that have not been repaired

14.3 Entire Agreement. This Agreement constitutes the sole understanding of the Parties hereto with respect to the matters provided for herein and supersedes any previous agreements and understandings between the Parties with respect to the subject matter hereof. No amendment, modification or alteration of the terms or provisions of this Agreement shall be binding unless the same shall be in writing and duly executed by Flint and the County Agency and in compliance with Section 14.9.

14.4 Successors and Assigns. This Agreement will inure to the benefit of and be binding upon Flint and the County Agency and their respective successors and assigns. This Agreement and any of the rights, interests or obligations hereunder may be assigned by either Party hereto without the prior written consent of the other Party hereto.

14.5 Invalidity. If any term or other provision of this Agreement is invalid, illegal or incapable of being enforced by any rule of law, or public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect so long as the practical, economic and legal substance of the transactions contemplated hereby is not affected in any manner materially adverse to any Party. Upon such determination

that any term or other provision is invalid, illegal or incapable of being enforced, the Parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the Parties as closely as possible in an acceptable manner to the end that transactions contemplated hereby are fulfilled to the extent possible. Invalid provisions shall be severed from this Agreement.

14.6 Counterparts; Facsimile Signatures. This Agreement may be executed in one or more counterparts, each of which shall for all purposes be deemed to be an original and all of which shall constitute the same instrument. This Agreement may be executed by facsimile signatures that shall be considered originals.

14.7 Headings. The headings of the articles, sections and paragraphs of this Agreement and of the Exhibits hereto are included for convenience of reference only and in no way define, limit or describe the scope of intent of any provision of this Agreement.

14.8 Construction and References. Words used in this Agreement, regardless of the number or gender specifically used, shall be deemed and construed to include any other number, singular or plural, and any other gender, masculine, feminine or neuter, as the context shall require. Unless otherwise specified, all references in this Agreement to articles, sections, paragraphs or clauses are deemed references to the corresponding articles, sections, paragraphs or clauses in this Agreement, and all references in this Agreement to exhibits are references to the corresponding exhibits attached to this Agreement.

14.9 Modification and Waiver. Any of the terms or conditions of this Agreement may be waived in writing at any time by the Party that is entitled to the benefits thereof. No waiver of any of the provisions of this Agreement shall be deemed to or shall constitute a waiver of any other provisions hereof (whether or not similar). Oral modifications of this Agreement are not permitted. Modification or amendment of this Agreement shall require the written approval of the Genesee County Drain Commissioner and the Flint City Council.

14.10 Addresses and Notice. Unless otherwise provided herein, any notice, communication, request, reply or advice (herein severally and collectively, for convenience, called "Notice") herein provided or permitted to be given, made or accepted by any party to any other party must be in writing and may be given or be served by depositing the same in the United States mail postpaid and registered or certified and addressed to the party to be notified, with return receipt requested, or by delivering the same to an officer of such party, or by prepaid telegram when appropriate, addressed to the party to be notified. Notice deposited in the mail in the manner described above shall be conclusively deemed to be effective, unless otherwise stated herein, from and after the expiration of three (3) days after it is so deposited. Notice given in any other manner shall be effective only if and when received by the party to be notified. For the purposes of notice, the addresses of the parties shall, until changed as hereinafter provided, be as follows:

If to Flint, to:

City of Flint
Attn: CHIEF LEGAL OFFICER
1101 South Saginaw Street
Flint, Michigan 48502

If to the County Agency, to:

Genesee County Drain Commissioner's Office
Division of Water and Waste Services
Attn: Drain Commissioner
G-4610 Beecher Road
Flint, Michigan 48532

The Parties hereto shall have the right from time to time and at any time to change their respective addresses and each shall have the right to specify as its address any other address by at least fifteen (15) days written notice to the other party hereto.

14.11 Governing Law; Interpretation. This Agreement shall be construed in accordance with and governed by the laws of the State of Michigan. The Parties hereto (a) consent to the personal jurisdiction of the state courts located in Flint, Michigan or federal courts located in Southeastern Michigan in connection with any controversy related to this Agreement including, but not limited to, counterclaims or third party demands raised as a result of third party counterclaims initiated in any other jurisdiction; (b) waive any argument that venue in any such forum is not convenient; (c) agree that any litigation initiated by the County Agency or Flint in connection with this Agreement may be brought in either the state court located in Flint, Michigan or federal court located in Detroit, Michigan; and (d) agree that a final judgment in any such suit, action or proceeding shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by law.

14.12 No Third-Party Beneficiaries. This Agreement is not intended to confer upon any person or entity, other than the Parties hereto, any rights or remedies of any kind or nature whatsoever.

14.13 Freedom of Information Act Requests. Flint agrees that if it receives a request for any documents relating to this Agreement, including Freedom of Information Act requests, Flint shall forward a copy of the request to the County Agency.

The County Agency agrees that if it receives a request for any documents relating to this Agreement, including Freedom of Information Act requests, the County Agency shall forward a copy of the request to Flint.

14.14 Interpretation. For purposes of interpretation of this Agreement, neither the County Agency nor Flint shall be deemed to have been the drafter of this Agreement.

14.15 Negotiated Agreement. This Agreement has been prepared and negotiations have occurred in connection with said preparation pursuant to the joint efforts of the Parties. This Agreement therefore shall not be construed against any Party to this Agreement.

ARTICLE 15
INDEMNIFICATION/HOLD HARMLESS

If at any time while Flint is securing legal access to any property identified in Exhibit D a the Water Main malfunctions, leaks, or requires the County Agency to enter onto the property to repair the Water Main or perform another necessary service, and in the opinion of the County Agency the malfunction or leak may wait until access to the property is secured, Flint shall indemnify/hold harmless the County Agency for any water loss, damage, and/or environmental issues that may result from the malfunction or leak.

Any amount of water loss shall be determined by the County Agency with the assistance of Flint. The amount of loss shall be based on past experiences and practice. The County Agency shall invoice Flint for the total loss from the date the malfunction or leak was discovered until the repair has been completed. Flint shall timely pay the invoice pursuant to the terms stated in the invoice.

If the Water Main malfunction or leak requires immediate entry onto the property identified in Exhibit D, Flint shall provide all of the necessary resources necessary, including, but not limited to, an immediate payment for an easement, immediately filing an action for condemnation, or requesting a court of competent jurisdiction to provide a right of entry, to secure legal access to the property to repair any malfunction or leak.

It is expressly understood by the Parties hereto, that until such time as Flint secures access to the property identified in Exhibit D, Flint shall be responsible for any and all loss that is the result of a malfunction or break of the Water Main under the property identified in Exhibit D.

In Witness Whereof, the Parties hereto have executed this Agreement as of the date first above written.

May 2, 2014

Mr. Darnell Earley, ICMA-MC, MPA
Emergency Manager
City of Flint
1101 S. Saginaw Street
Flint, MI 48502

RE: Your letter of April 29, 2014 to Mr. Kevyn Orr

Mr. Earley,

I am in receipt of your letter of April 29, 2014 addressed to Detroit's Emergency Manager, Mr. Kevyn Orr. In that letter, you indicated that Flint stopped using DWSD water as of that date and that "City officials have closed multiple valves within our infrastructure so that our system is now completely isolated from DWSD infrastructure."

I am writing this letter to confirm the information discussed in a conference call with Deputy City Attorney, Mr. Anthony Chubb, and representatives of the Genesee County Drain Commissioner's Office on May 1, 2014. During that call, as we reviewed flow data from the DWSD FL-01 meter, it was acknowledged that Flint continued to use DWSD water through April 30, 2014. As a result, DWSD will bill the City of Flint for water usage through the end of April as opposed to the earlier date indicated within your letter.

Since that time, DWSD has worked with the Genesee County Drain Commissioner's Office to confirm the closure of valves associated with Flint's usage of DWSD water.

Should you have any questions regarding this matter, please do not hesitate to contact me.

Very Truly Yours,

Ottenwess, Taweel & Schenk, PLC

Matthew Schenk

A memo may still be helpful, as it sounds like the Treasurer will have to grant a waiver of competitive bidding. Typically, he requests a copy of the appraisal, contract, and a cover memo from the city with a brief synopsis of the deal & associated approval being requested.

Hope this helps!

I approached Ashley about the sufficiency of the F&O language. She took the matter to Fred, who determined that the mention in the Plan was enough. Ashley's and my correspondence is reproduced below for ease of review.

Drew

I agree with everything you've outlined below. You're correct that if there was no competitive bidding process the Treasurer's approval would still be needed. I'm curious as to why it wasn't bid out somehow though … maybe just too few buyers.

Anyhow, Fred and I spoke about this today and he agrees that the mention in the F&O plan, such as it is, is sufficient. After some discussion, we'd recommend a two-pronged approach going forward:

- Amend the PA 436 guidance document (the one I sent to you yesterday) to clarify that OFR expects to be kept up to date on projects mentioned in the F&O plan as they develop. This can be done via memo, meeting, or in the weekly calls that OFR has with the EMs. Absent such updates, OFR may still require separate approval under PA 436.

- If an EM is not willing to share information, or if they aren't as politically savvy as one may hope (to be clear, I don't think this is a problem with the current EMs, just thinking worst-case scenario), OFR may additionally require that the F&O plan be updated on a more regular basis to ensure that the necessary details are included therein.

I hope this is helpful. Thanks.

Ashley

We have the appraisal and there is only one possible buyer so a competitive process could not work. We just need to lay it out in the memo.

City of Flint Wednesday 9:00am Phone Conference Agenda
May 14, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FFD - MIOSHA citation update
   Chief Cox reports that everything is ok with the ventilation system and all the firefighters should be tested within two weeks.

   b) Public Safety Study – contract has been signed, approximately six months until final report received.

   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update - Rich, Baird, H. Hollins**

3) **Lawsuits – Status, Issues**
   a) Kincaid v City of Flint – see attachment.

   b) Retiree Lawsuit - Contact from plaintiffs' attorney? Status of E&Y "Ability to Pay" analysis?

4) **Financial Update**
   a) Budget was prepared and presented to Council on Wednesday, April 30. Department reviews by Council are now underway.

   b) Rep. Phil Phelps proposed a budget amendment which would send money to Flint for public safety. Phelps is proposing $5 million. On May 8th State Sen. Jim Ananich offered a proposal on the Senate floor to prevent police and fire layoffs in Flint. This was voted down.

   c) FPD is also investigating the potential for any waivers on the COPS grants – matches and/or retention.

   d) COF is implementing the 80/20 premium share and open enrollment is underway for both active employees and pre-65 retirees.

5) **City Council Update**
   a) Council and Mayor attended an Ethics and Parliamentary Procedure Training on May 7th. This training was provided by Michigan Municipal League.

b) Guidelines for handling disorderly conduct during Council or Committee meetings have been clarified for the Council President and for the FPD.

c) Finance and Administration budget committee meetings have been lengthy but are progressing. Committee has been meeting as a committee of the whole.

6) **Blue Ribbon Committee on Governance**
   a) BRC is now holding public workshops, one completed last week and two more are scheduled. Expect to complete final report in June.

7) **Water Issues**
   a) The City received written notification from the DEQ that no back-up water service contract is required. Notification has been made to DWSD.

   b) The Water Treatment Plant has been operating very well.

   c) Pipeline Sale to GCDC – status?

8) **Other Items**

1) Attachment – communication from P. Bade

CITY OF FLINT
LEGAL DEPARTMENT
MEMORANDUM

Confidential communications between Attorney and Client are privileged, and may not be disclosed without approval of the Law Department; furthermore all notes, opinions and impressions contained in this memorandum are considered confidential work product.

TO: Darnell Earley, Emergency Manager

FROM: Peter M. Bade, Chief Legal Officer

RE: Kincaid, Poole, et. al. v. City of Flint

DATE: May 12, 2014

There have been three (3) separate lawsuits filed by Plaintiffs, two in state court and the most recent in federal court, each alleging the City failed to follow its own ordinances when raising water and sewer rates. The Michigan Court of Appeals dismissed the initial claim.

In the second state court case, Genesee County Circuit Court Judge Richard Yuille granted summary disposition to the City based upon a motion arguing that, assuming arguendo the City did fail to follow its own ordinances, the EM ratified the rates thereafter pursuant to his statutory power, which rendered their argument moot. Plaintiffs' motion for reconsideration was denied. Plaintiffs have filed an appeal that is currently pending in the Michigan Court of Appeals.

On appeal, the Plaintiffs are asserting 1. That the grant of summary was inappropriate because Act 4 does not allow an EM to retroactively ratify prior actions, and 2. that Judge Yuille improperly relied upon an auditor's affidavit in granting motion in violation of C(8) (which allows only for reliance upon the pleadings). He is seeking remand for further proceedings.

We believe these claims are wholly without merit. Even if there was a period in which the rates charged were illegally set, there is no cause of action to recoup those funds (and even if there was, we'd pay the judgment by raising the water rates), and the reliance upon the affidavit is a mischaracterization of dicta in Judge Yuille's opinion.

Last week the City was served with the third lawsuit that was filed in federal court. The federal case essentially restates the state court claims. Plaintiffs brought suit under 42 USC 1983 alleging a protectable due process property interest in receiving water at a certain rate, the contours of which are defined by state and local law, and that they were deprived of that right. We've found no federal case that has recognized this type of action. We have a strong possibility of getting the case dismissed on qualified immunity grounds, as there was no "clearly established" constitutional right being violated here and Plaintiffs have pursued adequate state law remedies and thus far failed.

Pursuant to FRCP 6(b)(1)(A), we have requested Plaintiffs concur in a 12(b)(6) motion to dismiss and for costs. Among other grounds, the motion will assert qualified immunity; a Monell defense to municipal liability; the failure to allege a recognized constitutionally protected property interest; the failure to allege deprivation of any protected interest; the existence of an adequate state remedy barring 1983 relief; that the Michigan Constitution does not authorize claims for money damages; and that the federal court action has already been litigated in state court unsuccessfully barring 1983 relief and the doctrine of constitutional avoidance.

Emergency Manager Darnell Earley Statement on City Council's Rejection of Pipeline Sale Proposal

Flint, Michigan – May 19, 2014 – **Flint Emergency Manager Darnell Earley has released the following statement in regard to the Flint City Council's 7-2 rejection of the sale of the 9 mile segment of pipeline sought by the Genesee County Drain Commissioner:**

"I look forward to seeing the City Council's alternative proposal for the sale of this asset, as required by Public Act 436, which will net the city $3.9 million or more for an asset which is no longer necessary to the City of Flint but which gives the city more options in managing its $12.9 million deficit. City of Flint Wednesday 9:00am Phone Conference Agenda
May 28, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FFD - MIOSHA citation update
   Chief Cox reports that all pulmonary tests have been completed except 4-5 people on vacation. A wrap-up phone call between Chief Cox and MIOSHA rep will be held today.

   b) Public Safety Study – data collection has begun.

   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update - Rich, Baird, H. Hollins**

3) **Lawsuits – Status, Issues**
   a) Kincaid v City of Flint –

   b) Retiree Lawsuit – Our attorneys filed a motion Friday, May 23, 2014 asking Judge Tarnow to reverse his decision on the injunction which is resulting in the additional $5 million in expenses in the upcoming budget, offset by significant reductions in police and fire staffing. City Attorney Bade and J. Ambrose are advising not to make any announcement or statement on this action at this time. Should we be asked, a "no comment on pending litigation" would be appropriate. Until the Judge reacts, there is not much to say.

4) **Financial Update**
   a) All Finance Committee budget hearings have been completed. The Council has proposed a number of changes, primarily to keep several police positions.

   b) Five Year Financial Analysis – The City is preparing to adopt a biennial budget, yet the next three years continue to exhibit structural deficits. See attached 5 year projection. In April of 2015 the Mayor and Council can vote to remove the EM. A long term plan needs to be discussed.

5) **City Council Update**
   a) Guidelines for handling disorderly conduct during Council or Committee meetings have been clarified for the Council President and for the FPD. City Attorney Bade issued a memo on May 21, 2014 clarifying

EM Orders 8 and 10. These Orders specify the Council Meeting Protocol and Council Agenda format. Council members and the Council President have attempted to stray from these orders repeatedly.

b) Councilman Mays has been in court this week defending himself against charges from the wrong way driving incident in January 2014.

6) **Blue Ribbon Committee on Governance**
   a) BRC Public Workshops have been completed and crafting of the report to the EM is underway. A method to receive public feedback on the draft report is planned. The Committee's report, when completed, will be provided to the Transition Advisory Board for review with the Dept. of Treasury and the Governor before the City of flint is returned to home rule order.

7) **Water Issues**
   a) The City Council met twice to discuss the sale of a 9 mile section of unused pipeline to the GCDC. The City had negotiated a sale price of $3.9 million. Council first voted to reject the sale. A second meeting resulted in a vote to sell the pipe section for $3.9 million but receive the funds in two payments over two fiscal years. It is unknown if the City council made a submission of this proposal to the local emergency financial assistance loan board. Does Flint have Treasury's approval to execute the contract of sale?

8) **Other Items**

Attachment: Five Year Financial Projection

EMERGENCY MANAGER
CITY OF FLINT
GENESEE COUNTY MICHIGAN

ORDER No. 13

PROHIBITING COUNCILMAN ERIC MAYS FROM ACCESS TO LOCAL GOVERNMENT FACILITIES

BY THE POWER AND AUTHORITY VESTED IN THE EMERGENCY MANAGER ("EMERGENCY MANAGER") FOR THE CITY OF FLINT, MICHIGAN ("CITY") PURSUANT TO MICHIGAN'S PUBLIC ACT 436 OF 2012, LOCAL FINANCIAL STABILITY AND CHOICE ACT, ("PA 436"); DARNELL EARLEY, THE EMERGENCY MANAGER, ISSUES THE FOLLOWING ORDER:

Pursuant to Public Act 436, the Emergency Manager has broad powers in receivership to rectify the financial emergency and to assure the fiscal accountability of the City of Flint and its capacity to provide or cause to be provided necessary services essential to the public health, safety and welfare; and

Pursuant to Public Act 436, the Emergency Manager acts in place of local officials, specifically the Mayor and City Council, unless the Emergency Manager delegates specific authority; and

Pursuant to Public Act 436, the Emergency Manager has broad power to manage the local government, and may issue orders to elected and appointed officials necessary to accomplish the purpose of the act. An order issued under PA 436 is binding on the person to whom it is issued; and

Pursuant to Public Act 436, the Emergency Manager may prohibit a local elected official from access to the local government's office, facilities, electronic mail, and internal information systems for failure to abide by an order which disrupts the Emergency Manager's ability to manage the local government; and

Emergency Manager Order 3, Directives to Councilman Eric Mays, dated December 13, 2013, a copy of which is attached, attempted to address a pattern of extremely disruptive and disorderly behavior by Councilman Eric Mays that has interfered with my ability to manage the City of Flint; and

Councilman Mays has consistently disregarded and not carried out the provisions of Order 3, including but not limited to:

1. Engaging in loud, disruptive and obnoxious behavior during meetings of the Flint City Council.
2. Repeatedly disregarding directives of the Council President during meetings.
3. Continuing to speak after having been called to order by the Council President.
4. Repeatedly engaging in disorderly conduct that causes the Council President to seek police assistance in removing him from Council Chambers.
5. Openly refusing to comply with the Council President's efforts to restore order at meetings.
6. Openly advocating that the Emergency Manager orders be disregarded at meetings.
7. Interrupting other members of Council and speaking over them.
8. Speaking out of turn and speaking without being recognized by the Council President.
9. Engaging in disjointed, rambling and excessively long diatribes that unnecessarily delay Council action.
10. Inappropriately engaging members of the public during meetings.
11. Being verbally abusive toward staff, other Council members, Council leadership, and the Emergency Manager.

Emergency Manager Order 8, Council Meeting Protocol, dated March 5, 2014, a copy of which is attached, provides, in part, that "Council members shall not make comments during Council meetings, other than to respond to roll call or to respond directly to a request of the Council President, or at his recognition. When recognizing a member, the Council President shall limit comments, discussion or debate to a reasonable amount of time;" and

Councilman Mays has consistently disregarded and not carried out this provision of Order 8. He has repeatedly spoken at meetings without being recognized; refused to follow the directives of the Council President; ignored the Council President's efforts to call him to order; continued speaking after having been requested by the Council President to stop; and interfered with the Council President's efforts to conduct meetings in an orderly manner; and

Emergency Manager Order 8 and Emergency Manager Order 10, Council Meeting Agenda, dated April 1, 2014, copies of which are attached, seek to ensure that "the business of the City of Flint conducted at City Council meetings occurs in an orderly, dignified, and efficient manner, reflecting the level of professionalism deserved by Council members, City officials, staff and the public;" and

Councilman Eric Mays has consistently disregarded and not carried out this provision of Orders 8 and 10. Councilman Mays' behavior significantly undermines the orderly conduct of Council

meetings, and causes an undignified, inefficient and highly unprofessional atmosphere for conducting the important business of the City of Flint; and

Governance of the City of Flint is subject to extraordinary circumstances due to a financial emergency necessitating a response to Mr. Mays' disruptive behavior; and

Emergency Manager Orders 3, 8 and 10 are necessary to accomplish the purposes of Public Act 436; and

Councilman Mays' consistent refusal to abide by Order Nos. 3, 8, and 10 has substantially disrupted and interfered with my ability to manage the local government; and

Implementation of my financial and operating plan requires that Council function in a competent, professional and efficient manner, and that it properly address assignments; and

I have assigned important matters to Council, including review of the Fiscal Year 2015 budget; proposed ordinances and ordinance amendments; formation of multiple advisory committees; and have increasingly solicited their input regarding municipal affairs; and

It is my intention to increase the assignments to Council, with the expectation that Council will assume greater responsibility for duties mandated in the Flint City Charter, and allowing the City to move to a transition advisory board, as contemplated by MCL 141.1563; and

Councilman Mays' continuous disruptive behavior has significantly impaired Council's ability to address the assignments I have directed to that body, thereby disrupting my ability to manage the local government; and

Order No. 3 was issued as a progressive step in an attempt to persuade Councilman Mays to correct his behavior and participate as a member of Council in a professional, constructive and thoughtful manner, consistent with the purposes of Public Act 436; and

If allowed to continue, Councilman Mays' disruptive behavior will significantly undermine my efforts to address the financial emergency and to accomplish the purposes of Public Act 436; and

Based upon the above, Councilman Eric Mays is prohibited from access to Flint City Hall and all other City governmental office facilities, electronic mail, and internal information systems.

This Order is effective May 21, 2014.

This Order may be amended, modified, repealed or terminated by any subsequent order issued by the Emergency Manager.

MEMORANDUM

TO: Randall Byrne, State Administrative Manager
FROM: Darnell Earley, Emergency Manager
RE: Proceeds From the Sale of the City of Flint Water Main
Date: May 28, 2014
CC: Gerald Ambrose, Daugherty Johnson, Howard Croft, Peter Bade

During our regular meeting this morning you mentioned that there was an inquiry regarding the possible use of a portion of the $3.9 million proceeds that the City of Flint will receive from Genesee County, to supplement the cost for maintaining sworn positions in the Flint Police Department. As you know, in order to produce a balanced biennial budget as required by PA 436, my proposed budget eliminates 36 sworn officer positions for fiscal years 2014/15 and 2015/16.

I have discussed this matter with staff, and as a practical matter will not be recommending the use of these proceeds for any purpose other than reinvestment into the City's water system for the following reasons:

1. The pipeline is clearly part of the infrastructure of the water and sewer system, paid for with water and sewer fees. Thus, the proceeds should in normal circumstances be returned to the water and sewer system.

2. In addition, the current state of the water and sewer infrastructure clearly demonstrates that significant reinvestment in that infrastructure is needed, in the amount of approximately $15 million annually. The recent analysis by the Raftelis Group substantiates this need, as does the number of repairs necessary to the infrastructure this past winter, and the demonstrated increase in the amount of unbilled water. By focusing the proceeds on the systems water loss issues such as metering and infrastructure, the City stands to receive a quick return on the reinvestment through the capture of lost revenue.

3. The City of Flint Water Reliability Study commissioned in 2013 projects that increased accuracy in metering and reducing the number of main breaks through infrastructure repairs could result in recovering as much as $3 million

annually to the Water and Sewer Fund. This is an initiative that we are pursuing in hopes of further stabilizing water and sewer rates.

4. Also, the decision to move to KWA, as well as the opportunity to discontinue the purchase of water from DWSD, required an immediate and unplanned $6 million - $8 million upgrade to the Water Treatment Plant in this fiscal year. Doing so, while financially beneficial to the system over the next few years, required postponing other needed capital improvements. The sale of the pipeline offsets the unexpected cost by half.

5. Finally, the use of one-time proceeds for ongoing operational purposes, whether for the water and sewer system, or for non- utility purposes (such as police), only works for one year. Use of one-time proceeds is not a sustainable revenue source, and does not address the long term funding needs for police.

While these factors in and of themselves present a compelling argument to place the proceeds in the Water Fund to reduce the cost of expanding the Water Treatment Plant and to meet the our new supply and distribution obligations going forward, just as important is the outcome of the data-driven, comprehensive public safety study currently underway. The study will be used to design a public safety model for police and fire services into the future. This will put the City in a better position to identify long-term solutions rather than short-term, as the suggestion for the use of these funds for public safety services would indicate, based upon the factors stated above.

Should you have any questions or would like to discuss this matter in greater detail, please don't hesitate to contact me.

1. INTRODUCTION

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer performed an analysis of the water supply options being considered by the City of Flint. The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining any potential risk and the best course going forward for supplying potable water to the City of Flint.

Report Organization

The following sections of this report are described below:

Section 2 – The basis of the analysis is described in this section. The options include the KWA option and several options offered by DWSD.

Section 3 – A significant amount of information and data was collected including memorandums, reports, drawings, financial reports, and other documents. This section summarizes the information used in the analysis.

Section 4 – This section describes the evaluation of the cost of supply for the Flint options. The costs are comprised of the initial cost of operations plus the annual rate of escalation/inflation.

Section 5 – The evaluation process used to analyze the construction costs associated with the KWA supply system is described in this section. Additionally, the cost of financing the capital requirements is described.

Section 6 – This section presents the financial review of the options considered to supply potable water to Flint. A summary of these options is also provided.

Section 7 – In addition to the financial analysis other considerations were identified that should be considered in understanding the risks and determining the best option to supply Flint. They include items related to cost, redundancy and reliability, and Flint's ability to control their future cost of water supply.

2. FLINT WATER SUPPLY OPTIONS

Two water purveyor options were evaluated; the KWA water supply system and continued supply from DWSD. Both suppliers would provide water from Lake Huron as the source. The KWA system is a raw water supply, which means that the water would have to be treated by Flint before distributing the potable water to its customers. The DWSD supply is potable or "finished" water and would not need additional treatment.

Additionally, an option for the Flint WTP to supply the City of Flint without being supplied from either DWSD or KWA was initially considered. The preliminary investigation evaluated the cost associated with the required improvements to the plant and to the Flint River dam system. Although it appeared that this was a viable option, Flint in a meeting on December 20, 2012 with the Treasury, stated that the City did not want to pursue the option and it is no longer being considered.

Karegnondi Water Authority (KWA) Lake Huron Water Supply

The KWA water supply system schematic is shown in Figure 2-1. The system is comprised of an intake in Lake Huron that supplies water to the Lake Huron Pump Station (LHPS). The LHPS lifts the water and pumps it through an approximately 22 mile long 60-inch pipeline. The pipeline terminates at a 5 MG reservoir and is then pumped from the Intermediate Pump Station (IPS) through approximately 26 miles of 60-inch and 18 miles of 30-inch pipeline to the existing Flint WTP. Downstream of the IPS, approximately half way to the Flint WTP, the 60-inch line would also supply a new Genesee County WTP.

The raw water transmission system has a 60 MGD capacity and is sized to deliver a maximum of 18 MGD to the Flint WTP with an average day supply of 12 MGD. Improvements at the Flint WTP would also be required to treat the lake water as the plant is currently designed to treat the Flint River water.

The term of the KWA contract for Flint is 40 years.

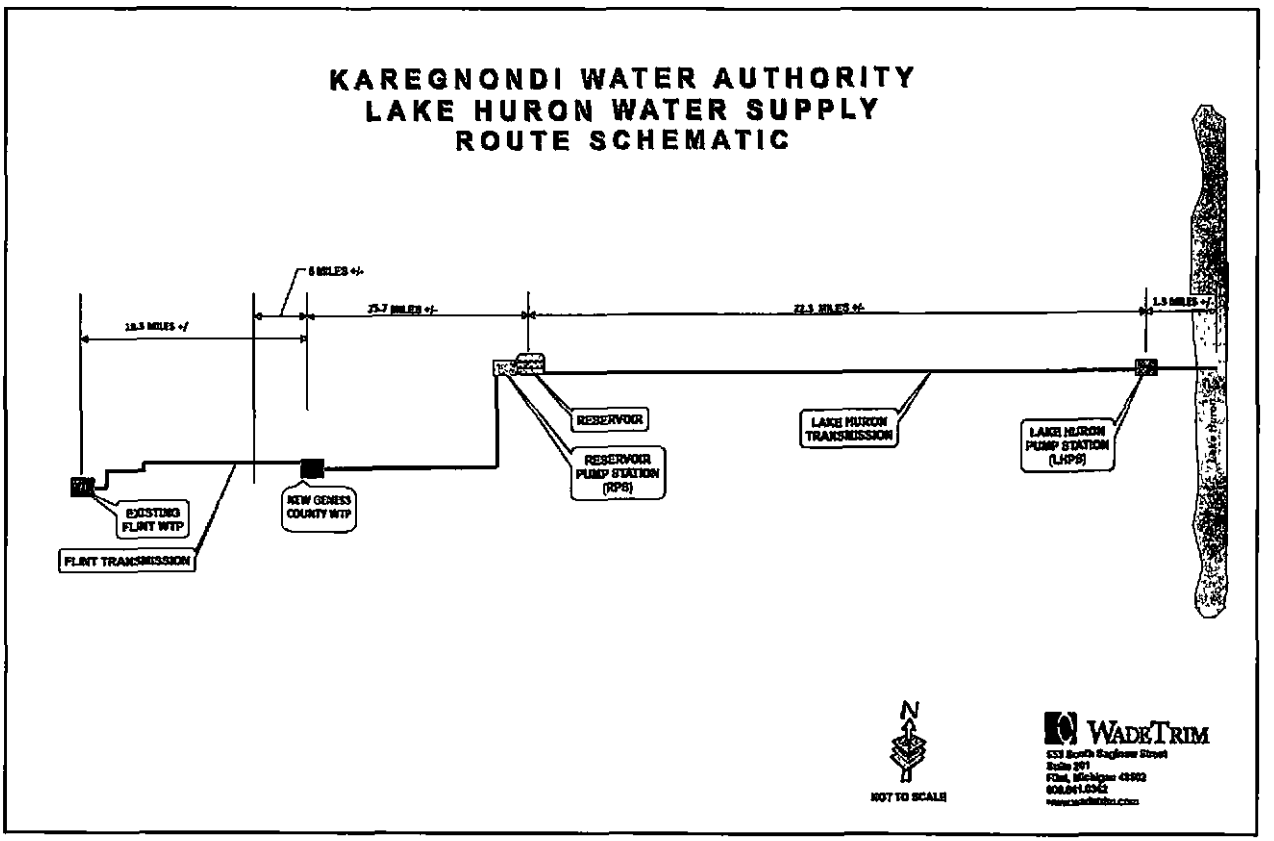

Figure 2-1: KWA Raw Water System

DWSD Water System

The DWSD system schematic is shown in Figure 2-2. Flint is currently supplied by DWSD at Master Meter FL-1, located at Potter and Baxter. Flint typically gets its water from the Lake Huron WTP, located in Fort Gratiot, Michigan; near the Lake Huron shoreline. Water is treated and pumped at the Lake Huron WTP and supplied through a 120-inch pipeline to an intermediate pump station called the Imlay Pump Station. The Imlay Pump Station has 20 MG of reservoir capacity. Depending on the time of year and the DWSD system demand, water is either bypassed directly to Flint or it is re-pumped at Imlay. It should be noted that the DWSD supply to Flint is part of a very large water system and during emergencies or outages water can be supplied from the south up to Flint in lieu of the Lake Huron facility.

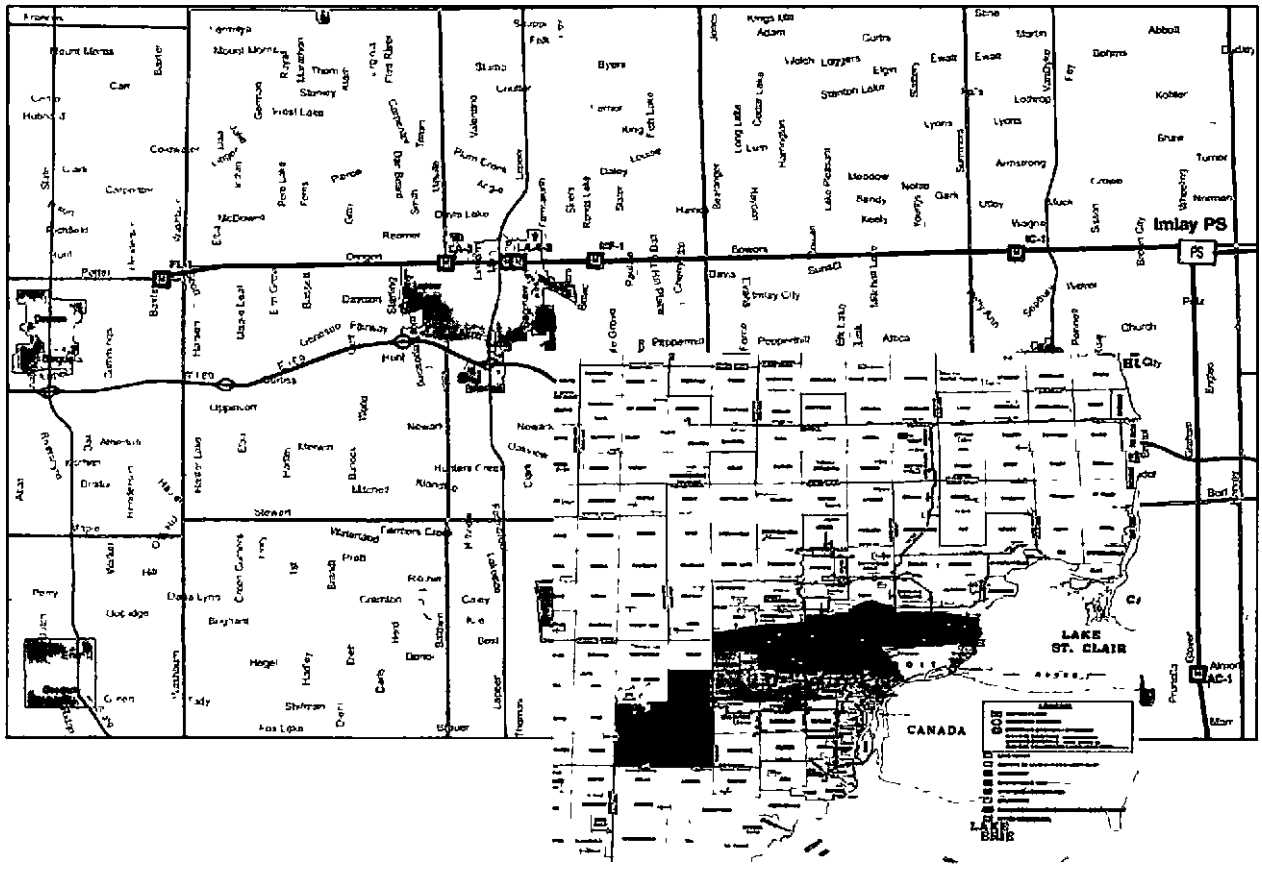

Figure 2-2: DWSD Water System

The pipeline from Imlay to FL-1 is a 72-inch pipeline. It has been estimated that the 72-inch line serving Flint has a capacity in excess of 90 MGD.

DWSD has presented several contractual options to Flint and all of them are based on Flint signing a new 30 year contract. The options shown in Table 2-1 are based on two different supply points; one at the current master meter location FL-1 at Potter and Baxter (P&B) and the other at the location of the Imlay Pump Station. The reason for the varying options is to provide a lower water rate at the Imlay Station, since the DWSD rate formula is based on distance and elevation factors related to the supply location.

The rates are also dependent on the maximum amount of water DWSD supplies. As example, if DWSD supplies a maximum day demand of 18 MGD that would equal the entire amount of water required by Flint.

For the options less than the maximum of 18 MGD means that the Flint WTP would supplement the difference by supplying water treated from the Flint River. These options are known as "blending" and would allow for Flint to blend two sources of water to supply its customers; the Flint River using the Flint WTP and Lake Huron from DWSD system.

Description	Average Day Demand
18 MGD Maximum Day Customer – FL-1	12 MGD
12 MGD Maximum Day Customer – FL-1	8 MGD
8 MGD Maximum Day Customer – FL-1	8 MGD
12 MGD Maximum Day Customer - Imlay	12 MGD
8 MGD Maximum Day Customer - Imlay	12 MGD

Table 2-1: DWSD Supply Options

3. DATA COLLECTION

During the course of the investigation several documents were used to perform the analysis. The names of the documents are listed below for reference.

KWA and Flint

- Preliminary Engineering Report, Lake Huron Water Supply Karegnondi Water Authority, September 2009;
- Analysis of the Flint River as a Permanent Water Supply for the City of Flint, July 2011;
- Cost Comparison, KWA vs. DWSD, Letter to Mr. Kurtz, October 31, 2012;
- Lake Huron Supply Study, KWA, Appendix 20, October 2012 Preliminary Report Update, Final Report (DRAFT), October 4, 2012;
- Articles of Incorporation of Karegnondi Water Authority, endorsed in 2010;
- Karegnondi Water Authority Bylaws, October 26, 2010;
- KWA Raw Water Supply Contract;
- Flint WTP Statement of Revenues and Expenditures 09' – 12';
- GCDC Division of Water and Waste Services Financial Statements 03' – 11'; and
- Assorted emails with further clarification of questions and documentation.

DWSD

- Historical Rates and Charges to Flint 04' – 13';
- Historical Rates and Charges to Flint with Hypothetical Model Contract 10' – 13';
- 2013 Rates and Charges for the following options:
  - 18 MGD Maximum Day Customer at FL-1;
  - 12 MGD Maximum Day Customer at FL-1 (Flint blending*);
  - 8 MGD Maximum Day Customer at FL-1 (Flint blending*);
  - 12 MGD Maximum Day Customer at Imlay (Flint blending*);
  - 8 MGD Maximum Day Customer at Imlay (Flint blending*); and
- Assorted emails with further clarification of questions and documentation.

* Flint blending based on DWSD supplying two-thirds and Flint one-third of 12 MGD average day demand.

Two meetings were also held; one with DWSD and one with Flint and Genesee County representing KWA. The meetings were held on November 19, 2012 and November 20, 2012, respectively. Minutes from these meetings are included in Appendix A.

4. COST OF SERVICE

Information provided by DWSD, Flint, and representatives of the KWA were used in the cost of service evaluation. To evaluate the annual escalation/inflation rate over the planning period, the rate adjustment for DWSD was estimated based on the recent rate adjustment history. For the KWA system both the estimated cost of operations when the system begins supplying water and the annual rate adjustment or inflation was evaluated. The existing cost of operations and escalation for the Flint WTP was based on actual costs provided and then adjusted depending on the scenario considered. This section describes the evaluation process and the rates used in the analysis.

DWSD Water Supply

The City of Flint has been a customer of DWSD since 1967. The Flint WTP has been maintained as a backup to the DWSD system. As indicated previously, several options were provided by DWSD depending on the type of service Flint was to select. The unit cost of water for each of these options is shown in Table 4-1. These rates are based on DWSD's FY13, which are current until July 2013.

Description	Average Day Demand (MGD)	Unit Rate ($/MCF)
18 MGD Maximum Day Customer – FL-1	12	16.37
12 MGD Maximum Day Customer – FL-1	8	16.31
8 MGD Maximum Day Customer – FL-1	8	12.68
12 MGD Maximum Day Customer - Imlay	12	14.38
8 MGD Maximum Day Customer - Imlay	12	11.11

Table 4-1: Cost of DWSD Supply Options

To determine annual escalation rate, DWSD's last 10 years of history was used along with other large urban water systems in Michigan. The water systems used for benchmarking comparison were: Lansing, Grand Rapids, and Saginaw.

Table 4-2 identifies the annual and average rate of increase to Flint based on supplying water either to the current FL-1 at Potter and Baxter or Imlay. Note the last three years of the rates (FY 2011 through FY 2013) assumes that Flint's cost would be based on the new 30 year contract; FY 2011 being the first year that the new contract was available.

Fiscal Year	Average Unit Cost ($/MCF)	Annual Change (%)
2004	11.06	
2005	10.24	-7.4
2006	10.56	3.1
2007	11.09	5.0
2008	11.35	2.3
2009	13.07	15.2
2010	11.73	-10.3
2011	13.89	18.4
2012	15.08	8.6
2013	16.24	7.7
Average		4.4%

From FL-1

Fiscal Year	Average Unit Cost ($/MCF)	Annual Change (%)
2004	11.06	
2005	10.24	-7.4
2006	10.56	3.1
2007	11.09	5.0
2008	11.35	2.3
2009	13.07	15.2
2010	11.16	-14.6
2011	12.23	9.6
2012	13.28	8.6
2013	14.32	7.8
Average		2.9%

From Imlay

Table 4-2: Recent DWSD Water Rates

Audited financial reports were used to determine the rate of inflation associated with other three large municipal systems. The results are shown in Table 4-3.

Water Systems	Years Evaluated	Average Rate (%)
Lansing	05'-12'	4.6
Grand Rapids	04'-11'	1.6
Saginaw	04'-11'	7.0

Table 4-3: O&M Inflation Rates of Other Large Water Systems

Based on the information analyzed from DWSD and the other communities, it was determined that a fair annual rate of inflation for operations and maintenance cost for the analysis should be 4.4%. The 4.4% has historical significance from Flint's current water supplier and falls within the range of the other communities.

KWA Water Supply

The initial projected O&M cost for the KWA supply would be comprised of KWA's O&M costs as well as Flint's O&M costs. Because there was limited information provided, the initial estimated rate of $1.50/MCF was used. This rate is based on information from the cost comparison analysis attached to the letter to Mr. Kurtz, dated October 31, 2012.

The KWA cost evaluation used an annual O&M inflation rate of 5%. To validate this rate a similar analysis to DWSD's operations and maintenance annual rate of inflation was used. First, in discussions with Flint and the Genesee County Drain Commission (GCDC), they believed that the annual rate of inflation for the new KWA system would be similar to the GCDC Water & Waste Services (WWS). Additionally, two large transmission systems were used to benchmark the inflation rates: the Southeastern Oakland County Water Authority (SOCWA) and the Ypsilanti Utility Community Authority (YUCA). Although both of these systems transmit finished water opposed to raw water, they were considered similar enough for comparison as they are comprised of only large water mains, pumping facilities and storage.

Once again audited financial statements were used to calculate the inflation rates. A summary of the findings are shown in Table 4-4. Based on the fact that the information analyzed showed a large difference between the two systems, it was determined that the KWA assumption of 5% was a good rate of inflation to use in the financial analysis. This rate is almost equally between the GCDC rate and the other two transmission systems.

Systems	Years Evaluated	Average Rate (%)
GCDC WWS	03' – 11'	10.5
SOCWA	04'-12'	--
YUCA	04'-12'	0.7

Table 4-4: O&M Inflation Rates of Other Comparable Systems to KWA

Flint WTP

The Flint WTP currently serves as a backup supply to the DWSD service to Flint. To maintain backup operations, the City of Flint operates the plant approximately 20 days each year. Flint indicated that the average production rate when they operate is 11 MGD.

For the blending options and the KWA supply considered, Flint would be required to operate its plant all year around. Therefore, their operating and maintenance costs were evaluated and adjusted to determine an annual cost associated with year-round operations.

The Flint WTP provided three years of operating costs for the assessment. Additionally, reports listed in Section 3 were also used as reference to determine both operating costs for the plant processing Flint River water (blending options) and Lake Huron raw water (KWA option).

Major cost centers were analyzed to estimate annual operation and maintenance. They included: labor, utilities, chemicals and residual management. In general, as recommended by the Flint plant staff, labor and overhead were increased from the current costs by two-thirds. Additionally, variable costs for power, chemicals and residual cost were increased to estimate full time treatment at the Flint WTP. Data from the KWA Preliminary Report and annual operating data for the Flint WTP (provided separately) were analyzed to make these forecasts.

The annual operating and maintenance costs developed for Flint WTP used are shown in Table 4-5.

Source of Supply	Average Daily Production (MGD)	Estimated Annual O&M Cost
Flint River (Blending with DWSD)	4	$5,895,097
Lake Huron (Supplied by KWA)	12	$7,913,118

Table 4-5: FY 13 O&M Costs for Year-round Operations

It was determined that a fair annual rate of inflation for operations and maintenance cost for the Flint WTP plant should be 4.51%. The 4.51% is an average of Lansing, Grand Rapids and Saginaw facilities.

.

5. CAPITAL REQUIREMENTS

Large capital investments would be required by Flint and GCDC to construct the KWA supply system. Furthermore, some of the options presented by DWSD (supply point from Imlay) would require the purchase by Flint of DWSD's 72-inch water main. Performing the financial analysis; therefore, required an analysis of the KWA construction cost estimate for the transmission system and Flint WTP improvements.

Revenue bonds were also identified as the source of financing the new supply system and associated improvements. This section describes the assumptions made and the interest used for financing the improvements.

KWA Supply System

The most current cost estimate of the KWA system was presented in the document titled; Lake Huron Supply Study, KWA, Appendix 20, October 2012 Preliminary Report Update, Final Report (DRAFT), October 4, 2012. The cost of construction is estimated at $272,421,558. Flint's portion would be 30% or $81,726,467.

Due to the significance of this expenditure, a detailed review of the cost was performed and is presented in this section. The analysis was performed based on the main elements of the supply system: the lake intake, the two pumping stations, and the transmission pipeline. Additionally, an analysis was performed related to construction contingencies and other costs such as engineering, legal, and administration.

Lake Intake

KWA representatives indicated in a meeting in November that the design documents for the intake were at 90% and that it was planned for advertisement in January 2013. A summary of the estimate is shown in Table 5-1.

Description	Estimate
Intake and Crib	$22,076,850
ELAC at 25%	5,519,213
Property	2,300,000
Total	**$29,896,063**

Table 5-1: KWA Intake Cost Estimate

Based on the evaluation, it appeared that the cost estimate was reasonable. Given that the design was nearly complete, the engineering, legal, administration, and construction contingencies (ELAC) at 25% were also found to be appropriate.

Pumping Stations

KWA representatives indicated that the pump stations were estimated at a level of design less than 15%. Therefore, in addition to an evaluation of their cost estimate, other water pumping station costs were used for comparison. Additionally, contractors were also contacted for costs. Table 5-2 summarizes the KWA cost estimate compared to our cost estimate performed for the Treasury.

Description	KWA	Estimate	TYJT	Estimate
Pumping Stations		$24,618,080		$54,573,314
Land for Intermediate Pump Station and Reservoir		–		75,000
Subtotal		$24,618,080		$54,648,314
ELAC for Construction	25%	6,154,520	30%	16,394,494
Total		**$30,772,600**		**$71,042,808**

Table 5-2: Pumping Stations Cost Estimate

Two things to note regarding the difference in the cost estimates; firstly, there is a large difference in the cost estimates of the pumping stations. The estimate developed for the Treasury used several other pumping stations construction costs from Southeastern Michigan and discussions with contractors. These costs were then computed on a $/MG's for comparison.

Secondly, our estimate for the Treasury is based on an ELAC of 30% instead of KWA's 25%. Although 25% was acceptable for the intake, it is believed to be too low for the pumping station estimate given that the engineering effort is less than 15%.

Transmission Main

Although the specific route for the transmission main was not provided, an estimate was calculated based on the general information provided. Once again, the KWA estimate was based on a level of design less than 15%. The estimate performed for the Treasury used the line items provided by KWA for the pipeline and also consulted with contractors to evaluate the cost of construction. The comparison is shown in Table 5-3.

Although the cost of construction of the pipeline is similar, a value of 30% was used for ELAC due to the level of design. Additionally, KWA did not believe there would be any additional costs for easements; however, this did not seem practical. Therefore an estimate for acquiring the easements was added to the Treasury estimate and is based on the 277 easements identified by KWA. The cost shown includes surveying, legal, engineering, administration, etc.

Description	KWA	Estimate	TYJT	Estimate
Transmission Mains		$166,202,316		$167,419,530
ELAC for Construction	25%	41,550,579	30%	50,225,859
Subtotal		$207,752,895		$217,645,389
Easements		–		1,166,170
Total		**$207,752,895**		**$218,811,559**

Table 5-3: Transmission Pipeline Cost Estimate

Other KWA Costs

In prior estimates of the construction cost, KWA used an ELAC of 37%. In this case it could be considered that the engineering effort associated with the design would have been included. However, it is believed that KWA's reduced ELAC of 25%, does not include the design effort. Additionally, it would be prudent to assume that the owner would want a construction manager during construction of this large project. A summary of these costs are shown in Table 5-4.

Description	Estimate
Design Engineering for Pumping Stations and the Transmission Pipeline	$16,939,581
Construction Management at 5%of Project Cost Estimate of $217,645,389	14,434,609
Administration	349,440
Legal, Easements, Contract Documents	831,000
Total	**$32,554,630**

Table 5-4: Other Costs

Summary Comparison

A summary of the two cost estimates are shown in Table 5-5. Based on the comparison, the estimate performed by TYJT shows a higher cost to Flint by approximately $25,000,000.

Note that there are two other costs shown in the summary that were not previously addressed; power and backup power. Regarding the cost of providing power to the pumping facilities, the cost of $4,000,000 appears reasonable.

The KWA has repeatedly indicated that backup power is not needed. Backup power is a standard practice in the water industry. Furthermore, a loss of power at either pumping facility will prevent the supply of water to both Flint and Genesee County. For these reasons, the cost of providing backup power was included in our estimate for the Treasury.

Description	KWA Estimate	TYJT Estimate
Intake/Crib	$ 27,596,063	$ 27,596,063
Pump Stations	30,772,600	71,042,808
Transmission Mains	207,752,895	217,645,389
Power	4,000,000	4,000,000
Redundant Power for PS		1,273,200
Land for Lake Huron Pumping Station	2,300,000	2,300,000
Design Engineering/PS and Transmission		16,939,581
Construction Management		14,434,410
Administration		349,440
Legal/Easement/Contract Documents		831,000
Easements		1,166,170
Total	**$ 272,421,558**	**$ 357,578,060**
Flint Share at 30%	**$81,726,467**	**$107,273,418**

Table 5-5: Total Cost Comparison

Flint WTP Improvements

The KWA analysis identified capital costs required to convert the existing WTP from river water treatment to treating lake water. The cost estimate was identified as $7,100,000 in the 2009 report. This number was used in the our analysis, since additional information was not provided. For the purpose of the financial analysis; however, the $7,100,000 was increased by 3% each year for three years to account for inflation.

DWSD Imlay Station Supply Options

The options identified by DWSD to supply service to Flint at the Imlay Pump Station would require Flint to purchase the 72-inch water main from Imlay to Master Meter, FL-1. The pipeline is approximately 25 miles long. The estimated cost provided by DWSD for estimating purposes is $4,700,000.

Financing

The cost of financing the revenue bonds for the capital work was investigated. Based on conversations with local financial advisors knowledgeable in bond financing, an interest rate of 5% for the 25 year

period was considered acceptable. This is based on a Standard and Poor's bond rating of A without insurance.

Additional costs associated with the bond include the reserve and bond issuance fee. The bond holders will require a reserve of approximately 10% of the loan to be held for the 25 year payment period. The cost associated with the bond issuance has been estimated at 2.25% of the principal borrowed for the KWA project and 3% for the smaller loan associated with the Flint WTP improvements or the purchase of the 72-inch main.

Furthermore, since no revenue will be generated to pay on the bonds for the first three years that the system is being constructed, the cost associated with capitalizing the interest was also included.

Finally, interest on the reserve will be provided back to KWA and Flint. Although the interest is currently less than 1%, it was determined that a 3% rate would be more prudent long-term.

6. FINDINGS

Using the information described in the previous sections, a cost evaluation was conducted for the KWA supply and the DWSD options. Individual worksheets for each option are provided in Appendix B. For the purpose of comparison a 30 year period was used. This period includes the 3 year construction period, the 25 loan period and an additional two years to get a sense of the cost of operation after the loans have been paid.

There were three separate cost sheets prepared for the KWA option. The first cost sheet (KWA) is based on the cost estimate provided by KWA. The costs provided assumed no overruns or delay in construction. With KWA's own assumptions of an overrun in construction of 15% and a one year delay in operations, the KWA estimated cost becomes $686,375,920 through Year 2042.

Since this cost estimate did not appear to include the financing of revenue bonds, another cost sheet (KWA-1) was developed that included KWA's cost estimate without overruns with the additional finance costs associated with the revenue bonds. A final cost sheet (KWA-2) includes the cost associated with the revenue bonds based on the estimate provided by TYJT for the Treasury.

A summary of the cost sheets provided in Appendix B are shown in Table 6-1. Figure 6-1 shows the cumulative annual costs associated with each option.

Option	Costs through 2042 ($)	Ranking by Cost
DWSD 8 MGD Maximum Day at Imlay Station	634,795,488	1
KWA *(10/31/12 No Overruns, As Provided)**	649,775,166	2
DWSD 8 MGD Maximum Day at FL-1	672,671,705	3
KWA-1 *(10/31/12 No Overruns with Cost of Financing)*	707,279,715	4
DWSD 12 MGD Maximum Day at Imlay Station	725,576,803	5
DWSD 12 MGD Maximum Day at FL-1	762,110,308	6
KWA-2 *(Treasury Estimate)*	766,784,313	7
DWSD 18 MGD Maximum Day at FL-1	821,226,268	8

* $686,375,920 with 15% overrun in construction and a one year delay in operations

Table 6-1: Total Cost of Options through 2042

Based on the analysis, it is prudent to assume the KWA water supply option costs would be somewhere between the KWA-1 and KWA-2 options. Therefore, the analysis indicates that the two DWSD options of supplying 8 MGD on a maximum day and up to 8 MGD on average are the least cost options for Flint. These options allow Flint to maximize the use of existing assets; the City of Flint's (the Flint WTP) and DWSD's (the existing 72-inch main).

Additionally, in recent conversations with the Treasury another option was discussed that could potentially be the most cost-effective solution. Currently the Flint WTP serves as a backup if service is

lost through either the DWSD or KWA pipeline. If the a twin pipe paralleling the DWSD 72-inch water main were constructed with interconnects with the 72-inch line, then the new water main could serve as the backup to Flint and the Flint WTP could be abandoned or potentially sold to Genesee County for their use.

The construction of the parallel pipeline would be considered in the DWSD capital expenditure as a Common to All (CTA) cost. This means that the capital cost of the pipeline would be shared by all DWSD customers and not just by Flint. Preliminary analysis of this option appears to be the most cost-effective of all the options discussed. However, a more thorough cost analysis is warranted and this approach would require an agreement between Flint and DWSD.

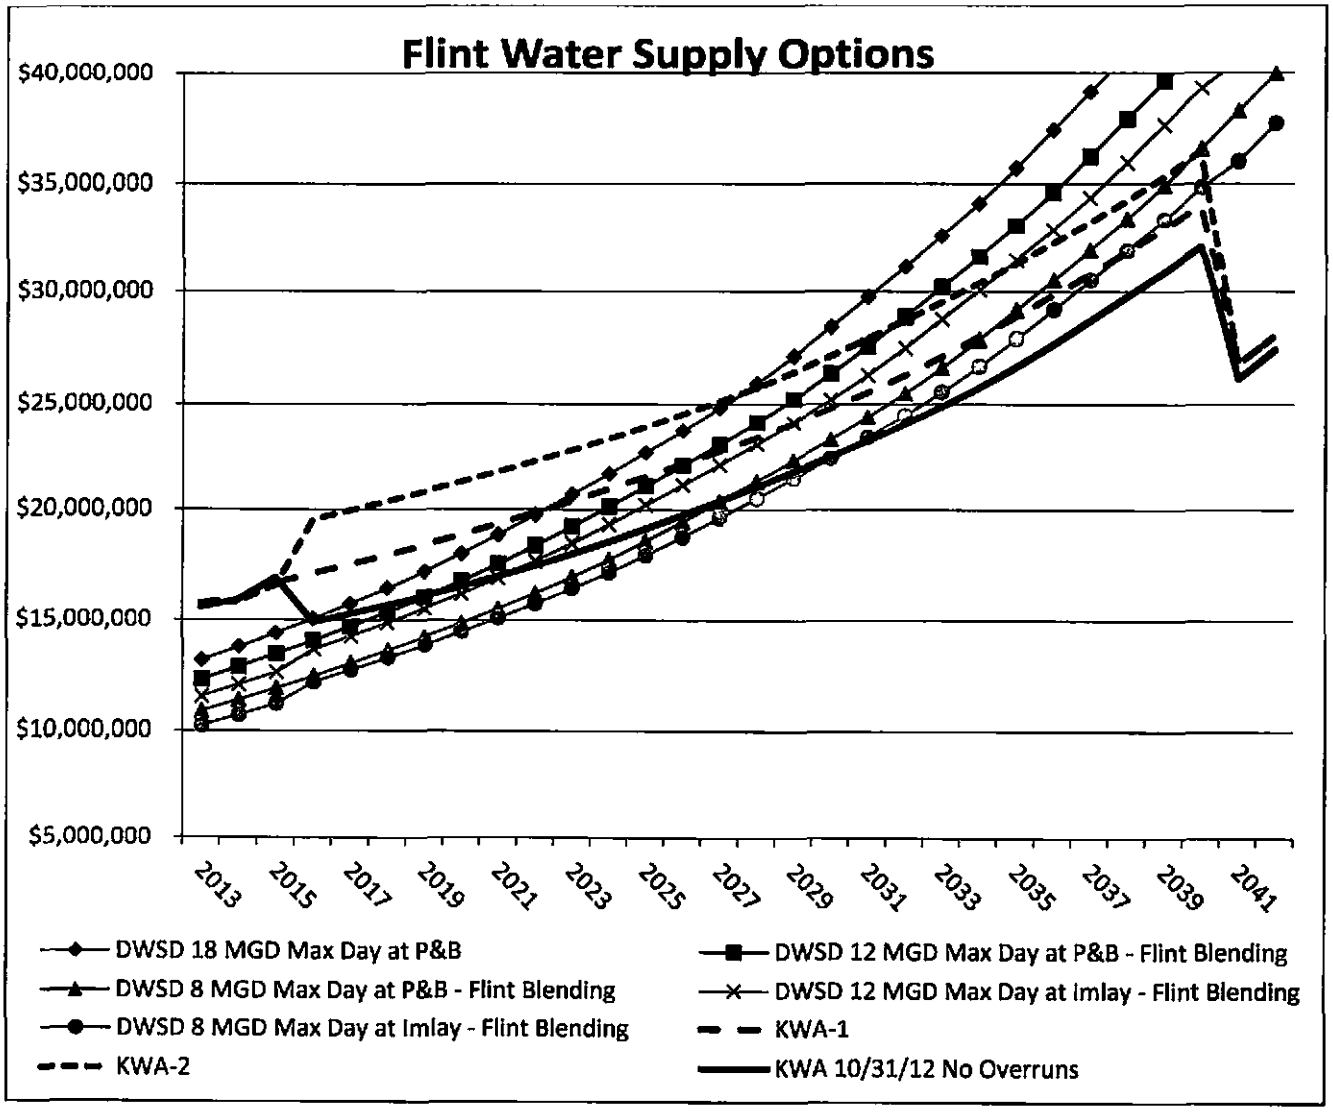

Figure 6-1: Flint Water Supply Options through 2042

7. OTHER CONSIDERATIONS

As part of the investigation other issues were identified that may result in risks to Flint that should be considered by the Treasury in determining how Flint's potable water should be supplied. These issues are related to redundancy and reliability, other items affecting cost, and Flint's desire to control its own destiny related to its water supply. These are described further below.

Redundancy/Reliability

In one of the first meetings related to this task assessment, which was held on November 1, 2012, the Genesee County Drain Commissioner, Mr. Jeff Wright, stated that one of the main reasons for pursuing the KWA supply option related to the lack of reliability of the DWSD system. He pointed to the Northeast blackout of 2003; a widespread power outage that occurred throughout parts of the Northeastern and Midwestern United States and Ontario, Canada, on Thursday, August 14, 2003. He stated that Flint and Genesee County were out of water for several days.

It is worth noting that this was a power outage of historic proportions that affected millions of Americans. However, DWSD did begin supplying water again relatively quickly in comparison to other major cities impacted by the same power outage.

Furthermore, the KWA supply system offers less redundancy to Flint than the current DWSD system. Under both options, Flint is supplied by a single pipeline; however, DWSD has backup power at all of its major facilities supplying Flint. The KWA system will not have a redundant power at its pumping facilities. This would be a major risk.

Currently, backup to the DWSD system for Flint is Flint's WTP using the Flint River as the source of supply. KWA has stated that the Flint River source would also be used as backup to Flint if the KWA supply through its pipeline was lost. However, since the Flint WTP would be upgraded to treat Lake Huron water under the KWA option, using the Flint River as a backup source would require the Flint WTP to maintain two process treatment streams.

In addition to Flint and Genesee County, the DWSD's 72-inch main supplies Imlay City, Mayfield and the Greater Lapeer County Utilities Authority (GLCUA). The volume of water contained within the 72-inch main is approximately 30 MG. Only supplying these three remaining communities would cause the water age to increase dramatically; somewhere in excess of three weeks old, before reaching the customers' master meters. Since the half-life of chlorine in the DWSD system is approximately 5 days, the chlorine would most probably be near zero requiring re-chlorination of the finished water upstream of the master meters.

Re-chlorinating is a costly and risky process due to the instability of chlorine gas. It is unknown whether DWSD would pursue this improvement or possibly abandoned the 72-inch pipeline.

If Flint is supplied by the KWA system, then DWSD supplying their other customers along the 72-inch water main may be reconsidered. Since the KWA system is a raw water supply, the communities would

either have to build a treatment facility to treat the water from KWA or find another water source for their communities.

Additional Cost and Risk Considerations

The design of the KWA supply and the construction of the system have not been completed; therefore, final costs and time to complete are unknown. Cost overruns and delays in completion will both negatively impact Flint's final cost. As example, if the project is not completed within the three year period, payment on the bonds will be due, but the revenue source needed from the sale of water could not be provided.

Furthermore, there is always a risk with large water system construction; especially those including an intake in the Great Lakes, pumping stations and rehabilitation of older water treatment plants. These risks include the potential of explosive gases in tunneling below Lake Huron, changing site conditions associated with the large number of miles of pipe installation and rehabilitating an older WTP, and the startup and debugging of the entire pumping system.

Flint has indicated that they have a high water loss. Not addressing this issue prior to sizing the Flint supply pipeline from KWA could cause the water main to be oversized along with its incremental cost in construction.

Also, the KWA supply option appears to run counter to the Treasury's Competitive Grant Assistance Program (Formerly EVIP Grant). This program has been put in place to allow for communities to consolidate their services and save money. Two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (GLCUA, Mayfield, Imlay City) separating to from another water system is in contradiction to the program.

Finally, there is a concern over the ability of smaller systems (KWA) over larger systems (DWSD) to pay for future unfunded mandates and regulations. Obviously, identifying regulation requirements over 30 years is hard to determine. However, it is widely accepted that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base.

Flint's Autonomy

Flint has indicated that a major point of consideration is that they have no control over the rate increases issued to Flint by DWSD. All other counties supplied by DWSD have representatives on the Board of Water Commissioners (BOWC). The BOWC is one of the governing bodies that approve the water rates. Since Flint and Genesee County do not have a representative on the BOWC, Flint believes they are held "hostage" to DWSD's rates and cost of service.

This issue was stated in Flint's handout at the November 1, 2012 meeting. The handout is titled, "Flint Water Supply Future." However, it is worth noting in the same handout, Flint also identifies similar concerns with the governing board of the KWA system. Notably, that although Flint and Genesee County will be the only customers and Flint will be responsible for 30 percent of the construction cost,

they will have a minority vote on the KWA board. Furthermore, there are other communities (Lapeer County, the City of Lapeer, and Sanilac County) that sit on the board and vote. However, they are not purchasing water nor contributing to the construction costs.

MEETING MINUTES

IN ATTENDANCE: Sue McCormick, DWSD Director
Darryl Latimer, DWSD Deputy Director
George Karmo, TYJT
Awni Qaqish, TYJT
Dave Guastella, TYJT

DATE: November 24, 2012

PURPOSE OF MEETING: Meeting with DWSD for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment

PREPARED BY: Dave Guastella

A meeting was held at the DWSD Main Office Building on November 19, 2012 to discuss the water supply options being presented by DWSD to the City of Flint. The main items discussed generally followed the attached DWSD Discussion/Questions that were provided to the Department prior to the meeting. A summary of the key points discussed are provided below.

DISCUSSION ITEMS

1. Question/Discussion Item: Verify that the four options presented at the November 1, 2012 meeting are still available for consideration:

    a. Supplied from Potter & Baxter using the new model contract (assume a Maximum Day Customer),

    b. Supplied from Imlay Station,

    c. Finished un-pumped supply from Lake Huron WTP, and

    d. Raw un-pumped supply from Lake Huron WTP.

    DWSD prefers to focus on the first two supply point listed; from the current location at Potter & Baxter and at the Imlay Pump Station as these apply specifically to Flint.

    DWSD provided the attached summary regarding the current costs to Flint based on the various options that DWSD is offering. The savings associated with each option is provided as well. As example, if Flint were to purchase water from the supply point located at Imlay Station, the current cost to Flint would be $5,661,000 and it would be a savings of nearly 50%

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

compared to Flint's current rate.

2. Question/Discussion Item: What additional capital improvements will be required for each option?

   If Imlay Pump Station is selected as the supply point then Flint would need to purchase the 72-inch water main and an agreement to supply Lapeer would need to be worked out. DWSD believes that this could be worked out through a "wheeling" charge over the 72-inch main or possibly moving the supply point downstream of the Lapeer connection.. DWSD estimates the value of the water main at $4.7M. Flint could bond for this amount or DWSD could include the cost into Flint's rate.

3. Question/Discussion Item: Are there other options being presented that should be considered (e.g., blending)?

   Only the two options indicated above are currently being considered and both would include blending; DWSD providing 2/3 of the supply and the Flint WTP providing the other 1/3.

4. Question/Discussion Item: To evaluate each option over the 25 year planning period, provide:

   a. Annual water rate for Flint for 2002 through 2012, and the

   b. Projected annual rate adjustment for each option. What are the proposed measures to keep the rate adjustments down in the future?

   DWSD provided the attached historical rates from 2002 through 2012 for the existing water contract with Flint. The attachment also includes what the rates would have been if Flint had signed the new model contract or had taken service from Imlay. These rates were provided back to 2010.

   DWSD believes that 5% would be a good estimation to assume for their annual escalation in rates over the 25 year planning period.

5. Question/Discussion Item: Flint stated a 10% increase in the capacity charge. What number did DWSD provide Flint?

   It was unclear to DWSD where the 10% increase in capacity charge stated by Flint came from. DWSD's information provided shows an average of 6.3%. DWSD offered a meeting with TYJT to discuss how the fixed and commodity charges are allocated.

6. Question/Discussion Item: Flint financial comparison is based on the initial Cost of $14,413,858, which includes $2,725,538 for Flint WTP operating cost; i.e, DWSD charge is $11,688,320. How good is this number?

   DWSD indicated that the charge of $11,638,320 is good through 6/30/13.based on their existing contract with DWSD.

7. Question/Discussion Item: KWA's initial charge to Flint is based on 12 MGD. Is DWSD charge

based on 12 MGD?

Yes, 12 MGD from DWSD would be a maximum with Flint supplying 6 MGD for a total of 18 MGD (2/3 vs. 1/3).

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

CITY OF FLINT WATER SUPPLY ASSESSMENT

DWSD Discussion/Questions for the November 19, 2012 Meeting

1. Verify that the four options presented at the November 1, 2012 meeting are still available for consideration:
    c. Supplied from Potter & Baxter using the new model contract (assume a Maximum Day Customer),
    d. Supplied from Imlay Station,
    e. Finished un-pumped supply from Lake Huron WTP, and
    f. Raw un-pumped supply from Lake Huron WTP.
2. What additional capital improvements will be required for each option?
3. Are there other options being presented that should be considered (e.g., blending)?
4. To evaluate each option over the 25 year planning period, provide:
    g. Annual water rate for Flint for 2002 through 2012, and the
    h. Projected annual rate adjustment for each option. What are the proposed measures to keep the rate adjustments down in the future?
5. Flint stated a 10% increase in the capacity charge. What number did DWSD provide Flint?
6. Flint financial comparison is based on the initial Cost of $14,413,858, which includes $2,725,538 for Flint WTP operating cost, i.e DWSD charge is $11,688,320. How good is this number?
7. KWA's initial charge to Flint is based on 12 MGD. Is DWSD charge based on 12 MGD?

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

Summary of DWSD Cost Allocations to Flint Under Various Scenarios

Flint Only

MEETING MINUTES

IN ATTENDANCE:	Ed Kurtz; Flint Emergency Financial Manager, City of Flint Dayne Walling; Mayor, City of Flint Mike Brown, City of Flint John O'Brien, Genesee County Howard Croft, City of Flint Dwayne "Duffy" Johnson, City of Flint Brent Wright, City of Flint Awni Qaqish, TYJT Dave Guastella, TYJT
DATE:	November 24, 2012
PURPOSE OF MEETING:	Meeting with the City of Flint for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment
PREPARED BY:	Dave Guastella

A meeting was held at the City of Flint Municipal Center on November 20, 2012 to discuss the water supply option being presented by the Karegnondi Water Authority (KWA) to the City of Flint. The main items discussed generally followed the attached KWA Discussion/Questions that were provided to City prior to the meeting. A summary of the key points discussed are provided below.

The questions submitted are repeated in the Discussion Items for easy reference. A summary of the action items generated from the meeting follow the Discussion Items.

DISCUSSION ITEMS

1. Question/Discussion Item: Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?

   KWA would supply up to 18 MGD. 18 MGD has been assumed as the maximum day demand and 12 MGD is assumed as the average day demand throughout the 25 year planning period.

2. Question/Discussion Item: Copy of the intake contract documents and engineer's estimate.

   The intake contract documents are approximately 90% complete and are not available for distribution. However, the updated Appendix 20, dated October 4, 2012 includes the most recent cost estimate of the intake based on the current design in process.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

3. Question/Discussion Item: Documentation of the Flint WTP improvements required and cost estimate.

   The costs are approximately $7M as presented in the September 2009 Preliminary Engineering Report. However, this estimate has been updated. Some processes have been eliminated. John O'Brien will provide the updated costs and the description of the planned improvements to the plant.

4. Question/Discussion Item: Confirm Flint's allocated percentage of the KWA capital improvements (30%?).

   Yes, the allocation is based on 18 MGD/60 MGD total capacity.

5. Question/Discussion Item: Copy of the proposed KWA operating agreement for Flint.

   John O'Brien will provide the operating agreement as well as the Capacity Contract and Articles of Incorporation.

6. Question/Discussion Item: What is the annual operating agreement adjustment projected for the 25 year planning period?

   This information is provided in Appendix 14, Table 14.2 of the September 2009 Preliminary Engineering Report. Operating cost based on Table 1. Used 12 MGD as average day demand (ADD). Assumed 5% as the annual increase in operating costs. John O'Brien indicated that these operating costs were based on Genesee County's operating costs. John O'Brien will provide the last 10 years of audited financial statements for the water fund.

   To assess operating and maintenance costs for the Flint WTP, Duffy will provide multiple years of financial statements for the water fund. Duffy did not believe they had 10 years, but they will provide what they have.

   Regarding operation and maintenance costs, Flint believes that these costs will increase by 2/3 of what they are now.

7. Question/Discussion Item: Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).

   KWA will not release the route due to concerns regarding speculation of land and easements. John O'Brien did indicate that the Lake Huron pump station would be at Fisher and M-25. The intermediate pump station site is near a location of the Lapeer/Sanilac/St. Clair border; where all three meet.

8. Question/Discussion Item: KWA's initial charge to Flint is based on a 12 MGD average day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

This was answered in Question No. 1 above.

9. Question/Discussion Item: Is there a transition plan and cost during construction of the KWA system identified?

   Flint is looking for an agreement with DWSD for back-up supply from the 72-inch main at the Genesee border.

10. Question/Discussion Item: The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?

    Flint indicated that they have adequate storage to supply the system for 6 to 7 days. Flint has 55 MG of storage and Genesee County has 65 MG for 2.5 days.

11. Question/Discussion Item: The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?

    In cases of emergency, Flint indicated that the back-up for the KWA system will be the same as it is now with DWSD; they will use the Flint River as the source water. Flint currently operates their plant four times a year.

    When questioned as to whether the WTP will be able to treat both lake water from the KWA system and river water Flint indicated that once the improvements identified in the September 2009 Preliminary Engineering Report are completed they will be able to accomplish both treatment processes. Flint will provide a schematic of the treatment trains at the WTP and a copy of the Flint transmission system.

    Genesee County indicated that additional redundancy would also be provided from the new Genesee County WTP.

    Regarding hydraulic transients; Genesee County indicated that a model analysis has not been included, but capital costs for mitigating transients have been included.

12. Question/Discussion Item: Related to the construction cost:

    a. Does it include an additional traffic lane since the construction will occupy half the right of way? *Not required, all roads are county roads; however, there are a few State road crossings.*

    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million. *Not required; all of the counties have waived any fees.*

    c. Does the cost of the steel pipe segments include corrosion protection measures such as

anode stations and related O&M? *Yes; however, the KWA has not settled on using steel pipe. PCCP pipe may be used. Steel shown in estimate because it is highest in cost and therefore the pricing is conservative.*

d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators. *Yes, Genesee County did emphasize that the SCADA system will be simple and straightforward because a lot of controls are not required.*

e. Other items discussed at the meeting included:

- The 2009 plant improvement cost is still good; however, there will be some reduction, such as a sulfuric chloride feed system that was eliminated. Plant capacity now is 36MGD, but will be 18 MGD.
- The KWA Lake Huron Pumping Station (LHPS) is now only high lift pump station.
- Genesee County will provide the distance of the intake pipe from the crib to the LHPS.
- The intake project is almost ready to bid; waiting for the COE permit.
- Genesee County is estimating the construction for the pipe lines and pump stations will begin July 2013.
- The route has been flown for survey.
- Genesee County is estimating construction will be complete and the project will be placed in service by Jan 2016.
- Genesee County to provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?

    The Flint River would serve as a back up supply.

14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

    The 40 years was stated in error. The reference was to DWSD's requirement to sign a 30 year contract.

    After 40 years Flint will own 30% of the project and can sell their share of ownership if they want. Conversely, with DWSD, they continue to pay for the capital projects but have no ownership. Flint believes they will know what they will be charged for the next 25 years versus DWSD that can't commit to a fixed escalation.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

Action Items for Follow-up		
Items:	***Assigned To:***	***Date to Complete***
1. Updated Costs for the Flint WTP Improvements and a description of the improvements.	John O'Brien	11/21/12
2. KWA Operating Agreement, Capacity Contract and Articles of Incorporation.	John O'Brien	11/20/12
3. Provide the last 10 years of audited financial statements for the Genesee water fund.	John O'Brien	11/20/12
4. Provide multiple years of financial statements for the City of Flint water fund.	Duffy Johnson	11/26/12
5. Provide schematic of the Flint WTP and a map of the Flint transmission system.	Brent Wright	11/26/12
6. Provide the length of the intake pipe from the crib to the pump station.	John O'Brien	11/20/12
7. Provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.	John O'Brien	11/26/12

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

CITY OF FLINT WATER SUPPLY ASSESSMENT

KWA Discussion/Questions for the November 20, 2012 Meeting

1. Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?
2. Copy of the intake contract documents and engineer's estimate.
3. Documentation of the Flint WTP improvements required and cost estimate.
4. Confirm Flint's allocated percentage of the KWA capital improvements (30%?).
5. Copy of the proposed KWA operating agreement for Flint.
6. What is the annual operating agreement adjustment projected for the 25 year planning period?
7. Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).
8. KWA's initial charge to Flint is based on a 12 MGD maximum day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?
9. Is there a transition plan and cost during construction of the KWA system identified?
10. The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?
11. The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?
12. Related to the construction cost:
    a. Does it include an additional traffic lane since the construction will occupy half the right of way?
    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million.

Comments. Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

c. Does the cost of the steel pipe segments include corrosion protection measures such as anode stations and related O&M?
d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference the for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?
14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

I. Executive Summary

Strategic Overview - Over the last 18 months, the Flint executive team has made significant progress towards addressing the City's budget imbalance by increasing revenues and achieving cost savings

- In a short period of time the City has been able to stop its chronic pattern of deficit spending, which resulted in an accumulated $19.1 million deficit as of June 31, 2012. Current projections for the FY13 budget indicate that revenues will exceed expenses at years end, and the recently announced FY14 budget appears to be also credibly balanced, including a financial commitment to reduce the accumulated deficit. Additionally, cash flow has improved with the passage of a police and fire millage, institution of new fees, and one-time gains from the sale of assets

- Key changes implemented during this period include:
  - Approval of Public Safety millage to replace funds provided through grants expiring in FY14
  - Increase in Water and Sewer rates
  - Creation of Street Lighting assessment and garbage fee (including related outsourcing of waste collection service)
  - Headcount reductions
  - Labor related savings equivalent to 20% of salaries and fringes
  - Reform of healthcare benefits, including consolidation of plans and meaningful changes to medical plan designs
  - Reform of pension benefits, including:
    - Eligibility criteria
    - Reduction of multipliers
    - Increase in employee contributions
    - Changes to final average compensation
    - Radical change to governance structure by transitioning plan to MERS

- These and other changes allowed the City to rebuild its depleted cash reserves to acceptable current levels

- Although, these changes have placed a heavy burden on citizens and city employees, they were absolutely necessary to address, in a very short period of time, an unsustainable structural deficit

- Despite these positive changes, key challenges remain, as the City continues to spend a significant percentage of its revenues in paying for legacy expenditures, and does not have any ability to reinvest in City infrastructure and blight removal to make Flint an attractive place for businesses and residents

Strategic Overview - The City should consider undertaking a comprehensive restructuring process to address its current financial condition allowing for reinvestment and blight removal in the City

- The City's operating deficit is likely to increase over the forthcoming years especially during FY15 – FY18 due to legacy costs and salary inflation. Management has undertaken several tough initiatives, however, the City has acknowledged that addressing the structural deficit will be extremely challenging and will further impact the provision of services to citizens
- The chronic scarcity of capital has resulted in the City having antiquated information systems and a dilapidated infrastructure. City officials have estimated capital needs in the range of $300M – none of this capital requirement is addressed in the 5 year plan
- In a review of the expense structure of the City, it is evident that legacy costs are the most significant burden on the budget. Further rationalization of legacy costs will be imperative to address the long term strategic needs of the City
  - Pension and OPEB costs account for nearly 33% of total General City expenditures; which is higher than Detroit, Warren, Lansing and Kalamazoo
- The City's budget constraints will continue to impact its citizens:
  - Public Safety is at risk with the expiration of certain federal grants in FY15. These expirations will result in a drop in Police and Firefighter headcount and will likely impact emergency response times
  - The City has higher rates for services such as Water and Sewer in comparison to other municipalities in Michigan
  - The City's property tax millage is among the highest in the State
- An initial review of the City's technology infrastructure & purchasing/billing functions was conducted which focused on IT, Police, Purchasing and Water and Sewer. The resulting observations are as follows: (i) the IT function is antiquated and inefficient and in need of additional funding, (ii) the Police systems are currently run on dozens of access databases, which leads to inefficiencies and limitations on data access, and (iii) the Water and Sewer departments are experiencing significant issues surrounding the process for billing / collection which has led to a substantial increases in bad debt
- With consideration of the above, it is clear that the City should undertake a comprehensive restructuring as an option to rationalize the cost structure and allow for capital investment in the City. It may be the only alternative to address the blight of the City and create an environment to attract citizens and businesses to the City

Strategic Overview - A benchmarking summary comparing Flint to other Michigan cities shows that Flint is lagging in basic public safety, City services and demographics metrics

- Flint has suffered a significant loss in population and increase in unemployment in the last 10 years
- Flint's public safety metrics (citizens/police and fire, and police/fire per square mile) indicate the City's existing staffing is less than adequate
- Flint's active to retiree ratio is the worst of the comparable cities, resulting in the highest ratio of Pension and OPEB cost as a percentage of total expenditures

Notes:

Sources: Data obtained from the respective city's most recent Comprehensive Annual Financial Report (CAFR)

1. Firefighter and police staffing represented uniform and non-uniform employees
2. Excludes debt from revenue bonds
3. Flint represents currently available data based on FY13 actuals for Flint. All other data based on FY12 CAFR/Budget
4. Based on FY12 CAFR/Budget
5. Flint Pension & OPEB reflects General City only

Summary of 5 Year Plan - The City's initial draft five year projection shows an increase in accumulated deficit of $22.4M and does not allow for capital to reinvest in infrastructure to enhance services to citizens

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

- The City is in the process of developing a 5-year business plan. The plan remains a work in progress and the City intends to make further changes to attempt to address the deficit that is currently projected. Key issues for consideration include:
  - On-going litigation surrounding retiree health benefits. This risk is likely to be highlighted in the next month when the retirees are informed of their required contributions to the health premiums
  - The City continues to experience significant increases in delinquencies on revenues, including property taxes and Water and Sewer bills. There is risk that the City has underestimated the impact on receipts
  - The current projection reflects significant reduction to fire staffing, including a consolidation of stations from 5 to 3. It is not clear that this reduction is feasible without having a material impact on response times
  - The City's projection includes minimal capital maintenance and improvements resulting in degradation of roads, sidewalks, sanitation and water, facilities, and parks. Flint estimates it has unmet capital needs of approximately $286M

Memo:										
Forecast deficit elimination (forecast by City)	-	-	-	-	(1.0)	(1.0)	(1.5)	(1.8)	(1.9)	(7.1)

Summary of 5 Year Plan - The City has generated positive cash flow during FY2013 suggesting a year end surplus; the City should review this surplus to understand opportunities in the projection period

- There also remain opportunities to improve on the projections as currently drafted
  - The cash generation that has occurred during FY13 suggests the City is likely to end the year with a surplus. This factor has not been considered in the FY14 budget and future projections.
  - There are many expense areas currently under budget – to the extent these are permanent differences, this may suggest future periods have further opportunity for expense reductions

- The City's pooled cash balance as of April 30, 2013 was $34.6M and is projected to end the fiscal year with $35.6M (see appendix on page 43 for detailed cash flows)
  - The pooled cash balance is projected to increase during FY13 by $24.7M, mainly as a result of:
    - Mid-year approval of tax millage for police and fire
    - Changes to health benefits plans
    - Sale of garbage trucks as part of the outsourcing transaction
    - Unspent budget across the City in professional fees and unallocated expenses
  - Potential cash flow issues going forward include:
    - Incremental delinquency rates and bad debt

Long-Term Liabilities - The City is burdened with substantial long term liabilities, mostly composed of legacy liabilities

- The City's projected long-term liabilities as of June 30, 2013 is $798.8M (excluding Hurley pension and OPEB liabilities)
- 82%, or $652.6M of the City's liabilities are made up of OPEB and Pension UAAL
- The City is projecting to pay $21.9M for General City legacy expenditures in FY14, representing 33% of General City revenues

Long-term liabilities

	FY13 LT - Liability Expense	LT - Liabilities	%
OPEB[1]	$10.5M	$367.0M	46%
Pension UAAL[2]	9.8M	285.6M	36%
Hurley	5.1M	85.1M	11%
Water	2.3M	21.8M	3%
Other[3,4]	0.9M	13.4M	2%
General Obligation - Parking	0.3M	9.0M	1%
Limited Obligation- Human Svcs Bldg	0.1M	8.4M	1%
Fiscal Stabilization	0.2M	7.6M	1%
Total	$29.1M	$797.9M	100%

A review of valuation assumptions and revaluation could result in a 2x-3x increase to OPEB and pension liabilities

Notes:

This schedule excludes unamortized bond discount and capital leases

1. OPEB liability as of 06/30/12 CAFR
2. Pension UAAL, excluding Hurley based on the June 30, 2011 Actuarial Report
3. Primarily Section 108 Loans (CDBG backed loans). See appendix for comprehensive debt schedule
4. Includes SIB 3rd Avenue reconstruction loan of $1.9M

Long-Term Liabilities - Despite significant recent changes to healthcare and pension benefits, these costs will continue to be a significant burden on the City's budget

Healthcare Benefits

The City has implemented plan design changes and consolidated plans reducing OPEB liability by 57% and annual expenses by approximately $6M

Current State

- The City consolidated to 3 plans for actives and retirees, simplifying and creating substantial costs savings
- For calendar 2013, the City chose the State imposed limits
  - Most actives do not contribute to premiums because they fall below the imposed caps
  - Many retirees will exceed the limits and the City has budgeted contributions from the retirees
    - Collection from retirees who never contributed to premiums may be problematic
    - The City is planning to bill retirees, giving them the option to have the premiums deducted from pension checks. This issue is likely to result in risks to collection and risk of litigation
- The City is currently litigating these changes with retirees, which could result in some of the changes being reversed

Observations / opportunities

- Consider switching to 80/20 premium sharing for actives and retirees, which could generate savings of $1.5M or otherwise require actives to make contributions to premiums
- OPEB obligations will increase significantly if the changes are reversed
  - Even after the changes highlighted above, the City is projecting a substantial portion of its net operating cash flow on OPEB obligations

Pension Benefits

While the City has changed pension benefits for future service and has transferred administrative and fiduciary responsibility to MERS, the pension plan still remains significantly underfunded

Current State

- The pension plan is substantially underfunded, with funding levels near 50%. The ratio of actives to retirees of 1 to 3 creates a significant burden on actives to be able to fund the plan
- Normal cost is low (10-15% of salaries and wages) but UAAL contribution is 55% for general and 47% for P&F
- Annual pension contribution per active employee is approximately $30k
- The City has recently implemented significant changes to the pension that materially reduced the unfunded liability and required contributions. These changes include:
  - Transfer to MERS to addresses governance issues
  - Changes to multipliers for future service and Average Final Compensation (eliminated OT, shift premium, call-in and stand-by pay)
  - Eliminated the 13th check payout until the funding levels exceed 90%
  - Placed new hires on hybrid plans

Observations / opportunities

- Opportunity to implement further identified changes to final average compensation calculations and to multipliers
- Perform an independent review of the plan assumptions and funding levels
- Based on other situations, it is possible that the underfunded status is even higher due to the aggressive return assumptions used in actuarial calculations

Restructuring Considerations - In order to make necessary investment in the City for the long-term, the City needs to consider a comprehensive restructuring plan that will reduce its legacy burden

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

Reinvestment in the City and department restructuring

- A significant reduction in annual legacy expenditures would result in the City being able to set aside funds to deal with:
  - Capital expenditures including streets, Water and Sewer infrastructure, facilities, parks
  - Demolition
  - IT updates – both systems and processes
  - Department restructuring to achieve increased efficiency

$ in millions	Budget	Projection				5-year

Next Steps - The City should move quickly to evaluate a comprehensive restructuring solution

Actuarial analyses

- The City should obtain actuarial analyses to have a better assessment of existing pension and OPEB obligations and alternative solutions/scenarios to address them

Retain restructuring legal counsel

- Retention of restructuring counsel would be the first step towards obtaining a better understanding of the potential benefits of a comprehensive restructuring solution for the City

Additional analysis on 5-year plan

- The City should develop a detailed bottoms up financial model by department and by fund to enhance its understanding of its projected financials
- The City should develop financial projections under two alternative scenarios: (a) status quo scenario with additional changes including increasing income tax rate, increasing State revenue sharing and further changes to medical and pension benefits and (b) a comprehensive restructuring scenario, which provides a solution to the City's pension and OPEB liabilities
- A full reconciliation of cash vs. FY13 budget is necessary. The FY13 budget is used as the basis to project the expenses in future periods. It appears there are areas where the City is experiencing significant positive variances in spending, including:
    - Professional services
    - Water purchases from the City of Detroit

There are many benefits for moving with speed in the evaluation of a comprehensive restructuring strategy

- **Strong liquidity position:** The implementation of a comprehensive restructuring will be more effective if implemented while the City has strong liquidity. Decisions should be made quickly before cash dissipates
- **Unresolved retiree medical:** There is a substantial drain on cash flow that results from the unresolved retiree medical changes (particularly on prescription related expenditures). An accelerated implementation will limit this drain
- **On-going litigation:** The City is likely to face further litigation with the implementation of the retiree contributions to healthcare premiums. A comprehensive restructuring would address current and future litigation, and avoid a drain due to litigation expense
- **Needed capital improvements:** Addressing capital needs of the City and removing blight will take many years to see results. Further delay in this process will impair the ultimate achievability
- **Major grant expiration:** Completing a comprehensive restructuring before the expiration of existing grants would help address the projected deficits for FY15 and beyond

II. Review of Five Year Plan

The City's five year plan projects deficits in FY15 and beyond as a result of the loss of grant revenues and the escalation of labor related costs

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

Five Year Plan (see appendix for detailed total city projections)

- The City prepared a draft five year plan that includes a detailed budget (by object code) for FY14 and incremental high-level projections for FY15 through FY18
  - FY14 projects a deficit reduction of $2.6M given that the City is not projecting to spend the entire amount collected from the public safety millage
  - FY15 projects a $2M deficit. The City has plans to address the loss of grant revenues totaling $7M, mostly related to public safety, by using the public safety millage
  - FY16 through FY18 project increased deficits as a result of escalating labor related costs

$ in millions	Budget	Projection				5-year
	2014	2015	2016	2017	2018	Total

Memo:						
Projected deficit elimination (projected by City)	(1.0)	(1.0)	(1.5)	(1.8)	(1.9)	(7.1)

Note: the 5-year plan presented above is for the General City only.

The five year plan is based on reasonable assumptions, but does not account for significant risks or reinvestment requirements that could have a negative impact on the financial projections

Key trends

- Modest decline in prop taxes and income taxes due to declining home values and wages, respectively
- Significant loss of grant revenues starting in FY15
- Increasing cost of salaries, healthcare and pension contributions (at a rate of 3.75% annually)

Major risks

- Significant annual deficits projected for FY15 and beyond, with limited or no ability to increase revenues or issue debt
- Delinquency rates for property taxes and Water and Sewer could be higher than projected given recent increases in rates and millage - currently projected at 30%, up from historical of 20%
- Inability to collect healthcare premium sharing from retirees - for plans exceeding the cap. Implementation could face potential further litigation
- Risk of healthcare plan design litigation - if negative ruling expands to all retirees (currently only 6 retirees impacted)
- No major capital expenditures projected (see appendix for details) - this will result in declining levels of service. No reinvestment in the City to attract people and businesses. This fact puts pressure on other macro-economic trends including population and property values
- MERS change to 25 year UAAL amortization - currently City uses 30 years. MERS has indicated it is willing to work with the City for a gradual transition
- Pension contributions projected to grow at 3.75% based on Gabriel Roeder's input - however, MERS may require higher growth in contributions if 8% return on assets not achieved
- A detailed execution plan for the improvements and capacity for Flint internal resources to deliver on improvements is continuing to be reviewed
- Some of the above risks may be offset by the City's ability to achieve additional cash savings. Results to date for FY13 suggest expenses are running materially below budget. If this trend continues, this may address some of the deficit issues

The City should evaluate options that may be available under a comprehensive restructuring. This is likely to be the only forum to adequately address the legacy costs

The proposed budget demonstrates significant strategic deficiencies. As currently structured, there is no clear plan on how to address the budget deficit once grant money is exhausted. Even before considering further cost cuts and revenue enhancements to address this issue, the City is faced with an outlook that strains the citizens and does not address significant capital improvements that will be necessary to address the blight in the City

The following are key issues the City must address:

- Any revised plan should consider solutions that avoid further burdens on the citizens
- A revised plan should consider some progress on making investment in the City. Without further investment, it will be difficult to reverse the adverse trends in the City
- It will be very difficult for the City to find substantial costs savings from its active work force without further impairing necessary services to the City
- The most significant areas that may be addressed without further impairing City services are the legacy costs. As demonstrated previously, these costs represent a significant portion of the overall City expense

Property taxes have continued to decline since 2008 related to drops in property values, and increases in foreclosures and delinquencies and are projected to decline

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

$ in millions	Fiscal year ended			Amended Budget	Budget	Projection

Total revenue - City Services	**$ 145.2**	**$ 178.4**	**$ 171.0**	**$ 198.4**	**$ 182.7**	**$ 166.4**	**$ 169.2**	**$ 172.6**	**$ 178.3**

Historical

- Property taxes have continued to decline since 2008 related to drops in property values, and increases in foreclosures and delinquencies
- Delinquent property taxes are transferred to Genesee County and the City receives payment in advance. Charge-backs are netted against those payments
- The City's total tax levy has decreased more than 40% over the last 10-years compounded by an increase in delinquency rates from 5% to ~15%

Projection

- Property tax revenues are projected to decrease due to a combination of assumed decline in property taxable valuations, declining population and high charge-backs. The rate of decline is expected to be 18% in 2014, 8% in 2015 and then flattening in the years that follow
- With assessment reductions set at 18% in FY 14, the City has only allowed for an additional 3% decline related to challenged assessments, loss in population, bad debt loss, etc. This may create a risk on achievement
- Property taxes are projected net of distributions

Special Assessments were increased in FY13 to provide funding for public safety

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

$ in millions	Fiscal year ended			Amended Budget	Budget	Projection

Total revenue - City Services	**$ 145.2**	**$ 178.4**	**$ 171.0**	**$ 198.4**	**$ 182.7**	**$ 166.4**	**$ 169.2**	**$ 172.6**	**$ 178.3**

Historical

- Includes 2 mill police services tax to maintain police officers who would have otherwise been laid - off
- Includes 0.5 mill for parks and recreation to maintain and operate the City's parks
- Public improve mill also included and primarily used for capital improvements and debt service on the 2011 fiscal stabilization bonds

Projection

- The City has introduced a new fire and police tax mill to maintain police and fire staffing at approximately 75 fire fighters and 150 police officers in response to the loss of SAFER, Mott and COPS grants projected in FY15
- Voters approved a 6 mill incremental tax in FY13 which was added to the winter tax bill. Proceeds are intended to be deferred until FY14 and beyond to replace the loss of grant revenue
- Special assessments carry a certain risk factor as delinquencies grow in the face of a rising tax rates and continued lower taxable valuations. However, this risk is tempered by the fact that the overall tax burden on the citizen is reduced by on-going property value declines

Income Taxes have stabilized in recent years and are projected to remain flat

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

Total revenue - City Services	**$ 145.2**	**$ 178.4**	**$ 171.0**	**$ 198.4**	**$ 182.7**	**$ 166.4**	**$ 169.2**	**$ 172.6**	**$ 178.3**

Historical

- Income taxes have stabilized in recent years despite continued decline in population

Projection

- Projections of revenues is driven heavily by recent trends in collections through Treasury. As such, FY 14 appears consistent with most recent collection delay and is a reasonable basis for projection

State Revenue Sharing is projected to increase slightly from FY13 levels then remain flat

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

$ in millions	Fiscal year ended			Amended Budget	Budget	Projection

Historical

- Historical changes in rates are driven by changes to the sharing methodology. The FY 12-13 collections are under a consistent methodology with what is expected going forward

Projection

- The budget for FY 14 is consistent with the state's existing statements for Flint. While the City continues to have reporting required this year to receive full funding, it appears they are on track to comply
- Statutory revenue sharing payments were eliminated and replaced by the Economic Vitality Incentive Program. The total amount available to be paid to municipalities decreased and the payment method is now based on performance metrics to reward "best practices"

Most grants are projected to expire in FY15

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

Historical

- The City has had a healthy grant program in recent years providing funds for several important initiatives:
  - Hiring and sustaining police officer and fire fight staffing levels
  - City of Flint Mater Plan
  - HUD – CDBG grants supporting community development

Projection

- Revenues are projected based on existing contracted grants. The substantial decline in FY 14-15 is related to the roll off of significant grants including, SAFER, Lockup, MOTT and others
- Currently there are no identified replacement grant programs – rather, increased tax millage are designed to replace some of the lost grant revenue

Salaries, Wages & Overtime expenses are driven by headcount. The City reduced headcount substantially from FY08 to FY13 and very little additional room to cut salaries expenses further

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

Historical

- The City has reduced general city headcount from FY10 to FY13 by approximately 480 FTE's, equivalent to 58% (see appendix for detailed headcount information)
- General City salaries and wages decreased by 23% although overtime has remained relatively flat

Projection

- The projection includes a further reduction in total city headcount of 70 FTE's
- Public safety millage is intended to limit reduction in public safety with plans to reduce fire fighter headcount to a steady level of 75 FTEs and police officers to ~150 FTEs
- Salaries and wages are projected to increase 3.5% annually

Other expenses are primarily comprised of professional services, utilities, and other operating expenditures

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

Total expenditures - City Services	$ (186.0)	$ (190.8)	$ (185.4)	$ (202.8)	$ (188.9)	$ (168.1)	$ (174.2)	$ (181.7)	$ (188.1)

Historical

- Utilities expense relates primarily to power for the City's street lights and was captured in the general fund
- Other expenses in FY09 include a one-time $7M lawsuit settlement
- Other expenses in FY10 include a one-time $7M capital project funded by HUD grant proceeds

Projection

- The projection period reflects significant reductions in other expenses primarily driven by cost reductions across the City
- Utilities expenses related to street lights have been transferred to the Street Light special assessment fund (~$3M annually)
- The reduction in other expenses is primarily driven by a reduction in charges for central services and inter-City billings. The assumption is driven by centralizing services, reduction of the overall City footprint and outsourcing
- **The Water and Sewer projection does not include changes/savings due to conversion to the KWA (Karegnondi Water Authority)**

The Water and Sewer department has had to significantly increase rates to eliminate past deficits and generate revenue levels necessary for operations

The analysis in this document is based on the 5-year projection dated April 29, 2013 and does not reflect the May 18, 2013 update which reflects increased deficits

Historical

- In recent years, the Water and Sewer departments had been operating at deficits despite little to no capital investment

Projection

- The City significantly raised Water and Sewer rates to both eliminate deficits and to ensure that department operation can be funded at minimal levels
- The Water and Sewer projection does not include changes/savings due to conversion to the KWA (Karegnondi Water Authority)

III. Healthcare Benefits

The City's recent implementation of changes to active and retiree healthcare plans resulted in significant savings, approximating 25% of its annual spend

Recent plan design changes

- The City used to have in excess of 60 plans, given that the City offered each retiree the healthcare plan that they participated in which was in place when they retired
- Flint made the decision to consolidate its healthcare plans into 3 main plans for FY13
  - Blue Cross Community Blue Plan – self insured
  - Health Plus Plan – fully insured
  - McLaren Plan – fully insured
- Main changes to plan designs included:
  - Increases in deductibles from a range of $50 to $150 in the old plans for singles to $1,000 deductible for BCBS and Health Plus plans and $500 for the McLaren plan
  - Increase in co-insurance percentages, out-of-pocket maximums and increases in office visits
  - Increases in prescription co-pays

2013 Plans	**BC Community Blue Self Insured**	**Health Plus Fully Insured**	**McLaren Fully Insured**
General plan coverage			
Employee premium contribution	Subject to State Caps	Subject to State Caps	Subject to State Caps
Plan deductible (single/family)	$1,000/$2000	$1,000/$2000	$500/$1,000
Co-insurance %	20%	20%	20%
Co-insurance maximum (OOP max)	$3,500	$3,500	$2,000
Office visit	$30	$30	$30
Rx drug plan coverage			
Co-pay	$10/$40/$80	$20/$40/$60	$10/$40/$80

- Cornerstone (healthcare advisor) estimates for healthcare savings (City contribution) were as follows:

$ in millions			**Estimated Savings**	
	FY 2012	**FY 2013**	**$**	**%**
Actives - Medical and Rx	$ 7.4	$ 5.8	$ (1.6)	-22%
Pre-65 Medical	9.9	6.6	(3.3)	-33%
RX - Post 2000 Retirees	7.5	7.2	(0.3)	-4%
Post-65 Medical	2.9	1.0	(1.8)	-64%
Total Savings Estimate	**$ 27.7**	**$ 20.6**	**$ (7.0)**	**-25%**

Despite recent changes and resulting cost savings, the City's healthcare costs continue to be high for actives and retirees

Average cost of healthcare plans

- The City's total projected FY14 medical costs are estimated to be approximately $20M
- This amount is net of expected premium contributions of about $3M from retirees whose plans cost exceeds the State imposed caps
- Assuming the City is able to collect $3M from its retirees, the average medical cost to the City would be:
  - $7,707 per retiree
  - $9,873 per active

Flint should evaluate switching to 80/20 cost sharing, which could generate savings of approximately $1.5M, mostly from actives contributions

$ in million	Projected for FY-14		
	Participants	**Average Spend**	**City Cost**
Retiree medical	1,947	$ 9,282.4	$ 18.1
Actives medical	538	9,872.5	5.3
Total medical	2,485	$ 9,410.2	$ 23.4
Hard cap retirees			15.0
Hard cap actives			6.6
Hard Cap Total			$ 21.6
Over/(Under) Cap Retiree			$ 3.1
Over/(Under) Cap Active			(1.3)
Calculation using caps			
City Cost - Retirees	1,947	$ 7,706.9	$ 15.0
City Cost - Actives	538	9,872.5	5.3
Retiree Contribution	1,947	$ 1,575.5	$ 3.1
Active Contribution	538	-	-
Total City with Caps	**2,485**	**$ 8,175.8**	**$ 20.3**

Existing and future lawsuits may impair the City's ability to realize healthcare savings as planned

Issue	Considerations

Current Retiree Lawsuits	▪ Retirees have filed 2 lawsuits against the City for imposed plan changes:
	  ▪ Pre-2000 retirees litigation: a settlement reached in 2002 prevents any changes to these retirees' prescription drug cards. After the City imposed changes to Rx co-pays in 2011, a judge ruled in favor of the retirees and reinstated the old drug cards. The City has filed an appeal the case is pending resolution
	  ▪ 6 retirees filed a lawsuit opposing the plan design changes. The judge granted a preliminary injunction in favor of the retirees. The City has appealed the ruling. The city of Pontiac is going through a similar lawsuit in which the judge's ruling favored the City's position. Now both cases are in front of the 6th Circuit
	▪ The City reversed the plan design changes for the 6 retirees being represented. If the City needs to reverse the plan design changes for all retirees, the **potential impact would be $3.5M to $4M of additional healthcare costs for the City**

Potential further litigation resulting from imposing State caps	▪ The City has chosen to apply the State caps for actives and retirees, even though the legislation does not explicably address retirees ▪ As shown in the previous page, average plan costs for actives do not reach the State caps. Therefore, actives are not required to contribute to healthcare plan premiums ▪ Most of the retiree plans exceed the State imposed caps. Therefore, the City is planning to charge retirees (for the first time) for the excess above the State caps. This amounts on average to $1,500 per retiree for FY14 ▪ The City will be sending notices to retirees regarding their obligation to pay their portion of the plan premiums and give retirees the option make a payment directly to the City or have a deduction taken from their pension checks ▪ If retirees do not respond to notices, the City is planning to move them to a cheaper plan that falls below the State caps ▪ **There is a potential for the City not to be able to collect these premiums and there is also potential for further litigation from retirees that will be charged a premium for the first time. This litigation risk increases if the City changes the structure of the plan (which could be considered inconsistent with rights of retirees)**
Alternative strategies	▪ **The City's retiree healthcare cost is unsustainable. Significant further changes should be considered in a long term strategy**

IV. Pension Benefits

Despite significant recent changes to pension benefits, the City's pension plan continues to be severely underfunded and requires contributions that are significantly higher than other cities

During the last 18 months, the City has implemented significant changes to it pension benefits, including:

- Plan transfer from FERS (Flint Employees Retirement System) to MERS. The FERS board has been dissolved and all assets and liabilities are now under the administration of MERS
- Increased employee required contributions to DB plan
- Changes to FAC (Final Average Compensation) calculations to eliminate certain components such as overtime
- Reduction in multipliers for service accrued in the future
- Limitations on eligibility for payment of 13th check – plan has to be funded at 90% or higher for 13th check to be paid
- Introduction of hybrid plan for new hires
- Changes to job elimination provisions

Despite the changes introduced to pension benefits, the plan continues to be severely underfunded and continues to be a significant burden on the City's financial condition.

- The ratio of actives to retirees is one third (excluding Hurley)
- The plan funding level for general City employees is 40% and for police and fire is 61%. Total UAAL was $287M as of the 6/30/2011 valuation
- This valuation results in the City's required pension contributions to be very significant as a percentage of actives wages
  - General City employees contribution is 55% of payroll and Police and Fire contributions are 47%, mostly driven by the UAAL portion of contributions
  - On average, for each active employee, the City has to contribute $30k to the pension plan

	Flint (6/30/2011)			
	General	P&F	Hurley[2]	Total
Participants

City contribution[1] ($m)	$ 9.6	$ 7.7	$ 4.1	$ 21.3
City contribution/active ($k)	$ 29.9	$ 31.1	$ 5.7	$ 16.7

Notes:

1. Information based on Gabriel Roeder Smith actuarial valuation for Flint (67th version)
2. The Hurley pension data only relates to the portion invested in the FERS plan

Implemented and potential further changes to pension benefits (without impacting vested benefits) will not result in a comprehensive solution to the City's pension issues

Issue	Considerations

Potential for further changes	▪ Further changes could include:
	  ▪ Additional reductions to Police and Fire multipliers
	  ▪ Additional changes to FAC calculation
	  ▪ Elimination of 13th check
	  ▪ Further increases in employee contributions
	  ▪ Move every employee to hybrid plan

Actuarial assumptions appear to be aggressive	▪ Actuarial assumptions that could be challenged include:
	  ▪ Rate of return assumption:
	  ▪ Previously, the assumed rate of return net of investment expenses was 8%
	  ▪ As part of the 2013 valuation, the assumed rate was changed to 8% net of investment **and administrative** expenses, which results in a 1.45% reduction in contribution rates
	  ▪ 8% is at the top of the range for assumed rates of return. A more reasonable assumption would be between 6.5% and 7%
	  ▪ UAAL amortization period:
	  ▪ The City has historically used a 30-year amortization period
	  ▪ MERS uses a 25-year amortization period
	  ▪ The City will need to move to a 25-year amortization in the near term, and this will result in increased contributions

Changes to eligibility, future service accrual and FAC calculations will not be sufficient to address underfunding	▪ Although changes implemented and potential future changes are positive to limit the City's exposure to its pension issues, they will not address the significant underfunding and burden on the City's financial condition ▪ **Only more drastic actions, including a major restructuring could provide a comprehensive solution to the City's pension issues**

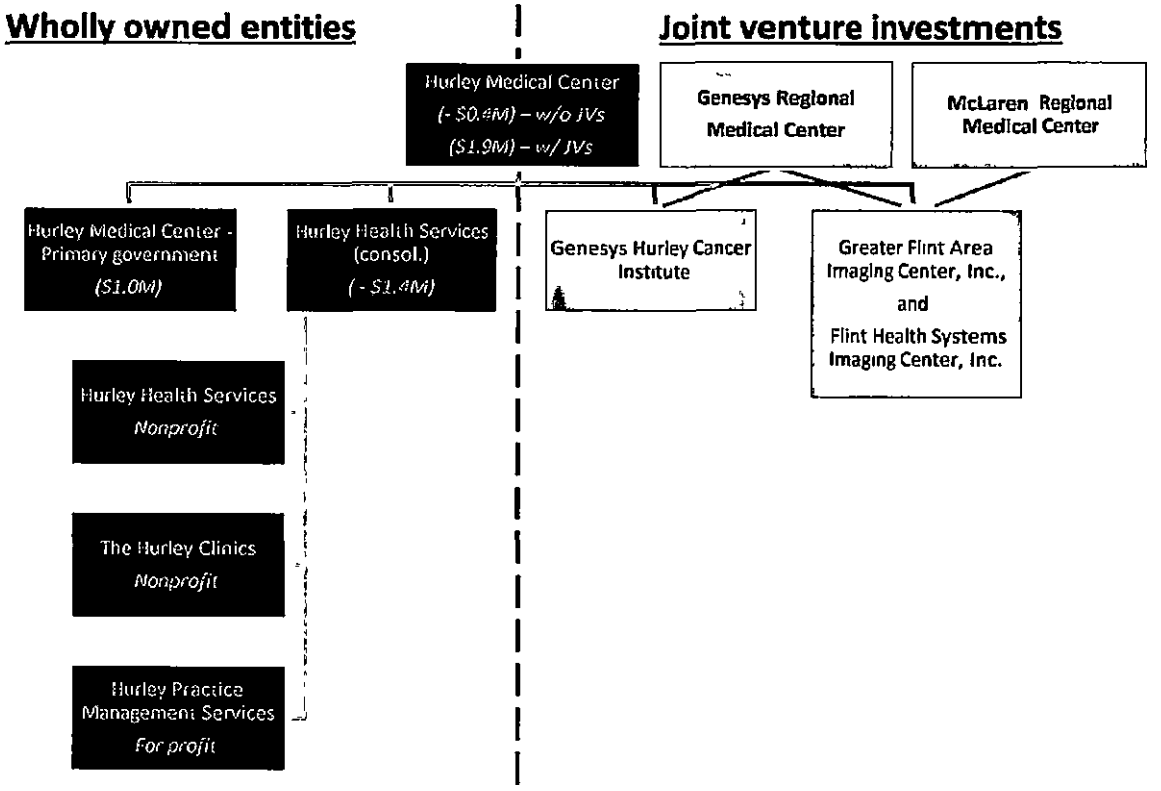
VI. Review of Hurley Medical Center

Hurley Medical Center is a Component Unit of the City of Flint and therefore, reported separately in the City's financial statements

Description

Hurley Medical Center provides inpatient, outpatient, and emergency care services and generates ~$380M with approximately 420 total available beds. It is a discrete component unit of the city of Flint, Michigan, and as such is exempt from federal income taxes

Hurley Medical Center is comprised of the primary government portion as well as a wholly owned subsidiary: Hurley Health Services, which itself includes two nonprofits entities and one for profit corporation. Additionally, the Medical center participates in two joint ventures with other local hospitals. The organizational chart below depicts the expanse of Hurley Medical Center's component entities:



Hurley operates 400+ available beds and its budget is roughly breakeven

Operational summary

The primary Hurley Medical Center facility is located at One Hurley Plaza, Flint, MI 48503. This facility consists of 247 routine service beds and 114 special care beds and 57 others for a total of 418 available beds. Beyond general medicine (1,033 inpatients) and as with many other hospitals, the top departments seeing Medicare inpatients are Cardiology (746 inpatients with an average stay of 5.76 days) and Pulmonology (520 inpatients with an average stay of 7.03 days)

Hurley Medical Center serves a low income population as is reflected in their Disproportionate Share Hospital share percentage of 40%. Additional operational details are presented in the following section on Competitive Landscape

Financial summary

Hurley Medical Center, inclusive of its wholly owned components, generates $380M revenues annually. Approximately 95% of these revenues are used to pay operational expenses, such as salaries & benefits, supplies, and other purchased services. Depreciation & amortization accounts for an additional 3.5% of revenue or $13M (net property, plant and equipment is $114M). As a result, the Medical Center, through its wholly owned component, has been operating at roughly break-even. Joint venture income has also been low: $1.5M and $2.3M in 2011 and 2012, respectively

As of March 31, 2013, the Medical Center had $10M in unrestricted cash & cash equivalents. Net debt ($79.5M) is made up of $4.5M current and $101M long-term, less $26M held in trust. This amount represents approximately 39% of total capital

Hurley Medical Center also holds a substantial off balance sheet pension liability. This unfunded actuarial accrued liability was last valued (as of 6/30/2010) at approximately $111M, which equates to 57% of balance sheet liabilities. Employer contributions are made each year with the purpose of providing a sufficiently funded pension plan; these contributions have been roughly $10M over the past few years

See appendix for Hurly financial statements

Hurley competes with 2 other major hospitals in the area that are similar in size

Comparable hospitals

Three large medical centers serve Flint, Michigan and the immediate surrounding area:

Hospital	Hurley Medical Center	Mclaren - Flint	Genesys Regional MC
Provider number	*230132*	*230141*	*230197*

These entities are comparable, including available beds, inpatient counts, and total revenues (gross patient revenue + non-patient revenue). Additionally, these medical centers have partnered in a joint venture to provide imaging services through both Greater Flint Area Imaging Center, Inc. and Flint Health Systems Imaging Center, Inc. Hurley and Genesys also established a joint venture focused on cancer treatment: Genesys Hurley Cancer Institute

The information below summarizes some of size indicators of these medical centers:

Beds and Patient Days by Unit (including swing beds)

Strategic Choices – Can Hurley be a source of liquidity for the City?

Issue	Considerations
Cash distribution to the City	▪ Limited by debt covenant requirements which create a default if cash drops below approximately $50M. Current levels of cash do not provide significant excess above the minimum cash requirements ▪ Break-even operations run-rate – the hospital is not building cash and is unlikely to create significant funds in the future
Annual fee on hospital	▪ The City is currently considering additional fees that may be charged to the hospital. The City already charges Hurley for safety – there may be additional fees that can be assessed
Additional debt raise / cash distribution	▪ Limitations on debt capacity - The debt burden on the hospital is generally at industry standards. Additional debt will become more difficult to obtain ▪ Limits on use of funds – unlikely to find lending source that will allow new funds to be used for a cash distribution out to the City
Sale of joint ventures	▪ The hospital currently has an interest in 2 JV's with other hospitals in the market. There may be market value in the JV's and the likely buyers would be the JV partners ▪ Strategic considerations – must consider strategic benefits of joint ventures and impact of selling interest to JV partners that compete in the local market
Sale of hospital	▪ Valuation issues w/ Pension – unlikely to effect a sale that includes assumption of pension liability. The $150M+ of unfunded pension liability is likely to fully offset the enterprise value ▪ Value may be further eroded by the conversion to a for-profit. This conversion will impact the DSH payments (currently at $15M) and would likely decline if the hospital is converted to a for profit ▪ Marketability: Limited growth opportunities in the market impacts interested buyers. Unlikely to attract financial buyers ▪ Reimbursement issues must be evaluated to consider impact of a sale, particularly if converting to a for-profit ▪ Comprehensive restructuring should be evaluated in conjunction with City strategy to determine how that may impact ability to generate liquidity

VII. Review of City Operations

City Operations – An initial review of several departments across the City indicates a significant need for a comprehensive IT infrastructure upgrade and City-wide integration of its centralized processes

Function	Observations
IT	▪ The technology infrastructure, support capabilities and governance appear to be in very poor condition ▪ The IT function is currently in a stage of transition in terms of people and investment. There is heavy reliance on third party advisors and little ownership by the departments utilizing the function ▪ The existing systems are antiquated and inefficient in structure. As an example, the Police system is run off of dozens of Access databases – which are relied upon to track critical data such as crime and intelligence data. Moreover, the ability to assess the patrol/arrest process time allocation is limited ▪ Police have received grants that make possible a system upgrade. However, the grant funding does not adequately cover the cost of process redesign, which will be a critical step in getting value from the IT upgrade ▪ It is apparent that the basic infrastructure and resources would need to be stabilized prior to optimizing specific systems. This includes a long term IT governance, disaster recovery and management / resource plan ▪ Telecommunication contracts appear to provide an opportunity for improvement. The current cost is in excess of $1M projected for FY14. It is possible that the restructuring of these contracts to match the needs of the City may result in savings as much as 40%
Purchasing/ Accounting	▪ The current process and tools limit the ability to empower the department heads to track and manage budget / actual accountability and impacting also the ability to encumber current funds and limit multi-year rollovers. There is some expectation that the new accounting systems will provide the tools to improve these processes ▪ Vendor management, IFB and RFP process needs to be enhanced to ensure that Bid to Delivery process is tracked
Water and Sewer	▪ The City is experiencing significant issues surrounding the large increases in water costs. Water rates have more than doubled in the past 2 years and that has resulted in declining collections. The City has more than 8,000 or ~25% customers past due and does not yet have a strategy / process / resources to address this issue ▪ The City only has the capacity to perform 150 shut-offs a week. Given the level of delinquencies, it is clear there are not resources to properly enforce collections ▪ The City has also identified a growing issue surrounding unbilled water. This is a result of both fire department usage (driven by high number of fires) and theft.

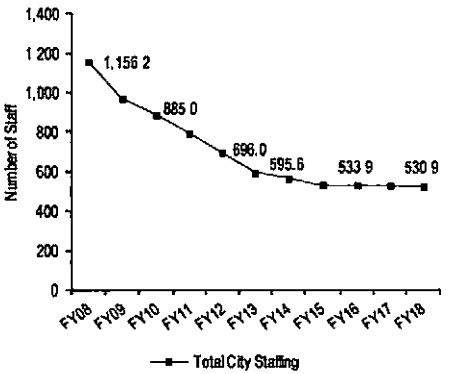
- As noted, the planned reductions in fire department work force will impact service response times in the community. This change will likely leave the city with service levels well below the average of comparable MI cities. It is worth noting that the stretched fire department currently faces one of the highest rates of fire emergencies in the state
- The decline in street personnel is consistent with the limited investment. This staffing is not likely to be adequate if the city chooses to invest in infrastructure.
- The limited staffing in building inspection is not likely to be adequate to ensure compliance with city codes and/or ordinances



Notes:

Source: Flint FY12 CAFR and 5-year budget

General: Historical headcount excludes crossing guards

1. Major and local streets include engineering, street maintenance, traffic control, traffic administration, and utilities administration
2. Other includes rubbish collection and Community Development Block Grant Program ("CDBG")

a) 5-year projection supplementary schedules

b) Citizen Impact -The City's plan assumes burdening citizens with high Water and Sewer rates and special assessments to provide minimum City services while leaving no room for capital reinvestment

Public Safety is at risk with the expiration of certain federal grants in FY15. These expirations will result in a drop in Police and Firefighter headcount and will likely impact emergency response times

- **Police & Fire**
  - In FY13 the police department employed approximately 152 FTE's or 736 citizens per police officer
    - The COPS and MOTT grants are projected to expire in FY15, resulting in a loss of $2.8M in annual funding
  - In FY13 the fire department employed approximately 94 FTE's across 5 stations or 1,080 citizens per firefighter
    - The SAFER grant currently funds 38 fire fighters and is projected to expire in FY15 which could lead to the closing of 2 of the City's 5 fire stations
  - Flint already ranks poorly in key public safety indicators versus comparable Michigan cities, further budget reductions and loss of grant revenue will only compound these issues

The burden of legacy costs and the necessity to maintain minimal level of public safety have resulted in little to no Capital reinvestment

- The City's budget includes minimal capital maintenance and improvements resulting in degradation of roads, sidewalks, sanitation and water, facilities, and parks
- Flint estimates it has unmet capital needs are approximately $286M
- Additional unidentified capital needs or cost overruns could result in an increase in capital costs

USD millions	Estimated Capital Needs
Roads	$ 83.0
Vacant Home Demolition	50.0
Sidewalks	45.0
Sanitary and Stormwater	40.0
Water Distribution system	27 0
Water Pollution Control	16.0
Facilities	15.0
Parks	10.0
Minimum estimated total	**$ 286.0**
Investment in public safety	*tbd*
Water system cost overruns	*tbd*
IT system upgrades	*tbd*

MEMORANDUM

TO: Wayne Workman
Randall Byrne
Fred Headen

CC: Darnell Earley

FROM: Peter M. Bade

RE: Alternative Proposal for Sale of Water Transmission Main

DATE: May 28, 2014

On May 12, 2014, Emergency Manager Darnell Earley presented to the Flint City Council a proposal for sale of a portion of the 72 inch water transmission main to the Genesee County Drain Commissioner.

A special meeting of the Flint City Council was held on Monday, May 19, 2014 to discuss the proposal. Pursuant to MCL 141.1559(2), Council adopted a resolution rejecting the proposal.

A second special meeting was scheduled on Wednesday, May 21, 2014 for the purpose of discussing an alternative proposal.

At the May 21st meeting, Council members acknowledged they did not have an alternative proposal. However, pursuant to a motion by Councilman Sheldon Neeley, a resolution was adopted recommending the water main sale price be increased to $4 million dollars, with equal payments over two years.

Pursuant to MCL 141.1559(2), Council had seven (7) days from the date of their rejection of the proposed action to submit to the local emergency financial assistant loan board an alternative proposal that would yield substantially the same financial result as the action proposed by the

Emergency Manager. Accordingly, the deadline for submission of Council's alternative proposal was Tuesday, May 27, 2014.

Council did not submit an alternative proposal to the local emergency financial assistant loan board.

Subject: RE: Memo re Alternative Proposal for Sale of Water Transmission Main

Pete:

Thanks for the summary. Section 19(2) of the Act is unambiguous in its requirement that a local governing body that disapproves an emergency manager proposal shall submit an alternative within 7 days. However, rather than pursue a mandamus action to compel compliance where a local governing body fails, or refuses, to submit an alternative, the Department of Treasury has taken the position that it will deem as an approval by a local governing body under Section 19(1) any instance in which the local governing body disapproves an emergency manager's proposal but fails, or refuses, to submit an alternative as required by the Act.

Fred

STATE TREASURER

May 30, 2014

Darnell Earley, Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

Mr. Earley:

This letter serves as a notice of my approval to sell the 72" (inch) pipeline and appurtenances from the DWSD connection at Potter and Baxter Roads; west of the proposed 36" (inch) KWA connection at Center and Pierson Roads for $3,987,700 to Genesee County Water & Waste.

Because the sale is referenced in the F&O Plan, no approval is necessary under Sections 12(1)(r) and 15(1) as the plan is considered adequate. However, 12(3) requires Treasurer approval for contracts over $50,000 because the sale was not competitively bid. In addition, Section 19 requires that this sale must be submitted to the City Council to approve or deny. The Flint City Council failed to take action on the matter by the required date; therefore, the proposed action is considered to be approved.

State Treasurer Approval:

I, R. Kevin Clinton, State Treasurer for the State of Michigan, pursuant to the authority assigned by Public Act 436 of 2012, do hereby:

__✓__ Approve Submitted Recommendation

_____ Deny Submitted Recommendation

Sincerely,

R. K. Clinton

SUBJECT: Approval for Sale of Pipeline in the City of Flint

Emergency Manager Early wishes to sell a 72" (inch) pipeline and appurtenances from the DWSD connection at Potter and Baxter Roads, west of the proposed 36" (inch) KWA connection at Center and Pierson Roads for $3,987,700 to Genesee County Water and Waste. The City of Flint hired the firm of Lockwood, Andrews, and Newman, Inc. to appraise the value of the pipeline. The appraisal report dated January 28, 2014 indicated that the value of the pipeline is $3,987,700. A copy of the report summary is attached.

Because the sale is referenced in the F&O Plan, no approval is necessary under Sections 12(1)(r) and 15(1), as the plan is considered adequate. However, 12(3) requires Treasurer approval for contracts over $50,000 because the sale was not competitively bid. In addition, Section 19 requires that this sale must be submitted to the City Council to approve or deny. The Flint City Council failed to take action on the matter by the required date; therefore, the proposed action is considered to be approved.

Staff has concluded that this sale is beneficial to the City, because the pipeline no longer serves a purpose. The proceeds of the sale can be returned to the City's Water Fund to be used to fund other water related projects.

If additional information is required, please let me know.

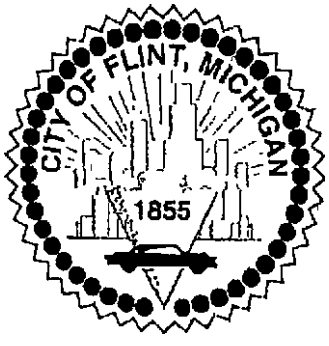
Present Value Analysis of 72-inch Water Transmission Main for City of Flint

Final Report – January 28, 2014

Lockwood, Andrews & Newnam, Inc.

Project # 130-10701-001



Lockwood, Andrews & Newnam, Inc.
A LEO A DALY COMPANY
PLANNING ENGINEERING PROGRAM MANAGEMENT

Introduction

Lockwood, Andrews, & Newnam, Inc. (LAN) was retained by the City of Flint (City) to perform a pipeline value assessment of the existing 72-inch water transmission main from the Detroit pipeline connection at the intersection of Baxter and Potter Roads to the Flint Water Treatment Plant (FWTP). The 72-inch transmission main was constructed from 1966 to 1968 to supply the FWTP with water from the Detroit Water and Sewerage Department (DWSD). With the original 30 year contract with DWSD expired, the City of Flint plans to establish a new contract with the Karegnondi Water Authority (KWA) beginning in 2015, which would require the KWA to provide raw water to the FWTP.

In order to provide raw water to the FWTP, the KWA will connect a 36-inch transmission main to the existing City-owned 72-inch water main near the northeast corner of Center and Pierson Roads. The Genesee County Drain Commissioner's Office-Division of Water & Waste is interested in purchasing the east portion of the 72-inch transmission main from this connection to the DWSD connection at Baxter and Potter Roads which is being defined in this analysis as Segment 1, while KWA has requested the use of the 72-inch pipeline west of this connection point to the FWTP which is being classified as Segment 2. Our analysis of these two segments is intended to help the City establish an equitable monetary value of both sections. A schematic of the limits of the pipeline and segments 1& 2 is shown in Attachment A.

Analyses

In order to value the segments of the 72-inch transmission main requested, quantities were derived from original construction drawings. Using the as-built cost established from the quantity take off, two (2) analyses were performed on the water main based on different valuation methods. Original Cost Less Depreciation (OCLD) and Reproduction Cost New Less Depreciation (RCNLD) methods were used in conjunction with the sinking fund depreciation technique to develop a credible current value assessment of the pipeline.

Quantity Take-Off

Using the Consoer, Townsend & Associates construction drawings dated 1966 (Attachment B) and the payment document dated January 1969 (Attachment C), a quantity take-off analysis was performed to determine the original construction cost of the section of 72-inch water main as described above. Line items originally listed as "linear feet" or "each" were summed to determine the value within the evaluation limits. Lump sum line items with information available, such as "gate valves complete in place" and "rubber seated butterfly valves," were counted and the ratio of the items within the limits to the whole project was applied to the lump sum price. For any unit with no quantifiable documentation, such as "sand and gravel refill" and "sand and gravel backfill," the ratio of the 72-inch pipeline within the evaluation limits to the whole project was applied to the total cost for the unknown line item. Line items determined to be outside the limits of the valuation were listed with a zero percent ratio.

OCLD Analysis

The Original Cost Less Depreciation valuation method uses the original cost of the project when constructed minus the depreciated value to determine the current value. The initial asset value was determined using the information established from the quantity take-off analysis and the original cost information found in the payment document dated January 1969.

RCNLD Analysis

Reproduction Cost New Less Depreciation is a valuation method that translates initial project costs to present day cost of construction. A new present day construction cost is calculated based on the original construction, followed by a depreciation method used to calculate the current book

value of the asset. The Engineering News-Record (ENR) Construction Index and the Handy-Whitman Cost Index for Concrete Cylinder Mains were possible references to determine the ratio used in calculating the present day cost. For this evaluation, the ENR index was selected to calculate the RCNLD initial asset value. A ratio of the current ENR index from September 2013 (9551.58) to the bid date ENR index from May 1966 (1014) was multiplied by the OCLD asset value to get the RCNLD initial asset value.

Sinking Fund Depreciation

The sinking-fund depreciation method is commonly used within the utility industry. This method of depreciation accurately reflects the service life of a utility line, having a low initial depreciation upon installation due to low maintenance during the early years of a utility. As the service life of a utility progresses and maintenance becomes more frequent and comprehensive, the depreciation of the asset increases over time.

Due to the fact that a transmission pipeline must be functional and meet all necessary standards of service until the day it is taken out of service, an intrinsic value will always remain; therefore, a salvage value must be determined prior to the depreciation calculation. Similarly, the useful life of the asset must be pre-determined. The industry standard for the useful life of a pipeline ranges from 50 to 100 years. Typically, lower useful life values are used for distribution mains, whereas higher values are used for transmission systems. For transmission mains similar to the 72-inch being analyzed, a useful life of 75 to 90 years is common. We have selected a useful life of 80 years for this analysis.

In addition to the salvage value and useful life, sinking fund depreciation requires a sinking fund rate, which was selected as 4.50% and 0.75% for OCLD and RCNLD respectively, reflecting the federal discount rate during the construction time analyzed. Due to the sinking fund rate, the annual depreciation varies depending on the year and can be calculated using Eq. 1 and Eq. 2 below.

Eq. 1 $$D_t = \frac{(A-S)*(1+J)^{(t-1)}}{S_{n|j}}$$

Eq. 2 $$S_{n|j} = \frac{(1+J)^n-1}{j}$$

where:

t	=	Evaluation time (years)
D_t	=	Depreciation at year t
A	=	Initial asset value
S	=	Salvage value of asset
J	=	Sinking fund rate

The sum of the annual depreciation values until the evaluation year is subtracted from the initial value to calculate the current book value of the asset value.

Results

Segment 1

RCNLD and OCLD analyses were performed using a sinking fund depreciation of the 72-inch pipeline and appurtenances from the DWSD connection at Baxter and Potter Roads, west to the

proposed 36-inch KWA connection at Center and Pierson Roads. Due to the size of the project and the portion involved in this segment (similar size piping and valves only) the RCNLD value of $27,400,000 was determined to be unrepresentative of the actual asset value. Utilizing the OCLD values listed below, a **book value of $3,988,000** was calculated for this portion of the pipeline.

Table 1 – Segment 1 OCLD Analysis

ORIGINAL COST LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 4,735,900
Useful Life (years)	80
Salvage Value at End of Life*	$ 1,184,000
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
$S_{n|j}$	729.56
Total Depreciation at Year 47	$ 748,200
Book Value	**$ 3,987,700**

*25% Salvage value

Segment 2

RCNLD and OCLD analyses were performed using a sinking fund depreciation of the 72-inch pipeline and appurtenances beginning at the KWA tie-in at Center and Pierson Roads, west to the property line of the FWTP. Utilizing the RCNLD values listed below, a book value of $5,269,600 was calculated for this portion of the pipeline using the following evaluation criteria:

Table 2 – Segment 2 RCNLD Analysis

REAL COST NEW LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 8,953,900
Useful Life (years)	80
Salvage Value at End of Life*	$ 1,790,800
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
$S_{n|j}$	109.07
Total Depreciation at Year 47	$ 3,684,300
Book Value	**$ 5,269,600**

*20% Salvage value

Utilizing the OCLD values listed below, a book value of $790,400 was calculated for this portion of the pipeline using the following evaluation criteria:

Table 3 – Segment 2 OCLD Analysis

ORIGINAL COST LESS DEPRECIATION SINKING FUND DEPRECIATION ANALYSIS	
INPUTS	
Initial Cost	$ 950,600
Useful Life (years)	80
Salvage Value at End of Life*	$ 190,100
Sinking Fund Rate	4.50%
Evaluation Year	47
OUTPUTS	
$S_{n|j}$	729.56
Total Depreciation at Year 47	$ 160,200
Book Value	**$ 790,400**

*20% Salvage value

The asset value of segment 2 was determined using the average of the OCLD and RCNLD analyses. **A current book value of $3,030,000 was calculated.**

Summary

OCLD and RCNLD analyses are an effective method of calculating the depreciation of an installed utility, as well as the opportunity cost to the buyer of purchasing an installed utility. After performing these analyses using the sinking fund method of depreciation, current book values of the segments were determined. The portion of the 72-inch transmission main from the DWSD connection at Baxter and Potter Roads, west to the proposed 36-inch KWA connection at Center and Pierson Road, **Segment 1, has a current book value of $3,987,700.** The portion of the 72-inch transmission main beginning at the KWA tie-in at Center and Pierson Roads, west to the property line of the FWTP, **Segment 2, has a current book value of $3,030,000.**

DEPARTMENT OF LAW

MEMORANDUM

TO: Wayne Workman
Randall Byrne
Fred Headen

CC: Darnell Earley

FROM: Peter M. Bade PMB

RE: Alternative Proposal for Sale of Water Transmission Main

DATE: May 28, 2014

On May 12, 2014, Emergency Manager Darnell Earley presented to the Flint City Council a proposal for sale of a portion of the 72 inch water transmission main to the Genesee County Drain Commissioner.

A special meeting of the Flint City Council was held on Monday, May 19, 2014 to discuss the proposal. Pursuant to MCL 141.1559(2), Council adopted a resolution rejecting the proposal.

A second special meeting was scheduled on Wednesday, May 21, 2014 for the purpose of discussing an alternative proposal.

At the May 21st meeting, Council members acknowledged they did not have an alternative proposal. However, pursuant to a motion by Councilman Sheldon Neeley, a resolution was adopted recommending the water main sale price be increased to $4 million dollars, with equal payments over two years.

Pursuant to MCL 141.1559(2), Council had seven (7) days from the date of their rejection of the proposed action to submit to the local emergency financial assistant loan board an alternative proposal that would yield substantially the same financial result as the action proposed by the

Emergency Manager. Accordingly, the deadline for submission of Council's alternative proposal was Tuesday, May 27, 2014.

Council did not submit an alternative proposal to the local emergency financial assistant loan board.

WATER TRANSMISSION MAIN

ACQUISITION AGREEMENT

BY AND BETWEEN

CITY OF FLINT

AND THE

GENESEE COUNTY DRAIN COMMISSIONER AS COUNTY AGENCY

DATED MAY 12, 2014

ACQUISITION AGREEMENT

THIS ACQUISITION AGREEMENT ("Agreement") is made this 12 day of May, 2014 ("Execution Date"), and effective May 12, 2014 ("Effective Date"), by and between the City of Flint, a Michigan municipal corporation (hereinafter "Flint"), and the Genesee County Drain Commissioner, as County Agency, a public agency pursuant to the County Public Improvement Act of 1939, as amended (the "County Agency"). The Effective Date of this Agreement shall be *contingent upon a condition antecedent that the Agreement* has been reviewed by the City of Flint City Council and no alternative has been proposed and the State of Michigan Department of Treasury has approved this Agreement as required by Act 436 of the Michigan Public Acts of 2012, as amended, which is commonly referred to as the Local Financial Stability and Choice Act. If either the City of Flint City Council or the State of Michigan Department of Treasury fails to approve this Agreement prior to May 1, 2014, then the Agreement shall be effective immediately upon the City of Flint City Council failing to offer an alternative and the Michigan Department of Treasury approving this Agreement.

PREAMBLE

It is the intent of the Parties for Flint to sell to the County Agency the Water Main, subject only to the restrictions more fully set forth in this Agreement, for the mutual consideration set forth in this Agreement for the County Agency's unrestricted use.

RECITALS

A. Flint desires to sell the Water Main to the County Agency; and

B. The County Agency desires to purchase the Water Main from Flint; and

C. The Parties have determined that it is in their respective best interests for the County Agency to acquire, upon the terms and subject to the conditions set forth herein, the Water Main from Flint if the Karegnondi Water Authority constructs a new raw water pipeline from Worth Township, Michigan to Genesee County, which shall furnish raw water to the City of Flint; and

D. In furtherance thereof, it is proposed that the County Agency acquire the Water Main for the mutual consideration set forth in this Agreement.

NOW, THEREFORE, in consideration of the mutual promises and representations set forth in this Agreement, the Parties agree as follows:

ARTICLE I
INTRODUCTORY PROVISIONS; DEFINITIONS

1.1. Adoption of Preamble and Recitals. All of the matters stated in the preamble and recitals of this Agreement are true and correct and are hereby incorporated into the body of this Agreement as through fully set forth in their entirety herein, provided that in cases of

conflict, provisions of this Agreement shall control over matters stated in the preamble and recitals.

1.2. Definitions. The following terms and expressions as used in this Agreement, unless the context clearly shows otherwise, shall have the following meanings:

a. "Closing" means the closing of the transactions contemplated by this Agreement.

b. "Closing Date" means the mutually acceptable date to be scheduled within thirty (30) days after execution of this Agreement or on a date as mutually acceptable to the Parties for the Closing to take place.

c. "County Agency" means the Genesee County Drain Commissioner, as County Agency, Genesee County, Michigan, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended.

d. "Emergency Manager" means an emergency manager or financial emergency manager as defined by law that is appointed by the Governor of the State of Michigan pursuant to law.

e. "Flint" means the City of Flint, Genesee County, Michigan.

f. "Party" or "Parties" means the Genesee County Drain Commissioner, as County Agency, individually, the City of Flint, individually, or the Genesee County Drain Commissioner, as County Agency and the City of Flint, collectively.

g. "Real Property Agreements" means all agreements that affect real property, including, but not limited to, licenses, leases, easements, or similar documents.

h. "Water Main" means the water transmission main as more fully described in **Exhibit A**, including, but not limited to, all appurtenances thereto including any meter pits connected thereto, along with the water contained therein and all drawings, files, laying schedules, records of repairs, maintenance files, repair parts, etc. Including by way of example, and not as a limitation, meter vaults, meters, pumps, air relief valves, sump pumps, electrical connections, communication devices and all other mechanical, electrical, or other equipment used to pump water through the Water Main or bring attention to an emergency situation.

ARTICLE II
THE PURCHASE AND SALE

2.1 Transfer to the County Agency. In accordance with the provisions of this Agreement, in consideration for the payment of the Purchase Price as set forth in Section 2.3 of this Agreement and other good and valuable consideration, and subject to the contingencies set forth in Article 8 and Article 9, Flint shall transfer and convey the Water Main to the County

Agency, effective either when Flint provides the County Agency thirty (30) days written notice of its intent to transfer the Water Main or at 12:01 a.m. local time on July 1, 2014, whichever event occurs first in time, including all rights as Flint may have pursuant and any and all Rights of Way and Easements, copies of which are attached hereto as **Exhibit B**, and other instruments of transfer to be delivered at the Closing, as set forth in Article III of this Agreement, in accordance with the provisions relating to the Closing.

2.2 Acquisition by the County Agency. The County Agency, in reliance upon the covenants and representations of Flint contained herein and the documents provided by Flint, hereby agrees to acquire the Water Main from Flint.

2.3 Purchase Price. As part of the consideration for the transfer and conveyance of the Water Main to the County Agency from Flint, the County Agency shall make a lump sum payment within thirty (30) days from the execution of this Agreement, in a sum equal to Three Million Nine Hundred Eighty-Seven Thousand Seven Hundred Dollars and Zero Cents ($3,987,700.00), inclusive of all interest, fees, charges, or other costs (the "Purchase Price").

ARTICLE III
CLOSING

3.1 Closing. The Closing will take place at the offices of Sargent's Title Company, 625 S. Grand Traverse, Flint, Genesee County, Michigan, on such date as shall be mutually acceptable to the Parties within thirty (30) days after the execution of this Agreement or on a date as mutually acceptable to the Parties.

3.2 Deliveries. At the Closing, the transactions listed below shall occur.

a. The County Agency shall deliver to Flint:

1. A certified letter from the Genesee County Drain Commissioner stating that he has the authority, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, to execute and deliver this Agreement and the transactions contemplated hereby; and

2. An opinion of legal counsel to the County Agency reasonably satisfactory to Flint, providing that the transactions contemplated by this Agreement do not violate the provisions of Act 342 of the Michigan Public Acts of 1939, as amended, or other applicable laws and such additional matters and in form and substance satisfactory to Flint and its counsel; and

3. A certified letter from the Genesee County Drain Commissioner as to the accuracy of its representations and warranties as of the date of this Agreement and as of the Closing and as to its compliance with and performance of its covenants and obligations to be performed or complied with at or before the Closing; and

b. Flint shall deliver to the County Agency:

1. A certified resolution of the City Council of the City of Flint or an Order of the Emergency Manager, if applicable, or both, authorizing the execution and delivery of this Agreement and the transactions contemplated hereby; and

2. An executed bill of sale for all of the Water Main that is tangible personal and real property executed by a representative of Flint authorized to sign the bill of sale or an Order of the Emergency Manager, if applicable, or both; and

3. An Assignment of Rights of Way and Easements, or such other appropriate document or instrument of transfer, as the case may require, and executed by a representative of Flint authorized to sign the bill of sale or an Order of the Emergency Manager, if applicable, or both; and

4. Such other documents and other instruments of transfer and conveyance as may reasonably be needed to complete the transactions contemplated hereby; and

5. A certified letter from the Mayor or Emergency Manager as to the accuracy of its representations and warranties as of the date of this Agreement and as of the Closing and as to its compliance with and performance of its covenants and obligations to be performed or complied with at or before the Closing; and

6. An opinion of legal counsel of Flint, reasonably satisfactory to the County Agency, providing that the transactions contemplated by this Agreement do not violate the City Charter of Flint, local ordinances or laws, and such additional matters and in form and substance satisfactory to the County Agency and its counsel and

3.3 Transfer of Operation. The County Agency took over maintenance and operation of the Water Main pursuant to the MOU between the parties dated April 29, 2014, and it is understood by the parties that the County Agency shall continue to operate and maintain the water main from this date forward.

3.4 Expenses. Flint and the County Agency shall each bear their own expenses incurred by them in connection with the transactions contemplated by this Agreement, including without limitation, consultants' fees, legal fees and accounting fees, whether or not such transaction is consummated.

3.5 Closing Costs. If there are any costs associated with the Closing, including costs to be paid to the title company, filings, recording costs, or other costs, fees, or expenses, the costs shall be paid by the County Agency.

ARTICLE 4
REPRESENTATIONS AND WARRANTIES OF FLINT

Flint makes the following representatives and warranties to the County Agency:

4.1 Corporate Organization. Flint is a municipal corporation duly organized, validly existing and in good standing under the laws of the State of Michigan.

4.2 Authorization. Flint or the Emergency Manager has the requisite power and authority to execute and deliver this Agreement and to consummate the transactions contemplated hereby and thereby. Assuming due and valid authorization, this Agreement will constitute a legal, valid and binding obligation of Flint, enforceable against Flint in accordance with its terms, except as the enforcement thereof may be limited by applicable principles of bankruptcy, insolvency, reorganization, moratorium, or similar laws affecting the rights of creditors and subject to general principles of equity.

4.3 Easements and Rights of Way.

a. **Exhibit C** identifies all of the real property occupied by the Water Main.

b. Upon reasonable title search and review provided by the County Agency to Flint of all of the real property occupied by the Water Main, Flint possesses all necessary, permanent, perpetual and transferable real property rights including easements, licenses or rights of way by prescription, necessity, implication or acquiescence necessary for the use, routine operation, and maintenance of the Water Main, except as disclosed on **Exhibit D.**

c. Flint has good and marketable title to the Water Main.

d. As of the Execution Date, there are no pending or threatened disputes or pending or threatened litigation with respect to any real property rights pertaining to the Water Main.

e. Flint agrees to provide access to the County Agency to any and all documents that are in Flint's possession regarding the Water Main. These documents include, but are not limited to, as built drawings, shop drawings, maintenance records, land records and easements, and any other document that relates to the

Water Main. The County Agency is free to take possession of the documents for the limited purpose of making any copies that are deemed necessary in the opinion of the County Agency. All original documents shall be returned by the County Agency to Flint in a timely manner.

4.4 WATER MAIN. **THE WATER MAIN SHALL BE CONVEYED BY FLINT TO THE COUNTY AGENCY IN "AS IS", "WHERE IS" AND "WITH ALL FAULTS" PHYSICAL CONDITION, WITH NO ADDITIONAL WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE PHYSICAL CONDITION OF THE WATER MAIN THAT EXTEND BEYOND THE WARRANTIES EXPRESSLY STATED IN THIS AGREEMENT. EXCEPT FOR ANY EXPRESS WARRANTIES STATED IN THIS AGREEMENT, THE WATER MAIN SHALL BE CONVEYED WITH NO EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR USE.**

4.5 Litigation. As of the Execution Date there is no action, suit or proceeding pending or threatened against or affecting Flint before any governmental entity in which there is a reasonable possibility of an adverse decision which could have a material adverse effect upon the ability of Flint to perform its obligations under this Agreement or which in any manner questions the validity of this Agreement.

4.6 Water Main Parts and Equipment. Flint agrees that it will provide to the County Agency any spare parts or equipment which, in the sole discretion of Flint, may only be used exclusively on the Water Main.

ARTICLE 5
REPRESENTATIONS AND WARRANTIES OF THE COUNTY AGENCY

The County Agency makes the following representations and warranties to Flint and delivered to Flint on Execution Date, a copy of which is attached hereto:

5.1 Corporate Organization. The County Agency was established pursuant to Act 342 of the Michigan Public Acts of 1939, as amended. As County Agency, it is organized and validly existing under the laws of the State of Michigan and has all requisite power and authority to execute, deliver and perform this Agreement and to consummate the transactions contemplated hereby.

5.2 Authorization. The County Agency has the requisite power and authority to execute and deliver this Agreement and to consummate the transactions contemplated hereby and thereby. This Agreement will constitute a legal, valid and binding obligation of the County Agency, enforceable against the County Agency in accordance with its terms, except as the enforcement thereof may be limited by applicable principles of bankruptcy, insolvency, reorganization, moratorium, or similar laws affecting the rights of creditors and subject to general principles of equity.

5.3 No Conflict. The execution, delivery and performance by the County Agency of this Agreement, the compliance by the County Agency with any of the provisions hereof and thereof, and the consummation by the County Agency of the transactions contemplated hereby and thereby: (i) do not violate any Applicable Law; (ii) do not require the consent,

approval, clearance, waiver, order or authorization of any person, organization, or entity; and (iii) do not conflict with, or result in any breach of, or default or loss of any right under (or an event or circumstance that, with notice or the lapse of time, or both, would result in a default), or the creation of any encumbrance pursuant to, or cause or permit the acceleration prior to maturity of any amounts owing under any indenture, mortgage, deed of trust, lease or other agreement to which the County Agency is a party, which failure, violation, conflict or breach would, in the aggregate, materially hinder or impair the consummation of the transactions contemplated by this Agreement.

5.4 Litigation. As of the Execution Date, there is no action, suit or proceeding pending or threatened against or affecting the County Agency before any governmental entity in which there is a reasonable possibility of an adverse decision which could have a material adverse effect upon the ability of the County Agency to perform its obligations under this Agreement or which in any manner questions the validity of this Agreement.

5.5 Due Diligence and Inspection. The County Agency acknowledges that it is being afforded the opportunity to conduct due diligence and investigation with respect to the transaction contemplated by this Agreement. The County Agency represents and warrants that it has conducted any and all such legal, factual, and other examinations, inquiries, investigations, and inspections, including conducting any tests, studies and examinations, that it, in its sole discretion, has determined necessary to complete such due diligence inspection to determine that the subject matter of this Agreement is suitable for the County Agency's intended use.

5.6 Environmental Matters. The County Agency represents and warrants that it has conducted any and all such legal, factual, and other examinations, inquiries, investigations, and inspections, including conducting any tests, studies and examinations, that it, in its sole discretion, has determined necessary to complete such due diligence inspection to have full knowledge of the environmental condition of the subject matter of this Agreement. County Agency shall enter into this Agreement subject to any and all environmental conditions present upon the subject matter of this Agreement.

5.7 Emergency Water Supply. The County Agency warrants that it will provide, to the extent the Detroit Water and Sewerage Department has available capacity treated water through the water main that is the subject matter of this Agreement in an emergency situation to Flint until such time as the Karegnondi Water Authority Water Transmission Pipeline construction is completed (which is estimated to be completed by May 2017) and the Karegnondi Water Authority is providing raw water to its customers.

The emergency supply of treated water to the Flint by the County Agency during the construction of the Karegnondi Water Authority Water Transmission Pipeline shall be at the prevailing rate and any additional charges, fees, special charges, and penalties, as billed by the Detroit Water and Sewerage Department to the County Agency.

If Flint shall need an emergency water supply after the Karegnondi Water Authority Water Transmission Pipeline has been installed and is operational, the County Agency will provide, to the extent the County Agency has available capacity, treated water through the water main that is the subject matter of this Agreement in an emergency situation to Flint. The emergency supply of treated water to Flint by the County Agency after the Water

Transmission Pipeline has been installed and is operational, shall be at the prevailing rate and any additional charges, fees, special charges, and penalties, if applicable, as billed by the Detroit Water and Sewerage Department to the County Agency.

ARTICLE 6
COVENANTS OF FLINT

Flint covenants and agrees with the County Agency as follows:

6.1 Operation and Maintenance of the Water Main until Closing. Between the Execution Date of this Agreement and the Effective Date of this Agreement, Flint shall:

a. Operate the Water Main in the ordinary course of business; and

b. Maintain all books and records relating to the operation of the Water Main in the ordinary course of business; and

c. Fix any known breaks or leaks in the Water Main, except those set forth on **Exhibit F**; and

c. Promptly notify the County Agency of any emergency or other change in the normal course relating to the Water Main (or communications indicating that the same may be contemplated.

6.2 Litigation and Claims. Flint shall promptly inform the County Agency in writing of any Claims of which Flint is or becomes aware that are or might reasonably be expected to become the subject of litigation affecting the Water Main or the transactions contemplated by this Agreement.

6.3 Notice of Changes. Flint shall inform the County Agency in writing if it becomes aware that any representation or warranty made by Flint in this Agreement has ceased to be accurate or if Flint becomes aware of the occurrence of any breach of any covenant or other agreement required by this Agreement to be performed or complied with by Flint.

ARTICLE 7
COVENANTS OF THE COUNTY AGENCY

The County Agency hereby covenants and agrees with Flint as follows:

7.1 Cooperation. Subject to the terms and conditions of this Agreement, the County Agency shall cooperate with Flint to use its best efforts to secure all necessary consents, approvals, authorizations, exemptions and waivers from all persons and entities as shall be requested by Flint or required to be obtained in order to consummate the transactions contemplated hereby.

7.2 Litigation and Claims. The County Agency shall promptly inform Flint in writing of any claims (or communications indicating that the same may be contemplated) of which the County Agency is or becomes aware that are or might reasonably be expected

to become the subject of litigation affecting the Water Main or the transactions contemplated by this Agreement.

7.3 Notice of Changes. The County Agency shall inform Flint in writing if it becomes aware that any representation or warranty made by the County Agency in this Agreement has ceased to be accurate or if the County Agency becomes aware of the occurrence of any breach of any covenant or other agreement required by this Agreement to be performed or complied with by the County Agency.

ARTICLE 8
CONDITIONS AND OBLIGATIONS OF FLINT

The obligations of Flint to consummate the transactions contemplated by this Agreement shall be subject to the satisfaction (or waiver by Flint) on or prior to the Closing of all of the following conditions:

8.1 Accuracy of Representations and Warranties. Except as otherwise noted in this Agreement, the representations and warranties of Flint set forth in this Agreement shall be true and correct in all material respects as of the date when made and as of the Closing.

8.2 Performance of Covenants and Agreements. Flint shall have duly performed and complied in all material respects with the covenants, agreements and conditions required by this Agreement to be performed or complied with by it prior to or at the Closing. None of the events or conditions entitling the County Agency to terminate this Agreement under Article 10 hereof shall have occurred and be continuing.

8.3 Consents. Any consent required for the consummation of this purchase and sale under any agreement, contract, law, license or other instrument described in any exhibit hereto or referred to herein, or for the continued enjoyment by the County Agency of any benefits of such agreement, contract, license or other instrument after the Closing, which consent Flint is specifically obligated to obtain pursuant to this Agreement shall have been obtained and be effective as set forth in this Agreement.

8.4 Governmental Approvals. All requisite regulatory approvals, if any, shall have been obtained or made and shall be in full force and effect. There shall be no injunction, restraining order or decree of any nature that restrains or prohibits the transactions contemplated by this Agreement.

8.5 No Proceedings. Since the Execution Date of this Agreement, there shall not have been commenced or threatened against Flint, including any proceeding (a) involving any challenge to, or seeking damages or other relief in connection with, the transactions contemplated by this Agreement, or (b) that may have the effect of preventing, delaying, making illegal, imposing limitations or conditions on or otherwise interfering with any of the transactions contemplated by this Agreement.

8.6 Documents. Flint shall have received from the County Agency all of the documents identified in Sections 3.2.a.1, 3.2.a.2, and 3.2.a.3 of this Agreement.

ARTICLE 9
CONDITIONS AND OBLIGATIONS OF THE COUNTY AGENCY

The obligations of the County Agency to consummate the transactions contemplated by this Agreement shall be subject to the satisfaction (or waiver by the County Agency) on or prior to the Closing of all of the following conditions:

9.1 Accuracy of Representations and Warranties. Except as set forth in the Exhibits, the representations and warranties of the County Agency set forth in this Agreement shall be true and correct in all material respects as of the date when made and at and as of the Closing.

9.2 Performance of Covenants and Agreements. The County Agency shall have duly performed and complied in all material respects with the covenants, agreements and conditions required by this Agreement to be performed or complied with by it prior to or at the Closing. None of the events or conditions entitling the County Agency to terminate this Agreement under Article 10 hereof shall have occurred and be continuing.

9.3 Consents. Any consent required for the consummation of the transactions contemplated by this Agreement under any agreement, contract, license or other instrument described in any schedule or exhibit hereto or referred to herein, which consent the County Agency is specifically obligated to obtain pursuant to this Agreement shall have been obtained and shall be effective as set forth in this Agreement.

9.4 Governmental Approvals. All requisite regulatory approvals shall have been obtained or made and shall be in full force and effect. There shall be no injunction, restraining order or decree of any nature that restrains or prohibits the transactions contemplated by this Agreement.

9.5 No Proceedings. Since the Execution Date of this Agreement, there shall not have been commenced or threatened against the County Agency any proceeding (a) involving any challenge to, or seeking damages or other relief in connection with, the transactions contemplated by this Agreement, or (b) that may have the effect of preventing, delaying, making illegal, imposing limitations or conditions on or otherwise interfering with any of the transactions contemplated by this Agreement.

9.6 Documents. The County Agency shall have received the documents identified in all of the Sections of this Agreement to be provided by Flint.

ARTICLE 10
TERMINATION PRIOR TO CLOSING

10.1 Termination.

a. This Agreement may be terminated at any time prior to the Closing:

1. By the mutual written consent of Flint and the County Agency;

2. By Flint in writing if the County Agency fails to perform any condition, obligation of any provision of this Agreement and fails to correct the non-performance within five (5) days (or other period of time as mutually agreed to by the Parties) of being notified by Flint;

3. By the County Agency in writing if Flint fails to perform any condition, obligation of any provision of this Agreement and fails to correct the non-performance within five (5) days (or other period of time as mutually agreed to by the Parties) of being notified by the County Agency;

4. By Flint if the transaction is not approved by all its governing body, the emergency manager, or the Treasurer of the State of Michigan, if such approval is required;

5. By either Party, if the other Party fails to timely satisfy those conditions set forth in Article 8 or Article 9, as appropriate.

b. This Agreement may be terminated by the County Agency in writing on or before May 1, 2014, if it shall not have been satisfied in its sole discretion with the results of the County Agency's continuing due diligence investigations of the Water Main, including, without limitation, with respect to all operational, financial, environmental, legal and accounting matters.

c. This Agreement may be terminated by either party upon written notice if the Karegnondi Water Authority fails to construct the proposed Water Main from Worth Township to Genesee County.

d. This Agreement may be terminated by either party upon written notice if the cost of construction of the Water Main from Worth Township to Genesee County by the Karegnondi Water Authority exceeds the limitations set forth in the Financing Agreement between the Karegnondi Water Authority, Flint, and the County Agency. A unit is defined as one million gallon per day, U.S. Liquid Measure.

e. In the event of any termination pursuant to this Article 10, any amounts paid by the County Agency to Flint or from Flint to the County Agency shall be refunded within thirty (30) days. In the event that either party to this Agreement fails to refund any amounts paid within thirty (30) days, the amount due and owing shall

accumulate interest at the rate of 1.5% per month, until such time as the debt is paid.

10.2 Effect on Obligations. Termination of this Agreement pursuant to this Article 10 shall terminate all obligations of the Parties hereto; provided, however, that termination pursuant to Sections 10.a.2 or 10.a.3 hereof shall not relieve any defaulting party from any liability to the other party hereto resulting from such failure to perform. Notwithstanding the foregoing, any and all existing agreements (other than this Agreement) between Flint and the County Agency which are related to the Water Main shall remain in full force and effect following any termination of this Agreement unless and until such existing agreements are otherwise terminated pursuant to the terms thereof.

ARTICLE 11
TERMINATION AFTER CLOSING BY COUNTY AGENCY

This Agreement may be terminated at the sole discretion of the County Agency after Closing, if Flint fails to provide the County Agency with an easement, license, or similar document for the portion of the Water Main that is located on private property as identified in **Exhibit D,** prior to Friday, June 30, 2015, unless Flint has filed an action in a court of competent jurisdiction to condemn the property or a portion of the property necessary to ensure that the County Agency has access to the Water Main under the private property to replace, repair, maintain, or perform any other action commonly associated with the ownership of a water main.

In the event of a termination by the County Agency pursuant to this ARTICLE 11, the County Agency shall be entitled to a complete refund or repayment of any amounts paid to Flint pursuant to ARTICLE 2, Section 2.4 of this Agreement. If this Agreement is terminated by the County Agency for any reason set forth herein, then Flint shall immediate become responsible for the operation, maintenance and administration of the Water Main beginning at 12:01 a.m. (local time) the next business day after the notice of termination is received by Flint.

After the County Agency receives all amounts to be refunded or repaid by Flint as set forth in the preceding paragraph, the County Agency shall execute any and all documents necessary to return title to the Water Main to Flint. Additionally, the County Agency shall assign or transfer any property easements and execute any other documents necessary to fully transfer the Water Main back to Flint as if this Agreement did not exist. Flint shall be responsible for all costs of recording the documents and any closing costs in the event of a termination pursuant to this ARTICLE 11 by the County Agency.

ARTICLE 12
REMEDIES FOR BREACHES OF THIS AGREEMENT

12.1 Survival of Representations and Warranties. All of the representations, warranties and covenants of the County Agency and Flint contained in this Agreement and the Exhibits

hereto shall survive the Closing and continue in full force and effect forever thereafter (subject only to any applicable statutes of limitations applicable to their breach).

12.2 Remedies Generally. It is not intended hereby to specify (and this Agreement shall not be considered as specifying) an exclusive remedy for any default, but all such other remedies existing at law or in equity may be availed of by any Party hereto and shall be cumulative. The Parties agrees that failure in the performance of this Agreement cannot be adequately compensated in money damages alone. In the event of any default by a Party, the other Party shall have available to it the equitable remedy of mandamus and specific performance in addition to any other legal or equitable remedies which may also be available. No waiver or waivers of any breach or default (or any breaches or defaults) by any Party hereto or of performance by any other Party of any duty or obligation hereunder shall be deemed or construed to be a waiver of subsequent breaches or defaults of any kind, character or description, under any circumstance.

12.3 Remedies for Breach of Representations, Warranties and Covenants. If a Party sustains any losses because the representations or warranties provided by the other Party are incorrect or untrue or because the other Party has breached its covenants given herein, the other Party shall be liable for all losses incurred by the Party to cure such representations, warranties or covenants, including attorney fees. In addition or in the alternative, the Party may require the other Party to take such actions as required to cure such misrepresentations, warranties or breached covenants, within three (3) months or other amount of time mutually agreed to by the Parties.

12.4 Limitations on Certain Remedies.

a. The injured Party will take reasonable steps to mitigate all losses relating to a claim, including availing itself of any defenses, limitations, and will provide such evidence and documentation of the nature and extent of a claim as may be reasonably requested by the other Party. The injured Party's reasonable steps include the reasonable expenditure of money to mitigate or otherwise reduce or eliminate any loss or expense for which a remedy would otherwise be due under this ARTICLE 12, and the reimbursing Party will reimburse the injured Party for the injured Party's reasonable expenditures, including attorney fees and costs.

b. Notwithstanding anything contained to the contrary in any other provision of this Agreement, except in cases of a Party's gross negligence, willful misconduct or fraud, the obligations of each Party under Sections 12.2 and 12.3, and the recovery by any injured Party of any liabilities suffered or incurred by it as a result of any breach or non-fulfillment by a Party or any of its representations, warranties, covenants, agreements or other obligations under this Agreement, shall be limited to actual damages.

12.5 Survival of Remedies. The rights and obligations to remedies given in this Article 11 shall survive the Closing indefinitely.

ARTICLE 13
TERMINATION OF WATER SUPPLY CONTRACTS, AMENDMENTS, AND WAIVER OF NOTICE TO TERMINATE

Flint and Genesee County by and through its Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, have executed several Agreements in the past that shall be affected upon the execution of this Agreement. By executing this Agreement, Flint and the Genesee County by and through its Drain Commissioner, as County Agency, pursuant to Act 342 of the Michigan Public Acts of 1939, as amended, hereby expressly mutually terminate the following agreements in their entirety and further expressly waive any notice provisions set forth therein:

1. Agreement between the CITY OF FLINT, a Michigan Home Rule City Corporation and the COUNTY OF GENESEE, a Michigan County Corporation, by and through the Genesee County Drain Commissioner, having been designed as such by appropriate legislation in compliance with Act 342 of the Public Acts of 1939, and any subsequently named Agent for the County of Genesee dated June 28, 1972 (hereinafter "Water Agreement"); and

2. Agreement to amend the Water Agreement dated March 5, 1981; and

3. SUPPLEMENTAL AGREEMENT AND AMENDMENT TO CITY/COUNTY WATER AGREEMENT, dated March 31, 1988; and

4. AGREEMENT between the CITY OF FLINT, a Michigan municipal corporation, and the GENESEE COUNTY DRAIN COMMISSIONER, a designated County Agency dated February 20, 2001; and

5. 3rd AMENDMENT TO 1973 CITY/COUNTY WATER SUPPLY AGREEMENT, dated October 21, 2003, between the City of Flint, a Michigan municipal corporation and the County of Genesee, a political subdivision of the State fo Michigan and the Genesee County Dain Commissioner, the County Agency designated by the Genesee County Board of Commissioners pursuant to Act 342 of the Public Acts of 1939, as amended; and

6. 4th AMENDMENT TO 1973 CITY/COUNTY WATER SUPPLY AGREEMENT, dated December 30, 2011, between the City of Flint, a Michigan municipal corporation and the County of Genesee, a political subdivision of the State of Michigan by and through the Genesee County Drain Commissioner, the County Agency designated by the Genesee County Board of Commissioners pursuant to Act 342 of the Public Acts of 1939, as amended.

7. Any other Agreement or part of Agreement that directly conflicts with this Agreement and the intent contained therein as mutually agreed upon in writing by the parties hereto.

ARTICLE 14
MISCELLANEOUS

14.1 Construction. The Parties have participated jointly in the negotiation and drafting of this Agreement. In the event an ambiguity or question of intent or interpretation arises, this Agreement shall be construed as if drafted jointly by the Parties and no presumption or burden of proof shall arise favoring or disfavoring any Party by virtue of the authorship of any of the provisions of this Agreement. Any reference to any federal, state, local, or foreign statute or law shall be deemed also to refer to all rules and regulations promulgated there under, unless the context requires otherwise. The word "including" shall mean including without limitation.

14.2 Incorporation of Exhibits. The following Exhibits attached hereto are incorporated herein by reference and made a part hereof:

Exhibit A: Description of Water Main

Exhibit B: Rights of way and easements held by Flint

Exhibit C: Real property occupied by the Water Main

Exhibit D: Flint's disclosure of real property occupied by the Water Main that Flint does not have the necessary transferable easement or real property rights for the use, routine, operation, and maintenance of the Water Main

Exhibit E: Flint's disclosure of any breaks or leaks in the Water Main that are known by Flint and that have not been repaired

14.3 Entire Agreement. This Agreement constitutes the sole understanding of the Parties hereto with respect to the matters provided for herein and supersedes any previous agreements and understandings between the Parties with respect to the subject matter hereof. No amendment, modification or alteration of the terms or provisions of this Agreement shall be binding unless the same shall be in writing and duly executed by Flint and the County Agency and in compliance with Section 14.9.

14.4 Successors and Assigns. This Agreement will inure to the benefit of and be binding upon Flint and the County Agency and their respective successors and assigns. This Agreement and any of the rights, interests or obligations hereunder may be assigned by either Party hereto without the prior written consent of the other Party hereto.

14.5 Invalidity. If any term or other provision of this Agreement is invalid, illegal or incapable of being enforced by any rule of law, or public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect so long as the practical, economic and legal substance of the transactions contemplated hereby is not affected in any manner materially adverse to any Party. Upon such determination

that any term or other provision is invalid, illegal or incapable of being enforced, the Parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the Parties as closely as possible in an acceptable manner to the end that transactions contemplated hereby are fulfilled to the extent possible. Invalid provisions shall be severed from this Agreement.

14.6 Counterparts; Facsimile Signatures. This Agreement may be executed in one or more counterparts, each of which shall for all purposes be deemed to be an original and all of which shall constitute the same instrument. This Agreement may be executed by facsimile signatures that shall be considered originals.

14.7 Headings. The headings of the articles, sections and paragraphs of this Agreement and of the Exhibits hereto are included for convenience of reference only and in no way define, limit or describe the scope of intent of any provision of this Agreement.

14.8 Construction and References. Words used in this Agreement, regardless of the number or gender specifically used, shall be deemed and construed to include any other number, singular or plural, and any other gender, masculine, feminine or neuter, as the context shall require. Unless otherwise specified, all references in this Agreement to articles, sections, paragraphs or clauses are deemed references to the corresponding articles, sections, paragraphs or clauses in this Agreement, and all references in this Agreement to exhibits are references to the corresponding exhibits attached to this Agreement.

14.9 Modification and Waiver. Any of the terms or conditions of this Agreement may be waived in writing at any time by the Party that is entitled to the benefits thereof. No waiver of any of the provisions of this Agreement shall be deemed to or shall constitute a waiver of any other provisions hereof (whether or not similar). Oral modifications of this Agreement are not permitted. Modification or amendment of this Agreement shall require the written approval of the Genesee County Drain Commissioner and the Flint City Council.

14.10 Addresses and Notice. Unless otherwise provided herein, any notice, communication, request, reply or advice (herein severally and collectively, for convenience, called "Notice") herein provided or permitted to be given, made or accepted by any party to any other party must be in writing and may be given or be served by depositing the same in the United States mail postpaid and registered or certified and addressed to the party to be notified, with return receipt requested, or by delivering the same to an officer of such party, or by prepaid telegram when appropriate, addressed to the party to be notified. Notice deposited in the mail in the manner described above shall be conclusively deemed to be effective, unless otherwise stated herein, from and after the expiration of three (3) days after it is so deposited. Notice given in any other manner shall be effective only if and when received by the party to be notified. For the purposes of notice, the addresses of the parties shall, until changed as hereinafter provided, be as follows:

If to Flint, to:

City of Flint
Attn: CHIEF LEGAL OFFICER
1101 South Saginaw Street
Flint, Michigan 48502

If to the County Agency, to:

Genesee County Drain Commissioner's Office
Division of Water and Waste Services
Attn: Drain Commissioner
G-4610 Beecher Road
Flint, Michigan 48532

The Parties hereto shall have the right from time to time and at any time to change their respective addresses and each shall have the right to specify as its address any other address by at least fifteen (15) days written notice to the other party hereto.

14.11 Governing Law; Interpretation. This Agreement shall be construed in accordance with and governed by the laws of the State of Michigan. The Parties hereto (a) consent to the personal jurisdiction of the state courts located in Flint, Michigan or federal courts located in Southeastern Michigan in connection with any controversy related to this Agreement including, but not limited to, counterclaims or third party demands raised as a result of third party counterclaims initiated in any other jurisdiction; (b) waive any argument that venue in any such forum is not convenient; (c) agree that any litigation initiated by the County Agency or Flint in connection with this Agreement may be brought in either the state court located in Flint, Michigan or federal court located in Detroit, Michigan; and (d) agree that a final judgment in any such suit, action or proceeding shall be conclusive and may be enforced in other jurisdictions by suit on the judgment or in any other manner provided by law.

14.12 No Third-Party Beneficiaries. This Agreement is not intended to confer upon any person or entity, other than the Parties hereto, any rights or remedies of any kind or nature whatsoever.

14.13 Freedom of Information Act Requests. Flint agrees that if it receives a request for any documents relating to this Agreement, including Freedom of Information Act requests, Flint shall forward a copy of the request to the County Agency.

The County Agency agrees that if it receives a request for any documents relating to this Agreement, including Freedom of Information Act requests, the County Agency shall forward a copy of the request to Flint.

14.14 Interpretation. For purposes of interpretation of this Agreement, neither the County Agency nor Flint shall be deemed to have been the drafter of this Agreement.

14.15 Negotiated Agreement. This Agreement has been prepared and negotiations have occurred in connection with said preparation pursuant to the joint efforts of the Parties. This Agreement therefore shall not be construed against any Party to this Agreement.

ARTICLE 15
INDEMNIFICATION/HOLD HARMLESS

If at any time while Flint is securing legal access to any property identified in Exhibit D a the Water Main malfunctions, leaks, or requires the County Agency to enter onto the property to repair the Water Main or perform another necessary service, and in the opinion of the County Agency the malfunction or leak may wait until access to the property is secured, Flint shall indemnify/hold harmless the County Agency for any water loss, damage, and/or environmental issues that may result from the malfunction or leak.

Any amount of water loss shall be determined by the County Agency with the assistance of Flint. The amount of loss shall be based on past experiences and practice. The County Agency shall invoice Flint for the total loss from the date the malfunction or leak was discovered until the repair has been completed. Flint shall timely pay the invoice pursuant to the terms stated in the invoice.

If the Water Main malfunction or leak requires immediate entry onto the property identified in Exhibit D, Flint shall provide all of the necessary resources necessary, including, but not limited to, an immediate payment for an easement, immediately filing an action for condemnation, or requesting a court of competent jurisdiction to provide a right of entry, to secure legal access to the property to repair any malfunction or leak.

It is expressly understood by the Parties hereto, that until such time as Flint secures access to the property identified in Exhibit D, Flint shall be responsible for any and all loss that is the result of a malfunction or break of the Water Main under the property identified in Exhibit D.

In Witness Whereof, the Parties hereto have executed this Agreement as of the date first above written.

Attention Michigan State Police and Governor's Office: please add your agenda items and share with the group. These additions, once received, will become part of the on-going agenda.

City of Flint Wednesday 9:00am Phone Conference Agenda
November 12, 2014 CANCELLED

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD –
      i. The final draft report for the evaluation of both the Police Department has been received. We are awaiting the final draft of the Fire Department.
      ii. Completing revisions to SRMS MOA.
      iii. The Citizens Radio Patrol was operating the evening before Halloween. Only two fires were reported that evening – the lowest in recent memory.
      iv. Emergency Manager Earley is setting up a meeting with MSP Post and District Commanders to prepare for transition and keep momentum going with COF PD and MSP. The ICMA Public Safety Study will be included for discussion.
      v. Lock-up financial issue: City submitted the September invoice submitted by the County in the amount of $248,819.02; the State informed us that the current contract ended September 30, 2014. The State has requested another contract with the County. Sheriff Pickell informed Chief Tolbert that he is in the process of finalizing the contract/budget and will ensure the City receives a copy before he submits to MDOC. Treasury, please let us know if MDOC plans on covering the expenditures from September.
   b) FFD
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation Status
   b) The legislative initiative to allow a vote on a local income tax increase will be handled by Mayor Walling who will be working through the Governor's Office and H. Hollins. A meeting is being scheduled with H. Hollins, Mayor Walling, Rep. Stanley, D. Earley, and J. Ambrose.
   c) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire
   b) Next benchmark is audit.

c) Fund balance ordinances including OPEB and BSF have been drafted. Also drafted ordinance for budgeting and strategic planning process will be reviewed by Finance and Admin. Cmte. at the December meeting.

5) City Council Update

a) The Council meeting schedule has been revised for the balance of the year to accommodate election of officers and the November and December holidays.
b) Two Council seats will become vacant on January 1, 2015. An appointment process is under consideration by the EM. P.A. 436 will guide the process which could involve direct EM appointment or collaborative effort with City Council.

6) Charter Review Commission

a) Three of the six charter revision ballot proposals passed: establishment of a Charter Review Commission; an add to the current charter regarding financial best practices, and a reduction in the number of Mayoral appointees from 10 to 5.
b) Notice has been sent out on new timing for the election of commissioners. See attached press release. Election will be held in May 2015.

7) **Water Issues**

a) General Motors Water Issues – working through lawyers at this point. We are close to a final agreement regarding their level as a customer with the City of Flint.
b) A meeting with the Department of Environmental Quality was held on October 29. A number of steps for continued support were discussed. More follow-up is planned. We are awaiting action from the DEQ on getting a message of support out to the public.

8) Messaging

a) A plan is being developed to present to the community at-large and to the various interest groups (i.e. business, investors, foundations) the background of the financial emergency, the actions taken and next steps to emerge from receivership. This will be an on-going item for discussion.
b) Starting a new communication strategy with an EM press briefing the afternoon of a Council meeting or important Committee meeting.
c) Hurley Hospital Valuation City - beginning regular meetings with the Hurley leadership to identify strategy beneficial both Hurley and the City of Flint.
d) Deputy Finance Director has resigned. Need to develop an internal plan for succession and filling vacancies for the newly appointed City Administrator. These will also need to include the City HR Director who is the HR finalist for the Flint Community Schools.

9) 9-1-1 Reconsolidation Plan

a) The Genesee County 9-1-1 Consortium has voted to accept Flint's request to join. Consolidation is expected to be complete by July 1, 2015. Mayor Walling has been

appointed the City's representative on the Membership Board. Work is progressing to complete merger before July 1, 2015.

b) C-GAP award for 9-1-1 Tower will have ~$400,000 balance. Would like to use for 9-1-1 consolidation expenses.

10) Recruitment and Selection of City Administrator/Manager

a) Provide guidance on several considerations: duration of appointment, contract, consistent with TAB, working with TAB, etc. – Finalize timeline after January 1, 2015.

b) Five finalist candidates will be interviewed today. The Recruitment Advisory Committee includes: Mayor Walling, Councilwoman Galloway, Jerry Ambrose, Randy Byrne, Pastor Al Harris - Chairman of the Concerned Pastors for Social Action, Steve Landaal – a Flint resident and business owner, and Emergency Manager Earley.

11) Other Items

Importance: High

All—

Please see below from Egan. This is essentially the same "?" Nancy Kaffer asked of Jeremy a couple weeks back. Intend to say something along the lines of the following...please advise.

The Tucker-Young report offered an initial perspective on the situation, but as additional information was received and considered by the city, city officials determined that KWA offered the best long-term solution for Flint. As has been noted previously, all involved, the mayor and city council, believed the move to KWA was appropriate and supported the move.

As we have discussed previously, consideration of the development of a Flint-area/Genesee County water system had been on-going since the early 2000's and the City of Flint had been in discussions about joining a new system for much of that time.

To: Stanton, Terry A. (Treasury) <StantonT@michigan.gov>
Subject: Flint water

Terry attached is the City of Flint Water Supply Assessment, a February 2013 study commissioned by the state treasurer and carried out by Tucker, Young, Jackson, Tull Inc.
Why did the state and city opt to split with DWSD and go with KWA when this study found it would be more costly to do so?

(From p. 17) "Based on the analysis, it is prudent to assume the KWA water supply option costs would be somewhere between the KWA-1 and KWA-2 options. Therefore, the analysis indicates that the two DWSD options of supplying 8 MGD on a maximum day and up to 8 MGD on average are the least cost options for Flint. These options allow Flint to maximize the use of existing assets; the City of Flint's (the Flint WTP) and DWSD's (the existing 72-inch main)."

QUARTERLY REPORT TO THE STATE TREASURER REGARDING THE FINANCIAL CONDITION OF THE CITY OF FLINT

October 15, 2014

This quarterly report covers the period from July 1, 2014 through September 30, 2014 and addresses the financial condition of the City of Flint.

Per P.A. 436 Section 9 (MCL141.1549) requires that you submit quarterly reports to the State Treasurer with respect to the financial condition of your local government, secondly, a copy to each state senator and state representative who represents your local government. In addition, each quarterly report shall be posted on the local government's website within 7 days after the report is submitted to the State Treasurer.

Status of the Financial Condition of the City of Flint
July 1, 2014 through September 30, 2014

The City of Flint has adopted a biennial budget for fiscal years 2015 and 2016, and is committed to ongoing review of revenues and expenses.

Summary of FY15 First Quarter and FY 15 Budget Status

In summary, at the end of the 1st quarter, the financial outlook for the remaining FY15 appears to be on track. In total, revenues and expenditures are generally meeting expectations. The City continues to make timely pension contributions and healthcare premium payment for both active employees and retirees. (Attachment A: Summary and Revenue & Expense Report 1st Quarter FY15)

Some further observations on the current budget status:

- In the General Fund, actual revenues are just above 20% of budgeted revenues. At the time of the report, however, the City had not received its portion of State Shared Revenues, and when those revenues are received (approximately $2.4 million), they will be accrued back to the 1st quarter.
- General Fund expenditures are reported at 22% of the budgeted expenditures, in line with expectations. However, it has been discovered that $13,000 in communications expenses was inadvertently deleted from the District Court budget. It will be necessary to consider an adjustment to the District Court budget to address this shortfall.
- Also, we continue to monitor the personnel expenses in the Police and Fire budgets to determine the budgetary impact that reducing staffing levels through attrition rather than layoffs at the beginning of the year will have. It appears that attrition is moving staffing levels down to the budgeted levels, with Fire already at its reduced level of 75, and Police currently at 121 (VERIFY), with a target of 115. By the end of the second quarter we anticipate that the reduced levels will be met by then and in addition, we will have the results of the ICMA organizational and staffing study. We will also be beginning to receive a portion of the $1 million allocated for police and fire expenditures in the state budget. We presently anticipate that these funds will be sufficient to offset any shortfall in the personnel line items in these budgets. With the second quarter report, we will provide any necessary budget amendments in these areas.
- Special Revenue Funds, Major and Local Street Funds are operating below budgeted revenues and expenditures. Major Streets, Fund 202, revenues are down due to timing in which State revenues of the Gas and Weight Tax allocations have not been received as of the date of the report. Budgets in the Grant Funds, Funds 274, 295, and 296 reflect timing differences as well. The revenues in these funds have not been received as of the date of the report. In addition, it will be necessary to create a budget for Fund 297 to reflect the final expenditure of a COPS Hiring Grant, with funds carried over into the FY15 budget year.
- Revenues in the Building Safety and Inspections Fund (Fund 542) are coming in higher than anticipated for the first quarter of the year. This was due largely to

the new construction of the paint shop on the General Motor's property expansion.

- Revenues in the Water and Sewer funds are coming in at 19% and 16% respectively in comparison to the budgeted totals. At the same time, expenditures are coming in a 13% and 11% of the budgeted totals. It appears that the trend of reduced water billings are continuing, and efforts are underway to increase compliance and to identify areas of water loss from leaks as well as from theft. Actual expenditures currently do not include many of the capital improvement projects that are budgeted this fiscal year. The DPW and the Finance Department will continue to closely monitor the Utilities revenues and expenditures to keep them in line.
- The June 30, 2014 ruling by the Federal Court which modified its injunction to allow the City to implement certain changes to retiree health care benefits should provide some financial relief to the City budget, at least for the time during which the matter is being litigated. However, at this time it is not possible to project the amount of relief from the $5 million which was added to the budget for retiree health care as a result of the Courts initial decision prohibiting any change to retiree health care. This is because implementing the approved changes will not be effective until November 1 because of the time necessary to incorporate the changes into the current plans. With the second quarter report, we anticipate being able to project the anticipated costs in comparison to the budgeted amounts.

Current Cash Flow

The City's cash flow has improved significantly from the $13 million cash on hand in December of 2011. Thirteen million dollars is less than one month's operating expenses. By comparison, the cash on hand on September 30, 2014 was in excess of $61 million. (Attachment B Cash Flow Comparisons)

FY 15 AND FY 16 Budget

The FY14 budget was developed within the context of a five year projection of revenues and expenses. This exercise pointed out the continuing challenge the City of Flint will have in achieving long term financial stability. The Finance Department and the Council Finance/Administration Committee completed the FY15-19 strategic plan and financial projections. The City Council has also adopted a Mission, Vision, Goals and Budget Priorities statement. This was incorporated into the FY 14/15 and FY 15/16 Budget document (Attachment C Final FY15 & FY16 Budget Document). Consulting firm Ernst & Young assisted the City with an update to the five year financial projections. The biennial budget was adopted on June 23, 2014 via EM Order #13.

City of Flint Strategic Plan

Quarterly Report

July 1, 2014 – September 30, 2014

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

DATE: October 10, 2014

TO: Scott Kincaid, President, Flint City Council
City Council

FROM: Darnell Earley, Emergency Manager
Dayne Walling, Mayor

RE: City of Flint Strategic Plan, First Quarter Report

Earlier this year, the City Council of Flint adopted a Strategic Plan for the City of Flint. This Plan announced a Vision, Mission, and Goals to guide the operation of the City government for the next five years, and was adopted in the context of the City's recently adopted Master Plan for the community. It was followed by a statement of budget priorities adopted by the City Council, and ultimately by a biennial budget for FY15 and FY16. The budget also projected the City's finances for the following three years – FY17, FY18, and FY19. During this same period a Deficit Elimination Plan and Reserve Accumulation Plan was approved by the State and a Seven Point Transition Management Plan was enacted to guide the way by which the operation of the City will be assumed by the Mayor and City Council . The integration of the Strategic Plan into the organizational processes of the City is a key component of the Seven Point Transition Management Plan.

In total, these actions comprise a broad framework guiding the direction of the Flint City government as it restores financial stability and once again becomes an active leader focused on making Flint a safe, secure city attractive to residents, businesses, students, and visitors.

The first quarter of FY15 ended on September 30, 2014. We are pleased to report on the progress which has been made. While significant progress has been made on many fronts, significant challenges and risks remain.

We wish to commend the Management Team and our employees for their dedicated efforts to move the City forward. We look forward to discussing the contents of the report with you.

Overview

The City of Flint has a vision and a plan and now it is focused on implementation in order to achieve a stronger and financially sound municipal government along with a safer and more stable community. To succeed, however, City leaders must follow the plan with discipline and commitment. They cannot stop halfway or leave work half-done—and everyone has an important role to play. Working together as a team, the City of Flint has been successful in the previous quarter in increasing public safety, improving infrastructure, creating jobs and development, eliminating blight, engaging citizens and managing financial and administrative challenges. Areas of success include.

- Law enforcement is working hard with growing community support and total homicide victims is down 28% compared with 2013.
- Utilities is managing with an eye toward the future and the construction of the KWA pipeline is underway, on time and within budget
- Development activities have increased with new facilities under construction at GM Flint Assembly, on the Buick City brownfield site with American Pipe, and downtown in the Health and Wellness District.
- Blighted properties continue to be eliminated, using state and federal funds, and neighborhood volunteer groups have removed more than 2 million pounds of trash in major clean-up efforts.
- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12 9 million the previous year.
- Revenues and expenses for the first quarter of FY15 are in line with expectations.
- Internal restructuring of the City continues at it strives to become efficient, effective, and customer service focused in an environment much smaller than in the past.
- The transition from state oversight to traditional home rule is underway, guided by the Seven Point Plan recently enacted If progress continues as anticipated, the next step in transition will occur in 2015.

Challenges also continue. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred; however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures. A badly needed update to the City's web site is underway; progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks. The retiree lawsuit, whose outcome can seriously affect the financial solvency of the City, remains unresolved. Work continues to get done under difficult circumstances with limited resources, however the new strategic planning process is improving the City of Flint's productivity, responsiveness and accountability.

Assuring Accountability to Adopted Plans and Budget

The Strategic Plan for FY15-FY19 and the Biennial Budget for FY15 and FY16 charts the course for the Flint City government as it emerges from near financial insolvency and establishes itself as a municipal government providing residents, businesses, students and visitors public services in a customer friendly and financially responsible manner. Near term steps for achieving this have further been defined by a set of priorities set by the Mayor and City Council as the biennial

budget was adopted. Likewise, the Master Plan for a Sustainable Flint, adopted in October 2013 by the Flint City Council and the Flint Planning Commission, provides the framework for ongoing efforts to improve the community as a whole.

Achieving the outcomes desired will be a lengthy and ongoing process. Specific steps to move along this course have been outlined in a series of objectives to be accomplished over the next several years. The purpose of the quarterly report is to hold the City of Flint government accountable to the highlight progress as well as to identify areas of weak performance. The first quarter of FY15 ended on September 30, 2014, and progress has been assessed.

Highlights

Increasing Public Safety

A primary goal of the City is to assure a safe, secure, and healthy environment in which to live, work and play. Well-functioning police, fire and emergency response systems are essential to achieving this. While challenged significantly with less than adequate resources, progress has been made to improve public safety, thanks in part to the assistance and collaboration of the State Police:

- Incidence of Part One crime is down 13%, including a 28% reduction in the number of homicides
- Response time for police and fire has been decreased
- The decision has been made that the City will rejoin the Genesee County 9-1-1 Consortium. Anticipated to occur by July 1, 2015, this action will result in enhanced service with access to updated technology and will provide some $1 million annually in reduced costs.
- Internal reorganizations and process improvements have been made in the Police and Fire departments to accommodate the reduced staffing made necessary by the City's financial condition. With the assistance of financial assistance from the state, the City is engaged in a comprehensive review of its police and fire structure to determine the most efficient and effective organization for the future.

Improving Infrastructure

A key goal of the City is to provide access to dependable and affordable water sewer, and waste. Another key goal is to assure an adequate and well maintained transportation network. The financial challenges of the past several years has left the City with significant need for reinvestment in virtually all of its infrastructure. While the challenge is enormous, positive steps have been taken:

- The first draft of the City's first comprehensive Capital Improvement Plan has been completed and will shortly be shared with the public for its input.
- The City has recently been notified that it will receive $750,000 in funding for roads, as contained in the new State budget. Planning for use of these funds is beginning, with the expectation that it will be used for badly needed road repairs in the spring.

- The construction of the KWA pipeline is underway, on time and within budget. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred; however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures.
- Concerns regarding the cost of water to Flint residents and businesses remains a high concern. Investigation of sources of water loss – both from theft and pipe leakage is ongoing. Reports of theft have resulted in criminal investigations, which are significant and ongoing. Several criminal complaints have resulted from the investigation and more are anticipated Comprehensive programs of water meter replacement and leak detection are being developed.
- Construction will begin in October of a load out facility that will allow the city to shut down the incinerator and realize up to $400,000 a year in operational savings in the sewer fund.
- Investments in the underground utilities infrastructure are being finalized, utilizing budgeted funds for pipe replacement, pipe lining, and installation of technologically advanced water meters.
- Work is being planned to address the condition of city facilities. A contract has been signed to repair the employee and police parking lot and to replace the lighting with LED lights, while a process for evaluating potential energy savings at the Municipal complex is being finalized.

Creating Jobs and Development

One of the goals in the recently adopted Master Plan is to have a growing and diverse economy that spurs innovation and small business development along with an education system that prepares our workforce for jobs paying a livable wage. The Strategic Plan likewise commits the City to foster cooperation between businesses, higher education and medical institutions, nonprofit organizations and community groups to create jobs and development. It also identifies the need for the City to better define the role of the public sector in economic development and also to improve the business climate.

A number of business and community development initiatives are underway across the city

- Development activities have increased as evidenced by revenues collected from building permits and rental inspections. These revenues are currently projected to exceed budgeted revenues by $300,000 by the end of the fiscal year
- Increased capacity for compliance with the City's Rental Registration Ordinance is being put into place. A contract for services has been executed, with inspections planned to begin before November 1.
- A new Medical Marijuana ordinance has been enacted. Application forms and related materials are being developed.
- Aggressive pursuit of funding for specific projects promoting development has resulted in more than $4 million to the City, including some $2 million for the redevelopment of Chevy Commons, $1.6 million for reconstruction of Dupont Street. Other grants have been awarded for a revitalization plan the South Saginaw corridor, road diet and bike lanes for Harrison Street, and an analysis of housing for the downtown area.

- Smith Village Development - Of 39 new homes built, 21 have sold, there are six purchase agreements, and 12 are remaining to be sold.
- Gundry and Salem NSP1 Purchase-Rehab-Resale – 14 homes were rehabbed, there are seven purchase agreements, and one home has been sold. Six of the 12 deeds that are in litigation with a previous developer by order of the Court.
- 26 units of senior apartments were made available with the ribbon cutting of Oak Street Apartments, a repurposed closed school building. Renovation was kick started with City of Flint CDBG demolition funds.
- An assessment of the development capacity of Flint's network of Community Housing Development Organizations (CHDO) and Community Development Corporations (CDC) has been completed in partnership with Local Initiatives Support Corporation (LISC). A planning is now underway to determine how the network can support implementation of the city's Master Plan and Blight Elimination Framework.
- In partnership with the local community foundation, public library, community college, and non-profits, began a six month community planning process where over 200 volunteers and stakeholders will create a well-coordinated, integrated system for literacy service delivery that increases literacy levels through a well-managed coalition of organizations.
- The $2.3 Million Community Development Block Grant (CDBG) programming allocation has been implemented. This allocation supports $928,000 of blight elimination, $725,000 in housing rehabilitation and emergency repairs, $227,000 to increase literacy, $124,000 for victim advocacy and fair housing and $184,000 in youth initiatives.

Improving Parks

Encouraging partnerships for recreation and access to open space across the City is a key goal of the Strategic Plan. While City support of its park system has been minimal for the past several years, positive steps, and the creation of partnerships in particular, have been taken towards achieving this goal:

- All City parks are being mowed at least twice per month, and their progress monitored on a regular basis
- Partnerships have been formalized with the Crim Foundation for Basset Park; with Friends of Rollingwood for additional park improvements; with Genesee Conservation District for forestry services; and with Mott Community college for Kearsley Softball Field and the Longway Greenbelt.
- A partnership with Mott Park Association for golf course and clubhouse is being developed.
- Substantial progress on park improvements are occurring at Max Brandon, aided by $200,000 in grant funding.
- Grant funding has also aided improvements at McKinley, and fostered progress on the Grand Traverse Greenway.
- Other improvements are occurring at Thread Lake and Flint Park Lake through the Genesee County Parks Partnership.

- The City is working in partnership with stakeholders at Whaley, Berston, Dewey, Kearsley, Hasselbring and Brennan Parks to leverage additional funding and volunteer assistance to construct further improvements.
- The Senior Center leases have been completed for Hasselbring and Brennen, assuring that senior citizen programming will continue in the City.

Eliminating Blight

Eliminating blight within the next five years is one of the objectives incorporated into the Master Plan, and is recognized by the City as being critical to creating and maintaining a vibrant and growing community. To date:

- A draft Blight Elimination Framework has been developed and widely circulated for public input, reaching approximately 400 residents who have committed to its implementation. The City has committed to organizing its resources around this plan and has appropriated approximately $928,000 for blight elimination activities including the development of a code enforcement program, demolition, and coordination of extensive neighborhood clean ups.
- Several hundred citizen volunteers, working with Cities of Service, Clean & Green, and many neighborhood associations, have spent countless hours on many projects, including removal of more than 2 million pounds of trash from blighted areas, boarding of 575 vacant properties, and mowing some 12,500 properties a total of 28,000 times
- Over $900,000 in CDBG allocations has been contracted to the Genesee County Land Bank for demolition of approximately 70 commercial and residential structures.
- $2.6 million in Hardest Hit funds were recently allocated to the City in partnership with the Land Bank to demolish some 225 homes in Civic Park. This funding is in addition to the nearly $23 million of both Michigan Blight Elimination and Hardest Hit Grant Funding for demolition of approximately 2,000 debilitated homes. The City has completed more than 1,500 Cut and Plugs in preparation for scheduled demolitions.
- An average of 240 Code Compliance issues are addressed monthly by the City's Blight Elimination Manager. 80% of these are resolved without further code enforcement action.
- The City has recruited 2 AmeriCorps VISTAs volunteers who will start in November and focus on implementation of the Blight Elimination Framework

Engaging Citizens

An engaged citizenry is essential to creating and maintaining a vibrant growing community. Citizen engagement in Flint increased significantly over the past few years as the City engaged them in the development of the Master Plan. Master Plan implementation has continued to engage citizens, as have other activities fostered by the City:

- All Master Plan Implementation Task Groups have met twice, working on individual actions plans The City will also be working with 41 neighborhood groups who have

been trained on assessment work and will complete the neighborhood inventory for housing and street lighting by mid-November.

- The Police Department has engaged citizens in several ways, including increased participation by its command officers in community meetings, and by partnership and participation in APLACT (Advocates and Leaders for Police and Community Trust),
- The Department has also expanded use of Blue Badge volunteers in many areas, such as the newly established Citizens Radio Patrol.
- The department also become an active user of social media, promoting Crime Stoppers and Operation Fresh Start, and creating a presence on Facebook and Twitter.
- The Fire Department has also increased its presence in the community through its "Knock and Talk" initiative.
- Citizen engagement has also been enhanced with the placement of national service teams in the City of Flint, one from the National Civilian Community Corps and one from VISTA. More than 800 volunteers have been engaged with these teams on various projects, including removal of more than 2 million pounds of trash from blighted areas, emergency preparedness education for more than 900 residents, and participation in the national day of service on 9/11.

Managing Financial Challenges

Operating in a financially sustainable manner is essential if the City is to achieve its Mission of assuring that residents, businesses, students and visitors receive municipal services in a customer friendly and financially responsible manner. While the City continues to address an accumulated General Fund deficit, significant legacy costs, and a continuing structural deficit, progress continues to be made

- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year. The City's cash position is adequate.
- A plan to eliminate the General Fund deficit no later than FY19 and to accumulate an adequate level of financial reserves no later than FY24 has been approved by the State.
- Revenues and expenses for the first quarter of FY15, which ended September 30, are generally in line with expectations.
- The City is vigorously pursuing external funding and resources to implement important projects in areas such as blight elimination, housing, and park improvements. More than $3 million has been received so far this year from federal agencies, state entities and community foundations, and additional applications are pending.

However, the legal challenge to changes made to retiree health care as part of restoring financial solvency continues. The June 30 decision by the Federal Court to permit the City to modify health care for retirees should provide some financial relief to the City while the case is being litigated. Should the City not prevail, however, the $5 million additional cost added to the FY15 budget will be continued, and may result in Flint's return to financial solvency becoming exceedingly difficult if not impossible

Improving Internal Operations

Achieving the goals set forth in the Strategic Plan will require a city organization that is efficient and effective, and capable of operating in an environment of limited resources. Elected leaders, appointed officials, and employees must be highly trained and professional, and place high priority on excellent customer service. Its organizational structures and process must be efficient, modern, and focused on results. Much remains to be done, but progress is being made:

- The search for an experienced professional City Administrator is underway, and several charter amendments are being considered by the voters, which would further enhance the efficiency of the government.
- A badly needed update to the City's web site is underway; progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks.
- A comprehensive review of City Ordinances is underway, with revisions in business licensing and zoning ordinances nearly complete.
- The organizational structure of the City has been revised to assure that capacity exists to implement the Master Plan.
- Professional development opportunities have been defined and are being provided for city staff. Current focuses include supervision and use of technology.
- An in-depth evaluation of the structure of the police and fire departments is underway with the goal of identifying the most efficient and effective structure for the delivery of public safety services.
- Nearly all labor contracts and personnel policies have been revised to improved organizational efficiency while containing short and long term costs associated with employee compensation.
- Review of the City's capacity to provide capacity and leadership in economic development is underway, including the potential of collaborative efforts with other entities.
- Reorganization of current staff positions to enhance constituent services is underway.
- Internal reorganizations and policy/procedure updates within the Police and Fire Departments have been enacted.
- The City's Emergency Management Plan has been updated.
- Reorganizations within the Utilities Division are being implemented to increase capacity to respond to maintenance and other needs.
- The Transportation Division has increased its capacity and lowered its costs to perform right-of-way maintenance activities by assigning casual skilled labor to work with street Maintenance crews.
- Agreement executed with Genesee County Conservation District to compile an inventory of street trees in order to develop a sustainable plan for the care and preservation of the urban street tree forestry.
- Improved processes for grant administration and compliance monitoring are being implemented
- Planning is leading an effort to fully utilize GIS capabilities to serve all departments.

- Asset management tools for Transportation and Utilities, such as GPS units, web reporting, and a new work order system, are scheduled for installation in the coming months.
- A city wide program to recognize employees is being evaluated. Currently, recognition programs exist on a departmental basis, including the Police Department, and a new program is scheduled for introduction in Department of Public Works.
- The Community and Economic Development Division continues to enact corrective actions, refine and adopt policies and procedures and provide technical assistance to sub-recipients for federal and state funded programs that reduce the potential repayment from historical HUD OIG monitoring findings and current Field Office and MSHDA monitoring, reducing exposure to General Fund for repayment.

Transitioning Back to Home Rule

The City has been under the jurisdiction of the State this time since November, 2011, as its financial condition placed it on the brink of insolvency. Much progress has been made to address that, and the focus is now preparing for the transition back to Home Rule Progress to date includes:

- A 7 Point Plan enacted by the Emergency Manager identifies specific objectives to be accomplished in order for the transition to proceed
- Target completion dates have been identified for many of the steps
- Specific objectives which have been accomplished include approval of a Deficit Elimination Plan, initiation of the search for a City Administrator, completion of a report by the Blue Ribbon Committee and the placement of 5 Charter Amendments plus the question of forming a Charter Review Commission on the November ballot.

Conclusion

Progress is being made in accordance with the expectations of the Strategic Plan and its specific objectives. Significant steps are being taken to improve its financial condition and to restructure the organization to improve efficiency and effectiveness. Steps are also being taken to prepare the City for return to traditional Home Rule governance.

Not surprisingly, because this is a first quarter report, not all objectives have been completed, and some have yet to start. In addition, many of the objectives require significant amounts of time and energy to achieve.

The positive progress outlined in this report must be read in the context of the current overall condition of the City of Flint. The level of services currently provided by the City is marginal as it struggles to regain financial solvency. Flint continues to be challenged by population loss, relatively low per capita income, aging infrastructure, and an insufficient revenue stream to support a desired level of services It still has a significant General Fund deficit to be addressed, along with significant legacy costs. And it still faces the possibility of insolvency should the challenge to changes in retiree health care prevail.

CITY OF FLINT
STRATEGIC PLAN

2014 -2019

Setting a Sustainable Course for the City of Flint

Quarterly Report

July 1, 2014 - September 30, 2014

CITY OF FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life

The Mission of the City Government

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals

In order to realize our Mission, businesses, students and visitors can expect that:

- The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees
- The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play
- The City will provide access to dependable and affordable water, sewer, and waste collection
- The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs
- The City will foster cooperation between business, non-profit, foundation partners and residents to create a climate that supports community and economic development

The City government will also:

- Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission
- Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan
- Encourage partnerships for recreation and access to open space across the City
- Enforce building and occupancy codes and to aggressively work with others to address blighted conditions
- Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development
- Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

GOVERNANCE AND ADMINISTRATION

VISION Statement

The City of Flint s Governance will adapt to change and be a model of professionalism transparency and sustainability in order to provide effective government to each of our City s residents (as written in the Charter Preamble)

MISSION Statement

The Executive Management and Elected Leadership Directs and guides the City government in order operate in an open and financially responsible manner including improving citizen access focusing on measurable results improving the City s financial position and eliminating accumulated deficits within the context of the City of Flint Master Plan

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
EMERGENCY MANAGER		Promote vision, set priorities and measure results	Formally assess City readiness for Transition Advisory Board and progress towards achievement of Seven-Point Plan	I
MAYOR & COUNCIL			Participate with MML and others on an ongoing basis in advocating for state reforms in municipal financing, including PP T and EVIP	C
	Management of City Government		Continue to participate with MML and partners with new legislative session in advocating for state reforms in municipal financing including OPEB and Prop A	I
CITY ADMINISTRATOR	Chief Elected Official	Leadership Provide direction, guidance and support to the leadership in the Departments of Public Safety Planning & Development, Public Works and Finance & Administration in order for the achievement of their goals and objectives	Reduce deficit by no less than $1 8 million by end of FY15 and each year thereafter in accord with City Deficit Elimination Plan and continuing to accumulate an appropriate level of reserves	I
	Legislative Body of the City		Begin search for City Administrator	C
MAYOR			Formally assess dept head's progress on attaining objectives and then semi-annually thereafter	I
		Partnerships Seek partnerships with local, state and federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting the City's mission	Conduct organizational review of all departments completing Public Safety in FY15 and Public Works in FY16	I
CITY COUNCIL			Resolve retiree healthcare lawsuit by December 31 2015	I
			Conduct formal quarterly budget and strategic plan review with Council	I
HUMAN RELATIONS		Training. Prioritize attracting and retaining a highly trained and professional staff of elected leaders appointed officials and employees by offering training opportunities encouraging best practices measuring performance and providing evaluations	Complete assessment of Hurley's future as a community hospital	I
			Apply for 20 grants annually and receive $10 million in competitive/non-entitlement awards beginning in FY15	I
CIVIL SERVICE/OMBUDSMAN			Secure ongoing financial and other support for public safety and blight including city lock-up for FY15-FY19	I
			Develop proposals for 911 consolidation and courts consolidation	I
		Citizen Access Manage municipal services in a customer friendly manner by providing public information respond to constituent concerns	Design citizen service system to process up to 500 requests each month	I
			All Council members and Mayor to attain MML Level Two certification	I
			Update the video capabilities of the City Council chambers to facilitate in-house recording, production and uploading of video	I
		Volunteer Service. Develop a culture of national service and community volunteering that demonstrates how the City and community priorities can be addressed through service solutions	EM and Mayor to approve professional development training schedule for department heads	I
			EM and Mayor to approve professional development training schedule for employees based on recommendations from department heads and Human Resources	I
			Updated web site to be implemented	I
			All appointments to City boards to be current	I
		Climate for Growth Foster cooperation among business nonprofit foundation partners and residents to create a climate that supports community and economic development	Create 1 000 Volunteer opportunities annually	I
			Mayor/EM to implement policies and procedures for improving citizen access to City government	I
			Formally assess future city role in promoting economic and community development for consideration in FY16 budget	I

GOVERNANCE AND ADMINISTRATION

City of Flint 5-Year Financial Plan

Preface

This adopted budget for the City of Flint covers the FY15 and FY16 fiscal years which begin July 1, 2014 and July 1, 2015 respectively. Financial projections for the following 3 fiscal years are included as well.

This budget has been developed within the context of the City's recently adopted Master Plan, the Vision, Mission, and Goals for the City government as adopted by the City Council, and the Budget Priorities as adopted by the City Council. Accompanying this budget is a preliminary statement of objectives initially proposed to be accomplished during the two years.

Taken together, the budget and strategic plan will serve as a template to move the City government forward to become a well-managed, financially stable, and accountable organization focused on creating a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

However, this budget demonstrates the continuing financial challenges facing the City of Flint. Stagnant revenue growth in property tax and income tax revenues, coupled with significant increases in legacy costs, retiree health care in particular, create a significant gap between revenues and expenses which require increases in other revenues and decreases in City staffing and services including the possibility of adjustments in public safety services.

Unfortunately, the financial forecast for the next several years beyond FY16 show a continuing gap between projected revenues and expenses. Within the next few years, without significant means to identify and collect additional revenues, or to further reduce the cost base, the City of Flint will be extremely challenged to provide even the most basic of City services.

Over the last several weeks, this adopted budget has been reviewed by the City Council, which will also held a public hearing to receive citizen input. The Mayor and Council subsequently provided comments and recommendations pertaining to the budget to the Emergency Manager.

Background

The City of Flint has been in state receivership since December, 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, unrealistic budgeting, and unfunded liabilities for postemployment benefits. Significant progress has been made in addressing these financial issues, as the $19.1 million deficit at the end of FY12 had been reduced to $12.9 million at the end of FY13, cash position had improved, and the FY14 budget was realistically balanced, with further reduction of the deficit anticipated.

The FY14 budget was designed and implemented with the same goals in mind – operating within the constraints of available revenues; restructuring operations and cost factors to enhance future financial stability, and continuing to reduce the remaining $12.9 million deficit. The FY14 budget was constructed with the specific intent of further reducing the deficit by a minimum of $1 million, by budgeting expenses at $1 million less than projected revenues. As of January 31, 2014, seven months into the FY14 year, revenues and expenses are on target.

In order to regain and maintain financial solvency, it is not only necessary to eliminate the remaining accumulated deficit but to have an adequate amount of reserves to protect the City in the event of unexpected financial losses. Planning to accomplish this requires a continual dedication of revenues over the next several years to eliminate the remaining deficit and establish an adequate reserve level. A draft deficit elimination plan to accomplish this is currently under review by the Michigan Department of Treasury.

Making progress to date has required hard decisions and sacrifices for all. The FY13 and FY14 budgets were balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Revenue increase included a 25 percent increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, establishment of a special assessment district for street lighting, and implementation of a fee sufficient to cover the cost of waste collection. Expenditure reductions included elimination of 20 percent of the City's workforce, compensation decreases equivalent to a 20 percent wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

The actions taken to-date to restructure healthcare benefits for current employees and retirees have also had a significant impact on reducing both current costs and long-term liabilities. The 20% reduction in the workforce required significant reorganizational activities focused on reducing current costs. Long term liabilities were reduced by eliminating traditional defined benefit pension programs for new employees in favor of hybrid plans; by moving the City's retirement system into the a state wide retirement system; by restructuring health insurance benefits for current employees and placing retirees into those same plans; and by eliminating the promise of retiree health care for new employees in favor of providing retiree medical savings accounts. Much of the positive financial result in FY13 came from these actions. The restructuring, which was implemented during the course of FY12, reduced the City's OPEB liabilities alone from nearly $900 million to less than $325 million as noted in the FY13 audit.

The efforts of the City to regain financial solvency have been aided by support from numerous Federal, State and private partners. State police troopers have been placed in the City to support local law enforcement efforts, and funds have been allocated to enhance prosecution activities and to operate the City's lock up. The Governor's proposed budget continues this support.

The steps taken to begin to restore the City to financial solvency have not been without conflict and changing circumstances. A significant legal challenge has been made to the decision to move retirees from their historical health insurance plans into the same plans offered current employees. This action resulted in an initial cost reduction in FY13 of $3.5 million to the City and imposed deductibles and co-pays on retirees. This challenge is currently pending in federal court. If the challenge is ultimately upheld, it will pose a significant challenge to the City in its efforts to regain and maintain financial and service solvency. Due to the stay imposed by the federal court, the City must increase its budget for retiree healthcare costs in the FY15 budget by $5 million and may even need to pay more as retirees seek reimbursement for past medical expenses. These healthcare expenses will continue to increase in subsequent years.

Legacy costs in total will continue to be a cost burden to the City of Flint. In FY 14, the City budgeted $30.2 million for its retiree healthcare and pension costs, an amount equal to 17% of its total revenues. The General Fund alone budgeted $16.4 million, an amount equal to 31% of its total revenues. By FY19, it is projected that the City will need to budget over $43 million, an amount equal to 23% of its total revenues. For the General Fund alone, the amount projected to be needed will exceed $21 million, an amount equal to 34% of General Fund revenues.

The future financial solvency of Flint will also be challenged by a continuing structural deficit. As part of the planning for future financial solvency, five year projections and a strategic plan were developed. This exercise indicated a significant financial challenge forthcoming in FY15, due to the current status of the retiree health care lawsuit and the ending of a major grant supporting firefighting resources. Future year projections also show a continuing gap between revenues and projections.

Finally, the most important challenge to be addressed in the City of Flint will be instituting structural changes in the organization of the City to foster financial solvency as a core value and to assure that future governance and management of the City is conducted in a financially responsible manner. To this end, the current Emergency Manager has created a Blue Ribbon Committee on Governance, charged with developing recommended changes to current ordinances, procedures, and the Charter. The recommendations of the Task Force are anticipated within six months.

Overview

The City of Flint has spent considerable time planning for the community's future through the comprehensive master plan and creating an organizational framework focused on the City's new vision, mission, and goals. The 2-Year budget has been developed in a balanced manner to best meet the needs of a variety of service areas and challenges.

However, challenges to changes in retiree healthcare and the loss of grant funds have required that a new service baseline be established; this also poses significant and immediate challenges to the City's financial viability. Current court rulings in regards to the retiree health care lawsuit have increased retiree health care expenses nearly $5 million in FY15, and the loss of the SAFER grant ($ 3.4 million) eliminates funding for 39 of the City's 65 firefighters.

The harsh winter increased the need to remove hundreds (if not thousands) of damaged and fallen trees throughout the city, and to repair damaged roads and sidewalks. The winter also placed additional stress on the antiquated city facilities as they faced water leaks and damage to walkways and sidewalks. Implementing the master plan, and continuing to eliminate blight will also require dedicated resources going forward.

The recently completed study of the water and sewer system finances also demonstrated a shortfall in revenues needed to operate this critical service and provide for necessary maintenance. As much as the high rates for providing water and sewer services pose significant financial challenges and community implications, the alternative of not addressing basic maintenance and adjustments based on guidance in the master plan is equally challenging.

These factors have a significant effect on the adopted staffing levels. Reductions in city staffing over the past two years have come almost exclusively from City services other than police, fire, and 911. As a result, those remaining city services are thinly staffed, and despite valiant efforts of dedicated employees, service levels have been reduced. In some cases, the reductions have been severe and counter-productive. For example, reductions in customer service at Treasury and staffing at Utilities has reduced capacity to effectively pursue collection of delinquent bills. Reductions in Information Technology have slowed the implementation of technology which can improve effective processing. Reductions in Human Resources have slowed the process of hiring employees. Reductions in Building Safety have slowed the process of conducting inspections and issuing permits, and have eliminated much in the way of code compliance efforts.

Therefore, balancing the budget in a financially sustainable way requires addressing the impact of these issues. It also requires that they are addressed within the context of the Mayor's and Council's stated budget priorities. The Council's stated priorities are:

- Maintaining police and fire staffing levels at the maximum level feasible
- Reducing the General Fund deficit by at least $1 million
- Continuing efforts to reduce blight, including demolition
- Hiring an experienced City Administrator
- Assure that capacity exists to implement the Master Plan
- Add capacity in the areas of Economic Development

- Fund years 1 & 2 of capital improvements identified in the Master Plan
- Improve street maintenance
- Establish parks partnerships
- Improve customer service through training and technology
- Increase removal of dead and diseased trees
- Evaluate ways to reduce water and sewer rates for constituents in the budget process

Balancing the budget responsibly in the context of these immediate and significant financial challenges, while addressing stated priorities, is a significantly difficult task. The unplanned addition of $5 million in expenses for increased retiree health care is a "Game-Changer" and seriously undermines the ability of the City government to move forward in becoming a positive force helping to create a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve quality of life.

As the development of the FY15 budget began, there was a significant gap between projected General Fund revenues and General Fund expenses alone. While some revenue sources indicated a slight increase over the current year, projected expenses were significantly above the current year. The expense increases are due primarily to a nearly $5 million increase in costs for retiree health care and an increase in the per person cost of pension contribution. In addition, there was recognition of the need to assure capacity to implement the Master Plan to continue addressing blight, to address increased costs of health care for current employees, and to address critically needed facility maintenance.

The budget presented here is balanced in a financially responsible manner, in that revenues and expenses meet. However, the consequence is that, where possible, revenues have been increased, and where necessary, expenses have been decreased. Whether the result is an acceptable result, in the context of the needs and the future of the City, is uncertain.

It is clear that proposed changes in service levels reflected in this budget are significant, and that at the same time the financial plan is being finalized within the confines of available revenues, considerable efforts will continue to mitigate the impacts. Continued efforts to achieve a satisfactory resolution of the retiree healthcare lawsuit, as well as to continue searching for additional sustainable funding, or to engage in mutually beneficial partnerships will continue. The changes necessary to achieve necessary balancing of revenues and expenses will be done in a managed way, not in a crisis response.

The financial projection for the years following FY15 and FY16 show the continuing challenge of a structural deficit. Without a means to identify a new significant revenue source or to sustain and even make further reductions in the City's cost base, such as retiree health care, Flint will be extremely challenged to provide even the most basic of City services in future years.

Highlights of the Adopted Budget

Costs to taxpayers are increased....

- Property tax levies remain unchanged
- Street lighting assessment increased to $71 in FY15 and $74 in FY16
- Solid Waste fee increased to $163 in FY15 and $169 in FY16
- Water and Sewer rates increased by a total of 6.5% in FY15 and 6% in FY16

Costs to City employees are increased....

- 20% premium share for health insurance implemented
- Premium contribution for non-Medicare eligible employees retiring after July 1, 2014 established
- 50% premium share for dental and vision insurance implemented
- Vacation and sick leave replaced with PTO, new accumulation caps established
- All new employees enrolled in hybrid pension plan
- All new employees enrolled in RMSA in lieu of promise of retiree health care

Legacy costs are increased significantly...

- General Fund costs for retiree health care are increased 25%, from $8 million to $10 million in FY15, increasing on an annual basis thereafter
- General Fund costs for retiree health care and pension in total are projected to increase from $16.4 million (31% of total revenues) in FY14 to $21.5 million (34% of total revenues) by FY19
- For all funds, total costs for retiree healthcare and pension are projected to increase from $30.4 million (or 17% of total revenues)in FY14 to $43.5 million (23% of total revenues) by FY19

City staffing is budgeted at 522 in FY15 and 523 in FY16.....

- Staffing is maintained in District Court, 911, Finance, Assessing, Transportation, IT, and Fleet
- Police Department – Total department staffing will be 115, with 7 vacant positions and 29 additional positions eliminated through attrition by end of FY15. Additionally, a recently offered COPS Hiring grant for six School Resource Officers will not be accepted. The next several months will be focused on mitigating the impact of this through reorganization with the assistance of consultants specialized in police and fire service; seeking additional funds; and obtaining assistance from law enforcement partners in order to achieve the best possible level of police response.
- Fire Department – Total department will be 75, with 19 positions eliminated as the SAFER grant expires. There are several vacant positions to be eliminated as part of this, with a goal of needed reduction no later than December, 2014. The next several months will be focused on mitigating the impact of this through reorganization and restructuring obtained with the assistance of consultants specialized in fire and police service.

- Planning and Development Department - Staffing is at 25, with adding 1 position. The department is being reorganized to assure capacity to implement the newly adopted Master Plan and continue efforts of blight management. Continued assistance in the form of grants and partnerships will be utilized, and general fund support for those activities is increased.
- Public Works Department - 6 positions are added to the Utilities division as the Water Treatment Plant begins operation as the primary source for Flint water; 1 position is added to Facilities to address critically needed maintenance issues.
- Finance and Administration Department - 3 positions are added to the Treasurer's Office to increase delinquent collections, with the added cost to be offset by additional revenues.
- Governance – As efforts to resolve the financial emergency progress, the position of City Administrator will be filled. Additionally, the salaries of Mayor and Council are partially restored as their role in governance increases.

Council budget priorities are addressed as follows:

- Maintaining police and fire staffing levels at the maximum level feasible – Due to revenue shortfall, increased retiree health care, and lack of other options, staffing is reduced. The Police and Fire millage funds will be used to fund 20 fire fighters and 26 police officers through FY15 and FY16. However, the accumulated millage funds will be fully used by the end of FY16.
- Reducing the General Fund deficit by at least $1 million – General Fund expenses are budgeted at $1 million less than revenues, and $800,000 in Capital Improvement Funds will be appropriated to the Utilities, thus reducing the General Funds debt to the Utility Fund by an additional $800,000. The plan is to continue this commitment for the next several years until the deficit is eliminated, and then the commitment will become one of building a financial reserve equal to 15% of General Fund revenues.
- Continuing efforts to reduce blight, including demolition – CDBG funds continue to be used for demolition and General Fund is assuming partial cost of the Blight Coordinator position
- Hiring an experienced City Administrator – Funds are included in budget.
- Assure that capacity exists to implement the Master Plan – General Fund is assuming partial cost of the Planning and Development Director, and Associate Planner, and a position of GIS technician is created, whose funding is shared among various city funds. Lead partners will be identified in each work area. Also, the Mayor has committed to overseeing the process of assuring that Master Plan implementation is an ongoing important part of city operations.
- Add capacity in the areas of Economic Development-The P&D Director is committed to defining a program for small business development, to be funded in FY16 through CDBG funds. Additionally, 20% of staff time of two DCED staffers and a portion of the Director's time will be devoted to economic development. Also, the Mayor has committed to leading the City's economic development efforts with partners and the assistance of this City staff.
- Fund years 1 & 2 of capital improvements identified in the Master Plan – the CIP portion of the Master Plan will be finalized in FY15, and the results will be considered for inclusion in the FY16 budget.

- Improve street maintenance – Due to minimal increases in state funding for streets, maintenance efforts will continue at the current levels. State financial support has been sought and obtained for some major street projects, in particular those related to economic development projects.

- Establish parks partnerships – The Planning and Development Department now has oversight of Parks, and as one of its strategic objectives, has committed to increase the number of parks partnerships in FY15 and FY16. Funding even the most basic of parks maintenance activities is increasingly challenging within the constraints of the parks millage funds. The goal is to eliminate General Fund support of these activities by the end of FY16.

- Improve customer service through training and technology– Human Resources, as it did in FY14, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. IT likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees. For example, the Treasury's customer service division is committed to specific customer service training for its front line employees.

- Increase removal of dead and diseased trees – Oversight of removal of trees within street right of ways is now the responsibility of the Transportation Division of Public Works, removal of trees within Parks is now the responsibility of Planning and Development; and removal of trees on other city properties is the responsibility of the Facilities Division of Public Works. Unfortunately, there is only a limited amount of funds available for these purposes, and the general effort will be focused on emergency responses. However, the Transportation Division is committed to attempting to secure assistance from other entities to increase capacity to address this problem.

- Evaluate ways to reduce water and sewer rates for constituents in the budget process-The results of the recent rate study confirm that it unlikely that water and sewer rates can be decreased at any time in the foreseeable future, and in fact, rates need to be increased. However, the actions taken to date to join KWA and to temporarily use the Flint River show that future rate increases will be less than had the City stayed with its prior provider.

Absent new sources of funding or reduced expenses in areas such as retiree healthcare, the commitments to progress and the staffing and service levels here are anticipated to continue for both FY15 and FY16. It is anticipated that the slight additional revenues in the General Fund for FY 16 will not be sufficient to cover increased costs, and it will be necessary to utilize additional funding from the police and fire millage to cover the costs of some police or fire positions in the General Fund in FY15. Depending on the rate of attrition in the Police Department, there should be sufficient remaining funds in the Police and Fire millage to avoid additional reductions in police or fire positions in FY16.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

June 3, 2014

Mr. Scott Kincaid, President
Members of the Flint City Council
1101 S. Saginaw St.
Flint, MI 48502

Dear Mr. Kincaid and Members of the Flint City Council.

Transmitted herewith are the final numbers for the biennial budget beginning FY14-15 and ending FY 15-16.

This budget is reflective of some of the recommended revisions offered following the Council's departmental budget hearings. All recommendations put forth by City Council were reviewed and thoroughly vetted at Treasury. The attached budget document was revised upwards by $90,000 and includes the details of the incorporated revisions.

The budget was revised to include your recommendations, along with those of the Mayor, which I felt could be implemented without adversely impacting the organizational structure, management, and the anticipated transition of the City of Flint to a Receivership Transition Advisory Board during the course of this spending plan.

Following the public hearing and consideration of the comments received, it is my intent to execute the order adopting the budget at the next Council meeting scheduled for June 23, 2014. At that time, Council will be able to officially receive the two-year budget consistent with PA 436 and the 7 Point Transition Management Plan.

You should also be aware that effective July 1, 2014, the day-to-day operations of the departments of Planning and Development, and Public Works will be shifted to Mayor Dayne Walling. The Mayor is currently putting together a plan for the allocation of resources within those departments. Similarly, Police Chief Tolbert and Fire Chief Cox are also putting together their work plans to utilize the final resource allocations for public safety.

The assistance and cooperation from you and the Council given to me, the Mayor, and the Administration in this process is greatly appreciated. I think we can agree that this is a responsible and realistic snapshot of the City's financial stability over the next two years, given its myriad financial challenges.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

CC: Dayne Walling, Mayor
Inez Brown, City Clerk
Administration

Proposed Changes to the City of Flint Proposed FY15 & FY16 Budget

On April 30, 2014, Emergency Manager Darnell Earley transmitted a proposed bi-annual budget to the Mayor and City Council, with a request that the Mayor and Council review and comment on the proposed budget. Accordingly, the City Council, acting as Committee of the Whole chaired by Finance Chair Josh Freeman, met five times to review the budget. At the conclusion, a set of recommendations was adopted and given to the Emergency Manager.

This document summarizes the key recommendations of the Council and Mayor and outlines changes made to the proposed budget as a result.

Summary of Council and Mayor Recommended Changes to FY15 & FY16 Proposed Budget

1. The recommendation of the Council identifies $1,824,510 in additional funds to be used by the Police Department:

- Specifically, $1 million of the $2.5 million in state appropriated revenues for the Lock-Up is proposed to be moved to the Police Budget.
- In addition, $1 million is identified by increasing the allocation in the CIP Fund for the purpose of reducing the deficit, thus freeing up the $1 million in the General Fund which has been identified for deficit reduction. Of that $1 million, $763,000) ($628,000 + $135,000) would be moved to the Police budget. Additionally, $61,510 is identified to be moved from the Finance Budget to the Police Budget.

2. The remaining funds from the proposed re-appropriation of the freed-up General Fund revenues ($237,000) would be used for the following:

- $50,000 - District Court
- $72,000 - City Clerk
- $50,000 - City Council Staff
- $45,000 – Additional Pay Raises for Council
- $10,000 – Brennen Center
- $10,000 – Hasselbring

3. Finally, there is a recommendation to eliminate funding for the Human Relations Commission ($22,547) and split those funds equally between Brennen Center and Hasselbring:

- Brennen - $11,274
- Hasselbring - $11,274

4. The Mayor has also made recommendations in other areas, including:

- Adding capacity to Economic Development by replacing the 20% of 2 DCED staff currently subsidized by the GF with CDBG funds and directing that staff to perform 100%

CDGB activities. The freed-up funds ($51,458) would then be used to contract for economic development services.

- Reduce DCED program staff by 1 FTE and utilize CDBG administrative funds for 50% of administrative staff support in Planning and Development
- Add 1 new FTE in Planning and Development dedicated to the new Business Licensing function
- Add to the Strategic Plan a key objective under Governance and Administration: "Respond to a minimum of 500 constituent services per month, including those formerly addressed by the Human Relations Commission staff."

Changes to the Proposed FY15 & FY16 Recommended Budget in response to Council and Mayor recommended changes

The changes proposed by the Mayor and Council have been reviewed, and changes made as considered appropriate within the context of maintaining a viable financial plan for the next two years. The proposed budget, as submitted to the Mayor and Council on April 30, 2014, will be revised as follows in response:

1. The Proposed Budget anticipates a reduction in public safety staffing of 36 officers and 19 firefighters. However, it also does not anticipate these reductions (other than vacancies occurring through attrition) until the comprehensive study of the police and fire departments is concluded. That study is to be completed prior to the end of 2014. At that time, depending on the study recommendations, a decision will be made as to the need for additional resources, and to the extent that funds in the General Fund which are currently targeted for deficit reduction can be used. Although the State will not agree to utilize funds appropriated for the operation of the Lock-Up to fund Flint police officers and firefighters, the Mayor and Emergency Manager will continue their efforts to obtain other state funding to support police and fire operations in Flint during this critical time.
2. The concern of the City Clerk, and supported by both the Council and the Mayor, of her inability to properly conduct the upcoming elections with the proposed staffing reduction, is acknowledged. Accordingly, the proposed budget is revised to continue FY14 budget level of staffing within the Clerk's Office. The business license position, originally moved to the Planning and Zoning Department in the FY15 and FY16 Proposed Budget, has been restored back to City Clerk's department. The new Business Licensing process is scheduled to be implemented by January 1, 2015; at which time, the responsibility for the process will be assumed by the Department of Planning and Development. Since the Clerk's Office staff will remain the same while reducing the responsibilities of the Clerks' Office, there should be adequate staff to conduct the elections and to provide additional support to the Council Office. Until such time as the

Business Licensing process is assumed by the Department of Planning and Development, the Clerk is authorized to increase the hours of the current part-time employee in the Council Office. $15,000 in temporary wages is added to the Council's budget for FY15.

3. The concern of the Council and the Mayor that financial support be continued to assist in the transition of the senior citizen programming at the Brennen Center and Hasselbring is acknowledged. The end goal is for there to be successful senior citizen programming at these locations, supported in their entirety by the County's senior citizen millage, which has been approved by voters within the City of Flint as well as the rest of Genesee County. Instead of adding additional funding to the FY15 and FY16 budgets, however, an amendment to the FY14 budget is being prepared to make a one-time appropriation to each center in the amount of $20,000, for a total expenditure of $40,000. The purpose of this appropriation is to support this transition.
4. The concern of the Council to add additional resources to the District Court is noted. However, during the presentation by the Court at its budget hearing, it became apparent that the proposed strategy of the Court to utilize part time employees may not be consistent with the requirement that temporary employees working in excess of 29 hours per week must be provided access to health care to the extent that full time employees are. Thus, additional funds in the amount of $40,000 is added to the Court's budget to address this potential problem.
5. The recommendation of the Mayor to add additional capacity to economic development as stated in #4 above is acknowledged. Additional resources for economic development was also a stated priority of the Council. The change recommended by the Mayor provides $50,000 in financial capacity, is revenue neutral, and is incorporated into the budget.
6. The recommendation of the Mayor with respect to reducing DCED staff by 1 FTE and redistributing the funds as noted above are also incorporated into the budget.
7. The recommendation of the Mayor to add one new FTE in Planning and Development dedicated to the new Business Licensing function is also acknowledged as being valuable in helping to assure that the new process is implemented aggressively and successfully. Accordingly, $64,000 for wages and fringes is added to the budget of Planning and Development for that purpose.
8. Finally, the recommendation of the Mayor to add an additional objective to the Governance and Administration section of the Strategic Plan is acknowledged and will be incorporated. Accordingly, while the Human Relations Commission may continue as a volunteer board, the proposed allocation is eliminated. As it has become apparent that the Human Resources Director is fully engaged with managing the Human Resources function, the portion of the Director's salary allocated to the HRC budget will be transferred to the Human Resources Budget.

Implementing the changes noted above require identifying $119,000 in FY15 General Fund appropriations and $104,000 in FY16 appropriations. The revenue and expense projections in the budget have been reviewed, and the necessary funds have been identified from the following sources:

FY15:

- $39,000 - reduction in audit costs
- $ 2,600 – net reduction in HRC budget
- $38,400 - additional projected revenue - income tax revenue
- $39,000 – additional projected revenue – delinquent income tax collections

FY16:

- $31,000 - reduction in audit costs
- $ 2,678 – net reduction in HRC budget
- $32,000 - additional projected revenue - income tax revenue
- $38,322 - additional projected revenue - delinquent income tax collections

Appreciation is extended to the Mayor, Council, and staff for the time and effort spent reviewing the proposed budget. The citizens of Flint will be better served by the changes made.

Proposed Budget FY15 and FY16 Technical Adjustments

1. Included the pension expense in the Office of the Clerk - $29,519

2. Removed wages and fringes for GIS Technician from Assessing Department because it was already budgeted in the Planning and Zoning Department - $60,518

3. Corrected the inclusion of all salaries, wages, and fringes in the Planning and Zoning department for all the approved positions - $123,596

4. Corrected Fund 202 FY15 and FY16 fund balance use. The indirect cost allocation was double reported in FY15. This was a $536,000 reduction in cost in FY15. In FY16, wages in administration was entered in error causing salaries to be overstated by $812,000. This correction was made.

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, and foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

ATTACHMENT D September 30, 2014 Quarterly Report

EMERGENCY MANAGER'S COMPLIANCE MONITORING REPORT

a) CONFIRM – That revenues recorded in the most recent quarterly financial statements are fairly stated in all material respects on a modified accrual basis of accounting, except that in the case of the water and sewer fund, revenues recorded in the most recent quarterly financial statements shall be fairly stated in all material respects on a full accrual basis of accounting.

b) CONFIRM – That expenditures recorded in the most recent quarterly financial statements are fairly stated in all material respects on a modified accrual basis of accounting, except that in the case of the water and sewer fund, expenditures recorded in the most recent quarterly financial statements shall be fairly stated in all material respects on a full accrual basis of accounting. Accounts payable, vouchers payable, and accrued payrolls are to be included in the determination of expenditures.

c) CONFIRM – That all appropriate inter-fund transactions have been recorded in the financial records of the City.

d) CONFIRM – That the City is in compliance with its budget for the fiscal year on a year-to-date basis and that the budget has been amended as required by law.

e) CONFIRM – That the reconciliation of bank accounts has been completed and appropriate adjusting journal entries have been made to the general ledger of the City. The City has completed bank reconciliations for major bank accounts up through August 2014.

f) CONFIRM – That remittance of payroll taxes, pension payments, 401(k) payments, debt payments, and taxes collected for other governmental units were completed on a timely basis.

g) CONFIRM – That cash flow reported for the most recent preceding month is fairly stated in all material respects.

h) CONFIRM – That overtime is properly disclosed and recorded in the most recent quarterly financial report of the City.

i) CONFIRM – That the originals of all source financial documents have been properly retained and preserved and that the City is in compliance with all other legal requirements, except to the extent specified in the report.

Pleyte, Beth (Treasury)

City of Flint Wednesday 9:00am Phone Conference Agenda
November 26, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD –
      i. The final draft reports for the evaluation of both the Police and the Fire Departments have been received.
      ii. Completing revisions to SRMS MOA.
      iii. The Citizens Radio Patrol was operating the evening before Halloween and is continuing patrols.
      iv. Emergency Manager Earley held a meeting with MSP Post and District Commanders to prepare for transition and keep momentum going with COF PD and MSP. The ICMA Public Safety Study and communication plans were discussed.
      v. Need contact number for AG's Office for processing sexual assault kits.
   b) FFD
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation Status
   b) The legislative initiative to allow a vote on a local income tax increase will be handled by Mayor Walling who will be working through the Governor's Office and H. Hollins. A letter was sent to Treasurer Clinton on Nov. 17 from EM Earley.
   c) Chicago Fed Letter – see attached.
   d) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire
   b) Audit is expected to be completed the week of December 1, 2014.
   c) Fund balance ordinances including Fund Balance Policy, OPEB, BSF and strategic planning processes have been referred by Council Finance Committee to its Legislative Affairs Committee. Council consideration to be scheduled for Council's December 15 meeting.

d) Hardest Hits Funds: Need to get clarity for Flint's eligibility status. (See attached).

5) City Council Update

a) The Council meeting schedule has been revised for the balance of the year to accommodate election of officers and the November and December holidays.
b) Two Council seats will become vacant on January 1, 2015. An appointment process is under consideration by the EM. P.A. 436 will guide the process which could involve direct EM appointment or collaborative effort with City Council. Self-nominations have been requested from residents of Wards 3 & 6.

6) Charter Review Commission

a) Notice has been sent out on new timing for the election of commissioners. Election will be held in May 2015.

7) Water Issues

a) General Motors Water Issues – working through lawyers at this point. We are close to a final agreement regarding their level as a customer with the City of Flint.
b) A meeting with the Department of Environmental Quality was held on October 29. A number of steps for continued support were discussed. More follow-up is planned. We are awaiting action from the DEQ on getting a message of support out to the public.

8) Messaging

a) A plan is being developed to present to the community at-large and to the various interest groups (i.e. business, investors, foundations) the background of the financial emergency, the actions taken and next steps to emerge from receivership. This will be an on-going item for discussion.
b) Starting a new communication strategy with an EM press briefing the afternoon of a Council meeting or important Committee meeting.
c) Hurley Hospital Valuation City - beginning regular meetings with the Hurley leadership to identify strategy beneficial both Hurley and the City of Flint.
d) Deputy Finance Director and HR Director have resigned. Internal candidates for Deputy Finance Director are being interviewed; recruiting

firms are being solicited to identify candidates for HR Director and eventually Finance Director.

9) 9-1-1 Reconsolidation Plan

a) The Genesee County 9-1-1 Consortium has voted to accept Flint's request to join. Consolidation is expected to be complete by July 1, 2015. Mayor Walling has been appointed the City's representative on the Membership Board. Work is progressing to complete merger before July 1, 2015.

b) C-GAP award for 9-1-1 Tower will have ~$400,000 balance. Would like to use for 9-1-1 consolidation expenses.

10) Recruitment and Selection of City Administrator/Manager

a) Provide guidance on several considerations: duration of appointment, contract, consistent with TAB, working with TAB, etc. – Finalize timeline after January 1, 2015.

b) Five finalist candidates were interviewed on November 12. The Recruitment Advisory Committee included: Mayor Walling, Councilwoman Galloway, Jerry Ambrose, Randy Byrne, Pastor Al Harris - Chairman of the Concerned Pastors for Social Action, Steve Landaal – a Flint resident and business owner, and Emergency Manager Earley. Three finalists were chosen for second interviews and those were held Nov. 18. Currently completing reference and background checks.

Created on: 11/19/14

City of Flint Wednesday 9:00am Phone Conference Agenda
October 1, 2014

1) **Public Safety Update – FPD, MSP, (FFD, if needed)**
   a) FPD
      i) Status of Sherman St. house demo and site clean-up? MSP initially agreed and now the decision appears to have changed.
   b) FFD
   c) Other update from Chief Tolbert and MSP

2) **Governor's Office Update – R. Baird, H. Hollins, B. Clement**
   a) Court Consolidation
   b) Other

3) **Lawsuits – Status, Issues**
   a) Retiree Lawsuit – No updates

4) **Financial and Administrative Update**
   a) Remaining bargaining units in "meet and confer" sessions: Fire
   b) Sgts., and Capts. & Lts. bargaining units have achieved Tentative Agreements.
   c) The City is amending the DEP to show future commitment on retiree healthcare.
   d) Need to start to develop a plan to begin pre-funding employee healthcare.
   e) Next benchmark is audit. Budget is on track at this point; preparing for 1st quarter end.
   f) Status of legislative initiative to allow vote on local income tax increase.

5) **City Council Update**
   a) Flint City Council postponed action on the Budget Stabilization ordinance and fund Balance policy and the primary reason given was that these recommendations came from the EM. This editorial from the Flint Journal is an excellent summation: http://www.mlive.com/opinion/flint/index.ssf/2014/09/editorial_flint_city_council.html#incart_river

6) **Blue Ribbon Committee on Governance**
   a) The "Vote YES for Change" committee held its first community discussion on Thursday, September 25.

7) **Water Issues**
   a) Flint will continue to investigate why conditions develop which are favorable for more severe problems to occur. Pursuing these investigations may include seeking additional professional assistance to review both systems and processes.

b) General Motors Water Issues – working through lawyers at this point. However, if this should become an issue for the GCDC with DWSD we would hope Treasury will be supportive of the GM-GCDC franchise customer agreement.

8) Messaging

a) A plan is being developed to present to the community at-large and to the various interest groups (i.e. business, investors, foundations) the background of the financial emergency, the actions taken and next steps to emerge from receivership. This will be an on-going item for discussion.

b) Hurley Hospital Valuation City - beginning regular meetings with the Hurley leadership to identify strategy beneficial both Hurley and the City of Flint.

9) 9-1-1 Reconsolidation Plan

a) The Genesee County 9-1-1 Consortium has voted to accept Flint's request to join. Consolidation expected to be complete by July 1, 2015.

10) Recruitment and Selection of City Administrator/Manager

a) Provide guidance on several considerations: duration of appointment, contract, consistent with TAB, working with TAB, etc. – Finalize timeline after January 1, 2015.

b) Emergency Manager has developed a recruitment package and a recruitment and appointment timeline; recruitment began September 1, 2014.

Director

MEMORANDUM

TO: Darnell Earley, Emergency Manager
Dayne Walling, Mayor

FROM: Howard Croft, Public Works Director

DATE: September 16, 2014

RE: Recent Boil Water Advisory

Mr. Earley,

I have compiled a bullet point list of the pertinent events surrounding the recent boil water advisory in the City of Flint. I have separated the events into five categories and attempted to condense them into a comprehensive sequence for your review.

OVERVIEW

- On Friday September 5, 2014 the City of Flint issued a boil water advisory to residents in two of ten test areas around the city.
- The advisory was due to multiple positive tests for "total coliform" and the area covered approximately 9 square miles.
- On Sunday September 7, 2014 the City expanded the advisory to include another of the ten test areas due to a subsequent positive total coliform test.
- The boil water advisories were lifted on Tuesday September 9th at 5:00pm after consultation with the DEQ.

BACKGROUND

- State of Michigan Regulations requires that the City of Flint Water Treatment Plant perform testing of its water distribution system on a routine basis in ten different locations around the City.
- The tests take twenty four hours to produce valid results and are sent directly to the Department of Environmental Quality for review.
- Test results which show positive for "E.coli" or "fecal coliform" trigger boil water notices for the test area and the advisories usually remain in effect until three consecutive tests return negative results.
- A single positive test for "total coliform" does not generally result in a boil water advisory, rather it indicates that the environment is conducive for bacteria.
- Typically, investigation into possible causes followed by corrective measures such as flushing the affected area with open hydrants will cleanse the system.
- This process is overseen by an employee who is required to hold an F-1 State License and is listed as the Operator in Charge of the Water Plant and an employee who holds an S-1 State License which is required to maintain distribution systems of this municipal size.
- The City of Flint has over 500 miles of pipe in its distribution system, much of which is over 70 years old.
- The City of Flint has over ten-thousand valves throughout its distribution system.
- The City of Flint has a professional reliability study of its system which was updated in December 2013.

PROBLEM

- ❖ After detecting the initial positive test for total coliform, normal procedures did not clear the condition and multiple positive tests ensued.
- ❖ The continued positive total coliform tests were the cause for issuing the boil water notice.
- ❖ Additional discoveries showed that residual chlorine levels in the affected area were considerably lower than normal.

SOLUTION

- ✓ On Monday September 8, 2014 the City convened all licensed personnel, Utility Supervisors, and DPW Director to a single meeting location and held a brainstorming session with the DEQ on conference call.
- ✓ It was agreed that while not totally isolated, the concern was mainly present in a specific large transmission line that ran through all positive testing areas.
- ✓ It was determined to expand the hydrant flushing outside of the immediate impact area.
- ✓ It was found that a 24" valve which feeds this transition main was broken in the OFF position outside of the immediate impact area.
- ✓ The broken valve was preventing fresh water from being pushed directly into the impacted area while causing water to travel from the water plant around the entire city and preventing adequate circulation of fresh water.
- ✓ After repairing the broken valve, virtually all of the symptoms were erased over a 24 hour period and the chlorine count has steadily risen back to normal levels throughout the transmission main.

CONCLUSION

- ✓ It was determined that the broken valve was not the single cause of the problem but was a significant factor in the development of the problem.
- ✓ Other possible factors include:
  - Low usage in the area
  - Pipe size in relation to volume of usage
  - Temperature change of surface water
  - Water Pressure in the area
- ✓ It was determined that the broken valve was the main reason that normal remedies were ineffective.
- ✓ Throughout the event, the City was in direct contact with DEQ personnel daily.
- ✓ The positive tests were for "total coliform" only.
- ✓ The following statement about total coliform was approved by the DEQ and distributed to the public as part of the recent boil water advisory:

Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present.
Usually, coliforms are a sign that there could be a problem with the treatment or

distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or E. coli, are present. We did not find any of these bacteria in our subsequent testing. If we had, we would have notified you immediately. However, we are still finding coliforms in the drinking water.

- ✓ The City of Flint is in the first year of strategic budgetary investment in an infrastructure strategy.
- ✓ The City of Flint infrastructure strategy has been, and will continue to be developed with state licensed employees, industry experts, and proven experienced consultants.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

DATE: October 3, 2014

TO: Rick Snyder, Governor

FROM: R. Kevin Clinton, Treasurer

SUBJECT: Status of Financially Stressed Local Governments

EMERGENCY MANAGER

Flint
Emergency Manager: Darnell Earley
Appointed: November 28, 2013
Anticipated Exit: April 2015

Recent Developments

- Emergency Manager Darnell Earley initiated a search for a qualified and experienced City Administrator. Ideally, the chosen candidate will begin on January 30, 2015.
- Five Charter amendments and a general Charter revision question have been placed on the November 2014 ballot. These include eliminating the Office of Ombudsmen and Civil Service Commission, reducing mayoral staff appointments from ten to five, eliminating the requirement for specific executive departments, and requiring that the annual budget include a budget message, multi-year financial plans, revenue projections, and a Budget Stabilization Fund.
- The City has contacted the Michigan Health Endowment Fund at MDCH to determine if grant funds are available to start a fund to assist citizens who are unable to pay their water/sewer bills.

Significant Actions/Issues

- On September 5, 2014 a boil water advisory was issued due to multiple positive tests for "total coliform" covering approximately a 9 square mile area. This was caused from a broken valve which feeds the transition main.
- In August, Treasury staff met with the Mayor and City Council in one-on-one meetings to discuss the possibility of the Emergency Manager exiting in April 2015, and to explain the function of a Receivership Transition Advisory Board. An April 2015 exit will not be possible if the pending retiree lawsuit outcome is unfavorable to the City. Decision date is still to be determined.
- Accumulated deficit for FY 2013 was $12.9M; the City reduced the deficit by $3.9M to $9M in FY 2014 (unaudited).

- A $1.1M State appropriation was received to fund front-line public safety positions for FY 2015.
- The sale of the water pipeline for $3.9M was completed in June 2014.
- The Genesee County 911 Consortium approved Flint's return to the county-wide system by July 1, 2015. This will result in about $1M in annual savings to the City. Currently, the City spends $2.4M annually to subsidize its own 911 operations.
- The results of a comprehensive public safety study, being prepared by ICMA, will be available this fall.

Issues to Resolve before EM Exit

- Eliminate annual operating/structural deficit which is projected at $1.7M for FY 2017, and grows to $11.9M by FY 2019 if the City loses the lawsuit over retiree healthcare. If the City loses this lawsuit, it will permanently add $5M annually to the cost of retiree healthcare. The City's budget does not assume this additional $5M potential expense.

Hamtramck

Emergency Manager: Cathy Square
Appointed: July 1, 2013
Anticipated Exit: November 2014

Recent Developments

- Both the Public Works Director and the Income Tax Director have been terminated for misfeasance; a replacement Public Works Director is being vetted. while the Income Tax Office has been outsourced to a third party.

Significant Actions/Issues

- A firm has been hired to conduct a search for a qualified City Manager candidate.
- The City closed on its emergency loan on September 23, 2014, which was approved by the Emergency Loan Board on June 26, 2014. The proceeds will resolve a $2.1M liability to MERS.
- Retiree healthcare changes were implemented in December 2013 at a cost savings of over $1.8M.
- The annual pension liability is anticipated to increase from $3.5M in FY 2015 to $4.3M in 2019. This resulted from the closing of certain pension plans and the MERS policy of accelerating the actuarial required contribution for closed plans.

Issues to Resolve before EM Exit

- Retiree healthcare litigation.
- Hire a qualified City Manager.

Lincoln Park

Emergency Manager: Brad Coulter
Appointed: July 3, 2014
Anticipated Exit: January 2016

Recent Developments

- SAFEbuilt was selected to perform building inspections for the City. Inspections were not being completed on a timely basis and the Building Inspector was terminated.

Significant Actions/Issues

- The Police and Fire pension plan is 30% funded. The General Employee plan is 22% funded.
- An Emergency Manager Order to charge $60 for each vehicle towed by the City will result in additional revenue of $100,000 per year.
- A Financial and Operating Plan was submitted to the Treasurer on August 22, 2014. The Plan's proposal includes 1) Fire Department restructuring - $1M annual savings, 2) OPEB plan reform or elimination - $3.2M+ for duration of fiscal emergency, 3) CBA changes include sick, vacation, unused sick and vacation buy backs, average final compensation, etc. This will likely result in hundreds of thousands in annual savings, 4) health plan changes - $150K annual savings, and 5) outsource Building Department - $75K annual savings.
- FY 2013 ended with a General Fund accumulated deficit of $89K. In the prior FY, the City had a positive fund balance of $2M.

Issues to Resolve before EM Exit

- Police and fire contracts need to be renegotiated.
- Pension and OPEB funding.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

Emergency Manager: Kevyn Orr
Appointed: March 14, 2013
Anticipated Exit: November 2014

Recent Developments

- On September 25, 2014, Mayor Duggan and the City Council reached a deal to keep Kevyn Orr on as Emergency Manager until the court approves the City's Plan of Adjustment. Mr. Orr's remaining tenure is strictly limited to those actions necessary to bring the bankruptcy proceedings to a close.
- As part of this arrangement, Kevyn Orr signed an order to return all operational authority to the City. While most operational duties had already been returned, Kevyn Orr had continued to oversee the financial and budgetary functions of the City prior to September 25, 2014.
- Mr. Orr also signed several orders to effectuate restructuring and consolidation of City functions. These included finance and budgetary functions, as well as information technology, planning, and grants management functions.
- While the court's exact timeline cannot be known, it is anticipated that proceedings could end over the next 3-6 weeks. In preparation, Treasury is coordinating with the Governor's Office to implement the new Financial Review Commission, which is required by the "Grand Bargain" legislation. This commission will help to ensure the full and timely implementation of the City's Plan of Adjustment.

Significant Actions/Issues

- On September 26, 2014, the Local Emergency Financial Assistance Loan Board approved exit financing for the City. This included the approval of four bond deals that, taken together, are worth up to $1.1B. All bonds had been previously approved by City Council.
- On the same day, the Local Emergency Financial Assistance Loan Board also approved the Emergency Manager's proposal to sell several properties in the footprint of the New International Trade Crossing to the Land Bank Fast Track Authority for a total of $1.4M.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park

RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Joyce Parker, Fredrick Frank, Karen Barann

Recent Developments

- Emergency Manager Joyce Parker exited on September 25, 2014 and a Receivership Transition Advisory Board was appointed.
- A $2.6M emergency loan was approved by the Emergency Loan Board on September 23, 2014 with the closing occurring the same day. The proceeds will be used to pay the delinquent pension obligation. Recent actuarial valuation revealed pension funding for General Employees at 79.2% and Police/Fire at 79.5%.

Significant Actions/Issues

- Future OPEB liabilities reduced by $48.8M (33%).
- Litigation was filed by retirees challenging the Emergency Manager's authority to reduce OPEB liabilities. A court date on this matter is pending.
- The Southfield Lease Properties were sold on August 22, 2014 to Time Equities for $12M.
- A compliance settlement with SEC must be finalized.
- A five-year financial forecast must be developed within 90 days of the Emergency Manager exit.
- The restructuring of the Southfield Lease Properties Debt and Tender Offer must be completed.

Benton Harbor

RTAB Appointed: March 10, 2014
RTAB Members: Cary Vaughn, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments

- The City submitted a $4.8M Capital Improvements Plan (CIP) which was approved by the RTAB on September 24, 2014.
- A litigation study was recently completed by UHY which will assist the City in improving its process of managing legal and litigation issues.
- Due to the resignation of another City Commissioner, a new vacancy has occurred on the City Commission. It is anticipated that the vacancy will be filled by November 2014.

Significant Actions/Issues

- General Fund revenues are projected to exceed expenditures by $2.9M for FY 2014 ($2.3M from loan proceeds).
- The City Manager implemented a twelve-month operational plan to guide City operations.
- Lawsuit filed against the City and former Emergency Manager Saunders by former Public Safety Director; alleges he was dismissed for complaining to the State.
- The Michigan Court of Appeals has ordered the Benton Harbor Mayor recall election off the November 2014 ballot.

Ecorse

RTAB Appointed: May 1, 2013

RTAB Members: Edward Koryzno, Robert Bovitz, Joyce Parker

Recent Developments

- The City continues to search for a qualified interim City Administrator, and is currently operating without one.
- The RTAB annual evaluation will be voted on at the November meeting; while some elements are positive or neutral, much of the report is negative. An eventual recommendation for the reappointment of an Emergency Manager is foreseeable.

Significant Actions/Issues

- City Council repeatedly rejected a CGAP grant which would have saved the City $1M; offsetting the lost tax settlement revenue.
- Pension contributions are anticipated to increase from $1.8M in FY 2015 to $2.4M in FY 2016.
- The State has approved $750K in State Revolving Funds for a sanitary sewer project.
- The RTAB rejected the City's proposed five-year budget in June 2014 due to unrealistic projections. The firing of the City Administrator and the uncertainty of Plante Moran's continued financial services have delayed the completion of a viable five-year budget. The amended budget completion date is unknown.
- Plante Moran has renewed their call for reform within the City (e.g. begin immediate search for permanent City Administrator, contract with neighboring community or an outside agency to provide HR services to the City). Plante Moran's future with the City is in doubt due to the City's failure to meet the conditions it previously agreed to.

Pontiac

RTAB Appointed: August 19, 2013

RTAB Members: Edward Koryzno, Louis Schimmel, Keith Sawdon, Robert Burgess

Recent Developments

- The City of Pontiac Retired Employees Association v. City of Pontiac lawsuit in the United States District Court was recently reassigned from Judge Lawrence P. Zatkoff to Judge Avern Cohn. Judge Cohn has requested the parties participate in facilitation as a means to reaching a settlement. The City of Pontiac and the Retired Employees Association have agreed to participate in facilitation.
- In April 2014, the Final Emergency Manager Order was amended to create a Deputy Mayor position. Interviews are tentatively scheduled on October 20 and 21, 2014.

Significant Actions/Issues

- General Fund accumulated fund balance for FY 2014 is approximately $4M.
- The RTAB is currently reviewing the City's proposed FY 2016 budget, which will be the City's first adopted budget since the Emergency Manager's required two-year budget.
- General Fund is structurally balanced in FY 2015 and expenditures are projected to exceed revenues by $360K.
- The $6M annual retiree healthcare obligation and related federal litigation must be resolved prior to August 2015, when the existing Emergency Manager Final Order regulating this issue expires. Expiration of this order would increase the annual cost of retiree healthcare to between $10-13M, which would be approximately one-third of the City's $30M General Fund budget.
- The General Employee Retirement System application for tax exempt status was extended for another five year period by the IRS until December 31, 2019, as required by federal law. This extension resolves the issue of the proposed 420 Transfer and the RTAB has ceased review of the issue unless the City presents any new proposals.
- The City expects condemnation litigation involving the Phoenix Center building to be resolved in the near future. At that time, the City will proceed with the budgeted $2M demolition of the building.
- The City Charter Commission has completed a draft of a new City Charter, which is under review by the Office of the Attorney General. The Charter will eventually have to be adopted by a vote of the electorate. A possible election date has yet to be determined.
- The City Administrator has informed the RTAB that additional financial training for the City Council is needed.

CONSENT AGREEMENT

Inkster

Date Executed: February 20, 2012
Consultant/Treasury Representative: Mark Stuhldreher
Term of Consent Agreement: N/A

Recent Developments

- A GASB Actuarial report indicated that the City has reduced its OPEB liability by 73% between July 1, 2012 and July 1, 2014 from $27M to $7M.
    - As of January 1, 2014, the City no longer allows any participant to enroll in the City's healthcare plans at retirement. This includes future and existing retirees. The City provides them with a monthly stipend that they use to acquire healthcare elsewhere. The stipend for a one-person household Pre-Medicare is $500 per month; $200 per month if Medicare eligible. The stipend for a two-person household Pre-Medicare is $1,000 per month; $400 per month if Medicare eligible.

Significant Actions/Issues

- The City was awarded a $486K CGAP grant on April 1, 2014 to contract with the Wayne County Sheriff's Department; the City is working with Michigan State Police to augment police staffing. This is currently on hold until a permanent chief is selected.
- The City of Westland was awarded a $347K CGAP grant to consolidate the Inkster Fire Department into the Wayne/Westland Fire Authority on April 1, 2014.
- General Fund revenues are projected to exceed expenditures by $1.5M in FY 2014.
- The Police Chief resigned in July; Interim Chief Vicky Yost was appointed August 4, 2014; a search firm has been retained to find a permanent chief.

River Rouge

Date Executed: December 15, 2009
Consultant/Treasury Representative: N/A (P.A. 72)
Term of Consent Agreement: N/A

Recent Developments

- A reduction in healthcare benefits for all current active employees will be implemented on November 1, 2014. The City is currently working to determine the estimated annual savings.

Significant Actions/Issues

- U.S. Steel annual $1M tax settlement payment to the City expires in FY 2015.
- General Fund revenues are expected to exceed expenditures by $986K in FY 2014.

Royal Oak Township

Effective Date: April 21, 2014
Consultant/Treasury Representative: Robert Burgess

Recent Developments

- The consulting firm (UHY) is assisting the Consent Agreement Consultant and the Township in developing a Financial & Operating Plan. The Township has requested that the plan deadline be extended to November 1, 2014.
- The Township will be approving a new contract for waste disposal services in October. A 10% cost reduction will be achieved under this new agreement.
- The State of Michigan, Bureau of Construction Codes ordered the Township Building Inspector to inspect and issue a report regarding the conditions at the Township's Recreation Center. The report was ordered after Treasury contacted the Bureau of Construction Codes when receiving a complaint from a Township Parks Commissioner regarding possible health and safety violations at the Recreation Center. Treasury will receive a copy of any determinations issued by the Bureau of Construction Codes.
- The Township is planning to submit several applications to the new Financially Distressed Cities, Villages, and Townships grant program.

Significant Actions/Issues

- The Michigan State Police continue to provide police services to the Township.
- A committee consisting of the Township Supervisor, Consent Agreement Consultant, and one Township Trustee continues to explore contracting for police and fire services. The Michigan State Police and Treasury are also involved with this process. The City of Ferndale and the City of Hazel Park have expressed interest in providing these services.
- A Deficit Elimination Plan is required for police, fire, and street lighting funds to address a total deficit of $547.6K and was due by August 23, 2014. The Township has not yet submitted its Plan.
- On July 30, 2014, the Township submitted a Corrective Action Plan to address deficiencies identified in its FY 2013 Audit; Treasury is currently reviewing the plan.
- Surplus pension assets of $619K administered by MERS were transferred to the Township. The State Treasurer approved a Consent Agreement Order by the Township Supervisor prohibiting the use of these funds until the Financial & Operating Plan is approved. The Office of the Attorney General is reviewing the legal authority regarding the use of these funds for any purpose other than pension expenses.

NEUTRAL EVALUATION

Highland Park

Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- The Emergency Loan Board approved the Emergency Loan Agreement and a $3M Emergency Loan on September 23, 2014. The Emergency Loan closed on September 24, 2014.
- The City requested proposals to prepare a water and sewer rate study. The deadline to submit a proposal is October 9, 2014.
- Ronald Rose has contracted with the City to facilitate the provisions of the Loan Agreement.
- Summary of the Plan of Adjustment for the City of Highland Park adopted on August 28, 2014.
    - Fifth Third Bank has finalized an agreement to settle for 50 cents on the dollar for outstanding debt.
    - By June 15, 2015, Highland Park (at the State's insistence) must have a third party operator for its water/sewer systems.
    - After the selection of this third party operator, DWSD and Highland Park will negotiate a long-term settlement for outstanding sewer debt.
    - Work to reduce retiree healthcare benefit cost has begun.
    - An additional emergency loan of $16.5M will be required to restructure $4.8M in existing emergency loans, to refund $2.7M in Fiscal Stabilization Bonds, $5.2M in Financial Recovery Bonds, and 3.6M in State Revolving Fund bonds.

Significant Actions/Issues

- Liabilities total $117.6M - some of the major components are: $55.3M debt (including $20.7M owed to DWSD), $17.7M pension bonds, and $26.1M unfunded OPEB liabilities.
- The City defaulted on its State emergency loan payment due May 19, 2014. Treasury withheld $101K from State Revenue Sharing on June 30, 2014 to cover the default.
- A long-term lease of its 32-acre tree farm in Rochester Hills for $1M was announced by the City.

OTHER COMMUNITIES

Melvindale

Significant Actions/Issues

- The General Fund deficit for FY 2013 is $1.9M, an increase of $248K from the FY 2012 deficit.
- The City's ice arena unrestricted annual deficit for FY 2013 is $1.9M, which is approximately $160K more than what the City projected. It continues to negatively impact the General Fund.
- The City met with Treasury representatives on August 19, 2014 to discuss the City's proposed deficit elimination plan. The City provided a well-crafted plan and it is under review by Treasury.
- The City Council approved placing two millage proposals on the November ballot. The first is to pay the debt on the ice arena and the other is for street/sidewalk repair.

Taylor

Significant Actions/Issues

- The General Fund has an unrestricted deficit of $2.2M for FY 2013.
- The City made only 47% of its required annual contribution for OPEB. The unfunded liability is $232.7M and continues to grow.
- There are several contingent liabilities that may impact the financial stability of the City, including the possible need to subsidize Brownfield Redevelopment Bonds of $14.2M.
- A 1996 levy to pay a general obligation bond expires in 2015, potentially resulting in a $6.2M drain per year on the General Fund during FY 2016 and FY 2017.

City of Wayne

Recent Developments

- City Manager Joe Merucci resigned, effective October 11, 2014 and has taken an immediate leave of absence.
- Police Chief Jason Wright was appointed Interim City Manager on September 11, 2014.

Significant Actions/Issues

- Projected General Fund deficits for FY 2014 and beyond.
- The City is discussing a May 2015 ballot proposal that would seek voter approval for additional millage.
- The positions of Finance Director, Personnel Director, and Parks and Recreation Director are currently vacant.
- The Mayor of the City of Westland has publically expressed concern about the stability of the City of Wayne and the collaborative agreements between the two cities.

Wayne County

Recent Developments

- In a letter from the Director of Labor Relations, the Director indicated that negotiations with all bargaining units have stalled.
- The County anticipates another short-term borrowing in December 2014 for $75M. Cash reserves reaches its lowest point in May 2015 with pooled cash falling to approximately $63M (average balance is $170M).

Significant Actions/Issues

- The County submitted a revised DEP, approved by the County Commission, which removes the changes to retiree healthcare. The loss of the $9.2M in savings will be offset by the $10M anticipated increase in revenue sharing. County Treasurer agreed to transfer $150M from the Delinquent Tax Revolving Fund to the General Fund. Of that $150M, $82M has already been transferred and applied to the accumulated deficit, and $44M has been applied to the operating/structural deficit in accordance with the DEP. The additional $24M, which was not part of the DEP, will be used to help reduce the accumulated deficit.
- Approval of the County's revised DEP is on hold until the new Wayne County Executive takes office.

EMERGENCY MANAGER				
Unit of Government	**Current Emergency Manager**	**Initial Appointment Date**	**Target Exit Date**	**Notes**
City of Flint	Darnell Earley	November 28, 2011	April 2015	* Five Charter amendments and a general Charter revision question have been placed on the 11/14 ballot * A $1.1M state appropriation received to fund front-line public safety positions for FY 15.
City of Hamtramck	Cathy Square	July 1, 2013	October 2014	* Firm hired to conduct search for qualified City Manager candidate. * City requested $2 1M emergency loan which was approved by the ELB. Proceeds will resolve $2.1M liability to MERS.
City of Lincoln Park	Brad Coulter	July 3, 2014	January 2016	* F & O Plan submitted in August * Police and Fire pension plan is 30% funded. General Employee plan is 22% funded.

Benton Harbor Schools	June 23, 2014	August 19, 2014	August 25, 2014	* Attendance as of 9/22/14 at approximately 92% of budget target. * Consent Agreement successfully negotiated, Board adopted 9/23/14 * In process of selecting Consultant, expected to be on the ground at District end of 10/14 * Currently managing payables to make emergency loan debt service payment (October) and payroll

SCHOOLS WATCH LIST
* Flint Community Schools – Current attendance at approximately 98% of budget target; Near term cash flow needs, Revised DEP submitted to MDE on 7/31/14, extending the recently approved DEP by 3 additional years to FY 21; FY 14 budget amendment ($20.4M) deficit fund balance, increased from ($10.4M) in FY 13.

Financial and Operating Plan for the City of Flint – Update 7
October 8, 2014

Introduction

This update to the Financial and Operating Plan for the City of Flint is submitted by the Emergency Manager for the City of Flint to Governor Rick Snyder, through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 17.

This report includes a summary of the financial conditions and goals for the City of Flint, the plan to conduct the operations of the City, the on-going actions being taken to resolve the financial emergency, and the outline of a plan to prepare for an eventual transition as prescribed in P.A. 436 This update will be posted on the City's website. www.cityofflint.com .

Summary of the EM/EFM Appointment Sequence and Development of the Operating and Financial Plan

The Flint Financial Review Team determined in November 2011 that the City of Flint was in a financial emergency. (See Attachment #1)

On December 1, 2011 Governor Rick Snyder appointed Michael K Brown as Emergency Manager. EM Brown developed the Financial and Operating Plan utilizing the resources of a five person Advisory Committee as well as five additional advisory committees. EM Brown sought broad expertise to ensure public engagement and to maintain a sense of continuity with the Mayor and City Council. All nine City Council members and over fifty other citizens participated in the advisory committees.

EM Brown's original Financial and Operating Plan (45 Day Plan) was submitted to the State Treasurer on January 15, 2012; the first update to the Plan was submitted on June 1, 2012. On August 8, 2012, PA 4 was suspended and Edward J. Kurtz was appointed Emergency Financial Manager under P.A. 72 (Mr. Brown stepped aside as he was prohibited from serving as EFM due to his recent service as Interim Mayor for the City of Flint.)

EFM Kurtz established a new Advisory Committee in accordance with the requirements of P.A. 72. Utilizing the Advisory Committee and the City of Flint management team, EFM Kurtz presented a second update to the Financial and Operating Plan and submitted this to the State Treasurer on February 8, 2013

When P A. 436 took effect on March 28, 2013 Mr. Kurtz was re-appointed by Governor Snyder as Flint's Emergency Manager. Mr Kurtz continued in that capacity until his resignation after the end of fiscal year 2013. At that time Mr. Kurtz submitted his closing

memorandum and the third update to the Financial and Operating Plan. Governor Snyder then reappointed Mr Brown as Emergency Manager. On October 8, 2013 I was appointed by Governor Snyder as Flint's fifth Emergency Manager following Mr Brown's resignation On November 21, 2013 I submitted the 45 Day Plan as required by P.A. 436 Section 11(2); that plan became Update #4 The fifth and sixth updates to the Financial and Operating Plan fulfilled P.A. 436, Section 17 six month and subsequent three month report requirement.

This report, indicated as Update #7, again fulfills P.A 436, Section 17 requirement for an update each subsequent three months.

Priority List for the Resolution of the Financial Emergency

- Stabilize the financial future of the City: maintain a balanced budget, eliminate the accumulated General Fund deficit, seek increased revenue, and reduce unfunded pension and OPEB liability.

- Re-establish Flint as one of the safest cities in Michigan — both in reality and perception· provide public safety services, focusing on reducing violent crime, commensurate with cities of comparable size and resources, utilizing regional cooperation as appropriate This includes implementation of the plan for the Flint 9-1-1 Center to join the Genesee County 9-1-1 Consortium.

- Implement the Blight Elimination Plan: manage demolitions, enforce blight ordinances

- Maintain access to a clean, sustainable water source: implement the steps necessary to participate in the Karegnondi Water Authority (KWA) including interim water supply implementation, disposition of current pipeline sections. City Water Treatment Plant updates, a long term water supply back up plan, and a long term financial plan for the stability of the water and sewer funds

- Implement the Master Plan of the City of Flint: update the Zoning Ordinance, evaluate the capital investment needs, and incorporate Master Plan activities in the annual budget development.

- Explore Governance Models for the City of Flint: receive report from the citizen's committee which was formed to evaluate city governance models, recommend course of action for Charter revision as a part of transition discussions.

- Implement the 7 Point Transition Management Plan (Attachment #2) which has been adopted by the Flint City Council and Mayor Walling. This Plan incorporates specific objectives which provide a strategy for determining and evaluating criteria for assessing when the City might be prepared to emerge from emergency management to home rule order with oversight of a Receivership

Transition Advisory Board. This plan has been further refined with a chart encompassing specific implementation steps and completion dates.

Operations of the City of Flint

Shortly after his appointment as EM, Michael Brown took steps to reorganize the city government operations including: elimination of departments, consolidation of departments, elimination of management level positions, adjustment of the compensation of elected and appointed officials, elimination of the Civil Service operation and the Office of Ombudsman

Management appointments were made to ensure that the essential services necessary for the public's health, safety and welfare are provided, and to continue conducting all aspects of the City of Flint's operation within the resources available. Necessary employment contracts were extended with the approval of the Treasury Department.

Department management reconfigurations were completed in anticipation of reductions in staffing levels as provided in the FY 13 Budget. Subsequently, as part of the FY 14 Budget process a Strategic Plan was adopted and more changes in the organizational structure occurred. The primary change was the inclusion of a new Planning and Development Department (See Attachment #3 Organizational Chart July 2014). I have made personnel adjustments to complete this reorganization of the Planning and Development Department.

The FY14/15 and FY15/16 biennial budget has been adopted. This year the budget process involved over 30 hours of active participation by the Mayor and the City Council Finance and Administration Committee sitting as the committee of the whole. As part of this process the Council adopted a five year Strategic Plan and a list of priorities for the development of the two year budget. This document has been updated to show the progress which has been made in each of the department level objectives (See Attachment #4 Strategic Plan of the City of Flint 2015-2019 1st Quarter Update).

When P A. 436 became effective in March 2013 the City Council members' and Mayor's compensation was eliminated. EM Kurtz partially restored compensation for Mayor and Council through Orders 1 and 2. These orders also defined specific responsibilities and requirements. For example, the City Council members were required to complete Level One of the Michigan Municipal League (MML) core course for municipal government and receive the MML education award within one year. I determined that this Order was still in effect, and the Council members all individually signed acceptance of these requirements as a condition of receiving compensation. Mayor Walling has fulfilled these obligations. All Council members have begun, but not yet fulfilled these obligations. Through adoption of EM Orders 15 and 16, beginning with the FY14/15 budget, the Mayor and Council received an increase in compensation commensurate with the increased duties assigned to them.

All Orders and Directives issued by the Emergency Financial Manager (under P.A. 72) and Orders issued by the Emergency Manager (under PA4 and P.A. 436) are listed in Attachment #5: Orders and Directives of the EFM and EM.

The 7 Point Transition Management Plan which emphasizes re-engagement of the Mayor and City Council has been a top priority. The Council is meeting monthly on a regular basis; five Council Committees are operational: Finance/Administration, Legislative, Public Works, Public Safety, and Planning and Development. Each Committee is meeting regularly and then reporting at the following Council meeting. Order 8 was issued in March 2014 and defines format of action and participation at the Council meetings. Order 9 established monthly Council and Committee meetings; and Order 10 set the format of the Council meeting agenda. Additionally, Mayor Walling has been assigned day to day oversight of the Department of Public Works and the Department of Planning and Development. These steps as outlined in the 7 Point Transition Management Plan are part of preparing the City to resume local control under a Receivership Transition Advisory Board.

The 7 Point Transition Management Plan has been further refined through the development of a chart entitled: *Steps to Prepare for Transition from Emergency Manager to Receivership Advisory Board.* This chart has set target completion dates for essential steps necessary to prepare for this transition (Attachment # 2).

Financial Status

FY12 Budget and Audit

The Comprehensive Annual Financial Report (CAFR) for FY12 was completed and was filed with the State in a timely manner. The results were as expected, with fewer auditor comments than in past years. Deficits existed in the General Fund ($19.1 million) and in the Water Fund ($8.8 million).

The $19.1 million accumulated deficit reflected an excess of expenditures in the General Fund for FY12 of $10.2 million plus $8.9 million for FY11. This was anticipated by Emergency Manager Brown shortly after being appointed, which was almost six months into the FY12 year. Given that FY12 was nearly half over, and that significant unplanned reductions in services, primarily public safety, would need to occur if the projected deficit were to be immediately eliminated, the decision of the Emergency Manager, in consultation with Treasury, was to contain costs as much as possible but without significantly reducing services – especially public safety - for the balance of the year.

Pursuant to State statute, Deficit Elimination Plans for both FY11 and FY12 were submitted to the Department of Treasury. Both plans involved a mix of borrowing and expenditure reductions over the next five years. However, no final action was taken to implement the intended courses of action.

FY13 Budget and Audit

FY13 was the first budget developed and administered by the Emergency Manager and his team. Faced with a projected gap of more than $25 million, the FY13 budget was balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Previous reports detail the 25% increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, conversion of the waste collection millage to a fee and the creation of a special assessment for street lighting, elimination of 20% of the City's workforce, compensation decreases equivalent to a 20% wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

Results of FY13 year end show a surplus of revenues over expenses in the General Fund exceeding $6.2 million. This surplus reduced the City's accumulated $19.1 million deficit as of the end of FY12 to less than $12.9 million. Since the goal of the EM team was to assure that FY13 would not end with any additional deficit, this result significantly exceeded expectations.

The FY13 audit was completed and submitted to Treasury on December 20, 2013. All items surrounding the audit, including submission of the Form F-65 and Comprehensive Annual Financial Reporting Program were completed by December 31, 2013. The audit was presented to City Council as well on January 13, 2014.

FY 14 Budget and Strategic Plan

The FY14 budget was adopted via Emergency Manager Edward Kurtz Order #4 on June 7, 2013. This budget was developed with the same goal as FY13 – to assure the provision of essential services within the constraint of a balanced budget and continued deficit reduction. Accordingly, the FY14 budget included a $1.0 million commitment from the General Fund to further reduce the deficit. This is considered a minimum level of deficit reduction.

The Emergency Manager's team, crafted a draft strategic plan in preparation for the FY14 budget development. Vision, Mission and Goals were established for the City government. Department managers then set specific, measurable objectives. Within the strategic plan was a five year financial projection.

Achieving the balanced budget again required reducing the workforce; however, with significant efforts from department heads and others involved in developing the budget, and building on ongoing reorganization of city processes, the level of services currently provided generally continued at FY13 levels. Most importantly, the quest to at least maintain FY13 levels of police and fire staffing was achieved, although one consequence was that the additional reductions in staffing came from non-public safety areas. This was equivalent to an additional 10% reduction of staffing in those areas.

As the city has reached the end of FY14, the unaudited close shows a General Fund balance of more than $4 million of revenue over expenses; this balance will be applied to the deficit as planned. One set of budget adjustments, with approval of Treasury was implemented in December 2013. A second budget adjustment was approved by Treasury and was adopted on April 3, 2014. The closing budget amendment was approved by resolution on June 25, 2014.

The City's cash flow has improved significantly from the $13 million cash on hand in December of 2011. Thirteen million dollars is less than one month's operating expenses. By comparison, the cash on hand on August 2014 was in excess of $60 million.

Deficit Elimination Plan 2014

A deficit elimination plan which also incorporates a reserve accumulation plan was approved by the Department of Treasury and was adopted by EM Order 18 on July 15, 2014. The City recognizes that a goal needs to be set to develop a reserve equal to 15% of General Fund revenues. This is one of many financial best practices which the City will incorporate to assure a sustainable municipal model. As of June 30, 2014 the deficit stands at approximately $9 million. In budget years FY15-FY20, $1.8 million will be allocated each year which will eliminate the deficit without need for borrowing.

FY 15-19 Strategic Plan and FY 15/FY 16 Budget

The FY14 budget was developed within the context of an updated five year projection of revenues and expenses. This exercise pointed out the continuing challenge the City of Flint will have in achieving long term financial stability. The Finance Department and the Council Finance/Administration Committee developed the FY15-19 strategic plan and financial projections. The City Council has adopted a Strategic Plan which included Mission, Vision, Goals and a Budget Priorities statement (Attachment #4: Strategic Plan of the City of Flint 2015-2019 1st Quarter Update). Consulting firm Ernst & Young assisted the City with an update to the five year financial projections.

The EM, in concert with the Mayor, developed a two year budget for FY15 and FY16. The goal continued to be to provide the best level of service possible within available resources while continuing to restore financial solvency. It is clear that in balancing these budgets the City will continue to be faced with addressing an on-going structural deficit; and the biggest challenge by far remains the outcome of the retiree health care lawsuit.

The City Council received the recommended two year budget April 30, 2014. The Finance/Administration Committee (sitting as the committee of the whole) used the first two weeks of May to hold five meetings on specific program areas. At the conclusion of the departmental reviews the Council send a list of budget revision

proposals to me. Several of the recommendations were incorporated into the revised budget. The Council then held a public hearing on June 9, 2014.

This budget does include significant staffing reductions in public safety. In the two prior budgets other General Fund departments were reduced in size, combined, or contracted services. For this budget cycle, there were no other General Fund areas to reduce, except public safety services.

The targeted personnel reductions in public safety will not result in lay-offs prior to December 31, 2014. In the interim, the City has contracted for a comprehensive study of the police and fire operations. Based on the results of this study, and the managed attrition reductions, the personnel levels in both Police and Fire will be re-evaluated.

The State budget which begins October 1, 2014, contains an appropriation of $1.1 million for use in Flint's public safety departments. The boilerplate of the State budget includes:

> *The appropriation of $1,100,000.00 in part 1 for the city of Flint shall be allocated to support city police and firefighters. The emergency manager shall determine which public safety personnel are to be funded from this award. If the city has an appointed receivership transition advisory board, then that board is vested with the authority to make the determination of which personnel are funded from this award.*

The City is grateful to receive this funding and will use this to implement the recommendations of the Public Safety study which will be concluded in October 2014.

The Emergency Manager's Order 13 adopted the biennial budget; Order 11 adopted the street lighting assessment for FY2015 and FY2016; Order 14 adopted the Strategic Plan; Resolution EME3302014 adopted the FY2015 and FY2016 Master Fee Schedule (which includes water and sewer rates, and waste collection fee); Resolution EME3312014 adopted the 2014 and 2015 operating millage rates (Attachment #6 FY15 & FY16 Biennial Budget).

I additionally note that Mayor Walling and the City Council have been fully engaged with City staff and me as this two year budget was developed. Also, as part of FY15, the day-to-day management of the Public Works Department and the Planning & Development Department will be handled by Mayor Walling.

Five Year Projection

FY15/FY16 budgets include more than $5 million each year in increased retiree health care, as a result of Judge Tarnow's injunction. FY15 & FY16 is balanced, but projections for FY17 indicate a deficit between projected revenues and status quo expenses of $5 million. If there is no relief from the $5 million in increased retiree health care expenses, or no new revenue source, balancing the FY17

budget without compromising the City's ability to provide even the most basic level of city services - including public safety, will most likely not be possible.

Retiree Health Insurance Revisions

The City's approach to containing its OPEB liabilities has been to restructure both active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million.

As previously reported, the City's effort to restructure retiree healthcare was challenged by a group of retirees in a federal lawsuit, *Welch v City of Flint*. On January 3, 2014, the U.S. 6th Circuit Court of Appeals reinstated an injunction prohibiting the City from modifying retiree health care benefits. The City is aggressively litigating this matter, as it does not have the resources to afford the current level of healthcare coverage, and projected cost increases for the upcoming fiscal years are substantial. If the federal district court's decision is not reversed, the City will be in an extremely precarious financial position, with insufficient resources to meet basic functions

The City is working to comply with the court's order, beginning with establishment of a reimbursement program for retirees whose expenses since January 3, 2013 are greater than their old plans. Work is also proceeding in anticipation of a court hearing sometime in the future, and settlement options are being explored.

On June 30, 2014 Judge Tarnow issued an order modifying in part his preliminary injunction barring the City from modifying retiree health care benefits. The Judge's order now permits the City to modify retiree health care as the City had proposed in a settlement proposal which was previously submitted to the Court.

While the details of the Judge's recent order are still being reviewed, and while the details of implementing the order are still being developed, it appears that the ruling will have a positive financial impact on the City, at least for the period while the litigation continues.

Otherwise, the City is utilizing the services of Cornerstone Municipal Consulting in ongoing review of various Employee/Retiree health care options including plan design, delivery systems, Medicare Advantage, Medicare Wrap Around, benefit carve-outs, etc. in an effort to control health care costs. Administration of the City's health insurance benefits program is being handled by Cornerstone. In addition to the retiree lawsuit, attention is now focused on minimizing the City's cost for health care (for current employees and retirees) in the FY15 and FY16 budgets.

Operating Plan

The city continues to review all departments and services to reduce costs through contract rebidding, merger, consolidation, contracted service, shared services with other governmental entities, privatization or elimination. As a result of these reviews the City will determine what continuing activities should be subsidized with general property tax dollars, what will be paid by the users, which services can be eliminated, and which services or activities can be handled by lower cost vendors.

The functions, goals and key objectives of each department and functional area of the City of Flint have been encompassed in the Flint Strategic Plan 2015-2019. This plan also contains target dates for completion of each key objective. (Attachment #4: Strategic Plan for the City of Flint 2015-2019. 1st Quarterly Report)

The progress made in this past first quarter of FY15 is presented in Attachment #4 and includes the narrative and the Strategic Plan with all objectives updated to the current status.

Major Up-coming Activities

68th District Court

- The City currently funds the operation of the 68th District Court; in FY14 this amounted to $3.5 million net. Senate Substitute for House Bill 5125 passed the Senate and the House in March 2014. The Bill authorizes consolidation of the 67th and 68th District Courts. It requires that the consolidation be approved by the City and the County. The County approval requires the affirmative vote of at least two-thirds of the County Board members. I strongly encourage the State to continue the process of working to consolidate the 67th and 68th District Courts; the City of Flint will work to support this consolidation.

9-1-1 Operation

- On September 9, 2014 the Genesee County 9-1-1 Consortium voted to admit the City of Flint as a member of the Consortium. The goal to complete the incorporation of the Flint 9-1-1 Center operation into the Consortium is June 30, 2014. As part of this process the City of Flint will contribute $325,000 toward the $1.2 million cost for new equipment and building expansion at the Consortium's Corunna Rd. location. The City will also transfer the ownership of the simulcast tower which is currently under construction. The City will also provide a no cost lease for the area on which the tower stands. The $325,000 is currently allocated for the Flint 9-1-1 phone system upgrade. This upgrade will not be required with the joining of operations.

Public Safety

- A data-driven public safety study to assess the operations of the City's Police and Fire Departments began in May 2014 utilizing the services of the Center for

Public Safety Management. This report is due in October 2014 and will be used to evaluate both departments' organization and staffing.

*7 **Point Transition Plan***

- Within the next quarter the selection process will be completed to hire a City Administrator.

- Six ballot initiatives, which were recommended by the Blue Ribbon Committee, will be voted on during the November general elections. The first proposal begins the process to open the current Charter for a complete review:
  PROPOSAL 1 GENERAL REVISION OF CITY CHARTER
  Shall there be a general revision of the city charter?

- These five initiatives are amendments to the current Flint City Charter:
  PROPOSAL 2 AN AMENDMENT TO REDUCE THE NUMBER OF MAYORAL PRINCIPAL STAFF APPOINTMENTS
  Shall the Flint City Charter Section 4-202(A) and (C) be amended by reducing the number of Mayoral principal staff appointments for legal counsel and administrative services from no more than ten (10) to no more than five (5)?

  PROPOSAL 3 AN AMENDMENT TO REQUIRE BUDGETARY BEST PRACTICES
  Shall the Flint City Charter be amended to provide that the annual budget presented to Council shall be accompanied by a budget message explaining the budget, to provide for multi-year financial plans and revenue projections and the establishment of a budget stabilization fund?

  PROPOSAL 4 AN AMENDMENT TO ELIMINATE FLINT CITY CHARTER SECTION 4-203(A), EXECUTIVE DEPARTMENTS
  Shall the Flint City Charter be amended by eliminating Section 4-203(A), which would eliminate the requirement for specific executive departments?

  PROPOSAL 5 AN AMENDMENT TO ELIMINATE THE CIVIL SERVICE COMMISSION
  Shall the Flint City Charter be amended by eliminating Section 5-101 through Section 5402, which would eliminate the Civil Service Commission?

  PROPOSAL 6 AN AMENDMENT TO ELIMINATE THE OFFICE OF THE OMBUDSMAN
  Shall the Flint City Charter be amended by eliminating Section 3-501 through Section 3-517, which would eliminate the Office of the Ombudsman?

Facilities Management

- The Facilities manager is reviewing all city owned assets (both real property and capital equipment) to determine if disposal should be pursued.

- All city owned facilities are under review for energy savings, revenue generation from tenants, or possible liquidation.

Emergency Manager's Conclusions

Significant work has been accomplished to stabilize the financial situation of the City of Flint. The whole organization has been being restructured to reflect a smaller, leaner government operation Services which were routinely provided are being inspected to determine if they should continue and if so, in what format. Technology solutions which can increase efficiencies are being implemented

The many improvements to-date and those represented in the Strategic Plan have been based on data-driven management plans. The approval of the KWA participation, water and sewer rates, capital improvements, departments staffing and priorities are all based on using rational data analysis. Collecting, analyzing and then utilizing data concentrates work and dollars where the most beneficial results can be expected

I acknowledge that substantial progress has been made, however the City is still experiencing an on-going financial emergency Resolution of the financial emergency will not be complete without providing a basic framework for, and implementation of, an objective model for the organization to follow.

A sustainable municipal organization incorporates the utilization of best practices financially, structures a governance model which clearly delineates between legislative, policy, and administrative responsibilities, and develops a management plan to provide services to residents in a consistent, reliable manner.

The 7 Point Transition Management Plan and the steps to Transition Chart which I have developed provides the roadmap to resolve the financial emergency and to achieve sustainability for the City of Flint.

For two years, FY13 and FY14, the goal of containing overspending has been achieved. The city must continuously function within a balanced budget, eliminate the accumulated deficit and further reduce the legacy and pension costs. Projections through 2019 demonstrate Flint's continuing challenges. Projecting current revenues and expenses into the future shows a continuing gap of $2 to $4 million annually.

Stable revenue is necessary in order for this City, and most other cities in Michigan, to continue to avoid a bankruptcy situation. We have asked our residents to accept a significant 6 mill Police and Fire Protection Millage; and they have done so. We have imposed a street lighting assessment, a waste collection fee and significant water and

sewer rate increases. However, our residents have not enjoyed increasing services, increasing property valuations or increasing employment opportunities.

As noted previously, there are very few additional revenue options We are approaching the limit of the City's borrowing capability. Capital improvement funds are fully committed and the property tax millage rate in within .1 mill of maximum. State Revenue Sharing has increased but minimally and is now tied to EVIP and competitive granting. We have made a request through our State Legislative representatives and the State Treasurer to push legislation to allow City voters the opportunity to decide to increase the income tax. This action could generate $7 million annually and would eliminate the City's structural deficit. A bill has been introduced but has not been acted upon

While the City will benefit from the temporary revision of Judge Tarnow's order on retiree healthcare, it is important to remember that this lawsuit continues. Final resolution in the lawsuit will determine if the financial emergency is resolved or if it will force the City to consider bankruptcy. Bankruptcy is the alternative which we have worked diligently to avoid. If, by the beginning of FY17 the City of Flint does not receive permanent relief from retiree health care costs, either in the form of reduced city expenditures or additional revenues, it is unlikely that the City will be able to provide even the most basic level of city services.

I do not recommend beginning the transition back to the Mayor/Council management of the City at this time. However, I expect the overall situation to become much clearer in the next three to six months, given the plans and organizational changes which have been put in place. The City still has critical on-going budgeting issues. There has been action on several sections of the 7 Point Transition Management Plan, but more needs to be completed. Also, the City Council is still required to complete the Michigan Municipal League Level 1 Certification as required by Order 2 (04/12/13). So far, only Mayor Walling has met this requirement.

Flint has twice been placed in the hands of a State appointed emergency manager A third failure should be avoided at all costs. The Blue Ribbon Committee on Governance, which I appointed in January 2014, completed their evaluation of governance revisions needed in the City. The Blue Ribbon Committee's final report (http://www.cityofflint.com/FinancialMgr/2014/IMAGES/BRC%20Final%20Report%20071714.pdf) recommended five amendments to the current Charter; these proposals have been placed on the November ballot. They also recommended return to the Council-Manager form of government. This can be achieved through a multi-step process, beginning with the approval of the Flint voters to agree to a general revision of the City Charter This proposal has also been placed on the November ballot.

I have now spent one year as Emergency Manager in Flint. Many major steps have been taken to resolve the financial emergency. Flint is on a much more stable footing than it was three years ago. However, the level of services being provided to the citizenry is at a minimal level, at best. I feel strongly that it is incumbent upon me to make sure that the

city reaches it goal of sustained financial solvency. The financial emergency is not fully resolved until the long-term sustainable structure is secured.

Another update of this report is expected to be presented in January 2015 as required by P.A. 436. Other updates will be provided as appropriate.

Respectfully submitted,

Darnell Earley, ICMA-CM, MPA
Emergency Manager
Flint, MI

Attachment 1. Summary of Findings of the Flint Financial Review Team

Summary of Findings of the Flint Financial Review Team
November 2011

- The City has a general fund deficit of$14,621,546 as of June 30, 2010 which was not eliminated within the two year preceding period.

- The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of$7,046,820 as of June 30, 2008. However, by June 30, 2010 the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 does not purport to eliminate the cumulative deficit until 2030 and that relies upon the issuance of an additional $12 million of debt in 2013.

- A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010 and the general fund is projected to have a $6,768,864 deficit as of June 30, 2011.

Attachment 2. 7 Point Transition Management Plan and Transition Status Chart

7 Point Transition Management Plan

Goal: To provide a strategy for determining and evaluating relevant and specific criteria for assessing when the City of Flint might be prepared to emerge from Emergency Manager (EM) oversight to a Transition Advisory Board (TAB), as provided in Public Act 436. The seven points identified provide comprehensive and well defined benchmarks to be reviewed before the determination is made The Plan also defines a data-driven and measurable process for the objective, results-oriented determination of facts. The Plan establishes the criteria now so that it is clear what the conditions are that will have to be satisfied before the Emergency Manager recommends the establishment of a Transition Advisory Board.

GOAL	STRATEGY	OBJECTIVES	STATUS
1. Deficit Elimination Plan	Deficit Elimination Plan and Reserve Accumulation Plan will be presented by the EM/Mayor/Finance Dir. to City Council through its Finance Committee to receive Council support. Also a commitment by the Mayor and Council to implement the plan will be required.	City Council to pass resolution of support for DEP/RAP from EM/Mayor/Fin Dir. Receive Treasury acceptance of the DEP/RAP. Confirmation by Mayor and Council that DEP/RAP actions will be a top priority in budgeting.	_____ _____ _____
2. Five-Year Financial Analysis	The development, monitoring and updating of a five-year financial analysis is critical to the ongoing challenges of financial solvency. It must remain an ongoing process to measure the City's ability to fund services, produce budgets, and proactively manage expenditures. It should be an expectation of the Council that the EM/Mayor/Fin. Dir. shall annually prepare and Council shall review and adopt said projection; and shall continue to use the projection as a basis for future budgeting actions	EM/Mayor/Fin Dir to annually prepare a 5 yr. R/E projection. Council Finance Committee review 5 yr. analysis and move to Council. City Council adopts 5 Year Analysis Finance Committee shall annually review analysis in February each year and send to Council for approval	_____ _____ _____ _____
3. Governance	The EM will consider recommendations from the Blue Ribbon Committee, National Civic League Model Charter, proposed charter amendments, review of electoral structure, Executive appointments, etc. It is expected that a formal agreement would be reached among the EM, Mayor, and Council as to what governance revisions are to be implemented, including time frames for implementation	Blue Ribbon Cmte. Complete Report and Submit to EM Mayor and Council Submit Comments on Report to EM EM developes proposed governance structure and sends to Governor. Mayor and Council have an opportunity to review and comment on EM proposal. Completion of City Ordinance review by Council as proposed by EM	_____ _____ _____ _____ _____

GOAL	STRATEGY	OBJECTIVES	STATUS
4. Organization Development	Review the City's organizational structure including Public Safety, 9-1-1 plan, courts consolidation plan, recommendations on other long-term services, and role of the city administrator (who will be appointed prior to the TAB). Finalize the organizational relationship among Mayor, Administration and Council This will result in an agreed upon detailed description of the roles and responsibilities of the Mayor and Council, including items such as respective roles in strategic planning, budgeting, monitoring and assessment of results, appointments, and protocols for addressing citizen complaints.	EM/Mayor determines recommended City organizational structure. EM/Mayor to recommend Council action (ordinance changes) to implement organizational structure. Council to review and adopt revised organizational structure EM/Mayor to hire City Administrator/Manager. Finalize organization structure and roles Mayor, Council, Administration. Labor contracts to be completed for all City unions	
5. Legacy Costs	Retiree Health Care remains the biggest challenge to managing legacy costs and the City is currently facing a legal challenge. It will be unlikely that the financial emergency will be declared resolved until this issue is settled in a manner which does not risk the solvency of the City. Sustaining the changes within RHC are essential to the City's future solvency.	Mayor and Council to support City's position on retiree health care or adopt measures offsetting the increased costs. Annual budgets to include payment of appropriate pension and health care costs and liabilities	
6. Strategic Plan	The adoption of a long-range strategic plan by the Emergency Manager, Mayor, and Council for the governing actions of the City will provide a guidance mechanism for determining budgeting, priorities, goals and objectives.	EM/Mayor/Fin Dir. to present 5 yr Strategic Plan through Finance Cmte to Council for approval Council to set spending priorities EM/Mayor to utilize Strategic Plan to develop budget Council to adopt budget in line with Strategic Plan and budget priorities. Council to receive quarterly reports from Mayor/Fin. Dir. on *progress of achieving strategic objectives and priorities* Strategic Plan to be updated annually	

GOAL	STRATEGY	OBJECTIVES	STATUS
7. Sustainability	Factors for determining sustainability are rooted in the 7 points. More specifically, the measures that will be evaluated include: achievement of consensus decision-making on the part of the Mayor and the Council, adoption of best practices, continuing commitment to training and development for the Mayor and Council members, ongoing monitoring and updating of plans necessary for the financial stability of the City including but not limited to 2-year budgets, 5-year *financial analyses, and the ongoing* implementation of the Master Plan	Council and Mayor update methods to develop policy recommendations and achieving consensus.	
		Council and Mayor attend all training sessions as scheduled by EM	
		Council and Mayor to actively participate in development and adoption of 2 yr. budget.	
		Implement Master Plan (evidence of Master Plan implementation in annual budget).	
		Define and incorporate financial and organizational best practices	
		Implement system of performance measurement	
		Utilize data-driven methods of decision making and performance measurement.

City of Flint Strategic Plan

Quarterly Report

July 1, 2014 – September 30, 2014

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

DATE: October 10, 2014

TO: Scott Kincaid, President, Flint City Council
City Council

FROM: Darnell Earley, Emergency Manager
Dayne Walling, Mayor

RE: City of Flint Strategic Plan, First Quarter Report

Earlier this year, the City Council of Flint adopted a Strategic Plan for the City of Flint. This Plan announced a Vision, Mission, and Goals to guide the operation of the City government for the next five years, and was adopted in the context of the City's recently adopted Master Plan for the community. It was followed by a statement of budget priorities adopted by the City Council, and ultimately by a biennial budget for FY15 and FY16. The budget also projected the City's finances for the following three years – FY17, FY18, and FY19. During this same period a Deficit Elimination Plan and Reserve Accumulation Plan was approved by the State and a Seven Point Transition Management Plan was enacted to guide the way by which the operation of the City will be assumed by the Mayor and City Council . The integration of the Strategic Plan into the organizational processes of the City is a key component of the Seven Point Transition Management Plan.

In total, these actions comprise a broad framework guiding the direction of the Flint City government as it restores financial stability and once again becomes an active leader focused on making Flint a safe, secure city attractive to residents, businesses, students, and visitors.

The first quarter of FY15 ended on September 30, 2014. We are pleased to report on the progress which has been made. While significant progress has been made on many fronts, significant challenges and risks remain.

We wish to commend the Management Team and our employees for their dedicated efforts to move the City forward. We look forward to discussing the contents of the report with you.

Overview

The City of Flint has a vision and a plan and now it is focused on implementation in order to achieve a stronger and financially sound municipal government along with a safer and more stable community To succeed, however, City leaders must follow the plan with discipline and commitment They cannot stop halfway or leave work half-done—and everyone has an important role to play Working together as a team, the City of Flint has been successful in the previous quarter in increasing public safety, improving infrastructure, creating jobs and development, eliminating blight, engaging citizens and managing financial and administrative challenges. Areas of success include

- Law enforcement is working hard with growing community support and total homicide victims is down 28% compared with 2013
- Utilities is managing with an eye toward the future and the construction of the KWA pipeline is underway, on time and within budget
- Development activities have increased with new facilities under construction at GM Flint Assembly, on the Buick City brownfield site with American Pipe, and downtown in the Health and Wellness District
- Blighted properties continue to be eliminated, using state and federal funds, and neighborhood volunteer groups have removed more than 2 million pounds of trash in major clean-up efforts
- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year
- Revenues and expenses for the first quarter of FY15 are in line with expectations
- Internal restructuring of the City continues at it strives to become efficient, effective, and customer service focused in an environment much smaller than in the past.
- The transition from state oversight to traditional home rule is underway, guided by the Seven Point Plan recently enacted If progress continues as anticipated, the next step in transition will occur in 2015

Challenges also continue. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred, however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures. A badly needed update to the City's web site is underway, progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks The retiree lawsuit, whose outcome can seriously affect the financial solvency of the City, remains unresolved. Work continues to get done under difficult circumstances with limited resources, however the new strategic planning process is improving the City of Flint's productivity, responsiveness and accountability.

Assuring Accountability to Adopted Plans and Budget

The Strategic Plan for FY15-FY19 and the Biennial Budget for FY15 and FY16 charts the course for the Flint City government as it emerges from near financial insolvency and establishes itself as a municipal government providing residents, businesses, students and visitors public services in a customer friendly and financially responsible manner. Near term steps for achieving this have further been defined by a set of priorities set by the Mayor and City Council as the biennial

budget was adopted Likewise, the Master Plan for a Sustainable Flint, adopted in October 2013 by the Flint City Council and the Flint Planning Commission, provides the framework for ongoing efforts to improve the community as a whole.

Achieving the outcomes desired will be a lengthy and ongoing process. Specific steps to move along this course have been outlined in a series of objectives to be accomplished over the next several years The purpose of the quarterly report is to hold the City of Flint government accountable to the highlight progress as well as to identify areas of weak performance The first quarter of FY15 ended on September 30, 2014, and progress has been assessed

Highlights

Increasing Public Safety

A primary goal of the City is to assure a safe, secure, and healthy environment in which to live, work and play. Well-functioning police, fire and emergency response systems are essential to achieving this. While challenged significantly with less than adequate resources, progress has been made to improve public safety, thanks in part to the assistance and collaboration of the State Police:

- Incidence of Part One crime is down 13%, including a 28% reduction in the number of homicides
- Response time for police and fire has been decreased
- The decision has been made that the City will rejoin the Genesee County 9-1-1 Consortium. Anticipated to occur by July 1, 2015, this action will result in enhanced service with access to updated technology and will provide some $1 million annually in reduced costs
- Internal reorganizations and process improvements have been made in the Police and Fire departments to accommodate the reduced staffing made necessary by the City's financial condition With the assistance of financial assistance from the state, the City is engaged in a comprehensive review of its police and fire structure to determine the most efficient and effective organization for the future.

Improving Infrastructure

A key goal of the City is to provide access to dependable and affordable water sewer, and waste. Another key goal is to assure an adequate and well maintained transportation network The financial challenges of the past several years has left the City with significant need for reinvestment in virtually all of its infrastructure. While the challenge is enormous, positive steps have been taken.

- The first draft of the City's first comprehensive Capital Improvement Plan has been completed and will shortly be shared with the public for its input
- The City has recently been notified that it will receive $750,000 in funding for roads, as contained in the new State budget. Planning for use of these funds is beginning, with the expectation that it will be used for badly needed road repairs in the spring.

- The construction of the KWA pipeline is underway, on time and within budget. The transition from DWSD to the Flint River for the City's temporary supply of water until KWA is complete has occurred, however, the work of producing treated water has been complicated by the system's aging infrastructure and varying temperatures
- Concerns regarding the cost of water to Flint residents and businesses remains a high concern. Investigation of sources of water loss – both from theft and pipe leakage is ongoing. Reports of theft have resulted in criminal investigations, which are significant and ongoing. Several criminal complaints have resulted from the investigation and more are anticipated. Comprehensive programs of water meter replacement and leak detection are being developed
- Construction will begin in October of a load out facility that will allow the city to shut down the incinerator and realize up to $400,000 a year in operational savings in the sewer fund
- Investments in the underground utilities infrastructure are being finalized, utilizing budgeted funds for pipe replacement, pipe lining, and installation of technologically advanced water meters
- Work is being planned to address the condition of city facilities. A contract has been signed to repair the employee and police parking lot and to replace the lighting with LED lights, while a process for evaluating potential energy savings at the Municipal complex is being finalized.

Creating Jobs and Development

One of the goals in the recently adopted Master Plan is to have a growing and diverse economy that spurs innovation and small business development along with an education system that prepares our workforce for jobs paying a livable wage. The Strategic Plan likewise commits the City to foster cooperation between businesses, higher education and medical institutions, nonprofit organizations and community groups to create jobs and development. It also identifies the need for the City to better define the role of the public sector in economic development and also to improve the business climate

A number of business and community development initiatives are underway across the city

- Development activities have increased as evidenced by revenues collected from building permits and rental inspections. These revenues are currently projected to exceed budgeted revenues by $300,000 by the end of the fiscal year
- Increased capacity for compliance with the City's Rental Registration Ordinance is being put into place. A contract for services has been executed, with inspections planned to begin before November 1
- A new Medical Marijuana ordinance has been enacted. Application forms and related materials are being developed.
- Aggressive pursuit of funding for specific projects promoting development has resulted in more than $4 million to the City, including some $2 million for the redevelopment of Chevy Commons, $1.6 million for reconstruction of Dupont Street. Other grants have been awarded for a revitalization plan the South Saginaw corridor, road diet and bike lanes for Harrison Street, and an analysis of housing for the downtown area.

- Smith Village Development - Of 39 new homes built, 21 have sold, there are six purchase agreements, and 12 are remaining to be sold.
- Gundry and Salem NSP1 Purchase-Rehab-Resale – 14 homes were rehabbed, there are seven purchase agreements, and one home has been sold. Six of the 12 deeds that are in litigation with a previous developer by order of the Court.
- 26 units of senior apartments were made available with the ribbon cutting of Oak Street Apartments, a repurposed closed school building. Renovation was kick started with City of Flint CDBG demolition funds.
- An assessment of the development capacity of Flint's network of Community Housing Development Organizations (CHDO) and Community Development Corporations (CDC) has been completed in partnership with Local Initiatives Support Corporation (LISC). A planning is now underway to determine how the network can support implementation of the city's Master Plan and Blight Elimination Framework.
- In partnership with the local community foundation, public library, community college, and non-profits, began a six month community planning process where over 200 volunteers and stakeholders will create a well-coordinated, integrated system for literacy service delivery that increases literacy levels through a well-managed coalition of organizations.
- The $2.3 Million Community Development Block Grant (CDBG) programming allocation has been implemented. This allocation supports $928,000 of blight elimination, $725,000 in housing rehabilitation and emergency repairs, $227,000 to increase literacy, $124,000 for victim advocacy and fair housing and $184,000 in youth initiatives.

Improving Parks

Encouraging partnerships for recreation and access to open space across the City is a key goal of the Strategic Plan. While City support of its park system has been minimal for the past several years, positive steps, and the creation of partnerships in particular, have been taken towards achieving this goal:

- All City parks are being mowed at least twice per month, and their progress monitored on a regular basis
- Partnerships have been formalized with the Crim Foundation for Basset Park; with Friends of Rollingwood for additional park improvements; with Genesee Conservation District for forestry services; and with Mott Community college for Kearsley Softball Field and the Longway Greenbelt.
- A partnership with Mott Park Association for golf course and clubhouse is being developed.
- Substantial progress on park improvements are occurring at Max Brandon, aided by $200,000 in grant funding.
- Grant funding has also aided improvements at McKinley, and fostered progress on the Grand Traverse Greenway.
- Other improvements are occurring at Thread Lake and Flint Park Lake through the Genesee County Parks Partnership.

- *The City is working in partnership with stakeholders at Whaley, Berston, Dewey,* Kearsley, Hasselbring and Brennan Parks to leverage additional funding and volunteer assistance to construct further improvements.
- The Senior Center leases have been completed for Hasselbring and Brennen, assuring that senior citizen programming will continue in the City

Eliminating Blight

Eliminating blight within the next five years is one of the objectives incorporated into the Master Plan, and is recognized by the City as being critical to creating and maintaining a vibrant and growing community To date

- *A draft Blight Elimination Framework has been developed and widely circulated for* public input, reaching approximately 400 residents who have committed to its implementation The City has committed to organizing its resources around this plan and has appropriated approximately $928,000 for blight elimination activities including the development of a code enforcement program, demolition, and coordination of extensive neighborhood clean ups
- Several hundred citizen volunteers, working with Cities of Service, Clean & Green, and many neighborhood associations, have spent countless hours on many projects, including removal of more than 2 million pounds of trash from blighted areas, boarding of 575 vacant properties, and mowing some 12,500 properties a total of 28,000 times
- Over $900,000 in CDBG allocations has been contracted to the Genesee County Land Bank for demolition of approximately 70 commercial and residential structures
- $2 6 million in Hardest Hit funds were recently allocated to the City in partnership with the Land Bank to demolish some 225 homes in Civic Park. This funding is in addition to the nearly $23 million of both Michigan Blight Elimination and Hardest Hit Grant Funding for demolition of approximately 2,000 debilitated homes The City has completed more than 1,500 Cut and Plugs in preparation for scheduled demolitions.
- An average of 240 Code Compliance issues are addressed monthly by the City's Blight Elimination Manager 80% of these are resolved without further code enforcement action
- The City has recruited 2 AmeriCorps VISTAs volunteers who will start in November and focus on implementation of the Blight Elimination Framework.

Engaging Citizens

An engaged citizenry is essential to creating and maintaining a vibrant growing community Citizen engagement in Flint increased significantly over the past few years as the City engaged them in the development of the Master Plan Master Plan implementation has continued to engage citizens, as have other activities fostered by the City:

- All Master Plan Implementation Task Groups have met twice, working on individual actions plans The City will also be working with 41 neighborhood groups who have

been trained on assessment work and will complete the neighborhood inventory for housing and street lighting by mid-November.

- The Police Department has engaged citizens in several ways, including increased participation by its command officers in community meetings, and by partnership and participation in APLACT (Advocates and Leaders for Police and Community Trust),
- The Department has also expanded use of Blue Badge volunteers in many areas, such as the newly established Citizens Radio Patrol
- The department also become an active user of social media, promoting Crime Stoppers and Operation Fresh Start, and creating a presence on Facebook and Twitter
- The Fire Department has also increased its presence in the community through its "Knock and Talk" initiative.
- Citizen engagement has also been enhanced with the placement of national service teams in the City of Flint, one from the National Civilian Community Corps and one from VISTA. More than 800 volunteers have been engaged with these teams on various projects, including removal of more than 2 million pounds of trash from blighted areas, emergency preparedness education for more than 900 residents, and participation in the national day of service on 9/11.

Managing Financial Challenges

Operating in a financially sustainable manner is essential if the City is to achieve its Mission of assuring that residents, businesses, students and visitors receive municipal services in a customer friendly and financially responsible manner. While the City continues to address an accumulated General Fund deficit, significant legacy costs, and a continuing structural deficit, progress continues to be made

- The General Fund deficit continues to be reduced, and the City's financial position is stabilized at least for the near term. Preliminary projections show the deficit as of June 30, 2014 to be $9 million, a reduction from $12.9 million the previous year. The City's cash position is adequate
- A plan to eliminate the General Fund deficit no later than FY19 and to accumulate an adequate level of financial reserves no later than FY24 has been approved by the State.
- Revenues and expenses for the first quarter of FY15, which ended September 30, are generally in line with expectations
- The City is vigorously pursuing external funding and resources to implement important projects in areas such as blight elimination, housing, and park improvements. More than $3 million has been received so far this year from federal agencies, state entities and community foundations, and additional applications are pending

However, the legal challenge to changes made to retiree health care as part of restoring financial solvency continues. The June 30 decision by the Federal Court to permit the City to modify health care for retirees should provide some financial relief to the City while the case is being litigated. Should the City not prevail, however, the $5 million additional cost added to the FY15 budget will be continued, and may result in Flint's return to financial solvency becoming exceedingly difficult if not impossible

Improving Internal Operations

Achieving the goals set forth in the Strategic Plan will require a city organization that is efficient and effective, and capable of operating in an environment of limited resources. Elected leaders, appointed officials, and employees must be highly trained and professional, and place high priority on excellent customer service. Its organizational structures and process must be efficient, modern, and focused on results. Much remains to be done, but progress is being made:

- The search for an experienced professional City Administrator is underway, and several charter amendments are being considered by the voters, which would further enhance the efficiency of the government.
- A badly needed update to the City's web site is underway; progress has been delayed from initial completion targets as the selected vendor was unable to perform necessary tasks.
- A comprehensive review of City Ordinances is underway, with revisions in business licensing and zoning ordinances nearly complete.
- The organizational structure of the City has been revised to assure that capacity exists to implement the Master Plan.
- Professional development opportunities have been defined and are being provided for city staff. Current focuses include supervision and use of technology.
- An in-depth evaluation of the structure of the police and fire departments is underway with the goal of identifying the most efficient and effective structure for the delivery of public safety services.
- Nearly all labor contracts and personnel policies have been revised to improved organizational efficiency while containing short and long term costs associated with employee compensation.
- Review of the City's capacity to provide capacity and leadership in economic development is underway, including the potential of collaborative efforts with other entities.
- Reorganization of current staff positions to enhance constituent services is underway
- Internal reorganizations and policy/procedure updates within the Police and Fire Departments have been enacted.
- The City's Emergency Management Plan has been updated.
- Reorganizations within the Utilities Division are being implemented to increase capacity to respond to maintenance and other needs.
- The Transportation Division has increased its capacity and lowered its costs to perform right-of-way maintenance activities by assigning casual skilled labor to work with street Maintenance crews.
- Agreement executed with Genesee County Conservation District to compile an inventory of street trees in order to develop a sustainable plan for the care and preservation of the urban street tree forestry.
- Improved processes for grant administration and compliance monitoring are being implemented
- Planning is leading an effort to fully utilize GIS capabilities to serve all departments.

- Asset management tools for Transportation and Utilities, such as GPS units, web reporting, and a new work order system, are scheduled for installation in the coming months
- A city wide program to recognize employees is being evaluated. Currently, recognition programs exist on a departmental basis, including the Police Department, and a new program is scheduled for introduction in Department of Public Works
- The Community and Economic Development Division continues to enact corrective actions, refine and adopt policies and procedures and provide technical assistance to sub-recipients for federal and state funded programs that reduce the potential repayment from historical HUD OIG monitoring findings and current Field Office and MSHDA monitoring, reducing exposure to General Fund for repayment.

Transitioning Back to Home Rule

The City has been under the jurisdiction of the State this time since November, 2011, as its financial condition placed it on the brink of insolvency Much progress has been made to address that, and the focus is now preparing for the transition back to Home Rule Progress to date includes

- A 7 Point Plan enacted by the Emergency Manager identifies specific objectives to be accomplished in order for the transition to proceed
- Target completion dates have been identified for many of the steps
- Specific objectives which have been accomplished include approval of a Deficit Elimination Plan, initiation of the search for a City Administrator, completion of a report by the Blue Ribbon Committee and the placement of 5 Charter Amendments plus the question of forming a Charter Review Commission on the November ballot.

Conclusion

Progress is being made in accordance with the expectations of the Strategic Plan and its specific objectives. Significant steps are being taken to improve its financial condition and to restructure the organization to improve efficiency and effectiveness Steps are also being taken to prepare the City for return to traditional Home Rule governance.

Not surprisingly, because this is a first quarter report, not all objectives have been completed, and some have yet to start In addition, many of the objectives require significant amounts of time and energy to achieve

The positive progress outlined in this report must be read in the context of the current overall condition of the City of Flint. The level of services currently provided by the City is marginal as it struggles to regain financial solvency. Flint continues to be challenged by population loss, relatively low per capita income, aging infrastructure, and an insufficient revenue stream to support a desired level of services. It still has a significant General Fund deficit to be addressed, along with significant legacy costs And it still faces the possibility of insolvency should the challenge to changes in retiree health care prevail.

GOVERNANCE AND ADMINISTRATION

VISION Statement

The City of Flint s Governance will adapt to change and be a model of professionalism transparency, and sustainability in order to provide effective government to each of our City s residents (as written in the Charter Preamble)

MISSION Statement

The Executive Management and Elected Leadership Directs and guides the City government in order operate in an open and financially responsible manner, including improving citizen access, focusing on measurable results, improving the City's financial position and eliminating accumulated deficits within the context of the City of Flint Master Plan

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
EMERGENCY MANAGER		Promote vision, set priorities, and measure results	Formally assess City readiness for Transition Advisory Board and progress towards achievement of Seven-Point Plan	I
MAYOR & COUNCIL			Participate with MML and others on an ongoing basis in advocating for state reforms in municipal financing Including PP T and EVIP	C

	Public Safety Planning		*Develop the City's first combined Capital Improvement Plan*	I
	GIS Services		Hold annual engagement to discuss progress of Master Plan and solicit additional feedback on action plan	N
	Infrastructure Planning		Establish short term (1-3 years) action plans for each chapter of the Master Plan	I
	Sustainability Planning		Develop between 10-15 neighborhood plans covering every residential area by 2020, at the rate of 20% per year	N
	Zone Changes		Develop a citywide sustainability plan	N
	Plan Amendments		Maintain on an ongoing basis updated demographic and housing data easily available to internal and external customers	I
			Develop a proposal for providing citywide Geographic Information Services to internal and external customers and implement plan	I
			Coordinate the implementation of at least 1 strategy in each chapter of the Master Plan every year, with progress measured annually	I
			Submit proposal to the EPA for a Brownfield Area wide Planning Grant or technical assistance grant to create a brownfield development for the area around the Chevy Commons	C
			Present blight elimination framework to the Planning Commission for adoption as part of the Master Plan Implementation	I
			Begin update of the Master Plan	N
			Complete a formal written blight elimination framework for neighborhoods	C
			Implement structure within P&D which has responsibility for developing a plan for improving street lighting within the City for managing the lighting special assessment and payment of bills	I

PLANNING AND DEVELOPMENT

(continued)

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
PARKS & OPEN SPACE	Parks Maintenance	Establish a new park management framework and secure resources necessary to maintain the City s parks and open spaces	Refine the City's parks classification system and develop service standards that align with the MDNR and the needs and desires of the Flint community	I
			Assure that all city parks are mowed at least twice per month based upon individual plan for land management, contractor performance to be reviewed on a quarterly basis	C
	Parks Planning	Improve the ecological health of the City s parks and open spaces through responsible planning and development	Complete a naturalization demonstration in Max Brandon Park and then 3 other parks	I
			Complete improvements to Riverbank Park and McKinley Park as specified in the MDNR grant	I
			Complete improvements to McKinley Park as specified in the MDNR grant	I
			Update the Parks and Recreation Master Plan with additional focus on park equity and enhancing recreational use of the Flint River and adjacent parks an open spaces	N
	Parks Partnership	Provide parks open space, and recreation infrastructure that both meets the needs of the community and is maintainable by the City and its community partners	Establish at least 3 "Adopt A Park" agreements every year; complete the establishment of the "Friends of Stanton" group	I
			Work with the County to establish a joint maintenance agreement for at least one of the City s larger parks	C
	Parks Programming	Engage the Flint Community to support the programming and use of park and recreation facilities	Develop a management plan for the City s 4 golf courses	I
			Develop the plan to adjust the CANUSA Games Housing and field of play locations	N
	Open Space		Submit at least one grant proposal each year for MDNR funding	C
	Trail Development		Complete construction of the Genesee Valley Trail	I

FINANCE AND ADMINISTRATION

VISION Statement

A robust division capable of meeting the external and internal needs of the City of Flint in the areas of finance treasury, assessments human resources information technology, and fleet

MISSION Statement

To manage the financial and administration division of the City of Flint through promoting fiscal responsibility and industry best practices in order to respond to the needs of the City of Flint with efficiency and timeliness

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
FINANCE				
ACCOUNTING	Payroll Production & Reporting	*Provides for a financially secure organization with sound* business practices providing for the purchase of goods and services and financial reporting Provides professional and technical advice to departments regarding financial and purchasing needs and on grant administration processes	Reduce the General Fund deficit by $1 8 million in FY15	C
			Reduce the General Fund deficit by $1 8 million in FY16	N
	Vendor Management and Payment		Convert to new fixed asset accounting and develop fixed asset policy	I
			Review rates and master fee schedule to ensure they are appropriately set	N
AUDITING	Monitoring Financial Performance		Implement Finance Department reorganization	I
	Preparation of Financial Reports		Audit completed and filed with state	I
BUDGETING	Monitoring Grant Performance		Schedule and conduct 4 city wide finance and accounting training sessions	I
	Accounting for Revenues and Expenses		Establish and implement internship program for Finance	I
RISK MANAGEMENT	Development of Long Term Financial Projections, Deficit Elimination Plans and Strategies for Financial Solvency		Establish a paperless process for procuring goods and services	I
			Prepare a RFP for copier services in FY15 in time to allow issuance of request before contract expires in FY16	N
PURCHASING	Administration of Property and Liability Insurances		Provide recommendations for updating procurement policies to be used during and after transition and to increase efficiencies	I
	Selection and Monitoring of Benefit Program vendors		Increase the usage of P-cards to boost the City's annual rebate by 15%, progress to be measured regularly	I
GRANT ADMIN			Establish management expectations of turn-around time on vendor payments purchasing requests, position filling requests, and other areas monitor performance beginning with FY15 first quarter results to be evaluated and monitored monthly	I
			Establish formal process for reviewing, processing, and making timely decisions for applications on tax abatements	I
			Adopt stabilization ordinance and fund balance policy	I
			Establish expectations of turn-around time on purchasing requests and monitor performance beginning with FY15 and evaluated quarterly	I
TREASURY				
CUSTOMER SERVICE		Provides for a customer friendly accountable entity managing receipts and collections Monitors collections of property taxes income taxes, water and sewer, and other receivables to assess budgetary compliance	Identify additional $500,000 00 to $1 000 000 00 in unreported income tax utilizing the 2011 State income tax data	N
			Increase the collection of delinquent taxes by 15-20% through continued efforts to collect delinquent income tax and personal property taxes and by new efforts to collect delinquent Miscellaneous Receivables and Water bills	N
			Reorganize Customer Service to assure that after that time, that all utility bills are mailed two weeks prior to the due date that checks are processed within 10 days from the postmark date, and that customer wait time in the office and on the phone are reduced by 25%	I
DELINQUENT COLLECTIONS			Replace the current vendor for processing electronic payments with Point and Pay in order to allow the City to accept water property tax, miscellaneous receivables, special assessment and permit payments electronically	C
			Install a kiosk in the City Hall lobby in order to allow the City to accept water property tax miscellaneous receivables, special assessment and permit payments electronically	I
			Create description of City s efforts to manage delinquent water accounts while obtaining the City's financial goals and assisting those who are facing financial hardships	N
			Implement electronic income tax withholding	I
			Update City efforts to assist those unable to pay for utilities	N
			Re-examine efforts to assist individuals to pay utility bills	N
			Establish and implement an ongoing schedule of Customer Service", "Team Work" and "How to deal with difficult customer" training for all Treasury staff	I

FINANCE AND ADMINISTRATION

DIVISIONS	FUNCTIONS	GOALS	KEY OBJECTIVES FY15 & FY16	STATUS
ASSESSING				
ASSESSORS OFFICE	Assessing of Properties	Assures the assessment of properties within the City in a professional and equitable manner in conformance with state law and professional practices, addresses appeals of values to Board of Review; represents City at state level appeals	Determine schedule of staff training in Assessing net as necessary and for annual compliance with state requirements during course of FY15, and annually thereafter	C
	Administration of Valuation Appeals		Conduct comprehensive site inspections of residential and commercial tracts between April and November of each year in sufficient number annually to canvas 12 tracts annually	I
	Processing of Poverty exemption requests		Secure contract to achieve the conversion of remaining hard copy records and drawings to digital format utilizing APEX and/or digital scanning, with financial plan submitted for FY16 budget	I
	Provision of property and tax information to businesses and residents		Provide for the timely process of MTT appeals, and split/combination applications 2012 and 2013 appeals will be completed by end of FY15 and appeals filed in 2014 will be resolved by end of FY16 The processing of splits and combination requests is required to be completed end of each year to be incorporated in the following year's assessment roll	I
			Working with Facilities finalize plan for relocating Assessing from its temporary site	I
	Maintenance of Property descriptions and tax rolls		Analyze options for lessening the workload impact of processing poverty exemption applications	C
			Participate with Planning and Development, IT and others to develop the ongoing process for establishing and maintaining of the parcel layer for City GIS, and for providing GIS services to internal and external customers.	C
HUMAN RESOURCES			Utilize a master position list for confirming the need to recruit, promote or reduce employees	C
EMPLOYMENT	Recruitment and Selection	Recruit and oversee hiring of qualified employees in compliance with laws and ordinances	Update personnel rules and procedures, including ordinances	I
	Testing		Update testing protocols for recruitment/selection	I
	Contract Negotiations	Recommend changes in personnel polices and labor contracts	Complete FPOA contract	C
			Implement FPOA contract	I
			Implement updated 1799 contract	I
			Implement updated IAFF contract	N
			Implement updated Capt/Lt contract	I
			Update Sergeants contract	I
	Employment law allegations		Inform department heads and supervisors of contract changes prior to implementation	C
LABOR RELATIONS	Grievances and Arbitrations	Train and assist departments in managing employees and resolving disputes	Answer 100% of all new grievances within required time frames measured with quarterly reports	I
	Benefit administration	Enroll employees in payroll and benefit systems,	Implement updated Exempt and Appointed benefit programs	I
ENROLLMENT	Payroll enrollment and changes		Develop and implement ongoing training curriculum and schedule in conjunction with Department Heads	C
	FMLA oversight	Assure that city FMLA and worker safety policies and practices are in accord with law and properly administered	Implement new FMLA process	I
	Worker's Compensation Administration		Implement new EAP program	C
	MIOSHA/OSHA Administration		Redesign Occupational Health and Safety Program for the City	N
WORKERS SAFETY	Employee Clinic		Administrative policies/procedures to be updated	I

City of Flint 5-Year Financial Plan

Preface

This adopted budget for the City of Flint covers the FY15 and FY16 fiscal years which begin July 1, 2014 and July 1, 2015 respectively. Financial projections for the following 3 fiscal years are included as well.

This budget has been developed within the context of the City's recently adopted Master Plan, the Vision, Mission, and Goals for the City government as adopted by the City Council, and the Budget Priorities as adopted by the City Council. Accompanying this budget is a preliminary statement of objectives initially proposed to be accomplished during the two years.

Taken together, the budget and strategic plan will serve as a template to move the City government forward to become a well-managed, financially stable, and accountable organization focused on creating a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

However, this budget demonstrates the continuing financial challenges facing the City of Flint. Stagnant revenue growth in property tax and income tax revenues, coupled with significant increases in legacy costs, retiree health care in particular, create a significant gap between revenues and expenses which require increases in other revenues and decreases in City staffing and services including the possibility of adjustments in public safety services.

Unfortunately, the financial forecast for the next several years beyond FY16 show a continuing gap between projected revenues and expenses. Within the next few years, without significant means to identify and collect additional revenues, or to further reduce the cost base, the City of Flint will be extremely challenged to provide even the most basic of City services.

Over the last several weeks, this adopted budget has been reviewed by the City Council, which will also held a public hearing to receive citizen input. The Mayor and Council subsequently provided comments and recommendations pertaining to the budget to the Emergency Manager.

Background

The City of Flint has been in state receivership since December, 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, unrealistic budgeting, and unfunded liabilities for postemployment benefits. Significant progress has been made in addressing these financial issues, as the $19.1 million deficit at the end of FY12 had been reduced to $12.9 million at the end of FY13, cash position had improved, and the FY14 budget was realistically balanced, with further reduction of the deficit anticipated.

The FY14 budget was designed and implemented with the same goals in mind – operating within the constraints of available revenues; restructuring operations and cost factors to enhance future financial stability, and continuing to reduce the remaining $12.9 million deficit. The FY14 budget was constructed with the specific intent of further reducing the deficit by a minimum of $1 million, by budgeting expenses at $1 million less than projected revenues. As of January 31, 2014, seven months into the FY14 year, revenues and expenses are on target.

In order to regain and maintain financial solvency, it is not only necessary to eliminate the remaining accumulated deficit but to have an adequate amount of reserves to protect the City in the event of unexpected financial losses. Planning to accomplish this requires a continual dedication of revenues over the next several years to eliminate the remaining deficit and establish an adequate reserve level. A draft deficit elimination plan to accomplish this is currently under review by the Michigan Department of Treasury.

Making progress to date has required hard decisions and sacrifices for all. The FY13 and FY14 budgets were balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Revenue increase included a 25 percent increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, establishment of a special assessment district for street lighting, and implementation of a fee sufficient to cover the cost of waste collection. Expenditure reductions included elimination of 20 percent of the City's workforce, compensation decreases equivalent to a 20 percent wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

The actions taken to-date to restructure healthcare benefits for current employees and retirees have also had a significant impact on reducing both current costs and long-term liabilities. The 20% reduction in the workforce required significant reorganizational activities focused on reducing current costs. Long term liabilities were reduced by eliminating traditional defined benefit pension programs for new employees in favor of hybrid plans; by moving the City's retirement system into the a state wide retirement system; by restructuring health insurance benefits for current employees and placing retirees into those same plans; and by eliminating the promise of retiree health care for new employees in favor of providing retiree medical savings accounts. Much of the positive financial result in FY13 came from these actions. The restructuring, which was implemented during the course of FY12, reduced the City's OPEB liabilities *alone from nearly $900 million to less than $325 million as noted in the FY13 audit.*

The efforts of the City to regain financial solvency have been aided by support from numerous Federal, State and private partners. State police troopers have been placed in the City to support local law enforcement efforts, and funds have been allocated to enhance prosecution activities and to operate the City's lock up. The Governor's proposed budget continues this support.

The steps taken to begin to restore the City to financial solvency have not been without conflict and changing circumstances. A significant legal challenge has been made to the decision to move retirees from their historical health insurance plans into the same plans offered current employees. This action resulted in an initial cost reduction in FY13 of $3.5 million to the City and imposed deductibles and co-pays on retirees. This challenge is currently pending in federal court. If the challenge is ultimately upheld, it will pose a significant challenge to the City in its efforts to regain and maintain financial and service solvency. Due to the stay imposed by the federal court, the City must increase its budget for retiree healthcare costs in the FY15 budget by $5 million and may even need to pay more as retirees seek reimbursement for past medical expenses. These healthcare expenses will continue to increase in subsequent years.

Legacy costs in total will continue to be a cost burden to the City of Flint. In FY 14, the City budgeted $30.2 million for its retiree healthcare and pension costs, an amount equal to 17% of its total revenues. The General Fund alone budgeted $16.4 million, an amount equal to 31% of its total revenues. By FY19, it is projected that the City will need to budget over $43 million, an amount equal to 23% of its total revenues. For the General Fund alone, the amount projected to be needed will exceed $21 million, an amount equal to 34% of General Fund revenues.

The future financial solvency of Flint will also be challenged by a continuing structural deficit. As part of the planning for future financial solvency, five year projections and a strategic plan were developed. This exercise indicated a significant financial challenge forthcoming in FY15, due to the current status of the retiree health care lawsuit and the ending of a major grant supporting firefighting resources. Future year projections also show a continuing gap between revenues and projections.

Finally, the most important challenge to be addressed in the City of Flint will be instituting structural changes in the organization of the City to foster financial solvency as a core value and to assure that future governance and management of the City is conducted in a financially responsible manner. To this end, the current Emergency Manager has created a Blue Ribbon Committee on Governance, charged with developing recommended changes to current ordinances, procedures, and the Charter. The recommendations of the Task Force are anticipated within six months.

Overview

The City of Flint has spent considerable time planning for the community's future through the comprehensive master plan and creating an organizational framework focused on the City's new vision, mission, and goals. The 2-Year budget has been developed in a balanced manner to best meet the needs of a variety of service areas and challenges.

However, challenges to changes in retiree healthcare and the loss of grant funds have required that a new service baseline be established; this also poses significant and immediate challenges to the City's financial viability. Current court rulings in regards to the retiree health care lawsuit have increased retiree health care expenses nearly $5 million in FY15, and the loss of the SAFER grant ($ 3.4 million) eliminates funding for 39 of the City's 65 firefighters.

The harsh winter increased the need to remove hundreds (if not thousands) of damaged and fallen trees throughout the city, and to repair damaged roads and sidewalks. The winter also placed additional stress on the antiquated city facilities as they faced water leaks and damage to walkways and sidewalks. Implementing the master plan, and continuing to eliminate blight will also require dedicated resources going forward.

The recently completed study of the water and sewer system finances also demonstrated a shortfall in revenues needed to operate this critical service and provide for necessary maintenance. As much as the high rates for providing water and sewer services pose significant financial challenges and community implications, the alternative of not addressing basic maintenance and adjustments based on guidance in the master plan is equally challenging.

These factors have a significant effect on the adopted staffing levels. Reductions in city staffing over the past two years have come almost exclusively from City services other than police, fire, and 911. As a result, those remaining city services are thinly staffed, and despite valiant efforts of dedicated employees, service levels have been reduced. In some cases, the reductions have been severe and counter-productive. For example, reductions in customer service at Treasury and staffing at Utilities has reduced capacity to effectively pursue collection of delinquent bills. Reductions in Information Technology have slowed the implementation of technology which can improve effective processing. Reductions in Human Resources have slowed the process of hiring employees. Reductions in Building Safety have slowed the process of conducting inspections and issuing permits, and have eliminated much in the way of code compliance efforts.

Therefore, balancing the budget in a financially sustainable way requires addressing the impact of these issues. It also requires that they are addressed within the context of the Mayor's and Council's stated budget priorities. The Council's stated priorities are:

- Maintaining police and fire staffing levels at the maximum level feasible
- Reducing the General Fund deficit by at least $1 million
- Continuing efforts to reduce blight, including demolition
- Hiring an experienced City Administrator
- Assure that capacity exists to implement the Master Plan
- Add capacity in the areas of Economic Development

- Fund years 1 & 2 of capital improvements identified in the Master Plan
- Improve street maintenance
- Establish parks partnerships
- Improve customer service through training and technology
- Increase removal of dead and diseased trees
- Evaluate ways to reduce water and sewer rates for constituents in the budget process

Balancing the budget responsibly in the context of these immediate and significant financial challenges, while addressing stated priorities, is a significantly difficult task. The unplanned addition of $5 million in expenses for increased retiree health care is a "Game-Changer" and seriously undermines the ability of the City government to move forward in becoming a positive force helping to create a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve quality of life.

As the development of the FY15 budget began, there was a significant gap between projected General Fund revenues and General Fund expenses alone. While some revenue sources indicated a slight increase over the current year, projected expenses were significantly above the current year. The expense increases are due primarily to a nearly $5 million increase in costs for retiree health care and an increase in the per person cost of pension contribution. In addition, there was recognition of the need to assure capacity to implement the Master Plan to continue addressing blight, to address increased costs of health care for current employees, and to address critically needed facility maintenance.

The budget presented here is balanced in a financially responsible manner, in that revenues and expenses meet. However, the consequence is that, where possible, revenues have been increased, and where necessary, expenses have been decreased. Whether the result is an acceptable result, in the context of the needs and the future of the City, is uncertain.

It is clear that proposed changes in service levels reflected in this budget are significant, and that at the same time the financial plan is being finalized within the confines of available revenues, considerable efforts will continue to mitigate the impacts. Continued efforts to achieve a satisfactory resolution of the retiree healthcare lawsuit, as well as to continue searching for additional sustainable funding, or to engage in mutually beneficial partnerships will continue. The changes necessary to achieve necessary balancing of revenues and expenses will be done in a managed way, not in a crisis response.

The financial projection for the years following FY15 and FY16 show the continuing challenge of a structural deficit. Without a means to identify a new significant revenue source or to sustain and even make further reductions in the City's cost base, such as retiree health care, Flint will be extremely challenged to provide even the most basic of City services in future years.

Highlights of the Adopted Budget

Costs to taxpayers are increased....

- Property tax levies remain unchanged
- Street lighting assessment increased to $71 in FY15 and $74 in FY16
- *Solid Waste fee increased to $163 in FY15 and $169 in FY16*
- Water and Sewer rates increased by a total of 6.5% in FY15 and 6% in FY16

Costs to City employees are increased....

- *20% premium share for health insurance implemented*
- Premium contribution for non-Medicare eligible employees retiring after July 1, 2014 *established*
- 50% premium share for dental and vision insurance implemented
- Vacation and sick leave replaced with PTO, new accumulation caps established
- *All new employees enrolled in hybrid pension plan*
- All new employees enrolled in RMSA in lieu of promise of retiree health care

Legacy costs are increased significantly...

- *General Fund costs for retiree health care are increased 25%, from $8 million to $10 million in FY15, increasing on an annual basis thereafter*
- *General Fund costs for retiree health care and pension in total are projected to increase from $16.4 million (31% of total revenues) in FY14 to $21.5 million (34% of total revenues) by FY19*
- For all funds, total costs for retiree healthcare and pension are projected to increase from $30.4 million (or 17% of total revenues)in FY14 to $43.5 million (23% of total revenues) by FY19

City staffing is budgeted at 522 in FY15 and 523 in FY16.....

- Staffing is maintained in District Court, 911, Finance, Assessing, Transportation, IT, and Fleet
- Police Department – Total department staffing will be 115, with 7 vacant positions and 29 additional positions eliminated through attrition by end of FY15. Additionally, a recently offered COPS Hiring grant for six School Resource Officers will not be accepted. The next several months will be focused on mitigating the impact of this through reorganization with the assistance of consultants specialized in police and fire service; seeking additional funds; and obtaining assistance from law enforcement partners in order to achieve the best possible level of police response.
- Fire Department – Total department will be 75, with 19 positions eliminated as the SAFER grant expires. *There are several vacant positions to be eliminated as part of this, with a goal of* needed reduction no later than December, 2014. The next several months will be focused on mitigating the impact of this through reorganization and restructuring obtained with the assistance of consultants specialized in fire and police service.

- Planning and Development Department - Staffing is at 25, with adding 1 position. The department is being reorganized to assure capacity to implement the newly adopted Master Plan and continue efforts of blight management. Continued assistance in the form of grants and partnerships will be utilized, and general fund support for those activities is increased.
- Public Works Department - 6 positions are added to the Utilities division as the Water Treatment Plant begins operation as the primary source for Flint water; 1 position is added to Facilities to address critically needed maintenance issues.
- Finance and Administration Department - 3 positions are added to the Treasurer's Office to increase delinquent collections, with the added cost to be offset by additional revenues.
- Governance – As efforts to resolve the financial emergency progress, the position of City Administrator will be filled. Additionally, the salaries of Mayor and Council are partially restored as their role in governance increases.

Council budget priorities are addressed as follows:

- Maintaining police and fire staffing levels at the maximum level feasible – Due to revenue shortfall, increased retiree health care, and lack of other options, staffing is reduced. The Police and Fire millage funds will be used to fund 20 fire fighters and 26 police officers through FY15 and FY16. However, the accumulated millage funds will be fully used by the end of FY16.
- Reducing the General Fund deficit by at least $1 million – General Fund expenses are budgeted at $1 million less than revenues, and $800,000 in Capital Improvement Funds will be appropriated to the Utilities, thus reducing the General Funds debt to the Utility Fund by an additional $800,000. The plan is to continue this commitment for the next several years until the deficit is eliminated, and then the commitment will become one of building a financial reserve equal to 15% of General Fund revenues.
- Continuing efforts to reduce blight, including demolition – CDBG funds continue to be used for demolition and General Fund is assuming partial cost of the Blight Coordinator position
- Hiring an experienced City Administrator – Funds are included in budget.
- Assure that capacity exists to implement the Master Plan – General Fund is assuming partial cost of the Planning and Development Director, and Associate Planner, and a position of GIS technician is created, whose funding is shared among various city funds. Lead partners will be identified in each work area. Also, the Mayor has committed to overseeing the process of assuring that Master Plan implementation is an ongoing important part of city operations.
- Add capacity in the areas of Economic Development-The P&D Director is committed to defining a program for small business development, to be funded in FY16 through CDBG funds. Additionally, 20% of staff time of two DCED staffers and a portion of the Director's time will be devoted to economic development. Also, the Mayor has committed to leading the City's economic development efforts with partners and the assistance of this City staff.
- Fund years 1 & 2 of capital improvements identified in the Master Plan – the CIP portion of the Master Plan will be finalized in FY15, and the results will be considered for inclusion in the FY16 budget.

- Improve street maintenance – Due to minimal increases in state funding for streets, maintenance efforts will continue at the current levels. State financial support has been sought and obtained for some major street projects, in particular those related to economic development projects.

- Establish parks partnerships – The Planning and Development Department now has oversight of Parks, and as one of its strategic objectives, has committed to increase the number of parks partnerships in FY15 and FY16. Funding even the most basic of parks maintenance activities is increasingly challenging within the constraints of the parks millage funds. The goal is to eliminate General Fund support of these activities by the end of FY16.

- Improve customer service through training and technology– Human Resources, as it did in FY14, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. IT likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees. For example, the Treasury's customer service division is committed to specific customer service training for its front line employees.

- Increase removal of dead and diseased trees – Oversight of removal of trees within street right of ways is now the responsibility of the Transportation Division of Public Works, removal of trees within Parks is now the responsibility of Planning and Development; and removal of trees on other city properties is the responsibility of the Facilities Division of Public Works. Unfortunately, there is only a limited amount of funds available for these purposes, and the general effort will be focused on emergency responses. However, the Transportation Division is committed to attempting to secure assistance from other entities to increase capacity to address this problem.

- Evaluate ways to reduce water and sewer rates for constituents in the budget process-The results of the recent rate study confirm that it unlikely that water and sewer rates can be decreased at any time in the foreseeable future, and in fact, rates need to be increased. However, the actions taken to date to join KWA and to temporarily use the Flint River show that future rate increases will be less than had the City stayed with its prior provider.

Absent new sources of funding or reduced expenses in areas such as retiree healthcare, the commitments to progress and the staffing and service levels here are anticipated to continue for both FY15 and FY16. It is anticipated that the slight additional revenues in the General Fund for FY 16 will not be sufficient to cover increased costs, and it will be necessary to utilize additional funding from the police and fire millage to cover the costs of some police or fire positions in the General Fund in FY15. Depending on the rate of attrition in the Police Department, there should be sufficient remaining funds in the Police and Fire millage to avoid additional reductions in police or fire positions in FY16.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

June 3, 2014

Mr. Scott Kincaid President
Members of the Flint City Council
1101 S. Saginaw St.
Flint, MI 48502

Dear Mr. Kincaid and Members of the Flint City Council:

Transmitted herewith are the final numbers for the biennial budget beginning FY14-15 and ending FY 15-16

This budget is reflective of some of the recommended revisions offered following the Council's departmental budget hearings. All recommendations put forth by City Council were reviewed and thoroughly vetted at Treasury The attached budget document was revised upwards by $90,000 and includes the details of the incorporated revisions.

The budget was revised to include your recommendations, along with those of the Mayor, which I felt could be implemented without adversely impacting the organizational structure, management, and the anticipated transition of the City of Flint to a Receivership Transition Advisory Board during the course of this spending plan.

Following the public hearing and consideration of the comments received, it is my intent to execute the order adopting the budget at the next Council meeting scheduled for June 23, 2014. At that time, Council will be able to officially receive the two-year budget consistent with PA 436 and the 7 Point Transition Management Plan.

You should also be aware that effective July 1, 2014, the day-to-day operations of the departments of Planning and Development, and Public Works will be shifted to Mayor Dayne Walling. The Mayor is currently putting together a plan for the allocation of resources within those departments. Similarly, Police Chief Tolbert and Fire Chief Cox are also putting together their work plans to utilize the final resource allocations for public safety.

The assistance and cooperation from you and the Council given to me, the Mayor, and the Administration in this process is greatly appreciated. I think we can agree that this is a responsible and realistic snapshot of the City's financial stability over the next two years, given its myriad financial challenges.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

CC: Dayne Walling, Mayor
Inez Brown, City Clerk
Administration

Proposed Changes to the City of Flint Proposed FY15 & FY16 Budget

On April 30, 2014, Emergency Manager Darnell Earley transmitted a proposed bi-annual budget to the Mayor and City Council, with a request that the Mayor and Council review and comment on the proposed budget. Accordingly, the City Council, acting as Committee of the Whole chaired by Finance Chair Josh Freeman, met five times to review the budget. At the conclusion, a set of recommendations was adopted and given to the Emergency Manager.

This document summarizes the key recommendations of the Council and Mayor and outlines changes made to the proposed budget as a result.

Summary of Council and Mayor Recommended Changes to FY15 & FY16 Proposed Budget

1. The recommendation of the Council identifies $1,824,510 in additional funds to be used by the Police Department:

- Specifically, $1 million of the $2.5 million in state appropriated revenues for the Lock-Up is proposed to be moved to the Police Budget.
- In addition, $1 million is identified by increasing the allocation in the CIP Fund for the purpose of reducing the deficit, thus freeing up the $1 million in the General Fund which has been identified for deficit reduction. Of that $1 million, $763,000) ($628,000 + $135,000) would be moved to the Police budget. Additionally, $61,510 is identified to be moved from the Finance Budget to the Police Budget.

2. The remaining funds from the proposed re-appropriation of the freed-up General Fund revenues ($237,000) would be used for the following:

- $50,000 - District Court
- $72,000 - City Clerk
- $50,000 - City Council Staff
- $45,000 – Additional Pay Raises for Council
- $10,000 – Brennen Center
- $10,000 – Hasselbring

3. Finally, there is a recommendation to eliminate funding for the Human Relations Commission ($22,547) and split those funds equally between Brennen Center and Hasselbring:

- Brennen - $11,274
- Hasselbring - $11,274

4. The Mayor has also made recommendations in other areas, including:

- Adding capacity to Economic Development by replacing the 20% of 2 DCED staff currently subsidized by the GF with CDBG funds and directing that staff to perform 100%

CDGB activities. The freed-up funds ($51,458) would then be used to contract for economic development services.

- Reduce DCED program staff by 1 FTE and utilize CDBG administrative funds for 50% of administrative staff support in Planning and Development
- Add 1 new FTE in Planning and Development dedicated to the new Business Licensing function
- Add to the Strategic Plan a key objective under Governance and Administration: "Respond to a minimum of 500 constituent services per month, including those formerly addressed by the Human Relations Commission staff."

Changes to the Proposed FY15 & FY16 Recommended Budget in response to Council and Mayor recommended changes

The changes proposed by the Mayor and Council have been reviewed, and changes made as considered appropriate within the context of maintaining a viable financial plan for the next two years. The proposed budget, as submitted to the Mayor and Council on April 30, 2014, will be revised as follows in response:

1. The Proposed Budget anticipates a reduction in public safety staffing of 36 officers and 19 firefighters. However, it also does not anticipate these reductions (other than vacancies occurring through attrition) until the comprehensive study of the police and fire departments is concluded. That study is to be completed prior to the end of 2014. At that time, depending on the study recommendations, a decision will be made as to the need for additional resources, and to the extent that funds in the General Fund which are currently targeted for deficit reduction can be used. Although the State will not agree to utilize funds appropriated for the operation of the Lock-Up to fund Flint police officers and firefighters, the Mayor and Emergency Manager will continue their efforts to obtain other state funding to support police and fire operations in Flint during this critical time.
2. The concern of the City Clerk, and supported by both the Council and the Mayor, of her inability to properly conduct the upcoming elections with the proposed staffing reduction, is acknowledged. Accordingly, the proposed budget is revised to continue FY14 budget level of staffing within the Clerk's Office. The business license position, originally moved to the Planning and Zoning Department in the FY15 and FY16 Proposed Budget, has been restored back to City Clerk's department. The new Business Licensing process is scheduled to be implemented by January 1, 2015; at which time, the responsibility for the process will be assumed by the Department of Planning and Development. Since the Clerk's Office staff will remain the same while reducing the responsibilities of the Clerks' Office, there should be adequate staff to conduct the elections and to provide additional support to the Council Office. Until such time as the

Business Licensing process is assumed by the Department of Planning and Development, the Clerk is authorized to increase the hours of the current part-time employee in the Council Office. $15,000 in temporary wages is added to the Council's budget for FY15.

3. The concern of the Council and the Mayor that financial support be continued to assist in the transition of the senior citizen programming at the Brennen Center and Hasselbring is acknowledged. The end goal is for there to be successful senior citizen programming at these locations, supported in their entirety by the County's senior citizen millage, which has been approved by voters within the City of Flint as well as the rest of Genesee County. Instead of adding additional funding to the FY15 and FY16 budgets, however, an amendment to the FY14 budget is being prepared to make a one-time appropriation to each center in the amount of $20,000, for a total expenditure of $40,000. The purpose of this appropriation is to support this transition.
4. The concern of the Council to add additional resources to the District Court is noted. However, during the presentation by the Court at its budget hearing, it became apparent that the proposed strategy of the Court to utilize part time employees may not be consistent with the requirement that temporary employees working in excess of 29 hours per week must be provided access to health care to the extent that full time employees are. Thus, additional funds in the amount of $40,000 is added to the Court's budget to address this potential problem.
5. The recommendation of the Mayor to add additional capacity to economic development as stated in #4 above is acknowledged. Additional resources for economic development was also a stated priority of the Council. The change recommended by the Mayor provides $50,000 in financial capacity, is revenue neutral, and is incorporated into the budget.
6. The recommendation of the Mayor with respect to reducing DCED staff by 1 FTE and redistributing the funds as noted above are also incorporated into the budget.
7. The recommendation of the Mayor to add one new FTE in Planning and Development dedicated to the new Business Licensing function is also acknowledged as being valuable in helping to assure that the new process is implemented aggressively and successfully. Accordingly, $64,000 for wages and fringes is added to the budget of Planning and Development for that purpose.
8. Finally, the recommendation of the Mayor to add an additional objective to the Governance and Administration section of the Strategic Plan is acknowledged and will be incorporated. Accordingly, while the Human Relations Commission may continue as a volunteer board, the proposed allocation is eliminated. As it has become apparent that the Human Resources Director is fully engaged with managing the Human Resources function, the portion of the Director's salary allocated to the HRC budget will be transferred to the Human Resources Budget.

Implementing the changes noted above require identifying $119,000 in FY15 General Fund appropriations and $104,000 in FY16 appropriations. The revenue and expense projections in the budget have been reviewed, and the necessary funds have been identified from the following sources:

FY15:

- $39,000 - reduction in audit costs
- $ 2,600 – net reduction in HRC budget
- $38,400 - additional projected revenue - income tax revenue
- $39,000 – additional projected revenue – delinquent income tax collections

FY16:

- $31,000 - reduction in audit costs
- $ 2,678 – net reduction in HRC budget
- $32,000 - additional projected revenue - income tax revenue
- $38,322 - additional projected revenue - delinquent income tax collections

Appreciation is extended to the Mayor, Council, and staff for the time and effort spent reviewing the proposed budget. The citizens of Flint will be better served by the changes made.

Proposed Budget FY15 and FY16 Technical Adjustments

1. Included the pension expense in the Office of the Clerk - $29,519

2. Removed wages and fringes for GIS Technician from Assessing Department because it was already budgeted in the Planning and Zoning Department - $60,518

3. Corrected the inclusion of all salaries, wages, and fringes in the Planning and Zoning department for all the approved positions - $123,596

4. Corrected Fund 202 FY15 and FY16 fund balance use. The indirect cost allocation was double reported in FY15. This was a $536,000 reduction in cost in FY15. In FY16, wages in administration was entered in error causing salaries to be overstated by $812,000. This correction was made.

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, and foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM MPA
Emergency Manager

October 8, 2014

Mr. R Kevin Clinton, State Treasurer
Michigan Department of Treasury
4th Floor Treasury Building
430 West Allegan Street
Lansing, MI 48922

Dear Mr Clinton:

Attached please find the three month report for the period July 8, 2014 through October 8, 2014 as required by Public Act 436, Section 17. This report is being submitted through you to Governor Rick Snyder.

The entire report will be posted on the City of Flint website www.cityofflint.com as soon as it is approved.

Respectfully submitted.

Darnell Earley, ICMA-CM MPA
Emergency Manager

cc:
Governor Rick Snyder
Randy Richardville, Senate Majority Leader
James Bolger, Speaker of the House of Representatives
James Ananich, State Senator
Woodrow Stanley, State Representative
Phil Phelps, State Representative
Inez Brown, Clerk of the City of Flint
Wayne Workman, Deputy Treasurer
Edward Koryzno, Bureau Director of Local Government Services
Randall Byrne, Office of Fiscal Responsibility

Public Act 436, Section 17: Three Month Report

October 8, 2014

Introduction

This Three Month Report of the status of the Financial and Operating Plan for the City of Flint is submitted to the Governor Rick Snyder, the Senate Majority Leader, the Speaker of the House of Representatives, and Clerk of the City of Flint through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 17 which requires this report beginning six months after the appointment of the Emergency Manager.

Included are the items detailed below from P.A. 436, Section 17:

(a) A description of each expenditure made, approved, or disapproved during the reporting period that has a cumulative value of $5000 or more and the source of the funds.

(b) A list of each contract that the emergency manager awarded or approved with a cumulative value of $5000 or more, the purpose of the contract, and the identity of the contractor.

(c) A description of each loan sought, approved, or disapproved during the reporting period that has a cumulative value of $5000 or more and the proposed use of the funds.

(d) A description of any new position created or any vacancy in a position filled by the appointing authority.

(e) A description of any position that has been eliminated or from which an employee has been laid off.

(f) A copy of the contract with the emergency manager as provided in section 9(3)(e).

(g) The salary and benefits of the emergency manager.

(h) The financial and operating plan as required under section 11. Update #7 to the Financial and Operating Plan for the City of Flint.

Section Separator

(a) A description of each expenditure made, approved, or disapproved during the reporting period that has a cumulative value of $5000 or more and the source of the funds.

CITY OF FLINT
Position Description

Class Title:	Planner II	Job Code Number:	30-C-205
Established:	May 10, 2011	Bargaining Unit:	1600

GENERAL STATEMENT OF DUTIES:
Planner II position plans, coordinates and reviews the work of City Planning initiatives. The position is responsible for a variety of City planning activities such as master plan implementation, neighborhood planning, environmental planning, zoning administration, and related type work. On occasion, the Planner II position may function as a project manager while performing work on large planning projects and exercising a high degree of decision-making authority. A Planner II will also be tasked with conducting public hearings and public meetings. The Planner II collects and analyzes data, evaluates existing conditions and trends, and conducts development review analyses and/or Plan monitoring activities. Additionally, prepares a variety of written materials including research reports, staff reports, environmental assessments, planning studies and evaluations, and public hearing items. Makes presentations to staff, Planning Commission, and/or citizens groups.

SUPERVISION RECEIVED:
Supervision Required: Planner II works under the guidance of Planner III and direct supervision of the Department Director.

Supervision Exercised: Management skills are required to provide oversight of contractors, Planner I, and planning interns.

ESSENTIAL DUTIES AND RESPONSIBILITIES:
1. Research, develop and guide the implementation of master plan strategies
2. Provide guidance and support regarding city planning issues and concerns.
3. Provide planning, information and analysis to other departments, outside agencies and the general public.
4. Ability to prepare neighborhood and small area plans in collaboration with city neighborhood planning efforts.
5. Deliver presentations to report recommendations and other findings.
6. Monitor and evaluate the progress and effectiveness of implementation programs.
7. Maintains the planning websites and social media outreach.
8. Ability to manage and report on division operating budget.
9. Leads multiple public planning groups through convening, facilitation, and organization.
10. Ability to manage multiple planning department interns simultaneously. Provides grant-writing assistance to City entities.

12. Leads the preparation and maintenance of programs and large planning projects for the department.
13. Performs professional planning work, data collection, assists in writing reports; completes project reviews.
14. Assists as needed in city committees.

MINIMUM ENTRANCE REQUIREMENTS:

A. Bachelor's Degree in Planning, Community Development, Urban Studies, Resource Development, Public Administration or a related field; Master's Degree is preferred; and at least:
B. At minimum (3) Years' professional planning experience in a planning office, private sector, or non-profit organization that primarily provides services to the public sector.
C. Knowledge of urban planning principles and practice.
D. Extensive understanding of the Imagine Flint master plan and Flint's 5-year strategic plan.
E. Knowledge of social, economic, and environmental issues facing Flint.
F. Ability to communicate effectively both orally and in writing.
G. Ability to interpret and follow complex oral and written directions.
H. Ability to lead and convene meetings among multiple stakeholders.
I. Ability to administer tasks and provide necessary follow-up.
J. Ability to read maps and other graphic materials.
K. Proficient in desktop computing, including Microsoft Office Suite.
L. Familiarity with Geographical Information Systems (GIS) mapping software is highly desirable.
M. Familiarity with graphic design software is highly desirable.
N. Working ability in website design.

NECESSARY SPECIAL REQUIREMENT:

1. Ability to travel to community meetings.
2. Ability to attend evening and weekend meetings and conferences.
3. Have a valid driver's license and ready access to a motor vehicle

PHYSICAL DEMANDS:

While performing the duties of this job, the employee is frequently required to sit, talk, hear, stand, walk, use hands to finger, handle or operate objects, tools or controls, reach with hands and arms. The employee is occasionally required to climb or balance, stoop, kneel, crouch or crawl, taste and smell. The employee must frequently lift and/or move up to 50 pounds and occasionally lift and/or move up to 100 pounds. Specific vision abilities required by this job include close vision, distance vision, color vision, peripheral vision, depth perception and the ability to adjust focus.
